Dear Mr. Editor:—Thinking that a few lines from this tropical part of Florida would interest some of your readers I will give some of my observations. I also send a photograph of some palms in front of a private house. The soil—or rather, the sand—is only from 8 to 12 inches deep underlaid with coral rock and it is a mystery to everybody how the plants can grow. Arriving in Miami, Nov. 5th, the first thing that strikes one is that all the gardens are planted with tropical material. On the porches are Bougainvilleas in full bloom, also *Solandra grandiflora*, a very striking flower, *Allamanda Williamsi*, plenty of the beautiful so-called “Mountain Rose” *Antigonon leptopus*, one plant of which reached to the second story of a house and then grew all over a tree covering it with one sheet of flowers—a sight never to be forgotten. The *Bignonia capreolata* is also largely planted and is always in bloom. Just now the *Bignonia venusta* is in bloom; it covers verandas and stone walls with a mass of flowers. All the gardens of the residential part of the city are planted with crotons, acalyphas, pandanus, both green and variegated—some specimens 10 feet high can be seen—magnificent plants of *Russelia juncea*, 10 ft. in diameter, in full bloom; Aloes, some in bloom; Chinese hibiscus in full bloom—all of which gives the city a flowery appearance. *Vinca alba* and *rosea* are also everywhere to be seen; it has gone outside and is acclimated.

The gardens have hedges mostly of the beautiful *Phyllanthus rosea picta*; this plant colors up beautifully down here. Acalyphas also make beautiful hedges. I saw one of the latter in the country around an orange grove and it was 8 ft. high, also a few hedges of *Aralia Guilfoylei*. *Aralia filicifolia* and *elegantissima* make beautiful single specimens. *Euphorbia Poinsettia* are largely planted and still in bloom. *Asparagus Sprengeri*

also does well amongst the flowering shrubs. The *Tecoma stans* with its golden yellow trumpet-like flowers is very attractive.

There are a good many flowering shrubs and trees that have been introduced here from the Bahamas and West Indies. In palms the cocoanut predominates because it is both useful and beautiful; almost every garden has its cocoanut. Next in number is the “Royal Palm” *Oreodoxa regia*, which is a noble palm, growing to a great height. Going up the Miami River I saw a single volunteer specimen fully 80 ft. high, standing out boldly like a sentinel guarding the Everglades. There are also some Phoenix and Washingtonias to be seen in the gardens.

The Royal Palm Hotel has about ten acres devoted to gardening. Here are large beds of crotons, 100 feet long and 75 feet wide and plants 4 or 5 ft. high. Here is a very large pandanus in fruit; it resembles a green pineapple. A splendid avenue of Washingtonias about 40 ft. high runs from one end of the place to the other. On each side underneath is a row of tropæolums and a walk between; on the edge is an oleander hedge coming into bloom now. This place has a great variety of trees and rare shrubs, Acalyphas—single specimens and hedges—hedges of the beautiful *phyllanthus* everywhere. The long flowerbeds consist of sweet alyssum, geraniums, petunias and tagetes. There are large rubber trees, amongst them a *Ficus nymphiifolia*. The *Eriodendron* or Ceiba tree, called “Silk Cotton,” was in full bloom; the flowers look like a scarlet magnolia; it blooms without leaves. There is a very large lath house filled with a collection of plants, mostly palms, for indoor decorating. This place is in charge of Mr. Andrews, a very courteous gentleman.

A trip to the U. S. Experimental Station is very inter-

esting. It is mostly devoted to the growing of fruits. Mr. Simmons is in charge and is tireless in showing visitors everything of interest. A long lath house here is devoted to the vanilla plant and had quite a nice crop on. Plenty of seedlings of Avocata pears for budding on other varieties are seen. Some of the budded ones have made a fine growth. Mr. Simmons has also done some crossing in the orange line. Everything is in good order. The most remarkable flowering tree around here is the Poinciana, a large flat-headed, fast growing tree which is covered all over with brilliant scarlet flowers in May.

British Horticulture

THE PREMIER HORTICULTURAL SOCIETY

An encouraging record of continued progress characterized the annual report presented at the recent annual meeting of the Royal Horticultural Society. It was announced that negotiations had been in progress for holding the International Exhibition of 1912 in the grounds of Chelsea Hospital, London, but nothing definite has yet been fixed. A proposal to hold a flower show under the auspices of the society at the Royal Agricultural Society's show at Liverpool this summer has fallen through. In the course of the discussion some criticism was passed on a proposal to spend £3,000 for the republication of Printzel's "Incones Botanicarum." It was suggested that the existing type-written copies might be brought up to date instead of the expense of printing the work being undertaken. Rev. W. Wilks, the Secretary, pointed out that the type-written copies were imperfect, and therefore, of little practical use. At present the matter stood in abeyance, owing to the indecision of the American Universities. The report and balance sheet, showing a satisfactory surplus on the year's working, were approved. Sir Trevor Lawrence, the president, at the close of the formal business handed to Mr. J. H. Goodacre and Mr. A. Mackellar Victoria Medals of Honor, and a Veitch medal to Mr. W. H. White, the recipients also receiving the hearty congratulations of Sir Trevor for the distinguished position they had attained in the horticultural world.

ITEMS OF INTEREST

The British Gardeners' Association has raised a protest against the appointment of a military man as Chief Officer of the Parks Department, under the London County Council.—A letter has lately appeared in the Press from Mr. Herbert Bell, suggesting the formation of a federation of horticultural societies. The matter is being discussed by the executives of these organizations.—The National Fruit Growers' Association held their annual meeting this week. In addition to the routine business there was an animated discussion on the question of protective tariffs in the interests of fruit growing. There was a diversity of opinion as to the advantages of the existing system of free imports, under which the country is inundated with foreign fruit and vegetables in times of plenty.—The Royal Horticultural Society has arranged for trials to take place at Wisley during the coming season of autumn fruiting strawberries, early out-door flowering chrysanthemums, rhododendrons, and other flowering plants.

The Blue Rose

Thanks to Messrs. Ellwanger & Barry, who have sent us the photograph, we are enabled to show our readers a picture of this extraordinary novelty Veilchenblau. The variety is of German origin. While not perfectly blue it is regarded as a forerunner of that long sought curiosity. The color, on first unfolding, is purplish pink, then amethyst, and finally steel blue. The yellow stamens make a sharp contrast to the petals. One characteristic is satisfactorily shown in the picture—that of floriferousness. The photograph from which the engraving was made was taken in Ellwanger & Barry's greenhouses, February, 1910.

Means for Extending the Flower Demand

How are the growers to find profitable markets to dispose of their constantly increasing production? This seems to be the burning question among many of the leading florists in the Eastern cities. It has at least become the interesting topic of discussion where it has recently been the privilege of the writer to come in contact with those prominently identified with floriculture. In nearly every instance where the subject was discussed the conclusion reached was that growers should restrict their production so that they may realize better prices. In only one case was it argued that the way is open to create a better demand for flowers if up-to-date business methods, which have been successfully tried out in other lines of industry were instilled into the florist trade, but this line of reasoning met with the contention that flor-

iculture is in a distinct class by itself and cannot be developed along lines which other businesses have adopted to find outlets for their ever increasing production. The existing conditions that confront the grower will, however, sooner or later require just some such methods as are being practiced by big manufacturers. The styles and fads must be created. Through some sort of campaign of education the public must be made interested in flowers so that they will be adopted for more general and frequent usages, than is the case now. It must be shown that the home can be made more cheerful when liberally surrounded with plant life and that no social event of any kind is complete without flowers and foliage. The styles must be revived to make it non-fashionable for the well-gowned woman to appear without the corsage bouquet, either in her street garb or in the ball room gown. The well-groomed man must wear his carnation with his business suit; the afternoon caller or matinee idol should not be regarded in proper form without his violet boutonniere; nor should he be considered in correct dress if his evening wear is not adorned with the rose. Such customs can again be brought into vogue if the florists will only get together and make the public "acquire the habit." Many in the trade will probably say that such a proposition is not feasible, which, on the other hand, if it is possible of accomplishment, (and there is no reason why it cannot be through a proper campaign) will undoubtedly mean an increased consumption in the cut flower market. It is only necessary to walk on Fifth Avenue, in New York City, on a fine afternoon, or watch the women enter the theatre, matinee or evening, to note how the fashion for the wearing of flowers has again been revived—but you will not observe the product in which you are interested. You will instead witness that the wearers are parading with artificial roses, violets, or orchids. The style for flowers is here again, but the way was left clear to the makers of imitation flowers, by the growers of real flowers, to work up a market for their ware. No one will deny that where the artificial is now so freely worn, there certainly must be a way of forcing preference for the natural, and this task should not be difficult if it is attempted through an organized system. To bring about this result, ridicule will readily arouse those who have adopted the artificial creation to the fact that the real and not the bogus should be part of the adornment of the well dressed. We are told that in a western city, recently, the flower dealers paraded a number of darkies, masquerading in the costumes of society and liberally covered with the made flowers, on the fashionabe thoroughfare during the hours society was on parade. - The effect is said to have been that the artificial fad was doomed in that locality. What the florist trade requires is that all its members from the growers to those of the humblest retailer become awake to the fact that business, in these days of great production, must be created and then developed. In every line of industry whether it is in the manufacturing, or coming from the soil, publicity and judicious advertising is accomplishing this in many directions where a few years ago any such attempted methods would have been regarded as foolhardy. The problem of the florist, to create ready and profitable markets for his productions, is a matter that can be solved. Concentrated energy skillfully directed, is the solution.

Dianthus barbatus

During the later part of last June when passing through one of our northern sea coast summer resorts I saw in a distance off the street a very bright display of flowers. The grounds rising, the bed had as background a low branching clump of native spruces. The contrast of the vivid colors against the dark evergreens behind was simply grand and I noticed even people in carriages stopped on the road for a few minutes to enjoy the pretty floral spectacle. Horticultural curiosity led me to trespassing and upon coming nearer I beheld an extraordinarily well grown bed of Sweet Williams dazzling in all shades from almost black to snowy white. Aside from reminiscences of the past with her old village and farm gardens abroad wandering through my mind, I wondered how it often happens that in the present mania for novelties we overlook plant species of sometimes even high ornamental merit, simply because in our imagination they appear out of fashion or otherwise too antiquated.

Dianthus barbatus is a biennial just as effective for garden planting today as it was a hundred years ago. In fact, I have of late noticed quite a number of decided improvements, both in form and shades, which make Sweet Williams still the more desirable. Seed offered by reliable firms in separate colors to a high percentage comes true. It is best not to sow it any later than in May. Seedlings should be pricked off in flats first and therein gain sufficient strength to be planted in the open ground about a foot apart. Sweet Williams need protection during winter. Around New York and further south coarse straw and spruce or pine boughs may be sufficient but, in the New England States a leafcovering is best. *Dianthus barbatus* is easily transplanted the following spring and may be used for ornamental garden planting without the least fear of loss. Single varieties are often obtainable in colors but are rarely absolutely true. Our illustration shows a small plot of the auricula eyed, with a few double white mongers in.

The Queen of Flowers will hold court next week in the very centre of refinement and modern luxury in the great Metropolis of America. The museum of lifeless things will be transformed into a garden, glowing and fragrant. The devotees of the Queen will flock from far and near to do her honor and she will speak eloquently to them in silent but no less eloquent voice—a language that only the rose lover understands. The assembling of the rose growers on this occasion will, we feel sure, mark a substantial advancement in the work and the strength of the American Rose Society. This organization, while opening its doors freely to the amateur, has at last secured itself in the affection and fealty of the profession—something without which no organization of its character, as things stand in this country, can substantially prosper. Good men are at the helm, and the American Rose Society, after a tempestuous beginning, is now sailing on under sunny skies and a favoring wind. HORTICULTURE extends sincere congratulations.

Flower market reports from various localities—always more or less erratic—have shown exceptional irregularity for some weeks past.

Even allowing for the fact that correspondents are likely to have their deductions colored in a greater or less degree according to their view point, whether as retail dealers or in more direct touch with the sentiment predominating in the wholesale market, yet the great divergence in conditions of supply and demand as indicated in trade reports would seem to suggest some serious undelying defect in the prevalent methods of handling flowers as a commercial commodity which, for the best interests of all concerned, should be studied out and a remedy of broad application sought. Some years ago it was quite customary to attribute the circulation of reports of a depressing character in some of the more active markets to possible speculative influence, but nobody with any clear knowledge of the situation as it stands today in these centres would think seriously of looking for the explanation in such a motive. Observant judges realize that there is something deeper and more vital back of the present emergency. But what is it?

It is worthy of notice in considering the conditions above mentioned that those flower markets which have succeeded in holding a regular shipping trade to outside districts run more evenly than do those that have come to depend mainly on local business; also that the number of the former is growing less each year and shipping trade limits are constantly contracting. It is a little singular that Bos-

ton, which has the record of having been the first flower shipping centre of any importance, still maintains quite a heavy business of that character throughout practically the entire year. Why this is so might be worth inquiring into, for nothing can be more healthy and stimulating to a local trade than a competing outside outlet. It would be equally worth while to ascertain, if possible, the causes which have operated and are still operating to deprive some other large distributing centres of the advantage formerly enjoyed through an out-of-town demand for their service. It is hardly creditable to a business of rapidly growing importance and magnitude that conditions approaching famine in the one case and ruinous overstock in the other should appear to exist simultaneously in markets but a few hours apart and in intermediate points, with a difference in wholesale values of staple goods of frequently fifty per cent. or even more. That the question "Why" has not been more frequently and seriously taken up by those most vitally concerned and the agitation carried to a conclusion is indeed one of the incomprehensible anomalies of the flower business. Can anyone point to another industry of equal importance so apathetic concerning broad tendencies which so vitally affect its welfare?

Politics and Horticulture in the Hub In the art or science of Horticulture, Boston has been traditionally progressive. The famous Faneuil garden of two centuries ago, occupied seven acres on the slope of Beacon Hill, covering

part of the site of the present State House under the gilded dome of which the laws of the State of Massachusetts are now enacted, the site of the present Court House in which the Courts of Suffolk County now administer justice, and extended down to the present Tremont Street, including also the site of one of Boston's busiest department stores. This garden was familiarly known as "Faneuil's Seven-Acre Eden" because of the wealth of its horticultural collections, which included over forty varieties of hot-house grapes and the finest assortment of fruits, vegetables and flowers that in those by-gone colonial days could be imported from Europe; at a time when, for the demands of luxury or the desire for delicacies for the sick, it was necessary for the well-to-do to produce such things for themselves, as the markets did not afford them as they do now.

Boston has been traditionally a horticultural city—the names of Peter Faneuil, Daniel Webster, General Dearborn, Marshall P. Wilder, Charles M. Hovey, John Galvin, H. H. Hunnewell and E. M. Wood are stars in the roll of honor of the art of gardening in the United States, and the silver cord runs on, for did not the Massachusetts Horticultural Society, during the present year, bestow the first award of the new White gold medal to Professor Charles Sprague Sargent, director

of the Arnold Arboretum, as the greatest living horticulturist in the United States? The far-sightedness and philanthropy of Benjamin Franklin made possible in Boston the finest system of parks in the world, second to which is that of Berlin and third that of Tokio in Japan. The love of the garden has similarly led Professor Sargent to devote his life and a large share of his fortune to giving Boston the finest collection of trees and shrubs in the world, and to send collectors to the most remote and heretofore unexplored parts of the globe to find and bring back new material. Then too, the recent munificent bequest of nearly six millions of dollars by George F. Parkman for the further improvement and maintenance of the Common, Public Garden and the Parks of Boston still further attest the spirit of aesthetic culture which seems perennial in the City of Massachusetts Bay. What possibilities! What may not be accomplished for Boston if the means and opportunities are wisely employed?

Under Boston's new charter, the officials in charge of these great interests must qualify before a Civil Service Commission appointed by the Governor of Massachusetts. The immediate appointments are made by the Mayor of the City. Therefore, Mayor Fitzgerald has in his disposal the stewardship of interests most vital to the present and future development and character of the city. We believe that he will appreciate the magnitude of this responsibility and that he will act advisedly in his appointments. It is a matter of regret that none of the members of the present board of Park Commissioners possess any knowledge of horticulture. Had they possessed such knowledge, it would not have been necessary for the Gardeners' and Florists' Club of Boston at its February meeting to pass a unanimous vote, protesting to these Park Commissioners against their removing the elm trees planted six years ago in two rows on Commonwealth Avenue and replanting them in four rows in a space only one hundred feet wide, against the publicly expressed opinions of such men as the late F. L. Olmsted, Professor C. S. Sargent, Samuel Parsons, C. C. Laney, Desmond Fitzgerald and other eminent authorities in landscape architecture and arboriculture. Let us hope that Mayor Fitzgerald will make his appointments in accordance with the spirit of the new charter—that the men appointed shall have special qualifications for their work, especially since he is now permitted to go even outside of the city to find them. The Park Commissioners of the City of Boston, upon whom such great responsibility rests, should include among their number men of comprehensive horticultural, arboricultural and structural landscape knowledge, as well as of general executive ability, and they may be found within the Hub.

In Mr. Thatcher's communication on Standard Lilacs in last week's issue, please read, "evolve new sorts" in place of "solve new sorts" in sixth line.

AMERICAN ROSE SOCIETY

Annual Convention and Exhibition in Conjunction with the Spring Exhibition of the Horticultural Society of New York to be Held in the American Museum of Natural History, March 16, 17, and 18, 1910

The Exhibition will be open on the evening of the first day from 7 to 10.
On Thursday and Friday from 9 A. M. to 5 P. M., and from 7 to 10 P. M.

AMERICAN MUSEUM OF NATURAL HISTORY

Officers of The American Rose Society.

President—August F. Poehlmann, Morton Grove, Ill.

Vice-President—Frank R. Pierson, Tarrytown, N. Y.

Treasurer—Harry O. May, Summit, N. J.

Secretary—Benjamin Hammond, Fish-kill-on-Hudson, N. Y.

Manager of Exhibition—Joseph A. Manda.

Executive Committee—Philip Breitmeyer, Detroit, Mich.; E. Gurney Hill, Richmond, Ind.; Peter Bisset, Washington, D. C.; A. Farenwald, Roslyn, Pa.; P. Welch, Boston, Mass.; Wm. F. Kasting, Buffalo, N. Y.

Programme of Proceedings.

The annual meeting of the American Rose Society will open at 7.30 P. M. sharp on Wednesday, March 16.

The transaction of business will be in the following order:

Calling to order. Address by President August F. Poehlmann. Reading minutes of previous session. Secretary's report. Treasurer's report. Report of committees. Selection of place for next year's meeting. Miscellaneous business. Election of officers. Appointment of committees. Adjournment, as business may require.

A question box will be opened at the secretary's desk.

Under the order of essays and discussions, addresses will be made as follows:

Paper by Mr. Adolph Farenwald, Roslyn, Pa., "Roses—the Brightest of Flowers."

Paper by Mr. S. B. Sibson, Portland, Ore., "North Pacific Coast Roses."

Second Regular Session.

Thursday afternoon at 2.30 P. M. sharp.

Address by Mr. James Wood, Mt. Kisco, N. Y., President of the Horticultural Society of New York, "The Ideals of Horticulture."

Prize Schedule.

All exhibits for competition must be in position by 3 O'CLOCK P. M. WEDNESDAY, MARCH 16TH, and cannot be REMOVED UNTIL SATURDAY, THE 19TH.

Plants and flowers for exhibition should be sent by express, prepaid, addressed: The American Rose Society, American Museum of Natural History, Columbus Avenue and 77th Street, New York City.

Medals.

Gold Medal for the best new rose not yet disseminated, whether of domestic or foreign origin. Exhibits to be judged by the official scale of the American Rose Society, and no gold medal to be awarded to any rose scoring less than 95 points.

Silver Medal is offered at the same time and under the same conditions for a novelty scoring not less than 85 points.

A certificate of merit is awarded to all novelties scoring 80 points, but neither medal nor certificate will be issued until the variety is named and 12 blooms shown.

It is further ordered that the complete scores of all the entries in the competition be filed with the secretary of the American Rose Society before the award of any medal is confirmed. No duplicate medal will be awarded. It is understood that though the award of the gold or silver medal or certificate may be made to the same variety from one exhibitor exhibited in different centers, only one medal will be delivered to the exhibitor.

The Executive Committee of the American Rose Society reserves to itself the

right of selection of the judges who shall pass upon the exhibits in the competition for these medals.

Division A—Pot Roses.

Class.

1. Best display of hardy roses in bloom. All types and classes of roses suitable for outdoor planting may be exhibited in this class. First prize, \$100, offered by Hon. Philip Breitmeyer, Detroit, Mich.
2. Collection of Teas and Hybrid Teas, in not less than 5-inch pots, 25 plants or more. First prize, \$25, offered by Mr. John N. May, Summit, N. J. Second prize, \$15.
3. Collection of Wichuriana Hybrids, 6-inch pots or over, not less than 25 plants. First prize, \$25, offered by The F. R. Pierson Co., Tarrytown, N. Y. Second prize, \$15.
4. Collection of Hybrid Perpetuals, 6-inch pots or over, not less than 25 plants. First prize, \$25, offered by Welch Bros., Boston, Mass. Second prize, \$15.
5. Six climbing roses, in not less than 7-inch pots. First prize, \$12. Second prize, \$8.
6. Six roses, not climbing, in not less than 7-inch pots. First prize, \$12. Second prize, \$8.
7. Twelve Baby Ramblers, any variety, in not less than 4-inch pots. First prize, \$6. Second prize, \$3.
8. Specimen in pot or tub, not a climber. First prize, \$5. Second prize, \$3.
9. Specimen Crimson Rambler in pot or tub. First prize, \$10. Second prize, \$5.
10. Specimen Lady Gay in pot or tub. First prize, \$10. Second prize, \$5.
11. Specimen Hawatha in pot or tub. First prize, \$10. Second prize, \$5.
12. Specimen Newport Fairy in pot or tub. First prize, \$10. Second prize, \$5.
13. Specimen Dorothy Perkins in pot or tub. First prize, \$10. Second prize, \$5.
14. Specimen Tausendschon in pot or tub. First prize, \$10. Second prize, \$5.
15. For the best collection of Hybrid Wichuriana novelties, not disseminated, five or more plants, in pots or tubs. Prize, \$25, offered by Messrs. Ellwanger & Barry, Rochester, N. Y. The best variety in this

AUGUST F. POEHLMANN
President American Rose Society.

collection may receive the Society's Silver Medal; second best a Bronze Medal, if considered worthy.

Division B.—Teas and Hybrid Teas.

Twenty-five Cut Blooms. Open to All.

Class.

107. For the best American Beauty (stems not less than four feet or more than six feet). First prize, \$15, offered by Mr. Arthur T. Boddington, New York City. Second, \$10.

In classes 108 to 129 the prizes are in each class—First, \$10; second, \$5. The varieties are as follows: Bride, Bridesmaid, Kaiserin Augusta Victoria, Cardinal, Rhea Reid, My Maryland, Mrs. Jardine, Souv. du President Carnot, Perle des Jardins, Bon Silene, Golden Gate, Mme. Abel Chatenay, Mrs. Oliver Ames, Ivory, Liberty, Sunrise, Wellesley, Killarney, White Killarney, Richmond, Uncle John,

Any other named disseminated variety.

130. Largest and best collection of Teas and Hybrid Teas, six or more varieties, not less than twelve flowers of a kind. First prize, \$30, offered by Mr. Robert Simpson, Clifton, N. J. Second, \$20.

Division C.—Twelve Cut Blooms.

Open to Private Gardeners and Amateurs Only.

Class.

131. American Beauty (stems not less than four feet or more than six feet). First prize, \$8. Second, \$5.

In classes 150 to 169 the prizes are, in each class—First prize, \$4; second, \$2. The varieties are:—Bride, Bridesmaid, Kaiserin, Mrs. Pierpont Morgan, Souv. du President Carnot, Perle des Jardins, Bon Silene, Mrs. Oliver Ames, Ivory, Safrano, Golden Gate, Mme. Chatenay, Liberty, Sunrise, Mrs. Jar-

ALEXANDER MONTGOMERY
Ex-President American Rose Society.

dine, Cardinal, Rhea Reid, My Maryland, Marechal Neil, Any other named disseminated variety.

170. Best and largest collection of Teas and Hybrid Teas, six of a kind. First prize, \$12. Second, \$6.

Division D.—Hybrid Perpetuals.

Stems Not Less Than Twelve Inches.

Open to all. Prizes are: First, \$25; second, \$15.

Class.

171. For the largest and best collection, not less than twelve varieties, or less than three of a kind.

Division E.—Hybrid Perpetuals.

Stems Not Less Than Twelve Inches.

Open to private gardeners and amateurs only. Prizes are: First, \$10; second, \$5.

Class.

172. For the largest and best collection, not less than six varieties or less than three of a kind.

BENJ. HAMMOND
Secretary American Rose Society.

FRANK R. PIERSON
Vice-President American Rose Society.

HARRY O. MAY
Treasurer American Rose Society.

Division F.—Special Prizes.

- Class.
173. The Dorrance Challenge Prize for the largest and best display of cut roses, offered by Benjamin Dorrance.
 174. Best 50 White Killarney, \$25, by Poehlmann Bros. Co.
 175. Best 50 My Maryland, \$25, by Poehlmann Bros. Co.
 176. Best 50 blooms Killarney roses, a Silver Cup, value \$25, by H. F. Michell Co.
 177. Best 50 blooms White Killarney, a silver cup, value \$25, by Waban Rose Conservatories.
 178. Best new rose, American origin, of 1909 and 1910. silver cup, value \$25, by Alexander Montgomery.
 179. Prettiest exhibit of roses in the exhibition, to be decided by the ladies' vote, \$10 gold piece, by Miss Marion I. Hammond.
 180. Best 50 blooms American Beauty, \$25, by John I. Raynor.
 181. Best 50 blooms Killarney, \$25, by Henshaw & Feurich.
 182. Best 50 blooms My Maryland, \$25, by Pennock-Mechan Co.
 183. Best 50 blooms Richmond, \$25, by H. E. Froment.
 184. Best 50 blooms Bridesmaid, \$25, by William F. Kasting Co.
 185. Best 50 blooms Mme. Abel Chatenay, \$25, by Traendly & Schenck.
 186. Best 50 blooms The Bride, \$25, by the King Construction Co.
 187. Best 50 blooms Mrs. Jardine, \$25, by Robert Scott & Sons. Co.
 188. Best 50 blooms American Beauty, \$25, by J. A. Budlong Sons Co.
 189. Best 36 blooms My Maryland, \$15, by John Cook.
 190. Best six roses (American Beauty excepted), two to be white and four to be red, pink or yellow. Length of stem is limited to only one joint. Solid silver cup, by Moore, Hentz & Nash.
 191. Vase of roses, not less than 25 or more than 50 blooms, one or more varieties, arranged for effect, accessories in other flowers, foliage, and also ribbons allowed. Exhibitors may supply their own vases. First prize \$15, second \$10, by Peter Henderson & Co.
 192. Best plant in bloom of American Pillar, \$4, by Conard & Jones Co.
 193. Best six cut sprays of American Pillar, \$4.
 194. Six plants in bloom of Harry Kirk. First prize \$5, offered by Henry A. Dreer; second \$3.
 195. Plant in bloom of Charles Dingee. First prize \$4, by Dingee & Conard Co.; second, \$2.
 196. Six blooms of Charles Dingee. First prize \$4, second \$2.
 197. Twenty-five blooms Richmond. First prize \$10, second \$5. Open to private gardeners only. Offered by Stumpp & Walter Co.
 198. Fifty blooms of Rhea Reid, \$25, by E. G. Hill Co., Richmond, Ind.
 199. Twenty-five blooms American Beauty. First prize \$15, by Arthur T. Boddington; second \$10. Listed Class 107.
 200. Twenty-five blooms Killarney. First prize \$10, by Walter F. Sheridan; second \$5. Listed Class 125.
 201. Twenty-five blooms Richmond. First prize \$10, by Wm. G. Badgley; second \$5. Listed Class 127.
 202. Twenty-five blooms My Maryland. First prize \$10, by L. B. Coddington; second \$5, by A. R. S. Listed Class 113.
 203. Twenty-five blooms The Bride. First prize \$10, by A. H. Langjahr; second \$5, by A. R. S. Listed Class 108.
 204. Best and largest collection of Teas and Hybrid Teas six or more varieties, not less than twelve flowers of a kind. First prize \$30, by Robert Simpson; second \$20, offered by A. R. S. Listed Class 130.
 205. Collection of Wichuriana Hybrids, 6-in. pots or over, not less than 25 plants. First prize \$25, by F. R. Pierson Co.; second \$15, by A. R. S. Listed Class 3.
 206. Collection of Hybrid Perpetuals, 6-in. pots or over, not less than 25 plants or more. First prize \$25, by Welch Bros.; second \$15 by A. R. S. Listed Class 4.
 207. Collection of Teas and Hybrid Teas, not less than 5-in. pots, 25 plants or more. First prize \$25, by John N. May; second \$15, by A. R. S. Listed Class 2.
 208. Vase of Cut Blooms showing the highest score, the Lord & Burn-

ham Co. Gold Medal, value \$25, by Lord & Burnham Co. This award to be in addition to any other premium the exhibit may have secured.

209. The Society of American Florists' Silver Medal may be awarded for best grown Rose plant or group of plants, should there be an exhibit of sufficient merit.

210. For the most artistically arranged vase on exhibition. First Prize, the Toronto Horticultural Society's Silver Medal; Second, the same Society's Bronze Medal. This award to be made before any other judging is done. Entries in class 192 will be debarred.

50 blooms My Maryland, \$10.00 by S. J. Reuter & Son.

HORTICULTURAL SOCIETY OF NEW YORK.

President—James Wood, Mount Kisco.
Vice-Presidents—N. L. Britton, T. A. Havemeyer, Patrick O'Mara, Geo. T. Powell, Samuel Thorne.

Treasurer—F. R. Newbold, Poughkeepsie, N. Y.

Secretary—George V. Nash, New York Botanical Garden, Bronx Park.

Chairman Exhibition Committee—F. R. Pierson.

JOSEPH A. MANDA
Supt. of Exhibition.

The schedule of prizes offered by the Horticultural Society of New York was published in full in the February 19th issue of this paper, page 263. It covers Acacias, Azaleas, Cinerarias, Cyclamens and miscellaneous Spring Plants and Bulbs, Orchids, Palms, Ferns and Foliage Plants.

THE BANQUET.

An encouraging response from all quarters indicates a large attendance at the club dinner on March 17. A fine entertainment will be provided and among the speakers will be representatives from the Rose Society, the Horticultural Society of New York, Professor Craig of Cornell University, and a prominent editor, Mr. Connell, from Poughkeepsie, will respond to the toast of "The Ladies."

The next meeting of the New York Florists' Club will be Rose and Sweet Pea Night. President Miller announces that a well-known member of the club, who is too modest to have his name mentioned, will be present and will give a talk on "Sweet Peas," and also give an account of his recent trip to California. JOHN YOUNG, Sec.

WOMEN IN HORTICULTURE.

Miss Laura Blanchard Dawson of Jamaica Plain delivered a lecture on March 5 before the Massachusetts Horticultural Society on "Horticulture as a Profession for Women." The stage was decorated with eight splendid specimens of *Dendrobium nobile virginalae*, from the conservatories of Dr. C. G. Weld. There was a large attendance, particularly of ladies, and Miss Dawson's talk was listened to with close attention and was followed by a very interesting discussion in which the ladies participated.

There are phases of horticultural work for which women are particularly fitted, said Miss Dawson. In Germany there are five horticultural schools, conducted by women. The first of these was started about twenty years ago. The best paid work in German horticulture is teaching gardening in the sanatoriums, where gardening is a part of the occupation of the patients. In England there are two good horticultural schools exclusively for women. About eighty pupils are graduated each year.

Speaking of commercial flower growing, she said that executive ability, good health and tremendous nerve force are requisite to success—a combination which but few women are possessed of. Women can make a success of raising orchard fruits, especially if they have in connection with it a plant for putting up fruit in cans. Women have also successfully grown fancy vegetables for market. The average woman should not attempt such work as raising nursery stock and that no woman should attempt landscape gardening without possessing more than the average strength. To do a week's work in an office on plans, following this with a month in the field, is not easy for any woman. The landscape gardener must know architecture, grading, drawing, the technique of planting and possess a great sense for color and form.

Miss Dawson suggested there should be opportunities for women as consulting gardeners. In small towns, where there are many small places looked after by some local gardener, there would be an improvement in the gardens if they had the supervision in the busy season of some skilled adviser, who may not have the strength to do more strenuous work. Other opportunities for women in horticulture are in caring for school gardens and in writing on horticultural topics. A school of horticulture for women exclusively is soon to be opened near Philadelphia, and students at Wellesley and Smith Colleges may take horticultural courses.

In conclusion, Miss Dawson warned her hearers that no woman should undertake to enter horticultural work for profit unless she has strength, health, ability, and some capital.

"PROVIDENCE, Feb. 23.—Hon. Matthew MacNair, who is known as the owner of a private paradise of floriculture, today sent to the girl operators in all of the exchanges in Providence, Pawtucket and the neighboring districts, a handsome bunch of violets each. The wires were kept busy long after sundown heavily laden with sentiments sent him in the way of thanks."—Boston Globe.

Hon. Matthew, we're proud of you.

ROSES UNDER GLASS.

A paper read before the Tarrytown Horticultural Society by Andrew McKendry.

I propagate my cuttings about the first week in January, in clean, sharp sand, using two-eyed cuttings, as they make plants quicker than those with only one eye. If the sand is kept at a uniform temperature at 65 deg. and the overhead temperature at 52 deg., the cuttings will root in about four to five weeks. They are ready to pot when the roots are about one inch long. If allowed to make any further growth in the sand it will induce a weak growth, as the substance is not there to nourish the plant. Two and one-half inch pots are generally used for the first potting, using new soil, sifted through a coarse screen. A little leaf mould added will help keep the soil porous, and benefit the the young roots.

The young plants should be placed in a rose house temperature, watering strictly attended to, and syringing done every bright day to keep the red spider in check. When the 2½-inch pots are nicely filled with roots, shift into 3-inch, adding a small portion of well-rotted cow manure, and a light sprinkle of "Clay's Fertilizer" to the soil; the plants to receive the same treatment as before, keeping the buds nipped off, which will cause the eyes below to break, making a good, stocky plant. Give the pots plenty of room on the bench, allowing the air and sunlight to get in through the plants. If the plants are kept in a good healthy condition they will require another shift into 4-inch pots before planting in the bench, which time will be about the latter part of May. The house will have to undergo its usual

A. L. MILNER
President, New York Florists' Club

cleaning, white-washing the benches, etc.

The compost to be used should be good fibrous loam, two-thirds soil, and one-third well-rotted cow manure, giving a good top dressing of bone-meal after the soil is on the bench, and mixing in well.

For the first week or ten days after planting, water only around the base of the plants. When the roots begin to find their way through the new soil they will need more moisture. The plants will need immediate staking and tying to make them well-shaped and to hold them in position so they can be syringed properly. Any cool night should be taken advantage of to fumigate. When the plants have been

benched about six weeks or two months they will require an additional inch or two of soil and manure, equally mixed, as the young roots will begin to appear on the surface looking for more nourishment. During the short days of November and December, roses do not seem to relish too much feeding, for the plants are inclined to be somewhat dormant, and the roots not very active. A light sprinkle of "Clay's" once a week is beneficial. The other chemical fertilizers are also very good if properly used. As the days begin to lengthen and the sun gets stronger, you will notice that your benches begin to dry out oftener, and at the same time your plants are making a more vigorous growth, which is a sure sign that the soil is filling with roots, and will need more nourishment. A good watering of liquid manure once a week is as good as anything, using the other fertilizers in between. A top dressing of bone-meal will also be beneficial. As

a preventive for mildew, I keep my hot water pipes well painted with sulphur, frequently closing off all the pipes but one run, which is well painted and allowed to get extra hot.

I think when plants are large enough for 4-inch pots, it is advisable to grow them a little on the dry side, which will help in keeping out the mildew during the hot weather.

Ventilating is a very important factor in rose growing, not allowing the temperature to run up to 80 or 85 per cent in the morning before giving air, and then opening the ventilators a foot or more, but ventilating gradually an inch or two at a time; the same method to be followed when closing the houses for the night.

W. C. RICKARDS, JR.
Treasurer, New York Florists' Club.

WALTER F. SHERIDAN
Chairman Entertainment Committee, New York Florists' Club.

JOHN YOUNG
Secretary, New York Florists' Club.

NEWS OF THE CLUBS AND SOCIETIES

NORTH SHORE HORTICULTURAL SOCIETY.

This society held its regular meeting, March 4. The report of the banquet committee was read and accepted. The banquet this year was not a financial success, owing to the non-support of the gardeners, who make up a large percentage of the membership of the society. The speaker of the evening was Thomas J. Grey of Boston, who held the attention of his audience for an hour, speaking on "Gardens and Gardeners in the Vicinity of Boston Fifty Years Ago." Mr. Grey's remarks were largely personal reminiscences of the past fifty years and were thoroughly enjoyed by the members. At a later date we may find space in which to publish the interesting personal incidents, so pleasantly voiced by Mr. Grey on this occasion.

The question of free distribution of seeds was then introduced by Mr. Mitchell, several taking part in the discussion; but no official action was taken in the matter.

William Till, on behalf of the society, thanked the speaker for his address and wished to add one name to those mentioned by Mr. Grey—a gentleman of the old school, ever kindly and courteous to all, respected by all who know him—Mr. Grey himself, who had this evening paid such an eloquent tribute to the memory of those who had gone and to his living associates of the past fifty years. The gardeners of today are proud of the rich heritage left them by the men whom Mr. Grey has so fittingly extolled. President Salter closed with a few well chosen remarks, and a unanimous rising vote of thanks was tendered Mr. Grey. The refreshment committee then took charge and brought a very pleasant evening to a close.

At the next meeting, March 18th, Mr. Cruikshank, of the R. & J. Farquhar Co., will lecture on the "Cyclamen."

YONKERS HORTICULTURAL SOCIETY.

A meeting of this society was held Wednesday evening, March 2nd, with fifty members present, President Bennet in the chair. Several new members were admitted and a number of applications received. The competition for the prizes offered by Pres. Bennet was very keen and a number of very fine roses were shown. The judges awarded first prize to J. Lamb; second, H. Scott; third, R. Cummings. Secretary Waite read a very able and instructive paper entitled, "Gardeners and the Gardening Profession."

Secretary Waite offered a box of cigars as first prize for the most meritorious exhibits of anything to be competed for at our next meeting, and S. A. Woodrow a two years' subscription to any of the trade papers as second prize, and a one year's subscription as third prize. Vice-Pres. Cochrane will read a paper on the Culture of Mushrooms at the next meeting.

LEE WHITMAN, Cor. Sec.

AMERICAN ASSOCIATION OF NURSERMEN.

Thirty-fifth Annual Convention.

There is every indication that this year's gathering of the nurserymen of the United States at Denver, Colorado, June 8th, 9th and 10th, will be both large and enthusiastic. The new secretary, John Hall, of Rochester, N. Y., is busy looking after details, and expects shortly to issue a circular letter to members setting forth the arrangements made for hotel accommodations and terms, as well as information concerning railroad rates and special offers. The Brown Palace Hotel has been selected as headquarters. It is a thoroughly modern, fireproof building, all large outside rooms, and under excellent management.

Those who know anything about "The Queen City of the Plains", are aware that it is a popular convention city, and an ideal place for the assembling of an organization like that of the American nurserymen in "the Month of Roses."

The Entertainment Committee has not been asleep, either. Chairman Frank A. Weber, Peter Youngers and A. M. Ferguson recently met in Denver, and arranged for the following entertainment to be given by the Western Nurserymen to the members attending the national convention of American Association of Nurserymen:

Afternoon of June 8th, the ladies will be given a sight-seeing trip through Denver and vicinity.

Afternoon of June 9th, the ladies will be entertained at a matinee in one of the theatres; and on

Friday, June 10th (subject to the action of the program committee), the committee has arranged for a sight-seeing trip over the Moffat Route to Corona, for the members and their ladies. This is said to be the finest scenic route out of Denver, and has been styled by eminent civil engineers as the greatest piece of engineering in the world. This trip will be complimentary to members and their ladies, and it is hoped the nurserymen will take advantage of this splendid display of hospitality on the part of their western brethren. Luncheon will be served on the trip. A special train will leave Denver at a convenient hour in the morning, returning in the late afternoon.

Other features have been arranged, and will be announced later. The Western Nurserymen hope that the members from the East will be well represented. Besides those already mentioned, the members of the entertainment committee are: F. H. Stannard, ex officio; J. W. Hill, C. G. Ferguson and George B. Fravert.

Secretary Hall is exceedingly anxious that members will anticipate his circular letter and be ready to give quick response to his appeal for membership fees and for advertisements and registration in the badge-book. First come first served, is his motto.

PITTSBURGH FLORISTS' AND GARDENERS' CLUB.

The usual good attendance was shown at the club meeting at the Fort Pitt Hotel on the evening of March 1st. The finance committee reported all bills paid that were incurred in the entertainment of the Carnation Convention, and a balance left of over \$415, which was returned pro rata to the subscribers to the fund. The report of the committee was accepted with the warmest thanks of the club and the committee discharged.

A pleasant incident was the reading by the secretary of a letter from the Chicago Florists' Club, in which the hospitality and work of the Pittsburgh Club in the entertainment of the Carnation Convention was warmly praised. This letter was greatly appreciated. Even if you think you are doing good work, it is a great relief and satisfaction to have some one else tell you that you are.

The auditing committee reported the books of the club examined and found correct.

The private gardeners staged a competitive exhibit of floral bulbs in 6-inch pots and 7-inch pans. The judges, Neil McCallum and Jas. Wiseman, awarded two second prizes to Frank Crook, gardener for J. H. Park. Dr. J. A. Shafer showed an interesting collection of orchids, for which the judges awarded a cultural certificate.

The Secretary was instructed to write a letter of condolence to Jas. Moore, foreman at the Phipps' Conservatories, on the recent death of his father. It having been brought to the attention of the club that two of its members, B. L. Elliott and E. H. Blind, had been married since our last meeting, the Secretary was instructed to send them letters of congratulation. E. H. Blind, who was present, asked the club to join him in refreshments in celebration of his marriage and soon the hotel waiters were busy. It was one of those delightful little impromptu, unplanned affairs which are often the most joy-giving.

H. P. JOSLIN, Sec'y.

GARDENERS' AND FLORISTS' CLUB OF BALTIMORE.

The Gardeners' and Florists' Club of Baltimore at their regular semi-monthly meeting voted in a number of new members. Mr. Geo. R. Morrison exhibited two unusually fine specimen plants of Cineraria—a cross between stellata and hybrida. The plants were nearly three feet high, bushy in proportion, and with an abundance of beautiful flowers. At the next meeting it is probable the club will vote in favor of "parcels post" and send a petition to Congress favoring the same.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

The Mid-Lent meeting of the Executive Board of the Society of American Florists and Ornamental Horticulturists will be held at the Seneca Hotel, Rochester, New York, on March 12th at 10 a. m., and will continue until March 15th, inclusive.

H. B. DORNER, Secretary.

NATIONAL GARDENER'S ASSOCIATION.

The National Gardeners' Association, of which Wm. Kleinheinz is president, this year will hold their exhibition in connection with the spring show of the Pennsylvania Horticultural Society, March 17. The schedule has just been issued by Secretary Maynard and offers the following attractive prizes:

Preliminary Schedule. Carnations.

Class No. 1.—Vase of seedlings. First prize, silver cup (Robert Craig); second, certificate.

No. 2.—Ten varieties. Ten blooms of each (seedlings excluded). First, silver cup (F. K. Pierson); second, certificate.

No. 3.—Six varieties, twelve blooms of each. First, silver cup (Peter Henderson); second, certificate.

No. 4.—Four varieties, ten blooms of each. Limited to those who grow only 800 plants or less. First, silver cup (Rickards Bros.); second, certificate.

Roses.

No. 10.—Twelve American Beauties, stems three feet or over. First, silver cup (Chas. Bertanzel); second, certificate.

No. 11.—Six American Beauties. Limited to those who grow 200 plants, or less. First, silver cup (The Chronicle Press); second, certificate.

No. 12.—Roses, four varieties, twelve of each. First, gold bronze cup (Benjamin Hammond); second, certificate.

No. 13.—Best White Rose, twelve of each. First, silver cup (Boblink & Atkins); second, certificate.

No. 14.—Twelve hybrid teas; pink. First, silver cup (Hitchings & Co.); second, certificate.

No. 15.—Twelve blooms any color except white or pink (American Beauty excluded). First, silver cup (P. H. Goodsell); second, silver cup.

No. 16.—Vase roses disseminated in 1908 and 1909. First, silver cup (Gould Chemical Co.); second, certificate.

Roses in Pots.

No. 17.—Six varieties, hybrid and hybrid teas, in bloom. First, silver cup (Ellwanger & Barry); second, certificate.

No. 18.—Specimen climbing rose in bloom, in pot or tub. First, silver cup (Weathered Co.); second, certificate.

Miscellaneous.

No. 24.—Hardy forcing bulbs. Not over ten varieties. Cut flowers, twelve to a vase, silver cup (Michael Fallon).

No. 25.—Display of cut flowers of winter forcing bulbs, tubers, etc. First, silver cup (F. J. Michell); second, certificate.

No. 26.—Specimen orchid in bloom, any variety except Cattleya. First, bronze cup (Lager & Hurrell); second, certificate.

No. 27.—Collection of orchids. First, gold bronze cup (Julius Roehrs Co.); second, certificate.

No. 28.—Flowering plants. Cattleya species. First, silver cup (Joseph A. Manda); second, certificate.

No. 29.—Six plants of cyclamen. First, silver cup (J. T. Withers); second, certificate.

No. 31.—Group of flowering and foliage plants, space not to exceed 60 square feet. First (Lord & Burnham) gold medal; second, silver cup (William Kleinheinz); third, certificate.

No. 32.—Twelve foliage plants (palms excluded), not over 8 in. pots; not over twelve varieties, of one species. First, silver cup; second, certificate (Wilson Plant Oil & Fertilizer Co.).

No. 33.—Pair specimen palms. First, silver cup (John Shore); second, certificate.

No. 34.—Vase of mixed sweet peas. First, silver cup (W. Atlee Burpee); second, certificate.

No. 37.—Collection of sweet peas; not less than 25 sprays to a vase, nor less than four varieties. First, silver cup; second, certificate (J. P. Sorenson).

No. 39.—Six Cineraria stellata. First, silver cup; second, certificate.

No. 40.—Three Cineraria stellata. Exhibitors in Class 39 can not exhibit in Class 40. First, silver cup (Jas. Bell); second, certificate.

No. 41.—Six Cineraria hybrida. First, silver cup (Burnett Bros.); second, certificate.

No. 42.—Six Primula obconica. First, silver cup; second, certificate.

No. 43.—One hundred double violets. First, silver cup; second, certificate.

No. 44.—One hundred single violets. First, silver cup (E. Fardel); second, certificate.

No. 45.—Vase of winter flowering stocks, one or more varieties. First, silver cup; second, certificate.

No. 50.—New or rare plant, foliage, not disseminated before 1907. First, silver cup (W. & T. Smith Co.); second, certificate.

No. 51.—Specimen flowering plant, any species. First, silver cup.

No. 55.—Four melons, four varieties. First, bronze cup; second, certificate.

No. 56.—Four specimens of hot-house cucumbers. First, silver cup (J. J. Donnelly); second, certificate.

No. 57.—Collection of vegetables. First, silver cup (W. E. Maynard); second, certificate.

No. 58.—For exhibitors taking the most prizes. First (counting three points), second (two points), third (one point), gold cup.

Class numbers not filled in will be announced later.

Bowling Prize—Open to all Horticultural and Gardeners' Societies.

NEBRASKA HORTICULTURAL SOCIETY.

This organization met at the State Farm at Lincoln and had a very interesting three days' meeting. An address of welcome was given by Chancellor Avery of the State University, who was recently promoted to his present position from the chemistry department. He was responded to by C. S. Harrison of York, who spoke highly of Nebraska products; but our chief delight and pride was in our Nebraska-grown chancellor.

The first session was given to the growing of small fruits. G. W. Shaver spoke of his phenomenal success with grapes. He considered Moore's Early the best. "How We Grew and Marketed Twelve Thousand Bushels of Apples," was the theme of G. A. Marshall of Arlington. The Society of Florists were given the right of way for the discussion of decorations, carnations, ferns and ornamentals.

This society decided on following the Minnesota plan by inviting the Forestry and Florist societies to co-operate with them, giving each society half a day, their reports to be published in the annual reports of the parent society. This plan will ensure the co-operation of all the affiliated interests of the state. C. S. Harrison of York was chosen president for the next year and his son, W. A. Harrison, vice-president.

WESTERN NEW YORK HORTICULTURAL SOCIETY.

At the 55th annual meeting of the Western New York Horticultural Society held at Rochester, recently, W. C. Barry was elected president for the 21st consecutive time. John Hall of Rochester was also re-elected secretary-treasurer. In his address before the society Professor U. P. Hedrick said:

"However men may differ as regards cultivation for the apple, few will deny the absolute necessity of it for the peach. Uncultivated apples in Western New York are, as a rule, bad enough, but an untitled peach orchard is the desolation of desolations. Show me a man who says 'peaches don't pay and, nine times out of ten, I can show you a sod bound orchard, the trees sick with insects and thirsting for

the water which goes to the grass. Never! Never! Never! nor sow the orchard to grain! nor intercrop after the trees come into bearing. Plow in the spring, cultivate the surface soil until the middle of August and follow with a clover crop to be plowed under the next spring."

WASHINGTON STATE HORTICULTURAL ASSOCIATION.

William T. Clark of Wenatchee was elected president of the Washington State Horticultural Association at its sixth annual session at Wenatchee, Wash., when it was also decided to meet at Prosser the middle of January, 1911. Other officers for the year are: First vice-president, E. T. Benson, Prosser; second vice-president, W. A. Ritz, Walla Walla; secretary, Levi Grant Monroe, Spokane; treasurer, Michael Horan, Wenatchee.

The attendance was the largest in the history of the association, there being 300 at the first day's sessions and 600 at each of the succeeding days. There was a lively contest for the presidency.

Resolutions were adopted urging the representatives in Congress to work against the legislation proposed by eastern interests in the shape of an amendment of the Pure Food Law, regulating the size of apple boxes. The entire representation of the Pacific Coast in Congress will be enlisted in the fight against adverse legislation affecting the fruit industry.

TUXEDO HORTICULTURAL SOCIETY.

A regular monthly meeting of this society was held Tuesday evening, March 8, in the Parish House, Tuxedo Park. Ten new members were elected and several more applications were received. A very instructive discussion took place, on pruning. Every member, and there were many there, expressed his views freely, with the result that something of great value was learned by each. It was the voice of the meeting that two shows are feasible and desirable for this year, one a rose show in June, and the other a chrysanthemum show in the fall. The executive committee was instructed accordingly.

DAVID McINTOSH, Sec'y.

TARRYTOWN HORTICULTURAL SOCIETY.

The above society held its regular monthly meeting on February 25th. The subject of the meeting, Roses, was introduced by Andrew McKendry. A very interesting and instructive discussion followed. The monthly prize was won by Jas. Stuart with a splendid vase of Killarney roses. Mr. McKendry showed a grand vase of mixed varieties, which was only a few points behind the first prize lot. A number of other vases were shown, the general quality of which was remarkably good. The subject for next meeting is "Forced Vegetables," and the prizes will be given for the best three kinds.

WM. SCOTT, Corresponding Secy.
Elmsford, N. Y.

THE CALENDAR OF THE CARNATION.

Paper read before the American Carnation Society by Joseph H. Hill.

It seems a trifle ludicrous for a person as young and as inexperienced in carnation culture as myself to stand before a body of representative men such as are gathered here today, and attempt to inform them as to the best way to cultivate carnations throughout the year. Many a member of this society was successfully growing carnations before I was born; others, comparatively young men, are already acknowledged authorities on the "Divine Flower," and there are others here present who might, if they so desired, retire on their well-earned laurels and enjoy for the rest of their lives their well-filled coffers, the result of hard work, close application, and an unceasing attention to the demands of their chosen flower. In some portions of my discourse will readily be recognized the teachings of such men as Mr. Wm. Nicholson and the Daille-douze Bros., to all of whom I am deeply indebted for kindly interest and instruction, and unfailing response to any inquiry propounded. Other portions of this paper are records of my own observations and experiences, many of the lessons being quite expensive, as every grower has at times cause to confess as he sums up his columns of success and failure.

The middle of November witnesses the first steps looking toward the production of the millions of carnation plants required for the annual planting in this and other countries. At this time the grower puts into the sand those varieties which fail to make good plants from later struck cuttings, and also those required by those of his customers who insist on "late December or early January delivery"; while large numbers are taken in November and December, the bulk of the propagating is done considerably after the holidays, and often quite up to the first of May. It is generally conceded that cuttings taken during January, February and March will give the best results to the average grower, though most of us have seen grand bloom produced in quantity from good April cuttings.

Too much importance cannot attach to the careful selection of cuttings, which must be strong and healthy and from clean and vigorous plants. The old axiom quoted in Mr. Ward's book, that "like begets like," must never be lost sight of in this part of our programme.

The cutting bench should have a brick or tile bottom, filled with 3 to 4 inches of absolutely clean sand, and so constructed that a bottom temperature of 60 degrees can be maintained. No draughts should be allowed to strike the cuttings, and they should also be protected from the direct rays of the sun by a perfectly clean and light weight curtain of muslin.

The cuttings should receive a very thorough watering when put into the sand and the detrimental habit of using the hose whenever they show signs of flagging should be avoided, as this wilting invariably shows that overhead conditions are wrong and these must be corrected rather than that water should be added to an already saturated sand; the less amount of water

used and still keep the cutting fresh and plump, the better will be the root formation, and it requires a nice discrimination to properly adjust the same. Varieties differ greatly in the fiber of the first roots, the Enchantress family being notable for producing good, tenacious roots quickly; while Afterglow, the sturdiest, toughest stemmed variety in existence, must be handled with great care to prevent the loss of roots when taking from the sand, and must be allowed a longer time to mature.

Then arises the question, shall the cutting be dibbled into soil, or potted? The former procedure is the easiest and the quickest, but I feel sure that the extra work of potting and repotting is doubly repaid.

The young carnation that is planted in the field or in the flowering bench from a pot, with its firm ball of earth, enwrapped with a network of roots, will show no ill effect from the shift and will start right off into growth without a day's hesitation, while the lifted plant in handling and resetting loses most of the soil from around the roots, and receives a severe check from loss of moisture from its tissues, and especially is this the case if not revived by frequent showers soon after planting. Another strong point in favor of the young pot-grown carnation is exemplified when the plant is lifted from the field either for shipping or for immediate benching; the small pot ball of the springtime will still be found intact, greatly protecting the roots from serious injury. One might be led to suspect that the speaker was interested in the pottery business, for if all the carnation men decide to pot all their cuttings before planting it means millions of pots, but such is not the case; nevertheless if any of the pot men present want to "fix it" with the speaker, he will be glad to meet them after we adjourn.

We endeavor to get our young stock up into 3's before planting out, but very often in the spring rush some lots have to remain 2½'s and grow on very nicely provided they have not become badly potbound.

When the first warm days come on about mid-April, the inclination is to rush the stock out into the field, but I feel sure that it is a serious mistake to do so; in the house it has grown up in a temperature of from 45 degrees to 50 degrees, and with moisture judiciously supplied, so that it cannot but suffer and be seriously checked when subjected to cold, severe frosts very often, and worst of all to wet weather and a falling thermometer. In an ordinary season if the planting is fully finished by the first of June, good, big, healthy stock is assured providing your soil has been properly prepared and is possessed of full quantities of plant food.

We have come to the conclusion that cross-checking the plants in the field so as to cultivate them both ways with a hand cultivator is not so good as to give them more room between the rows and draw the plants closer together in the rows. By spacing the rows 28 to 30 inches, a horse and spiked-tooth cultivator can be used, greatly lessening the hand labor, beside loosening the soil to a greater depth. The inclination of the

hand cultivator is upward rather than downward, thus failing of the intent to a certain degree.

About July 1st we begin to condemn the benches that are not producing a paying quantity of flowers, emptying the wornout soil, and making them ready for our next year's hopes. It is now a recognized fact that the returns from carnations cut in June and July come nearer being "real velvet" than those cut at any other time in the year, providing the plants have had the proper care and have not been neglected during the late spring rush.

If there is any time in the year when the greenhouse laborer approaches mutiny it is when the task of wheeling out and wheeling in presents itself. If at this particular period of carnation culture the lady who strolls through the houses in the winter, remarking on the delights of "cultivating the fragrant blossoms," comes about once more, she certainly finds herself rudely disillusioned, for it is as hard, hot and disagreeable as working in a quarry or in the moulding room of an iron mill. The man who perfects a practical, mechanical soil carrier, not only has a fortune assured but the added blessing of every man relieved of this arduous and exhausting work.

A word as to soil; the old prescription, "3 parts of soil to 1 of well rotted manure, together with a generous sprinkling of bone, chopped fine and put on the benches," is bound to be superseded by more modern methods of soil preparation. There are a number of eminently successful firms in this country who take as long as five years in the preparation of their soil for indoor culture. The one vital principle to be observed is to have the manure and other fertilizers so thoroughly assimilated by the soil by means of leguminous crops and clovers, that the food is immediately available to the plant.

So much has been written concerning the careful lifting and quick resetting of the plants from the field, that I pass this item of culture, but wish to emphasize the necessity of the use of the Bordeaux mixture promptly on the establishment of the plants, generously applied, and given once thereafter every 3 or 4 weeks; it not only acts as a preventive of spot, rust and other minor diseases, but of stem-rot as well. By beginning in August with a weekly spray of Nicotinic acid and continuing throughout the year, we keep down aphids and also rid our plants of thrip. Red spider is controlled by an occasional application of salt water, together with syringing under high pressure on bright days.

The antiquated proceeding of mulching heavily in late summer or autumn has given way to light top dressings, through which the surface of the soil is always pliable and open to the free air, thus preventing any tendency toward souring. Lime, wood ashes, sheep manure and pulverized cattle manure, always applied sparingly, constitute the menu for our plants after they are "up and doing." Plenty of fresh air, whenever it is possible to admit it, insures a healthy free growing plant.

Not until October and November

do the plants throw character blooms, but if by Jan. 1st each plant does not show several blooms cut, something is decidedly wrong, either with the variety or with the culture given.

In regard to new varieties, we need them and they are interesting, and we must not forget that every variety that we grow was once an untried novelty; but it behooves every general grower to ascertain as far as possible the exact value of a "new one" before displacing an "old one" to make room for it in quantity. This national meeting is of inestimable value to carnation growers in that it shows just how well the standard varieties are holding their early vitality and position, and just what new sorts are surpassing their seniors in brilliance of color, perfection of form and in size. Only the finest and most productive sorts can in this day and time pay for standing room in the modern, up-to-date greenhouse.

THE SHAMROCK.

Says St. Patrick in the old song:

"I'm a saint come to serve you
and Patrick's my name"

and tells them he's going to have a tussle with the devil and then advises them to

"Go lay down in clover
Till the scrimmage is over"

and the poet winds up his many verses with the same refrain:

"It was Patrick's Day in the morning"

Another old Irish song has it:

"In his hat good St. Patrick used always
to wear
The shamrock whenever he went to a fair,
And Nebuchadnezzar no doubt highly
prized
A bit of the blossom when he went dis-
guised,
For the bosom of beauty itself might
expand
When bedecked by the shamrock of Old
Ireland."

Dion Boucicault's tragi-comic song,
"The Wearing of the Green," is a gem
of the first water.

When this song was written condi-
tions were different from when "The
Wearing of the Green" loomed up.

"May the sons of the Thames, and the
Tweed, and the Shannon,
Drub the foe who dares plant on their
confines a cannon;
United and happy at loyalty's shrine,
May the rose, leek and thistle long flourish
and twine
'Round a sprig of shillelah and shamrock
so green."

—Henry Conde.

This variation of the same old song
was used to celebrate a St. Patrick's
Day in Paris, 100 years ago:

"On the banks of the Seine and the banks
of the Shannon,
Let each Irishman sing
To his country and king,
And let each honest heart, whether Irish
or not,

Religiously think
'Tis his duty to drink
On St. Patrick's day in the morning."

—Sir Jonah Barrington.

"I'll seek a four-leaved shamrock in all
the fairy dells,
And, if I find the charmed leaves,
O! how I'll weave my spells,
I would not waste my magic might
On diamond, pearl or gold;
For treasure tires the weary sense
Such triumph is but cold;
But I would play the enchanter's part
In casting bliss around—
O! not a tear nor aching heart
Should in the world be found."

—Samuel Lover.

The four-leaved shamrock was sup-
posed to be gifted with magic prop-
erties, but it is not nearly so uncommon
as is generally supposed.

OUTDOOR FLORICULTURE IN NORTHERN STATES—PRESENT DEVELOPMENT AND FUTURE MISSION.

(A paper by Richard Rothe read before
the Bar Harbor Horticultural Society
at the March meeting).

Broadly speaking, the New England
states have a well established and
enviable record in all lines of outdoor
floriculture as far north as Boston.
Beyond the Massachusetts boundary,
however, the horticultural fraternity
of this country still looks with more
or less doubt. Maine, New Hamp-
shire and Vermont have not been
heard from often enough to make an
impression. I don't think I am exag-
gerating when stating that in the
minds of a great majority of Ameri-
can horticulturists floriculture within
those states is still in its infancy and
little is expected of this section in the
near future. While this may properly
apply to the thinly settled regions it
hardly does to our larger cities.
Floriculture as a means to beautify
home surroundings and city squares
is better understood and becomes
more noticeable year after year. For

RICHARD ROTHE

obvious reasons we find it farthest
advanced along the seacoast line.
With the establishment of fashionable
summer resorts and subsequent build-
ing of cottages the desire to have the
immediate surroundings laid out in
the customary lawn like shape,
planted with trees, ornamental shrub-
bery and some flowers followed. It
was, and in many cases still is,
simply the introduction of the con-
ventional city suburban lawn into the
native spruce and pine region of the
North. Whatever little of flowering
everyday bedding plants during the
early stages of development were em-
ployed, were supplied by the large
far away central markets. The com-
paratively short growing seasons, the
uncertainty of plant material coming
a long distance from a much warmer
climate thriving, not to speak of the
frequent absence of skilled labor for
proper handling and care, proved in
many instances serious obstacles in
the pathway of quick advance. The
rapid floricultural progress of Bar
Harbor is first and last due to the
early employment of high class pro-

fessional plantmen and subsequent
foundation of her own plant growing
industries. To lay bare the floricul-
tural possibilities of a region, which
at the beginning must have looked
near to hopeless, required a vast
amount of patient experimenting.
There is no need to talk to you of
the many disappointments, or, on the
other hand, of the many happy sur-
prises the northern floriculturist
meets with, but it is safe to say, that,
so far the latter by far have out-
classed the former in number and im-
portance.

A Favoring Climate.

It was one of the happy surprises
to find out that we can safely em-
ploy many of the Azalea mollis and
pontica varieties along the Atlantic
coastline as far north as Canada.
Calycanthus floridus, Cydonia japon-
ica, all the free flowering deutzias,
diervillas, forsythias, bush honey-
suckles, mock oranges, spiraeas and
viburnums have proven perfectly
hardy and the rich florescence of im-
mense lilac bushes gives evidence
that the climatic conditions of the
north are exceptionally favorable for
their growth. Let us hope that the
popularity of the hardy hydrangeas
and Rosa rugosas is soon to be shared
by rose varieties such as Austrian
Briar, Copper, Harrison's Yellow
and Persian Yellow. Likewise are
the rubiginosa Penzance hybrids and
the many comparatively new rugosa
hybrids worth serious consideration,
for they are not only perfectly hardy
within this locality, but also exceed-
ingly prolific in flowering. Hybrid-
perpetuals, teas and hybrid teas need
winter protection in New England and
more so along the Canadian bound-
ary. If carried through in good
shape and otherwise properly cared
for their growth is extraordinarily
vigorous, the crops of buds are heavy
and the period of their flowering long
lasting; not to mention the fortunate
absence of the obnoxious rose bugs
which often ravage crops of outdoor
roses in the Middle Atlantic states.

Glorious Color Effect.

There is no climatic or other hin-
drance for the free use of nearly all
the popular bedding plants as gerani-
ums, tuberous rooted begonias, helio-
tropes, salvias, petunias and so forth.
If there had been any doubt as to the
possibility of flowering such roots as
dahlias, gladioli and cannas, your mag-
nificent exhibits of last year's flower
show would have quickly removed it.
But, after all, there is nothing which
can eclipse the great success we have
had in the line of hardy biennials and
perennials. Not alone can we grow
wellnigh everything worth having, but
time has divulged the fact that we
can also cultivate many varieties up
to a perfection and floriferousness that
is simply impossible south of Massa-
chusetts. I said, "Cultivate up," lest
we forget that growing of perennials
in the north means increased atten-
tion, and in consequence thereof high-
er expenses, especially in overwinter-
ing, than in the Middle States. For
those few extras, northern grown
plants, after surviving our long, icy
winters under protecting leaf-covering,
hardy and vigorous, are ready to put
forth that wonderful sturdy growth,
rich floriferousness and brilliancy of
colors, which year after year compels

the unreserved admiration of the multitude of our flower-loving visitors. This marvelous color phenomenon manifested equally strong in the flowers of all our summer annuals, is variously attributed to the moderate average summer temperature, the always cool nights and, along the sea-coast line, the beneficent influence of the sea atmosphere. In the interest of all future progress I cannot emphasize too strongly that a liberal amount of care in the preparation and fertilization of the soil, timely irrigation, weeding and cultivating, are not less important, whenever first class results are desired.

Sometime ago I read an article on new *Amaryllis* hybrids and their magnificent outdoor effect in Florida gardens. I can easily imagine a mass of them in full bloom must be a floral revelation to the eye, still I cannot believe that they ever can vie with the splendor of hue, say, for instance, of a well assorted bed of Japanese iris. It is not necessary to go into any further details on color questions, for Bar Harbor, for years past, has witnessed veritable floral color carnivals in peonies, phloxes, irises and, in fact, in all hardy flowering plants, both perennial and annual. This remarkable clarity in tints and shades has hereabout elevated many varieties to the rank of salable cut flowers, which ordinarily, as such, find no market.

The Right Viewpoint.

I fear this brief recapitulation of facts to those of you who have been for years familiar with them, may seem a mere waste of time. Still just this familiarity is apt to make us near-sighted and by giving up our thoughts entirely to cultural and other particulars we lose the right view point to the matter as a whole. We may as professional floriculturists comprehend and take careful advantage of our opportunities as growers, but we should, at present, under no circumstances, misunderstand the hitherto mainly evolutionary character of the situation. Northern outdoor floriculture, in spite of its great productiveness, would have no future without a mission. Last fall, one of my customers when leaving orders for spring planting, summed up by saying: "Now please be sure and see that my little garden and my piazza boxes are again well attended to, for, you know, they help to rent my cottage."—A brief, clear-sighted statement, touching the matter from a sober, businesslike point of view. It pays a city, by the agency of floriculture, to beautify her squares and boulevards, for it helps to bring up the value of adjacent property and in turn increases her tax receipts. It pays house owners along residential city and suburban streets and avenues to call on the floriculturist and brighten up the summer aspect of their small front lawns, for concerted efforts in that direction will aid in giving the locality that air of refinement which attracts cultured people of means. It is a wise policy for the intelligent native population of northern seacoast districts to study and to avail themselves of ornamental shrubs, perennial and annual flowers, because the summer resort calls especially for neatness and beauty of home grounds.

There is, however, another mission

of northern floriculture which seems to me is of a higher order than the one just mentioned. That host of flower lovers who, as a health-preserving outdoor exercise, take delight in doing things themselves, can find no better opportunity than the invigorating summer climate of the north offers. To our cottage inhabitants there seems hardly a more enjoyable pastime than that of outdoor floriculture. After the large city market has reigned them during the winter with the floral output of acres under glass, they find in their summer homes amid the pines and spruces of Maine conditions altogether reversed. Here the northern grown perennial and annual is supreme and Iceland poppies, foxgloves and Canterbury bells have their innings. The change is as radical as it proves agreeable, and amateur flower growing

JOHN COOK

A Pioneer American Rosarian.

has become a strong feature of northern summer resort life.

Avenues for Future Advancement.

As gratifying, however, as the ready popular response is, and as much as the present activity along this line may encourage us, we should not overlook our next task which is, as much as possible, to educate our patrons on the ways and modes to use our plants to their best effect. Since Bar Harbor from the very start has taken a leading part in the development of outdoor floriculture and her floral garden effects are known to represent the best artistic examples, it is natural that the North will more and more look to her and this society for competent counsel. In my opinion the time is at hand to give this problem a more careful thought as we have done so far. As a northeastern outpost,

situated far away from most of the nation's business centers it is not likely that we will see great exploits in elaborate landscape architecture in the near future. Summer residences on Mount Desert, the opposite mainland, shorelines and adjacent islands, as dwellings, are all of a more or less temporary character. The native vegetation and sceneries themselves are extremely attractive and beautiful. These conditions naturally limit extension and outlay on private grounds. The future will see a steady increase of all sorts of flower growing and attempts at gardening on a small scale, with the local professional in demand for intelligent advice. The excellence of the home grown hardy plant material alone should prompt us to direct the present private activity, by degrees, into those channels which lead to a higher standard of effect in outdoor arrangements. We are also face to face with the necessity of giving careful study to color harmony. Furthermore, the infinite variation of ground surface and the everchanging character of our native vegetation will demand thorough familiarity with the material, and here especially with the habit of growth and with singular as well as mass effects of hardy perennials. During my whole thirty years' practical career I have not found a single locality offering by nature so many rare and unique propositions for high-class miniature work in landscaping as does the North, and above all, Mount Desert Island; problems which would inflame ingenuity to enthusiasm and put mediocrity at once out of commission. To the trained eye a mere glance at some of our rugged granite ledges and their picturesque wild vegetation discloses ideal natural conditions for the rock garden, and yet, the flower-loving lady is very apt to turn a deaf ear to all our suggestions and decide on heliotropes and poppies; or a nasturtium bed may be the final outcome. Occasional disappointments on account of lack of understanding should, however, not in the least discourage us in the patient, tactful pursuit of our aims for the best effects.

Hardy Perennials Rank First.

To sum up: A careful study of the situation soon convinces us that the homegrown hardy perennials rank first in resistance. They should, in a general way, form the nucleus of Northern outdoor planting, with the more tender flowering bulbs, bedding plants and annuals as seconds. Many of the hardy perennials appear in no way out of place when in a natural, informal style mixed in among our wooded landscape. They are equally effective in the formal gardens and they give our plantings from the start a much desired stability, which, at no time, should be underestimated.

We find ourselves near the threshold of a new growing season. Soon a large contingent of the wealthy metropolitan population will return to their cottages amid our eververdant spruce and pine woods to enjoy the invigorating Northern summer. Let us not forget that the last and highest mission of Northern outdoor floriculture is to aid in strengthening the ties of attachment and in binding the bands of love for our home country and her beautiful North.

THE VALUE OF THE EXPERIMENT STATION TO THE FLORIST AND THE DUTY OF THE FLORIST TO THE STATION.

Address by Professor J. C. Blair, Head of Department of Horticulture, University of Illinois, Urbana, Illinois. Presented before the Illinois State Florists' Association, February 15, 1910.

In order to fully appreciate the value of the experiment station to the florist, it is necessary at the outset to have some conception of the nature and scope as well as the function of this great public institution known as the Experiment Station which has sprung up throughout the length and breadth of the land. These institutions are really the outgrowth of the discussions which took place at the meetings of our old time agricultural societies. Various kinds of model farms and test stations were proposed with here and there a real start made. The first station was a private institution established by Mr. L. Valentine at Houghton Farm, Orange County, New York, in 1876. An effort was made by the State of Connecticut in 1873, for the founding of an experiment station, but the bill failed to pass. It was this same year that the Experiment Station at California was established and 1879 when the Cornell Experiment Station came into existence. But our experiment station system in this country was not definitely established until 1887 as a direct result of federal appropriations for that purpose. Since the passage of this, the first Hatch act, there has been some modification in the laws governing these institutions and as the work has grown and enlarged, additional appropriations have been made. Yet from the first the intent and spirit of the law was the same; namely, "that it shall be the object and duty of said experiment stations to conduct original researches or verify experiments on the physiology of plants and animals; the diseases to which they are severally subject, with the remedies of the same; the chemical composition of useful plants at their different stages of growth; the comparative advantages of rotative cropping as pursued under the varying series of crops; the capacity of new plants or trees for acclimation; the analysis of soils and water; the chemical composition of manures, natural or artificial, with experiments designed to test their comparative effects on crops of different kinds, etc., etc."

Surely here is a law, the nature and scope of which is sufficient to take in all the problems relating in any way to the business of floriculture. But if we glance back over the twenty-three years that these stations have been in operation, we see at once that the old established lines of agriculture, or those which have to do with all outdoors so far as the farm is concerned, have been the ones to receive especial attention and the bulk of the money. It is not until a very recent date that the florists' business in this country was thought to be of sufficient im-

portance to receive the especial attention of investigators in these public institutions. In fact, as I have gone down over the list of publications which have appeared as a result of these federal and state appropriations, I am surprised to find that out of literally thousands of bulletins and circulars, there are but forty-seven which are especially designed to be of help to the florists and gardeners, yet considering the fact that the florists themselves have not until recently been making any demands upon the experiment stations for help, this list really seems a commendable one. Scanning the pages of these publications which have appeared, we find many things of real and positive help to the florists' business. Take for example the work which has been done by various pathologists on the diseases of many greenhouse plants. How can we ever fully estimate the benefit derived from this source alone? If we take these and the many other things accomplished as an indication of what may be done in the future and then stop to reflect upon the rapid rise of the different phases of the floriculture

E. GURNEY HILL.
A Pioneer American Rosarian.

tural business during the past dozen years, we will be in a better frame of mind to correctly anticipate what the future holds in store for us. Think for a moment of the step in advance which will be taken when we actually arrive at that stage in our state history when Illinois will have invested in this business \$100,000,000 instead of \$20,000,000 as at present. Of what value will this enormous horticultural industry in this state be if we do not actually learn how to throttle the insect pests, or if we do not know the correct combination of those materials and elements which go to make up the proper plant food of each of those ever varying and complicated types which we grow for the delight and comfort of the multitude. We have at least one firm in Chicago which cannot really secure a sufficient amount of the organic fertilizer (manure, if you please) which is now required for their establishment. This

has become so serious a problem with them that, I understand, they are contemplating establishing upon their premises a large dairy herd whose chief business it will be to make fertilizer with which to grow the dainty blossoms that are to grace our tables. Now, it is not too much to expect that this experiment station, through the experiments already in hand, will definitely ascertain what combination of chemicals or commercial fertilizers can be, in part at least, substituted for the now very precious stable manure. It is my firm belief that there is no industry in the state which will receive a fuller measure of benefit from the money spent in its behalf than will floriculture. The fact that this industry is confined largely to the area encompassed by 20,000,000 sq. ft. of glass, or approximately 400 acres, makes it apparent that we are dealing with control conditions, in large measure at least, and the influence which we can exert upon our plants is greater by far than upon those crops grown in the open. Now, the particular way in which the experiment station will be of most value to the industry, will be in the development of new forms or types better adapted to the requirements of our advancing civilization. Yet of no less importance will be improved cultural methods which must come from long continued experiments designed to shed light on the food requirements of the different varieties grown under glass. There must be a constant effort to improve existing types. Not only that, but these must be protected from the innumerable enemies which beset them with ever increasing vigor as the industry expands. Again, the trade resulting from this industry must extend into every section of the country and this means that facilities for keeping and transporting flowers must receive careful attention and investigation.

As I allow my mind to project itself into the future, I see with a certainty, that is most encouraging, the thousands of commercial establishments that have grown up within our state, furnishing their thousands of employees with a comfortable living, bringing upon the tables and into the very life of all our citizens, that refinement, that grace, that sweetness of character, which comes alone from intimate association with and love for flowers. It will be not alone the commercial florists that have profited, nor those who have labored in one phase or another of the industry as helpers, but also all the people who will have learned to appreciate the value of a flower. How will all this have been made possible? I believe I can see with sure vision that it is because the investigator has worked long and faithfully on one after another of the many problems which you practical growers have called to his attention. Nay, you have not only called his attention to these things but you have insisted that our laboratories, our glass houses, and our other equipment shall have been used or applied to the problems unceasingly until its solution shall have been found. Not only that, but you have seen to it that the state has wisely appropriated the money which has been given back to the people, a hundred, yea, a thousand fold, through added beauty, pleasure and profit. When all this shall have been

accomplished, can we estimate the true value of the experiment station to the florist?

It is the duty of the florists individually and collectively within the state, to support in every legitimate way the work of their experiment station. The chief reason for this is the fact that it is you, the florists of Illinois, who have secured the appropriations and who are really responsible for the work undertaken. Most of you know, but there are many apparently who do not know, that there is a state law which says that the experimental work in floriculture undertaken by the University shall be along lines agreed to by the director of the experiment station and a committee of five, known as the floricultural advisory committee. This committee is appointed by the State Florists' Association. It is a committee of your own selection.

It is, therefore, understood that this body of people selects five of its most progressive and representative men, who shall give to the work their best thought and energy. Not only that, but these five men, being the representatives of the florists at large through their state organization, bring the mature and ripened judgment of all the best florists within the state to the meetings with the University officials. It is here at these meetings between the advisory committee and the station officials, where the plans are matured after the most careful deliberation. I recall with a keen sense of satisfaction the wisdom and foresight which was brought to bear on the work by the five men with whom we have met from your Association during the past two or three years, and I assure you, gentlemen of the convention, that if the work has been faulty, or if this institution has not accomplished all you have expected of it, it is not because of neglect on the part of any of these, our associates in the work. Hour by hour through many a long day, and well into the wee hours of the night, have the members of this floricultural advisory committee deliberated with us, seeking ways and means looking toward the best development of the work. I repeat, therefore, that what has been done has been your work.

The work has not only been planned but pushed forward for you and by you through this superb co-operation, which means so much in the way of public service. In the largest and best sense the entire University is your University, but the floricultural work in the College and in the Experiment Station is in a peculiar sense your own. You, through your representatives on this committee, have made the plans; we here are your servants striving in every way within our power to carry them out. It is, therefore, your duty as florists, to make your wishes known and to co-operate with us through your splendid organization. If you have problems on which you want help, remember that this floricultural plant which we have built belongs to you. It does not belong to me or my associates and we exhort you to make the equipment and the possibilities which lie within it serve your purposes in the best possible way. It is your further duty as florists to make your therefore, as florists to make your

A PORTLAND (ME.) FLORIST STORE.

The accompanying illustration gives a good view of the new store of E. J. Harmon Co. of Portland, Me. Description other than what is so well shown in the picture is hardly necessary. It is a credit to Portland and to Mr. Harmon and his manager,

Miss Hayes, both of whom appear in the photograph. The store is located on Congress street, the main business thoroughfare of Portland. A fine patronage has been gradually built up from small beginnings, until now E. J. Harmon Co. are the leading florists of the city.

wants known not only to us, but to your senators and representatives to the end that when those people meet at Springfield to decide on the very best way to dispose of the \$20,000,000 of state appropriation, that the florists, who are heavy tax-payers, will not be forgotten. So, let me again remind you that you have a serious duty, a constant and ever present duty toward this, your newly developed child at the State University. This youngster will need not only to be fed and clothed, but it needs some brothers and sisters. We have an excellent range of houses, but these must be devoted for a long term of years to the special problems for which they are now being used. If we are to do your work in the largest and best way we must have rose houses, chrysanthemum houses, violet houses, orchid and palm houses. What we have done thus far is but a beginning. We must go forward until there is here on the Campus of your University an equipment for Floriculture which will mean as much to this industry as does some of our other equipment to the other industries of the state. If, when this is all done, it should chance to be that we have not succeeded in adding one jot or tittle to the sum total of floricultural knowledge, the effort will have been worth while and the money will have been wisely spent because by it and through it there will have been developed in the hearts and minds of these three or four thousand students a love for and appreciation of flowers, the importance of which can only be appreciated by you men who spend your lives in this—the noblest profession or calling of mankind. Will we do our full duty; can we be made to see the glorious opportunity?

A "WIRELESS" FROM COLLEGE POINT, N. Y.

Roses, roses and roses are in greater number than ever at the big Schultheis establishment, full of bud and all ready to sparkle for the Easter buyer. Among the sensational sellers is the pretty dwarf growing Mrs. Cutbush. Mr. Schultheis endorses all that other observant growers have had to say about this variety. The flowers are of the daintiest pink and the buds being much darker give a peculiarly lively effect. Flower of Fairfield, the Ever-blooming Crimson Rambler, is another good seller, and the demand for it for all purposes is bound to increase amazingly as soon as the growers and the public become familiar with its characteristic of flowering on every young growth. Lady Gay, Hiawatha, Tausendschon, Star Flowered Rambler, Wedding Bells, Dorothy Perkins and Crimson Rambler are here in long ranks of balloon shaped, standard and bush form, and it is to be noticed that low, symmetrical bushes prevail and the very large specimens so plentiful in past years are no more in evidence. Besides the Mrs. Cutbush, already referred to, there are among the dwarf growing sorts Baby Rambler, Pink Baby Rambler, Baby Dorothy and Apple Blossom. Mr. Schultheis objects to the last named, sweet as it is, because of the propensity to shed its petals soon after opening.

Azaleas are studded with buds ready to break, double flowering peaches, genistas, lilacs, ericas, acacias, boronias, hydrangeas, bulb pans and last, but most important of all, the lilies, are all in good time for the early Easter, and are certainly a cheerful proposition after a tough winter full of more than the usual amount of anxiety.

SEASONABLE NOTES ON CULTURE OF FLORISTS' STOCK.

Adiantums.

Plants started into growth from divided stock will now need careful attention. After repotting keep them moist, and if a few degrees more warmth be given they will make nice specimen plants by mid-summer, and a good many will be easily marketable at a much earlier date. For bench-grown adiantums for cutting purposes that have become nearly denuded of foliage by constant cutting, it is now time for a rest. In the interval between two main crops, water should never be entirely withheld but reduced to a minimum, while enough of moisture must be present at the roots to maintain the new growth. For a while just a light sprinkling will give all the moisture needed. When new growth attains size and shape water in the usual quantities can be resumed. While the plants are young and making luxuriant growth they will require more shade than later on, when the foliage gets hardened. These notes refer to *Adiantums Croweanum*, *cuneatum*, *gracillimum*, and *hybridum*.

Asters.

Successive sowings of the best strains obtainable should be made from now or until the middle of May. Use good fresh soil and, if heavy, it will stand a quantity of sand to lighten it up. A cool house of about 50 to 55 degrees is right for the seedlings. When about an inch high they should be transplanted into flats, small pots, or frames. Sow early, mid-season and late sorts in order to cover the entire aster season. Don't let them get stunted and root-bound in the seed boxes, thus weakening them and rendering them more susceptible to the attacks of diseases and insect pests. Many failures can be attributed to this one cause.

Crotons (*Codiaeums*).

Now or up to May is a very suitable time to propagate croton cuttings. If you can put them in a propagating frame so much the better; they can be aired frequently before being taken out so as to prevent a check when potted. In selecting the cuttings, only clean healthy wood should be chosen. They should be potted into small pots when rooted and care should be taken to keep them close and shaded for a few days. They must have a very moist atmosphere and frequent syringings to aid them until they get established. Plants that have outlived their usefulness can be mossed by cutting an upward incision and tying some moss around the incision which should be kept continually moist, the plant receiving only water enough to keep it alive at the roots. When roots have made their appearance the tops can be cut off, potted and handled in the same manner as cuttings as above mentioned.

Coelogyne cristata.

These orchids are very useful for the florist, being easily managed and profuse bloomers. The time for repotting or dividing is just after flowering. Although they can be grown on blocks of wood, pot culture is preferable. Plants which have

grown too dense will require separating and starting over; others will only require top-dressing—that is if the potting material is still good. A good compost may be formed of equal parts of chopped fibrous sod with the fine part well shaken out, peat fiber, sphagnum and some broken charcoal; the pots should be half-filled with drainage of clean broken crocks. The plants should be raised above the rim of the pot upon a moderate cone, and the compost pressed rather firm. After shifting, dividing, or top-dressing, spray them frequently and keep shaded. While coelogyne requires and enjoy a good supply of water in their growing season throughout the summer, when the growth of the bulbs is matured, just give enough moisture to keep the pseudo-bulbs from shrivelling. A temperature of 50 to 55 degrees suits them well. They enjoy a moderately cool house at all times.

Bougainvilleas.

These are splendid spring-flowering plants. The sprays of flowers are good for cutting and last for an almost incredible length of time, while as pot plants they are of great value for decorations. Those intended for Easter that are in flower will require plenty of water, and care should be taken that they do not get dry at the root, which is sure to give them a check. If flowers are well developed at this time they will be better to be moved into a cooler house. Cuttings of half ripened wood root easily from now until May, and will make nice plants for 6 or 7 inch pots by next fall.

Pelargoniums.

The chief point to be observed in working up a fine stock of fancy pelargoniums is to throw out all shabby, poor or stunted plants; they only help to disfigure any good collection. Those plants that have been shifted into 5 or 6 inch pots in January will be growing very fast now. When the warm days of spring come they will need plenty of water, but during cloudy or dark weather give very little water, as the principal thing to be avoided is dampness. Watch out for the aphids; they are bound to be troublesome. Nothing but regular and constant fumigation will keep plants from being injured by the greenfly. They thrive in a temperature of 50 degrees at night.

JOHN J. M. FARRELL.

Mr. Farrell's notes next week will treat of *Cobaea*; Time to Propagate; Handling Seedlings; Plants for Vases; *Caladium Esculentum*; Outdoor Sweet Peas.

"WIRELESS" FROM NAHANT, MASS.

Within sound of the roar of the Atlantic breaking on the rocky headlands of Nahant, swept by ocean breezes laden with health-giving properties for man and vegetation, the establishment of Thomas Roland at Nahant, Mass., is unique, and the combination of horticultural experience and good judgment with climatic conditions gives results which make a visit to the range of houses on the rock-bound peninsula a pleasure and inspiration long to be remembered.

Mr. Roland has just completed an addition of eight new houses of the most substantial construction: walls, gutters, benches—in fact, everything that can possibly be constructed of cement—are of cement and good for a lifetime.

Easter plants are in the ascendancy just now. The new houses are filled, in the main, with roses—*Hiawatha*, *Lady Gay*, *Tausendschon*, *Catherine Zeimeth* and a number of new claimants, including that lovely peach-pink double-flowered variety from France called in this country *Mrs. Taft*. Here one can see the perfection of pot rose training—*Crimson Ramblers* tied down till they form low dense bushes laden with flowers, which practically hide the pot. Charming little specimens of *Hiawatha* ready to burst into a galaxy of bloom and all the so-called "Baby" *Ramblers* in bewildering variety bear testimony to the fact that the rose is rapidly coming to its own as an Easter specialty, second to nothing else. All the roses on Mr. Roland's place are grown from cuttings home-raised.

There is an interesting proposition in a bench of *calceolarias*, raised from seed of George Stewart's hybrid between varieties of the shrubby and herbaceous sections. These plants will be in bloom in May and will be worth watching. *Acacias* are here in more than the usual number of species to be found in commercial establishments. There are *pubescens*, *armata*, *longifolia*, *grandiflora*, *heterophylla* and *Baileyana*, besides a number of others not yet in salable stock; *Erica cupressina*, *melanthera* and *persoluta rosea* seem to revel in the saline atmosphere, and *boronias*, *bougainvilleas* and other standard Easter plants are at their best. Of *hydrangeas*, there is an interesting display, for here all the new and improved sorts get a fair trial and among those seen in quantity are *Souvenir de Clair*, a handsome, neat habit-ed pink variety, and *Avalanche*—the latter destined to supersede *Thomas Hogg* and the later variety *Joan d'Arc*.

Genistas trained in the form of Swiss flower baskets on home-made frames make one covetous to possess them. *Amaryllis* in dazzling array and *imantophyllums* fairly blaze in the sunlight and particularly in the case of the latter one is forced to wonder why it is that the commercial plant grower has overlooked these gorgeous gems among spring blooming bulbs.

Lilies? Of course, 10,000 plants in one house alone. In another 25,000 candytufts in 2-inch pots ready to occupy the space when the lilies vacate at Easter, and make for the enterprising owner from the Decoration Day receipts, the price of another range of houses! And there are 30,000 leaf-struck *Lorraine begonias*, best ever in Mr. Roland's inspiring career.

Just a word more. The hot water which plays so important a part in the fine work done at this notable establishment gets its push and effectiveness from that little giant of modern greenhouse equipment and economy—the *Castle Automatic Circulator*. So says Thomas Roland—and he knows!

SOCIETY NEWS FROM ABROAD.

Royal Horticultural Society.

The annual report has just been issued by which it appears that the total number of members to the end of 1909 was 11,030, truly an enormous number for any horticultural society. The vacant V. M. H. medals were offered to Messrs. W. Botting Hemsley, J. H. Goodacre and A. MacKellar. It is announced that the Society has in contemplation the holding of a great International Horticultural Show on similar lines to that of 1866. This will probably take place in 1911 or 1912. Negotiations are pending with the Findley Library trustees, with the object of uniting the library more closely with the R. H. S. Last year the Society sent deputations to the Berlin, Birmingham, Gloucester and Cardiff shows and this year a deputation will be sent to the International Bulb Show at Haarlem.

A party of 90 German horticulturists, who came to visit English gardens, were entertained by the R. H. S. to luncheon on the occasion of the Holland House Show and expressed themselves pleased with their reception and also the magnificence of the show.

Portraits of Baron Schroder, Sir Thos. Hanbury and Mr. Harry have been or are to be shortly presented to the Society. The book of arrangements for 1910 gives very full details of the work to be done during the present year.

National Dahlia Society.

This society, with which is now incorporated the London Dahlia Union, held its first conference on March 1st at Carr's Restaurant, Strand, London. The following papers were read: Dahlias for Garden Decoration, by George Gordon; Growing Dahlias for Exhibition, by J. Stredwick; Methods of Exhibiting Dahlias, by J. B. Riding.

National Sweet Pea Society, England.

The schedule of prizes for 1910 is just to hand. We see that the tenth exhibition will be held in the Royal Horticultural Hall, Westminster, on the 12th and 13th of July next. There will be no provincial show of the society this year. Among the prizes are the Sutton Cup, the Henry Eckford Memorial Cup, the Provincial Challenge Cup, the W. Atlee Burpee Challenge Trophy, the Horace Wright Challenge Trophy, the Walter Voss Challenge Cup.

Garden Life Year Book and Who's Who in Horticulture.

The issue for 1910 of this new annual, which only came out last year, is a great improvement on its predecessor. Apart from the ordinary matter the section entitled "Who's Who

in Horticulture" contains short biographical notices of about 300 eminent English horticulturists, who they are, and what they have done. There is no other English garden annual that supplies these details, and as a work of reference in this respect the book should be of great value.

French National Chrysanthemum Society.

This society now numbers 784 members, of which 61 are affiliated societies. The 15th Congress will be held in Paris next November, under the auspices of the National Horticultural Society of France. The January number of *Le Chrysanthème*, the society's official organ, contains an excellent photogravure of the members of the Marseilles Conference, several literary articles on matters referring to the chrysanthemum and a continuation of the report of the Marseilles Conference.

L'Association Francaise des Amateurs et Jardiniers Chrysanthemistes.

This is a flourishing chrysanthemum society, whose headquarters are at Paris and in a way a rival to the older established *Société Française des Chrysanthemistes* of Lyons. The membership is now over 800. Its official publication, "*La Revue Chrysanthemiste*," is published regularly every month and, like the other society, it holds an annual conference.

We have just received a copy of the society's new publication, "*Grammaire Chrysanthemiste*," a cultural manual, well printed and liberally illustrated, of about 140 pages. A pretty little badge for the use of members has been struck, representing a flower of the chrysanthemum. It is supplied in silver gilt to members only.

Brussels International Exhibition.

In connection with the Brussels International Exhibition of 1910 an International Horticultural Congress will be held. It will take place from April 30 to May 3, and the program has recently been circulated.

All persons interested in horticulture are invited to take part and societies can also be represented. Particulars may be obtained of M. Ed. Rodigas, 229 rue de la Consolation, Brussels.

The subjects for discussion are divided into seven sections with a committee to preside over each. They are as follows: Floriculture, Fruit Tree Culture, Market Garden Culture, Science and Popularization of Horticulture, Horticultural Economy, Horticultural Construction and Engineering, Special Appliances, such as Electricity, etc.

ENGLISH COMMENT ON SOME OF THE NEWER CARNATIONS.

We clip from the *Horticultural Trade Journal* of London the following notes on the behavior of some of the recent introductions in carnations under English conditions:

Apple Blossom. A delicate pink, shading off to white at the outer petals of the flower. When the flowers are good it is a beautiful fancy variety, but these too often come to a poor white. The variety is too uncertain to be of any commercial use.

Alvina. A deep cerise, similar in color to *Aristocrat*. The flowers are not large, but of refined appearance. The one redeeming feature of this variety is its excellent habit of growth, which is very quick and free. It may prove a good market variety.

Black Chief. A dark crimson with the old clove scent. It has a wonderfully free habit of growth, and makes an exceptionally large plant. With some growers it has been a little slow in coming into bloom, but there is no doubt about its total crop of flowers exceeding all other crimson.

Bay State. A white pencilled carmine, in the way of M. A. Patten. It carried all before it in America last season owing to its large massive flowers, but over here the flowers are small, and growth, whilst being exceptionally strong, is very slow. No doubt it will show up better in the spring.

Fortuna. A yellow variety with a trace of buff in its color; the flowers are not large, but the plant grows well and is very free. A great advance in this class of color.

Lady Dalnty. Purely a fancy Carnation. White, overlaid with pale purple. Short compact habit of growth, and flowers with the strongest perfume.

Lucille. Yet another fancy Carnation in the way of the old *Prosperity* class. The flowers are large, and rich in color. Its habit of growth is rather inclined to be weak, but the stem is wiry. This may prove a commendable variety.

May-Day is the one variety which has been talked about. The flowers are not large, but of shapely build, with almost smooth edged petals. The habit of growth is wonderfully free, producing a phenomenal crop of bloom. There is some doubt as to its lasting qualities.

Mr. Chas. Knopf. A seedling from *Enchantress*, and is similar to its parent in all details, except that the color is a few shades deeper, and the calyx decidedly stronger. This variety may prove of great merit.

Mrs. J. C. Vaughan. A white variety, which was largely advertised in America. As yet it has failed to make good over here, being slow in coming into bloom. The flowers are exceptionally large, but the petals lack tissue.

O. P. Bassett. The scarlet variety of American origin. One which has had a record sale in the States. The color is very bright, flowers large with fringed petals. Planted out on benches it is a little slow, but in pots it gives great promise, a variety all should grow.

Pink Delight. A salmon pink. In growth and build of flower it is very similar to *White Perfection*. It will not prove a great producer, but the flower is of high quality.

Rival. One of the art shades which promise to be so popular. It might almost be described as a bright salmon red. The flowers are large with big guard petals, sound calyx, and an exceptionally free habit of growth.

Ruby. This variety has not lived up to its name over here, and is disappointing. It is not ruby in color but crimson maroon in the way of *Harry Fenn*. Indeed, it reminds one of that variety. The color is affected a little by dull weather, also it splits a little.

Rose Dore. This has been well shown by its raiser and will live up to the high standard set. It is described as a salmon rose, quite a new shade of color, but sure of a large sale. The habit is pretty strong with a good calyx and flowers large.

Royal Purple. Yet another new break in the Perpetual Flowering Carnation. Quite a rich purple shade which shows up well by artificial light, and will be a most popular novelty. Of good size, with one of the freest habits of growth.

Wapoka. A crimson seedling from America. The name is Indian, and means "one of a kind" and in the case of this variety, it is something to be thankful for.

W. H. Taft. A very indifferent red variety, rough in appearance and weak in stem. A great pity it was given so good a name.

Chas. H. Payne

Few gardeners have any idea of the size of the Maule Seed business. To one firm of celery growers I have sold in the last five years over 1,000 pounds of my XX Golden Self-Blanching Celery seed; this year I have already shipped them 200 pounds for their own planting. To another gardener I shipped last year \$550 worth of Maule's Prize Earliest Cauliflower; this year I am getting \$100 per pound for this seed. In one county in New York last season I sold almost 1,000 pounds of my selected Danish Ballhead Cabbage. One of my customers last year cleared up \$3,375 net on 15 acres of Maule's Earliest Valentine Beans, another made \$9,000 net profit on a 50-acre field of White Bush Squash; another, on 300 acres on an Island in the San Joaquin River, in California, made a net profit of \$92,000 on Maule's XX Golden Self-Blanching Celery. In the small town of Sunnyside, Wash., I shipped last year direct to growers 110 pounds of Maule's Earliest of All Tomato seed, while in a small town in Texas, with a population of 25, more than \$3,000 worth of Maule's Seeds are annually consumed.

I will be glad to send my Seed Book for 1910 to every reader of Horticulture who will send me their address on a postal.

Other facts are that in the last five years I have paid the U. S. Government \$214,898.07 in cash for postage. For years I have received more registered letters at the Philadelphia Post Office than any other Philadelphia seed house. In my home State of Pennsylvania alone I have 67,801 customers, fully 15,000 more than any other seed house in the country. During the late Boer War more cases of Maule's Seeds, bound for the Transvaal, were held up by the British Army than of any other seedsman, whether French, German, English or American. These facts may prove of interest to readers of Horticulture who do not know Maule. Maule's Seeds have today a reputation surpassed by none, equaled by few, and as you can get

YOUR MONEY BACK IF NOT SATISFIED

you need this book in your business. Send me a postal today and put money in your pocket.

More than 1,000 local Florists annually plant Maule's Seeds.

Wm. Henry Maule, 1761 Filbert St., Philadelphia, Pa.

SEASONABLE NOVELTIES IN FLORISTS' SUPPLIES.

All florists are interested in the latest in spring and Easter novelties in the way of baskets and other florists' supplies.

To get a grasp on these your correspondent had to get expert advice, hence a visit to the warehouses of M. Rice & Co., which amply repaid for the time taken.

Under the courteous escort of Mr. Eschner, of the firm, we saw and were amazed at the many beautiful things they were offering this spring and the development this business has under-

Rattan Adjustable Pot Cover.

gone in twenty-five years. A ten by twelve shop has become a seven-story warehouse covering acres of floor-space—and the end is not yet, if we may judge from the building operations and additions going on around this establishment.

An immense pile of purple beech branches Mr. Eschner explained were ordered for a big decoration in a western city. On the suggestion that beech branches were a fall item, it was explained that this specialty is non-combustible and has been indorsed by the underwriters' association, so it's the thing for spring also. Wild smilax is under taboo because it gets dry and brittle and dangerous. The first cost of the beech spray is greater but they can be used again and again

—so that they are really cheaper in the end and, being non-inflammable, escape the ban of the fire insurance people.

The next big item was the stacks and stacks of Porto Rico matting for pot covers. The old crude idea of this wood fibre matting has been vastly

M. RICE

improved upon. It looks now as if it were made out of the much more costly raffia instead of wood fibre. This effect is obtained by crushing the strands on the cross grain and leaving them plain on the other, producing a softer, more pliable and altogether better mat. Also piled up for shipment, a most noticeable thing was the new self-adjustable pot cover. This is a far different and better proposi-

tion than the old type of pot cover made of crepe. The Adjustable is woven with rubber and will fit any pot of its depth so one has only to order accordingly making a substantial saving in the amount of stock to be carried. And we are shown something even better—this being made of rattan with two steel springs woven on the inside. This also is made to fit any width of pot and is open down the side. All one has to figure on is the depth of pot.

One of the best selling novelties of the season is what is known as the

Etruscan Basket.

natural brown twig baskets. The sombre color harmonizes with any color of flower and the artistic and novel shapes give a finish to even inexpensive floral work otherwise unobtainable. One of the most popular styles is what is called the coracle—a sort of round boat-shaped effect.

A new idea is the tumbler basket. This is built to hold an ordinary tumbler and is filled with flowers—the big handle and the natural brown twigs give the most graceful and charming effect. These come besides in green, gold, and other shades; and also in white birch. What we might call a cradle basket in natural willow with a sweeping bow handle, sashed on top, with a bunch of twigs is an excellent new form and especially suitable for two or more plants, each side showing with ribbon overhanging. A rich result at small cost can be obtained by judicious use of this style of basket.

Next comes what Mr. Eschner seems to think a gem—the Dutch basket! A magnificent seller. Well, everybody to his taste. The Dutch basket has a box-like body with high side handles. It is of white birch bark in the body with natural twig handles at the sides-standing straight up. As to its charms your correspondent passes and confesses lack of up-to-date artistic taste.

The American Beauty basket is a long high concern (with no diameter to speak of) and a sweeping bow handle. This is made to drop a fibre or other vase in. Very effective. There are a lot of high-priced contraptions for American Beauty with long stems. But this seems to us the most sensible of all. It fills the bill artistically and costs far less than the best we have seen in the last twenty years.

We now come to the ribbon department with its bewildering array of rolls and colors to meet the needs of every imaginable flower tint and shade. To describe same is beyond us. All we can say is that any florist who cannot be satisfied here—whether in variety, quality or price, must be the Admirable Crichton of florists, for sure. One ribbon item we will ven-

Dutch Basket.

Headquarters for Hardy

Japanese Lilies

FOR IMMEDIATE DELIVERY

The Hardy Lilies are planted by many florists now. They bloom outdoors in July and August and are extremely useful for decorative purposes. The Auratum, Album and Rubrum are excellent for forcing.

	Per doz.	Per 100	Per 1000
Lilium Auratum (Golden Banded Lily).

Philadelphia, Pa

LILIUM AURATUM
Cold Storage during June, July and August

ture to mention, however, and that is what is called "silk stripping." This is made of raw silk, and is mostly about one inch in width. It makes up equally as well as regular ribbon costing twice the price. In fact, it is glossier and holds its shape far nicer than anything else, no matter what the cost. This "silk stripping" comes in all shades called for in the flower business.

day—which find a ready market. There is a green twig flower basket with a mildew effect that especially illustrates this.

Of course, we have to take note of the flying machine baskets, and aeroplanes and automobiles, and sleighs! There is more demand for these things than one might think. Not only in the effete East but in the virile West,

the imported carry the day. In the work rooms on the third floor, basket making, wheat sheaves, wedding outfits—and goodness knows what all—are in brisk operation all the time. This is where the Rice trade mark, "originators," comes in, and also where in most cases they are able to hold their ground in the face of all competition when it comes to a question of price.

Natural Willow Plant Basket.

Crepe Adjustable Pot Cover.

Ascending to another floor we come on more baskets. The Etruscan chip—simple, effective and cheap—no wonder it has had a great run. The merit of this lies more in the ingenuous working of the bronze green exterior than in anything else. There is a bronze garland draped around in permanent, yet inexpensive style. And, by that same token, this dull bronze and green is carried out in numberless other patterns of baskets seen on this floor and is one of the hits of the

the desire to be up-to-the-minute seems strong. One enterprising florist down South sends in a recent order explaining that he is to have a rooster for pilot with lots of little Easter chicks down below which he is to sell at a quarter. This for a flying machine.

The trade as a rule, says Mr. Eschner, is partial to natural willow and most of the designs in that connection especially in the larger sizes are home-made; but in the smaller sizes

Seed Trade

Prosecutions in Iowa.

Seed men all over Iowa are being closely watched by the state food and dairy commissioner, Wright, who has already instituted proceedings against several for selling seeds not up to the standard of purity as required by law. Prosecutions against the following for alleged violations were started:

C. E. Briggs, Onawa, for selling clover seed only 80 per cent pure. The state law requires that it be 90 per cent. pure. J. Lohrman, Wheatland, for selling clover seed only 83 per cent. pure. C. E. Briggs, Onawa, for selling sugar cane seed 85 per cent. pure, the law requiring that it shall be 95 per cent. pure.

CATALOGUES RECEIVED.

W. B. Longstreth, Gratiot, O.—"Seed Annual and Bargain Catalog."

E. E. Stewart, River Junction, Mich.—Wholesale Trade List of Gladioli for 1910. A selected list.

John D. Imlay, Zanesville, O.—"A Few Choice Seeds and Plants, 1910." A useful little retail catalogue of garden material.

M. Crawford Company, Cuyahoga Falls, Ia.—Catalogue of Strawberry Plants and Other Small Fruits. Contains concise and excellent cultural instructions for strawberry growing.

Wagner Park Conservatories, Sidney, Ohio.—Catalogue Number 18. One of the artistic publications of its class. Printed in dark green ink, well arranged, with half-tone illustrations of stock and plantations.

Northrup, King & Co., Minneapolis, Minn.—"Sterling Seeds" 1910. This is the 26th annual issue of this big catalogue. Like its predecessors, it is very complete and comprehensive in all departments. The front cover is especially pleasing with a finely colored clustre of single poppy flowers.

H. G. Hastings & Co., Atlanta, Ga.—Seed Catalogue No. 38. Cover in plum color with white lettering and a big bunch of cotton bolls makes a striking feature. Watermelons of luscious appearance adorn the back cover. Cotton seed of superior quality is a special feature with this house.

W. E. Dallwig, Milwaukee, Wis.—Seeds 1910. A showy and impressive catalogue; covers almost plain, daintily adorned in violet and gold. Many special illustrations on cream colored inserts scattered through the book are sure to attract attention. Also from same firm, Wholesale Price-List of Seeds in Bulk for Market Gardeners.

R. Vincent, Jr., & Sons Co., White Marsh, Md.—Wholesale Trade List of Vegetable, Greenhouse and Bedding Plants, 1910. This firm's specialties are well known. The list just received gives a very complete selection of variety that every up-to-date florist and market gardener should have. Hardy chrysanthemums, dahlias and geraniums are particularly strong in meritorious novelties and the vegetable plant department is well filled with seasonable things.

HENRY ECKFORD.

We are indebted to W. Atlee Burpee & Co. for the photograph reproduced herewith of the late Henry Eckford. This picture, heretofore unpublished, is considered to be the happiest and most striking ever taken of this grand old English gardener, and we are glad to be able to present it to our readers in memoriam of the good work he accomplished in many lines—especially in sweet peas, in which he was the pioneer in the modern large-flowering strains. Much splendid work has been done by others since; but we should always remember that Eckford was the father of them all. It is interesting to note in this connection that the first American recognition of the Eck-

HENRY ECKFORD

ford achievement appeared in Boston; the Breck Company being the first to catalogue the new strain. This was good, and all due credit is awarded; but the real boom started when Burpee took a hold of them. It was Burpee (or rather Burpee's manager, Howard M. Earl), who discovered Hutchins—the New England clergyman who has since done so much—under Burpee's encouragement, by tongue and pen, for the sweet pea. Eckford, Burpee, Hutchins—our national society should have their pictures on every piece of literature they send out.

Bath, Me.—William R. Kimball, proprietor of the Pine Tree State Seed Co., recently enlarged his business by the purchase of the Eastman Seed Co. of East Sumner, formerly owned and operated by Mr. W. H. Eastman. The sale includes Mr. Eastman's list of customers, also all of his specialties.

EARLY TOMATOES

In Concrete Plant Protectors. For use in garden or field. Keep out frost and draw heat. Set plants in the field a month earlier. Field trials show four times the yield, ripening a month ahead of season and value increased 100 times. No blight or insects. Useful for lettuce, rhubarb, melons, etc. Hold water for irrigation. Patent just issued on protection; and line wire opens or closes 100 instantly. Illustrated treatise tells how to make them quickly at 2c. each, how to make mold at 25c. Also full information about this method. Each purchaser of book has privilege to make mold and protector. Mention this paper and send \$1.00 for book. Money back if not satisfied.

THE BURPEE PREMIUMS.

The Burpee premiums consist of a cash prize of \$20 for the best collection of vegetables grown from Burpee's seeds and shown at state and county fairs. Also a cash prize of \$5.00 for vegetables or flowers under the same conditions. \$1.00 extra is added for a photograph of the exhibit winning the \$20 prize and for the best photograph in this connection there is a special \$10 offered. An extra prize of \$100 is offered for the exhibitor who wins the greatest number of prizes for the products of Burpee's seeds in 1910. The largest total, in amount of money, wins in this \$100 sweepstake.

The secretaries of all state or county fairs in the United States are authorized in the 40-page prize supplement, just issued, to offer these premiums in their schedules for the year 1910.

As there is no mention of horticultural societies (or other similar organizations) it is presumed that only state and county fair secretaries come under the provisions of the offer. There may be good reasons for this limiting, yet it seems to us it might be broadened; not only for the advancement of horticulture under the auspices of horticultural and floricultural associations—as distinct from county fairs; but for the benefit of the business of the generous donors.

We will be glad to hear from Mr. Burpee as to his reasons for excluding these associations—that is, if we are correct in assuming that he does so limit his offer.

The Burpee special for 1909 was won by Martin L. Bell, Sparkill, N. Y., with a total winning of \$1,400.20. This is the fifth time in succession that Mr. Bell has won the champion prize.

G. C. WATSON.

THE SEED TRADE DISCLAIMER.

Editor of HORTICULTURE:—

It is not to compete for the valuable prize you offer in your issue of Jan. 22 that I wish to reply to the article entitled, "A Clever Guarantee on Seeds." It is rather because a far-reaching decision has been rendered by a judge in Iowa upholding

the disclaimer now in common use, so recently.

Mr. Burpee's disclaimer does no more and no less than the official disclaimer adopted by the American Seed Trade Association, only it approaches the matter from the opposite side. Mr. Burpee's disclaimer tells what he will do; the official disclaimer tells what the seller will not do. Withal, Mr. Burpee will not do more than any other reputable seedsmen has done or will do, but his disclaimer states plainly just how much a purchaser may expect under certain conditions, without any quibbling and leaving nothing to the imagination and to that extent I believe the disclaimer is good and might well be added to the official disclaimer.

You will notice I use the word "added." My reason for doing so is because the use of the official disclaimer has been a custom for so long that it has been recognized as a law, invaluable in case of unjust lawsuits and safe now to use as the groundwork for defense.

For that reason, if for no other, I think the trade should adopt the official disclaimer, now that it is recognized in the courts, even if someone thinks he has a better one. It might be worded better, perhaps, but none other has been recognized in the courts and it is to that extent better than any other.

I therefore think that on the whole the Official Disclaimer is the best to use.

Yours truly,

C. E. KENDEL, Sec'y.
Amer. Seed Trade Asso.

OBITUARY.

Francis B. Dwight.

Reading, Pa.—Francis B. Dwight, a veteran seed dealer, died at his home, 1574 Mineral Spring Road, on the 82nd anniversary of his birth.

Percy Taylor.

Percy Taylor, well known to the trade and for many years a writer for horticultural and agricultural papers,

died of pneumonia at Elgin, Ill., Thursday, March 3. Mr. Taylor was born in Portsmouth, England, 59 years ago. The funeral took place Sunday, March 6. Mr. Taylor was an intimate friend of the late John Thorpe.

Maurice Butterfield.

Maurice Butterfield, 64 years old, widely known among nurserymen and horticulturists of the United States, died in Winona, Tex., Feb. 20, from Bright's disease. He conducted nurseries at Lee's Summit and Farmington, Mo. Mr. Butterfield was one of the leading benefactors and organizers of the Missouri State Horticultural Society, also the Jackson County Fair, which was held annually at Lee's Summit, Mo. He recently went to Texas in hopes of benefiting his health.

The C. W. BROWNELL COMPANY

WALDEN, N. Y.

During Recess

Tuxedo Horticultural Society.

The former members of the old Tuxedo Horticultural Society recognized the spirit actuating those new members who were instrumental in starting the society up again, by voting at a recent meeting to hold a social celebration, and it certainly was a celebration and a good one that came off on the evening of Wednesday, March 2, in the Village Club. The first installment was a bowling contest. Here the old stagers had the advantage of practice, but the others made up with enthusiasm what they otherwise lacked. When the exertions of bowling seemed to tell, the president led the way to the banqueting room, where the committee had in readiness an elaborate collation. Thomas Murray presided here as elsewhere and after the lighting of cigars remarks were made by the vice-president, James MacMachan; James Allen, David S. Miller, Fred. Bently, Albert Fischer, Joseph Tansey, Patrick Cassidy and David McIntosh. After this some more bowling brought a very enjoyable entertainment to a close. The committee consisted of G. O.

Bush, Fredk. Bently and Fred. Rake.
DAVID MCINTOSH, Sec'y.

CLUB AND SOCIETY NOTES.

The El Paso County Horticultural Society is agitating the proposition of a horticultural building with exhibition hall, library, etc., in Colorado Springs. We hope they will succeed.

Ed G. Bass, of Topeka, has issued a call for a meeting of the florists of Kansas to be held in Topeka, June 8. The purpose of the meeting is to organize the florists and all others who grow plants under glass in Kansas.

Mr. Jerome Jones of Boston has offered—and offer has been accepted—a prize of \$15.00 to be awarded by the Horticultural Society of Chicago for best twelve blooms of Chrysanthemum Mrs. Jerome Jones exhibited at the Chicago show of 1910.

The next meeting of the eastern branch of the American Association of Park Superintendents will be held at the Continental Hotel, Philadelphia, Pa., Saturday, March 26th, 1910. At the same time and place a meeting of the directors of the National Association will be held.

The next regular monthly meeting of the Cincinnati Florists' Society will be held Monday, March 14th, 5 P. M., at the Jabez Elliott Flower market.

After the meeting the members will go to Wielert's where they will have bowling, lunch and refreshments at the expense of the Society. A. O.

The preliminary schedule of the fifteenth annual show of the Morris County Gardeners' and Florists' Society, comprising \$2,500 in prizes, including a \$150 sweepstake cup, has been mailed. Those who have not received a copy of it may obtain same by applying to the Secretary of the Morris County Gardeners' and Florists' Society, Edward Reagan, Box 334, Morristown, N. J.

At the monthly meeting of the Dutchess County Horticultural Society held at the rooms of the Poughkeepsie Club, Poughkeepsie, N. Y., several important changes were made in the by-laws of the association, and Assemblyman Upton's bill on commission merchants of the state was indorsed. The paper for the afternoon was read by James Bell, of Garrisons, on the subject of the "Cyclamen."

Murphysboro, Ill.—The Wisley greenhouses at Oak and 16th Sts. were damaged recently by the weight of snow upon the glass. About 70 feet of glass was broken and the frame twisted the entire length of the house. Loss is estimated from \$1200 to \$1500; repairs will begin at once.

STRATTON'S GREENHOUSE,

C. D. Stratton, Prop.

Lancaster, Wis., Feb. 28, 1910.

Aphine Mfg. Co., Madison, N. J.

Gentlemen:—

The "Aphine" purchased through your agents, of Chicago, is certainly O. K. I have had universal success with it both as a spray and as a dip. Have dipped plants in full bloom, such as primulas, cinnararas, roses, etc., with no apparent ill effects on the plants or blooms, but with death to the bugs.

Would like to ask if you would consider it safe to use on edible vegetables such as cabbage, cauliflower, lettuce, etc.?

There ought to be a large sale of "Aphine" when the people become acquainted with it and can be sure of obtaining the results claimed. Yours very truly,

C. D. STRATTON.

See Pages 401 and 424 for other Aphine endorsement.

DECORATION DAY ROSES

The right time to buy Roses is when they are fresh and well ripened. Roses potted up in the Winter become better established and force better, and are more satisfactory in every way, and you can retard or force them at your leisure.

Baby Rambler Roses

BABY DOROTHY. The same in habit as Baby Rambler, but the color of the flower is similar to Dorothy Perkins. It makes an excellent pot plant for forcing. Price for strong, field-grown plants, 85c. for 5, \$16.00 per 100.

CATHERINE SEIMETH. A White Baby Rambler Rose, larger and better flowers than the type. White with yellowish center. 85c. for 5, \$15.00 per 100.

MRS. WM. H. CUTBUSH. Color intense crimson and exceptionally free-flowering. 85c. for 5, \$15.00 per 100.

MME. NORBERT LEVAVASSEUR (Baby Rambler). Strong, field-grown plants. 85c. for 5, \$15.00 per 100.

THE TREE BABY RAMBLER. (Grown as a Standard.) The popularity of the Baby Rambler has suggested the growing of it as a tree or standard... 40c. each, \$3.75 for 10, \$35.00 per 100.

BABY DOROTHY. (Grown as a Standard.) For description, see above. 75c. each, \$6.25 for 10, \$60.00 per 100.

Something New in Roses for Florists

Half Standard Baby Ramblers

These are Baby Ramblers, grown on stems or standards about one and half feet high, and will be a novelty for your trade you cannot profitably overlook. They are offered for the first time in this country in the following varieties:

BABY DOROTHY (Half standard). Deep pink. 60c. each, \$6.00 per doz., \$45.00 per 100.

BABY RAMBLER (Half standard). Crimson. 45c. each, \$4.50 per doz., \$35.00 per 100.

BABY CATHERINE SEIMETH (Half standard). White. 45c. each, \$4.50 per doz., \$35.00 per 100.

BABY "STARS and STRIPES" (Half standard). White and red grafted on the same plant; most attractive. 50c. each, \$5.00 per doz., \$40.00 per 100.

Hardy Hybrid Roses

We offer extra-strong forcing two-year-old dormant, low-budded stock, in the following varieties, true to name: Price, 75c. for 5 (of one variety), \$12.00 per 100, \$110.00 per 1,000 (immediate delivery).

Abel Carriere. Crimson. **Alfred Colomb.** Carmine-crimson. **Anne de Diesbach.** Bright carmine. **Ball of Snow** (Boule de Neige). Pure white. **Baron de Bonstetten.** Blackish crimson. **Baroness Rothschild.** Satin pink. **Capt. Christy.** Flesh color. **Clio.** Satin blush. **Duke of Connaught.** Rosy crimson. **Duke of Edinburgh.** Bright vermillion. **Eugene Verdier.** Crimson-violet. **Fisher Holmes.** Dark crimson. **Frau Karl Druschki.** The finest white. **Gloire de Margottin.** Dazzling red. **Gen. Jacqueminot.** Brilliant crimson. **John Hopper.** Bright rose. **La France.** Pink. **Mme. Charles Wood.** Bright carmine. **Margaret Dickson.** White, with pale flesh. **Marshall P. Wilder.** Cherry-rose. **Magna Charta.** Dark pink. **Mme. Gabriel Luizet.** Satiny pink. **Mrs. John Laing.** Satiny pink. **Paul Neyron.** Dark pink. **Perle des Blancches.** White. **Persian Yellow.** Yellow. **Prince Camille de Rohan.** Dark crimson. **Ulrich Brunner.** Cherry-red.

For prices see above.

Ramblers and Other Climbing Roses

TAUSENDSCHON

Flower of Fairfield The Everblooming Crimson Rambler

This variety is a sport from the beautiful Crimson Rambler, is similar in color, more brilliant and lasting than the old favorite. It also possesses the further advantage over the Crimson Rambler in the fact that it flowers profusely on the young wood the first year. Flower of Fairfield is a vigorous grower and free bloomer. It starts to bloom early in the Spring and continues until late in the Autumn. It is rightly termed "perpetual blooming." 40c. each, \$3.50 for 10, \$30.00 per 100.

Veilchenblau (Violet-Blue)

It has long been the desire of rosarians to secure a blue Rose. In Veilchenblau we have practically approached this color. The steel-blue flowers of this new Rose appear in large clusters, are semi-double, of medium size and keep in bloom a long time. The showy yellow stamens contrasting with the blue flower, give the whole a striking appearance. 60c. each, \$5.75 for 10, \$55.00 per 100.

PAUL'S CARMINE PILLAR. Flowers large and free; color rosy carmine. Two-year-old, field-grown. 85c. for 5, \$15.00 per 100.

CRIMSON RAMBLER. American Grown. The only stock for forcing. Large heavy plants, two years old, mossed and packed in bundles of 10, 3 to 4 feet, \$1.25 for 10, \$12.00 per 100; 4 to 5 feet, \$1.75 for 10, \$15.00 per 100; 5 to 6 feet, extra heavy, \$2.25 for 10, \$20.00 per 100.

DOROTHY PERKINS. Lovely shell-pink color. \$1.25 for 10, \$12.00 per 100.

TAUSENDSCHON. The new Rambler Rose. The name translated means a "thousand beauties." Color beautiful rose, shading to pink. \$2.25 for 10, \$20.00 per 100.

LADY GAY. A seedling from the popular Crimson Rambler, which it resembles in habit and general effect. The flowers are of a delicate cherry-pink color, which fades to soft white. Strong plants, field-grown, 4 to 5 feet. \$1.75 for 10, \$15.00 per 100.

ARTHUR T. BODDINGTON, Seedsman 342 W. 14th Street
NEW YORK

Deutzia Lemoinei

Is one of the choicest small shrubs, covered in the blossoming season with a profusion of pure white flowers. The tall varieties of Deutzia are also among the most beautiful flowering shrubs and should receive more attention from planters who aim to produce effective results.

A beautiful catalogue with many new illustrations will be mailed on request. It contains descriptions of these charming shrubs, also of the largest and most complete collections to be found in this country of

Tel. 1512 Franklin

Horticultural Department, J. P. Cleary, Mgr.

NOTE.—We will offer a complete list of Flowering Plants of every variety from prominent growers every day during the week preceding Easter. Correspondence invited.

ARTIFICIAL WARMING OF FRUIT PLANTATIONS AGAINST FROST.

The protection of fruit trees against frost during the flowering period, according to American methods, has been put to the test with successful results in England and on the continent of Europe. We read in American journals of vineyards of enormous areas, and crops having an estimated value of \$3,000,000 in the Grand Valley, Colorado, being saved by smother fires: the number of the braziers being on a average, 80 per acre.

This method will very probably be adopted in European vineyards and orchards before long, in those parts where damage from frost occasionally occurs. Something of the kind is commonly practiced during the danger period; that is, in central Europe, the 12th, 13th and 14th of May, when smother fires are ignited on the wind-

ward side of vineyards and orchards, and in the wide spaces between the line of vines or trees, by which rough and ready means the air among the trees, etc., is warmed by several degrees and the threatened danger averted. **FREDERICK MOORE.**

London England.

NEWS NOTES.

Ovid, Mich.—The business formerly operated as Hoag Bros. Greenhouse is now owned by James M. Hoag.

Grand Rapids, Mich.—It is stated that the Grand Rapids Greenhouse Company is to abandon the forcing of lettuce, etc., and devote their houses to flower growing exclusively.

Lake City, Minn.—One hundred acres of land adjoining the present grounds has just been purchased by the Jewel Nursery Co. and will be used for growing nursery stock.

Horseshoe Brand Products

In Giganteum indicates the acme of quality. Large growers know they produce the largest percentage of cut flowers per thousand bulbs of any brand. The reason why is because they are produced by the choicest seed-bulbs in the world; are properly planted and cultivated. The actual profits indicated by your cash register when the final show-down time comes are greater from Horseshoe Brand Giganteum than from any other brand receiving the same treatment in forcing. Don't take our word for it, try them, count the cut.

RALPH M. WARD & CO.

12 West Broadway, - - - New York

M. LEMOINE'S NOVELTIES.

One reads with interest notes of French gardening, as these are usually very instructive and frequently embody the results of extensive and long-continued experiments in the cultivation and propagation of plants. The raising and hybridizing of such as have been employed in gardens for many years. One of these veterans is M. Lemoine of Nancy, France, whose plant collection was visited by a correspondent of the "Gartenwelt" in search of novelties; and what he saw therein is made public in the issue of that journal for December 4 last. He found the begonias in full flower. These are the pride of Nancy gardens. The variety Lafayette is one of the best for bedding, but it does badly in northern Germany—the summers there being so changeable. Better in color and form is Washington, of Lemoine's raising, and when it is found unsuitable for bedding it is excellent for pot culture, and may be warmly recommended. The large, well formed flowers stand erect, on stalks bearing five or six. This variety grows stronger and more willingly than Lafayette, and is more easily propagated. Lemoine puts all his begonia corms in a great shade-hall, where they are simply planted in the soil to which horn shavings are added and dug under.

Among the varieties of begonias for the open ground, there appeared a seedling that has received the name Nuage Rose (Rosy Cloud). It blooms as if possessed; the blooms are small, standing in light bunches, and when open they show a rosy-white color; and the plant appears to have no period of rest, so that by winter propagation the flowers must be removed, so as to make it possible for growth to be made. Nuage Rose is very probably of B. Socotrana blood. A fellow variety is Bouquet Blanc, which in flowering does not quite equal the first named variety. A red-leaved B. Lubeca is one of Lemoine's best plants of the year's raising; and beautiful was Feu de Bengal (Bengal Fire); only the middle of the leaf retains its natural moss-green color, whilst the margin of the leaf has the color of the purple beech leaf.

As a hint to gardeners looking about for something not commonly cultivated, I may name the varieties of Ceanothus, which M. Lemoine has perfected in regard to new ones of his own raising—stood in full bloom. The following are excellent, viz., Croix du Sud, a dark blue flower and a very free bloomer; Indigo, also dark blue; Gloire de Plantieres, Arnoldii, Gloire de Versailles, Marie Simon, rigidus and Veitchianus, most of which require a south or southwest aspect excepting in warm districts; and they are all good for late forcing purposes. They are worthy of a trial as pot plants.

About Polygonum Baldschuanicum we have heard much of late in the gardening press, and the verdicts have varied considerably. There are two varieties of this plant; one is a sparse flowerer, and the other very free, and both are gigantic climbers. M. Lemoine has experimented for years with the former, but he has now taken to the latter. Experiments of propagation by cuttings of the young wood have turned out comparative failures; and at last he has succeeded in raising

PREPARE FOR EASTER

Headquarters for Easter Plants

WELL CROWN, RIGHT FOR EASTER

AZALEA INDICA, one of our specialties.

In large sizes we have, all covered with buds, the following: **Bernard Andrea Alba** (white), **Niobe** (double white), **Dr. Moore** (pink), **Memory de Van Houtte** (large flowering pink), **Mme. Van der Cruyssen** (light pink), **Empress of India** (double variegated), **Hellena Tellman** (light pink), **De Schreveriana** (double variegated), **Apollo** (red). Price: \$1.50, \$1.75, \$2.00, \$2.50 to \$3.00 each.

In smaller sizes we have a big house full of the well-known **Mme. Van der Cruyssen** (the best of all the pink), all as round as an apple and covered with buds. Price: 60c., 75c., \$1.00, \$1.25, \$1.50, \$2.00 and \$2.50.

SIMON MARDNER (double pink), **Verwaena** (double variegated), **Niobe** (double white). Price: \$1.00, \$1.25, \$1.50. **DEUTSCHE PERLE** (white), **Apollo** (red), **Empress of India** (double variegated), **De Schreveriana**. Price: 60c., 75c., \$1.00, \$1.25.

CINERARIA Hybrida Grandiflora, best strains, very fine colors. 6-inch pots, 25c., 35c., 50c., 75c. to \$1.00.

SPIREA Gladstone, full of buds, 6-7-in. pots, 50c., 75c. to \$1.00.

PRIMULA Obconica, 5-in. pots, \$2.50 per dozen.

TOUKESOL TULIPS, best double variegated, 3 bulbs planted in a 4-in. pot, \$1.50 to \$1.75 per dozen pots. **Murillo Tulips**, best double pink, 3 bulbs in a 4-in. pot, \$2.00 per dozen pots.

HYACINTHS. Raised from the best bulbs of Holland production; **King of the Blues**, **Grand Maitre** (light blue), **Gertrude** (best pink), **La Grandesse** (best white). Price: \$12.00 per 100 pots.

Von Sion DAFFODILS (best double Narcissus known), 3 double-nosed bulbs planted in a 6-in. pot. Price: \$2.50 to \$3.00 per dozen pots.

HYDRANGEA Otaksa, 6-7 in. pots, 35c., 50c., 75c., \$1.00, \$1.25 to \$1.50.

FERNS for dishes, 2½-in. pots, strong \$5.00 per 100.

KENTIA Forsteriana. Imported last spring (1909) from Ghent, Belgium, in fine condition, 6-7-in. pots, 35-40-50 inches high, \$1.25, \$1.50, \$2.00, \$2.50, \$3.00; 4-in., 20c. **Belmoreana**, 6-in., \$1.25 to \$1.50 each; 4-in., 25c.; 3-in., 10c.

EASTER LILIES. **Multiplorum**, 10c. per bud, about five buds to the plant; under five buds, 12c.

A reasonable amount of other plants must be taken in connection with lilies. **Japanese Multiflorum**, of our own importation, raised from special 10-in. bulbs, 6-in. pots, right for Easter. This year I can say we have the finest lot, free from disease, we have had for years past. The large demand for Lilies exceeds the supply every year; we, therefore, ask that you order early. Price, plants with five buds and upwards, 10c. per bud; plants with under five buds, 12c. per bud. We can satisfy all wants if ordered soon.

Cash With Order

GODFREY ASCHMANN

Wholesale Grower and Importer of POT PLANTS

1012 W. ONTARIO ST., PHILADELPHIA, PA.

plants in abundance, by artificial impregnation of the blooms, after having tried to propagate by means of cuttings of mature shoots.

A natural wonder was pointed out to the visitor, plants of Hydrangea Souvenir de Claire, which is grown in immense quantity in France, and at Nancy has a pleasing blue color; and in soil that has never been afforded iron in any form. That pretty plant, Gypsophila paniculata flore pleno, is considered by Lemoine as being the best herbaceous perennial of the day, and it is surprising that its culture is not more general. This may be due to the fact that the first plants were grafted high on the stocks, and therefore could not be divided, as at that time M. Lemoine was propagating from soft wood cuttings.

Baltimore, Md.—Through the State Board of Education, in response to the vote of 200,000 school children, "Black-eyed Susan" (Rudbeckia hirta) has been ratified as the State flower of Maryland. The flower fits in and well matches the colors of the State's coat of arms—black and orange.

The florist's exchange of this city has become a prominent factor of value to our florists. During February of 1910 there was a 25 per cent increase in business over February, 1909. The manager declares the floral products also show much greater general excellence.

CORNELL NOTES.

Prof. John Craig has announced the following speakers for Farmers' Week:

Monday, "Commercial Floriculture,"

F. R. Pierson, president American Florists' Association, Tarrytown, N. Y. Tuesday, "Special Flower Crops and the Outlook for Their Culture," Prof. John F. Cowell, director Buffalo Botanic Garden, Buffalo, N. Y. Wednesday, "Experience in Reclaiming Muck Lands for Trucking Purposes," W. W. Ware, practical grower, Batavia, N. Y., member of executive committee of New York State grange. Thursday, "Trucking on Muck Lands With Special Reference to Celery, Onions and Lettuce," Henry Greffrath, practical grower, South Lima, N. Y. Friday, "Experience and Observation in Market Gardening," T. Greiner, author, journalist, La Salle, N. Y. Tuesday, Demonstration, "Handling and Transplanting Vegetable Seedlings," George M. Cosh, gardener, Department of Horticulture. Wednesday, Demonstration, "Handling Cuttings, Potting and Shifting," Miss Landmann, student in Department of Horticulture. Friday, Demonstration, "Preparation and Planting of Window Boxes and Baskets," C. E. Hunn, foreman of grounds and school gardens.

The lectures will be given at noon, and the demonstrations at 3 o'clock. The place of the lectures will be announced later.

CULTURE OF THE CYCLAMEN.

Abstract of a paper read before the Tarrytown Horticultural Society by James Stuart.

Mr. Stuart said that the best time for sowing was middle of August and advised the procuring of new seed as his experience was that they germinate much quicker and stronger than old seed. As sowing compost he used a mixture of loam, leaf-mould and sand with enough finely broken charcoal to insure openness and freedom of drainage. Flats are used in preference to pans and the seeds sown in shallow drills in place of broadcast, so that the surface of the soil can be worked over occasionally to prevent moss or scum from gathering. The seeds are covered only lightly with soil and the boxes closely covered with glass to prevent evaporation. A temperature of 60 degrees is maintained with plenty of atmospheric moisture. When the seedlings are up plenty of light is allowed, but shade always provided against strong sunshine. When the second or third leaf appears the seedlings are pricked over into flats again, in preference to pots, where they remain until large enough to be potted into three or three-and-one-half-inch pots. For Christmas flowering they are moved up when ready into five or six-inch pots, but when intended for spring flowering they are given another shift, seven-inch pots being used. In summer they are kept in the coolest possible house and when fall comes a temperature of not less than 55 degrees is maintained until such time as the flowers begin to show. Then the temperature is lowered to from 45 to 50 degrees at night and when in full flower air is freely given, a little being allowed at night to insure a dry atmosphere and prevent damping. In the general potting compost a liberal supply of well-rooted manure is added to that formerly advised and potting done moderately firm. Cleanliness both in the house and benches he strongly advises. Also every precaution to prevent insect enemies from getting a hold on the plants. A solution of soft soap and kerosene he considers the best insecticide, this being used freely as a spray both on the plants and benches as a preventive against the cyclamen mite.

In growing plants over the second year, he preferred to keep them growing along steadily in place of drying off as some do and retaining as much of the old foliage as possible, but keeping all decayed flowers and leaves closely picked off.

In conclusion Mr. Stuart said that to be a successful cyclamen grower, one had to have a special interest in the plants, to pay strict attention to details and be on the job all the time.

Stillwater, Okla.—The greenhouse which is to be built at the Oklahoma Agricultural College will be 56 x 85 feet, consisting of three 18 foot houses, with even span and concrete foundations. Attached to this will be a potting shed 12 x 40 feet. The construction will be of wood throughout supported by iron pipes under the gutters. It will be heated by steam, connected with the central heating plant of the institution. The entire structure will cost less than \$5,000.

EASTER PLANTS

AZALEAS, 5½ to 8-in. pots, from 75c. to \$5.00 each, larger plants from \$6.00 to \$10.00 each, Pyramids \$4.00.

DEPARTMENT OF PARKS, City of New York, Boroughs of Brooklyn and Queens

Borough of Brooklyn, March 7, 1910.

To the Aphine Manufacturing Co.,
 Madison, New Jersey.

Dear Sirs:—

Having received your sample of Aphine, I at once made a test for mealy bug on coleus and crotons and the effect was marvelous, the mealy bug dried up without any damage to the plants. Have since purchased four gallons of Aphine and used the same according to directions, with spray, on green and white fly also scale on palms, with the same success. I am more than pleased at the results of your insecticide, and will continue its use, as it is safe, sure and reliable, and can honestly recommend it to all my brother craftsmen;

Very Respectfully Yours,

EDWARD J. WALTERS,

Head Gardener, Forest Park Greenhouse and Nursery

PUBLICATIONS RECEIVED.

Landscape Art, by Wencel L. Cukerski, Grand Rapids, Mich.—This little 32-page booklet will no doubt find many interested readers and it will do much to improve the popular knowledge of lawn-planting, laying out and arrangement of grounds, planting and caring for trees, shrubs, herbaceous perennials and bedding plants. The illustrations are exceedingly well selected.

Fungous Diseases of Plants.—By Benjamin Minge Duggar, Professor of Plant Physiology in Cornell University. Here is unquestionably one of the most needed books for the use of the horticulturist. Although much work has been done and much valuable information disseminated by the agricultural experiment stations in recent years regarding destructive parasitic fungi, yet much of it has come in so disconnected a form that it has not been of convenient and practical availability to the man most in need of it. Previous to the work now before us, we do not think there has been any publication presenting in systematic and comprehensive form the results of investigation in this great field. Now at last we have what has been so much needed, a book of over 500 pages, illustrated, and fully indexed from three different standpoints, viz.: The contents consecutively arranged; a ready reference index of fungous diseases with the names of plants affected in alphabetical order; and a general index. As a text book for scientific study the work will undoubtedly be gratefully received by the student and special investigator, but what we wish to emphasize particularly is its usefulness to the every-day horticulturist, who will find in its pages the answer to many questions that come up from day to day respecting those obscure and pestilent diseases which so often rob him of the fruits of his industry and have done so much to baffle his best efforts. In part 3, which the plant grower will find especially useful, each disease is discussed with reference to its occurrence, its life history is briefly given, and practical advice for the intelligent application of prophylactic and control measures. Professor Duggar has placed the horticultural industry of our continent under no small obligation to him by the painstaking service he has thus rendered. The price of the book is \$2.00. Copies can be supplied from this office.

MOVEMENTS OF GARDENERS.

James Caldwell has been appointed gardener at the City Infirmary, Cincinnati, Ohio.

San Francisco, Calif.—A. Charles McNaughton has taken a position with Arthur W. Foster of San Rafael, Calif.

Patrick W. Burke, formerly in South Lancaster, Mass., is now on the Mrs. Arthur W. Blake place at Brookline, Mass.

San Francisco, Calif.—Robert Ford is now employed at the Home of Peace Cemetery. He was formerly gardener to Henry T. Scott.

There is Yet Time for You to Stock Up

Among our new things that will be needed directly after Easter are Ribbon Posts. Every decorating florist needs them. Bouquet Papers are coming in again. We can supply them. Imported Magnolia leaves are selling fast. We do not handle the domestic kind. Cape Flowers are just in and they're very fine this year. We have prepared Maiden Hair Fern and Japanese Air Plants by the million. Send for quotations and complete catalogue.

**A Leader — Imperial China Ware Open-Work
Plant Receptacles in Many Beautiful Designs**

H. BAYERSDORFER & CO., Philadelphia, Pa.
1129 ARCH STREET

CHICAGO NOTES.

Florists' Club.

Ladies' night was a great success; in fact, it is generally conceded to have been the best ever given by the Chicago Florists' Club. Nearly one hundred and fifty sat down to the banquet at the Union Restaurant. Music and speeches followed, and Mrs. Clara MacCloud, an elocutionist of note, greatly pleased the company. An especially attractive part of the program was the graceful dances by a little six-year-old girl. The tables were decorated with red roses and green. President Asmus not being in his usual good health, Duncan Robertson was master of ceremonies and did credit to himself and club.

Poehlmann Acquisitions.

Poehlmann Bros. Co. have just purchased fifteen acres of land on the east side of Plaut B, and in a year or two will erect another large range of houses. This piece contains a large dwelling house which will be utilized as a boarding house for the employers. Another fifteen acres on the west side of Plaut B is also a recent acquisition, though Mr. Poehlmann says they do not expect to build on it for some time to come. The cement benches installed in some of the new houses are satisfactory so far, and Mr. Poehlmann can see no difference in the respective merits of those constructed after the Wittbold and after the Garland patents, so far as the appearance of the plants is concerned.

Moninger Busy.

John C. Moninger Co. report that,

notwithstanding the severe winter, business with them has more than doubled and a long list of contracts is on file for spring building. Their new catalog, No. 6, of Pipes and Fittings, is just out and gives distinct cuts with descriptions and prices of everything in that line. It is a valuable book and can be had for the asking. See their advertisement in this paper and send for the book.

Around the City.

All the wholesale florists in Chicago will presently write a different number in their address. Last September a new system of numbering was inaugurated in all parts of the city except the down-town district, and the committee on street nomenclature is now working on a plan which will complete the city.

People especially interested in the beautifying of the city by defeating the pending ordinance granting permission for the erection of billboards upon the roofs of buildings not more than eight stories high are much pleased with the recent decision of the Missouri Supreme Court against this kind of advertising, reversing the decision of the Circuit Court.

The frequency with which women's clubs include papers and talks on plants and trees is quite noticeable. The services of City Forester Prost are very often in demand, but the club members are also bestirring themselves and the result is good programs that cannot fail to show results in the near future. Mr. Prost strongly recommends the appointment by the board of education of a teacher of horticulture to take active charge of

the work in the schools and teach the children how to plant and care for a garden.

The salesmen for the bulb houses seemingly are having a hard time to take orders for their goods, for sharp reductions in price are offered to induce customers to place orders. Overproduction this year is holding back many from the same experience next year. Many blooms have sold for less than the cost of the bulb.

Personal.

H. A. Goodman of the W. W. Barnard Co. has returned from Europe.

Chas. Schlick of Winterson's Seed Store is mourning the loss of his father, whose funeral occurred Sunday, March 6th.

Harry Manheim, after eight years with J. A. Budlong, is now with Hoerber Bros. on the second floor in the Atlas building.

J. W. Starrett now has charge of the table decorations at the New LaSalle hotel. Mr. Starrett has been for 24 years in the wholesale and retail business in Chicago and knows his work perfectly.

Chas. L. Washburn has received a letter from his son, E. B. Washburn, announcing his safe arrival in Riverside, Cal., where they found the temperature 84 deg. in the shade and 102 deg. in the sun.

Harvey Brooks, eleven-year-old son of Mr. and Mrs. Joseph Brooks of Morton Grove, suffered a serious accident to his knee in a fall while skating recently. His wound seemed to be heal-

LILIES FOR YOU

N. F. McCARTHY & CO.

Wholesale Florists and Supply Dealers

84 Hawley St., Boston

ing nicely when the boy had a second fall, this time down stairs, and was taken to the Augustina hospital, where an operation was performed.

F. B. Dickinson has resigned his position as secretary of the E. H. Hunt Co. and with his wife has returned to his home in Chattanooga, Tenn. Mr. and Mrs. Dickinson very much disliked the cold climate of the North. No one has yet taken Mr. Dickinson's place and Mrs. E. H. Hunt is in the office temporarily.

Visitors—Wm. A. Garden, Thorley, N. Y.; E. A. Fancourt, with Pennock-Meehan Co., Phila.; Harry Balsley, Detroit, Mich.; C. W. Shepherd, Joliet, Ill.; Mrs. S. M. Ellison and Harry Ellison of Ellison Floral Co., St. Louis, Mo.

A Correction.

One paragraph in our notes from Joliet, in last week's issue, got out of its proper sequence and would be interpreted as referring to the Chicago Carnation Company, whereas it had reference to the Thompson Carnation Company. Beginning with the line, "Under the supervision of Mr. Peterson," the paragraph refers to the latter concern.

If you want reliable aster seed of the most advanced type you can't do better than send to Vick, who has done more for the development and dissemination of high grade asters than any other American seedsman. It will pay you to read carefully his full page advertisement on page 339, last week's issue of HORTICULTURE.

PERSONAL.

Prof. Charles S. Sargent will start in a few days for Texas in search of new plants, plums especially.

Julius E. Raether, of the Franklin Park Floral Company, has been appointed florist for the Columbus, O., State Hospital.

J. R. Merritt, Woodbury, N. J., a young man with a twelve thousand carnation range, has been making a good name for himself as a grower for the Philadelphia market during the past two years.

Robert Laurie, the irrepressible, erstwhile traveling salesman for W. W. Rawson & Co., has returned to his old love—"back to the mines"—and if Colorado and Nevada mining stocks do not now take on new activity it will not be "Bob's" fault.

Stewart Barclay Lohman, late of the Merion Country Club, is now with the Santa Barbara County Club, Santa Barbara, Cal. This is within seventy miles of his old friend, Edwin Lonsdale, at Lompoc; and it will go hard if there be not a congenial meeting in the near future.

J. W. Rodgers, superintendent of parks of Cincinnati, Ohio, has been visiting Riverside, Cal., and handed out some very eloquent compliments to that city. It is stated that Mr. Rodgers is in California studying the eucalyptus conditions, with the expectation of starting a corporation in Cincinnati. For this purpose he has been spending some time in Fresno and Tulare coun-

ties, where he is contemplating purchasing land.

Mr. and Mrs. William Kennedy of Greenfield, Mass., celebrated the fiftieth anniversary of their marriage on March 2. Mr. Kennedy was born April 8, 1842, at Ayer, Scotland, and married Miss Jane Sherrard in his eighteenth year. At that time he was serving a seven-years' apprenticeship as gardener on the estate of the Duke of Argyle. He began his apprenticeship when 14 years of age, and at the completion of that period had to serve another year in nursery work. He then took a course in a botanical college at Glasgow. After fitting himself for his chosen calling of gardener, Mr. Kennedy was employed by Rector White on an estate outside of Glasgow and was later employed on the estate of Sir Richard Wallace in Ireland, and held similar positions on large estates in other parts of Great Britain before coming to the United States, 28 years ago. For five years he was employed on the estate of I. C. Nickerson at East Brewster as landscape gardener. For over 20 years Mr. Kennedy has lived in Greenfield, where he has been employed by the late James C. Converse, the late G. Clinton Gardner, the late George H. Hovey, George E. Rogers and William H. Ulrich. He was engaged for some time in business as a florist.

Visitors in Boston: E. S. Miller, Wading River, N. Y.; Paul Berkowitz, of H. Bayersdorfer & Co., Philadelphia; Julius Rozitsky, New Bedford, Mass.; W. Dykes, representing Ed. Jansen, New York; E. J. Harmon, Portland Me; E. Weinhoeber, Chicago.

We never disappoint. Satisfaction guaranteed. Orders placed with us means that you can depend on us.

A WELL ARRANGED FLORAL WREATH.

A certain writer and critic of no small repute remarked in an article which we published recently that the sweet pea was one of the most difficult flowers to show to full advantage in a photograph. The difficulty is not limited to photographic illustration but, as many an artist has found, applies also to the working up of this favorite flower in floral arrangements. We think the wreath herewith illustrated is an exceptionally effective piece of work, characterized by simplicity and good taste, and making use of the sweet pea with very satisfactory results. It was arranged at the florist store of Thomas F. Galvin, Boston.

One of our florist correspondents takes a shy at the "Dutch shoe" as a flower receptacle. He says: "Flowers and shoes don't go together. Shoes are too stiff. Nothing can be made of the Dutch shoe with any arrangement of crocus or hyacinth that the wit of the best artist can devise. If one wants a Dutch effect there are better ways. Jars, vases—many things peculiar to Holland—lend themselves better to the art of floral arrangement."

Atlantic City, N. J.—M. S. Fleming, Ocean Heights Flower Shop, 1345 Pacific avenue, has leased the property at 104 South Carolina avenue, for a conservatory and will carry a large stock of decorative plants.

Flower Market Reports

BOSTON Although there is unquestionably a surplus of flowers, taken altogether in this market at the present time, yet we cannot in justice report conditions as being so bad as reported from some other centres or as bad as they have been on many occasions in the past right here. It is the belief of some that the fashion of going south at this season of the year, which select society indulges in so generally, is largely responsible for the slack demand for choice flowers. Gardenias have fallen off in demand and violets are away down at the bottom of the ladder. Carnations are overstocked generally in the wholesale marts. Roses fare better and may be said to be doing considerably better than they did last week. Beauty is in brisk demand, selling better than at a corresponding date last year. Killarney, White Killarney and Richmond are all moving satisfactorily, everything considered. All bulbous material goes hard. Whatever portion of it is marketed is at a figure too low to leave anything for the producer. Acacia pubescens has been a good seller, but is now about closed out. Lilies are beginning to move better than they did. Perhaps the liveliest things are the odd and miscellaneous flowers such as cornflowers, snapdragon, wallflowers, cowslips and myosotis. Asparagus and adiantum are decidedly scarce, Adiantum Croweanum moving at a very lively clip.

There was plenty of **BUFFALO** everything in the cut flower line the past week and trade fairly good, considering the amount of stock handled. The beginning of the week was rather quiet, but Friday and Saturday made up for lost time. Having a couple of spring days with the thermometer registering 58 to 60 made it satisfactory for the trade; there being so much stock, especially carnations, bargain signs were numerous. A good portion of every kind moved, but high prices were out of the question. Bulbous stock is coming in more plentifully, and so far has moved fairly well, save lily of the valley which is of excellent quality but with little or no demand. Roses are increasing in quantity daily. Beauties are had, but there is no special demand. Peas are in good supply and have sold well.

The condition of the **CHICAGO** Chicago market is very unsatisfactory. While there are various causes, which, acting together, have made the present conditions, the most potent one is no doubt the sudden change in the weather last week. After weeks of cold and cloudy weather had held the stock back, summer heat suddenly came and the long-delayed blossoms responded at once. The tables in the wholesale houses were filled with all kinds of roses, carnations, bulb stock, violets and everything else that the growers could bring in. The result was the selling only of the first-

class stock and the loss of the poorer flowers. No reports of delayed shipments in the South or West have been received yet but the firms doing a large shipping business are expecting them. It is quite an annual affair to have the rivers play havoc with perishable stuff. Jonquils are coming in from the South. They are much smaller than the home grown and suffer in comparison. With the opening of the present week the weather again became cold and Monday found stock well cleaned up.

Business for **MID-CINCINNATI** Lent is very satisfactory. Beauties are in good supply and the demand just about cleaning them up daily. Bridesmaid, Bride and Killarney are coming in more plentifully the call being mostly for Bride, which causes a little shortage of this variety. About one half of the carnations received are "splits." Fancy stock holds its own as to price. About two-thirds of the orders received for carnations call for white. The supply of callas equals the demand. Violets are in abundance and there is very little sale for same. A nice lot of sweet peas are received, the majority bringing 50c. per 100, exceptionally fancy stock fetching 75c. per 100. Lily of the valley is a drug on this market. Tulips, Miniature Dutch hyacinths and other bulbous flowers are moving nicely. Asparagus plumosus is scarce, with enough Springeri, smilax and other green goods to fill all orders.

The local market has **DETROIT** been swamped with flowers of all kinds, and wholesale prices were at the same low figure as the week before. Retail prices are very much demoralized, carnations, for instance, selling as low as 25c. per dozen. Bulbous flowers are better appreciated by the people than by the growers. The Saturday carnation sale at Sullivan's used up a little of 10,000 flowers, and this helped a good deal to clear the market.

Enormous quantity of flowers coming in and trade sluggish. Stock is being sold in the wholesale markets at any price it will bring—and quoted rates give but a faint idea of the actual situation. The labor troubles make matters worse in the central districts, of course; but out-of-town demand is not what it should be and it is probably true that general conditions all over the country are not as good as they were this time last year. Certain it is, that carnations have surpassed themselves in the past week or two; one wholesaler stated that his receipts for that time were "ten thousand more than double" the amount. One can readily imagine the effect of that influx on a sluggish market. One-half the product last year probably brought as much in dollars and cents as twice as much this year. Good American Beauty roses are about the only scarce item on the list. Specials are the only grade that are any way par and these bring good figures. All other grades are poor and hard to sell at any price. Single violets have been under the weather; wouldn't keep; went to sleep in no time; too soft from the dull days. But they are all right again now. White roses are selling pretty well, but have eased up in price. However, the excellent clean-up helps out on the average. Gardenias are suffering from the same deplorable conditions as carnations. A fine big crop coming in on a congested market, and selling at very reasonable prices. Lily of the valley plentiful and unusually fine. Daffodils and callas—forty times as much as the market can absorb. All bulbous stock going very cheap. Good Asparagus plumosus is scarce; in fact, all greens are in good healthy demand and not oversupplied. The prospects for Easter seem good, many of the out-of-town buyers already dropping in to look things up and leave their orders.

Flower Market Reports.

(Continued from page 413)

Last Saturday there
NEW YORK was a considerable revival of business and Monday opened with some encouragement that it might continue, but the over-abundance of stock and the passing of a temporary demand leaves the market in but little better shape than it was before. The cut of carnations is heavy and Bridesmaid, Bride and Killarney are too plentiful to command steady prices in the rose line. Beauties are still off crop and selling at 60c. for best grade with occasional sales at 75c. where the quality is exceptionally fine, but there is much poor stock for which there is no settled price. Special grade Richmond benefits as a result of the limited supply of Beauties. Bulbous stock is still a big feature as to quantity, particularly Golden Spur narcissus, though tulips are in lighter supply this week. Prices are weak on lily of the valley, for which the demand is not nearly equal to the supply. Lilies are moving somewhat better, but the market is not strong enough to warrant much increase in price. Quotations on violets do not change. There is little difference in the market for orchids and gardenias. Sweet peas are very plentiful, both long and short stems. It is difficult to realize on the latter.

PHILADELPHIA NOTES.

"Mayflowers" (Trailing Arbutus) have made their appearance. Pennock Bros. had a fine showing on the 7th inst. Old-fashioned bouquets were the feature of the great Pennock window this week.

A handsome specimen of Eupatorium triste is exhibited in the Habermehl window at the Bellevue-Stratford, this week. This is good as a pot plant, but the stems are too sticky to make it pleasant for designs.

Mr. J. Wolff Moore, Columbia avenue, has entrusted the Lord & Burnham Co. with the erection of the im-

provements in their store. The passage display will be 8 x 65 feet, the conservatory, 24 x 50 feet. D. T. Connor is in charge of the operation.

James Vick of Rochester, lately with P. Henderson & Co., and J. M. Thorburn & Co., of New York, is now with the Holmes Seed Co., Harrisburg, Pa. C. H. Carr, lately with Messrs. Gray, Farquhar, and Breck, of Boston, has also taken a responsible position with Messrs. Holmes.

A. B. Cartledge, Jr., has joined the Florists' Club, and will doubtless soon make as good a name among winners in indoor sports as in yachting circles. Welcome to our midst, A. B., Jr. But look out for your handicaps if you run up against the lads who can do from two-fifty to three hundred.

M. Rice & Co. have had to start night work, much against their will, in order to get out their Easter orders. The troubles in the labor world have stopped operations in the building line here, and the bad scaffolding and light obscuring conditions are liable to continue longer than was expected.

Andrew Morrison, late of California and Rydal, Pa., is back in town and open for engagement on gentleman's estate. Mr. Morrison is a younger brother of George Morrison of Baltimore, and is considered one of the best private gardeners of the younger generation. See his adv. in this issue.

The big banquet on the 15th inst.,—at Dooner's,—under the auspices of the National Gardeners, is well under way. W. Kleinheinz, the president of the Gardeners' Association, says there will be a large attendance. This is not a closed proposition. Anyone willing to pay for a ticket is welcome, so long as he tells Mr. Kleinheinz or Secretary Maynard on or before the 13th.

The Holmes Seed Co., through H. L. Holmes, vice-president and general manager, tendered the employees a banquet at the Commonwealth Hotel, Harrisburg, on March 2nd, in commemoration of the largest month's business done (by many thousand dollars) in the history of the company. H. M. Miller, expert accountant, acted as toastmaster, and bright speeches were made by the heads of the different departments. Mr. Holmes received many congratulations on the happy occasion and responded in his usual felicitous vein.

Visitors: C. B. Knickman, New York; H. L. Holmes, Harrisburg, Pa.; P. J. Lynch, New Castle, Ind.; Mr. and Mrs. Johnson, Baltimore, Md.

HELP WANTED

AN EXPERIENCED NURSERYMAN

For propagating shrubs, herbaceous and bedding plants. State references, age and wages wanted. Address

Rhode Island Nurseries, Newport, R. I.

WANTED

A first class man as manager of a large commercial place where roses and carnations are grown; must have had experience and be competent to take full charge; good salary to right man. In answering, give full particulars as to experience. "Grower," care of HORTICULTURE.

WANTED—Second man in commercial plant growing establishment in middle West. Wages \$12.00 a week. M. W., care HORTICULTURE.

WANTED—A sober, reliable, all round man for a commercial place. Steady position for the right man. Address Geo. E. Felch, Ayer, Mass.

SITUATIONS WANTED

SITUATION WANTED—By German, 44 years of age, single, good grower of vegetables and flowers under glass and out doors; 13 years' practical experience in a White Mountain summer resort. Can furnish good references. Address with particulars, Julius Shuenhoff, care J. V. Tilton, Wellesley, Mass.

SITUATION WANTED—Andrew Morrison, late with Curwen Doddert, Rydal, Pa., and E. P. Wright, Duarte, Cal., is open for engagement in a good private place. Address him, care HORTICULTURE, 9th and Market Sts., Phila.

COACHMAN, gardener, married; understands farming, poultry; able to take full charge of country place. Hans Zeman, care Dr. v. Raitz, Ossining, N. Y.

FOR SALE

FOR SALE—Greenhouse property with or without stock; 4 houses, with 6000 ft. glass; also barn and sheds; room for more houses. Greenhouses one year old. Second floor barn finished for living purposes. Gerudt & Co., Room 1008 Union Bldg., Newark, N. J.

FOR SALE—10,000 ft. glass, nearly new, stocked for cut flowers and bedding stock; thoroughly established trade; no competition; 8 acres market garden land; 1½ miles from best market in state; cause, poor health. Glenwood Greenhouses, Glenwood Springs, Colo.

FOR SALE—Special 16 x 18 and 16 x 24 double thick glass in "A" and "B" qualities. Buy now and save money. Write PARSHESKY BROTHERS, INC., 59 Montrose Ave., Brooklyn, N. Y.

ILLUSTRATIONS

ARE

MONEY MAKERS

FOR

ADVERTISERS

A good illustration is often the means of making a sale, especially if it shows something new or novel.

We have in stock many of the cuts used in our reading articles, all of which show the best type of the subject illustrated and in an effective manner.

They should all prove effective for catalogue or advertising purposes and can be secured at about half price.

Tell us your requirements and we will send you proofs of cuts nearest suited to your needs.

For San Jose Scale, and to Improve Health of Tree and Shrub.

BOWKER'S

Concentrated

Lime-Sulphur

Made in New England. FRESH from Factory to User.

NOW IS THE TIME TO ORDER Lime-Sulphur, which should be used while the trees are dormant. It destroys San Jose and all other Scale Insects and fungous spores wintering on the bark. It improves the health of the tree by destroying the mosses and lichens. As J. H. Hale says: "It smoothes up the trees."

All ready to use by adding cold water. No boiling, no special mixing plant required; no guesswork as to formula. Just add **cold** water, and spray.

Before spraying your orchard, post yourself about Bowker's sprays.—Write today for prices.

BOWKER INSECTICIDE COMPANY,
43 Chatham St., Boston, Mass.

Manufacturers of Bowker's PYROX for fruits and vegetables.

CATALOGUES RECEIVED

F. & F. Nurseries, Dept. Amer. Nursery Co., Springfield, N. J.; Bloodgood Nurseries, Dept. Amer. Nursery Co., Flushing, N. Y.—Spring Trade Lists, 1910, for nurserymen and dealers only. Very complete list of fruit and ornamental stock.

Eastern Nurseries, Henry S. Dawson, Mgr., Jamaica Plain, Mass.—Wholesale Trade List, Spring, 1910. This list of the very best of the well-proven hardy trees and shrubs and herbaceous perennials for ornamental planting is indispensable to the dealer who proposes to be in the advanced rank of his profession.

D. Hill, Dundee, Ill.—1910 Catalog and Planting Guide. The cover of this publication is unique and appropriate. All the illustrations in the work, including cover views are from actual photographs. The big nursery which stands behind the book has been es-

tablished for over half a century and the contents of the work show that it is doing good work by placing the finest of the garden ornamentals within the reach of the people.

INCORPORATED.

Selah, Wash.—The Selah Valley Nursery Co., capital stock \$5,000. Incorporators, B. Wood, A. C. E. Brown.

Mount Pleasant, Tex.—The Vine Hill Nursery Co., capital stock \$20,000. Incorporators, M. G. Black, H. W. Peterman, T. S. Denman, E. C. Lilienstern.

New Orleans, La.—A rose garden, with 1,000 varieties of roses, is to be added to City Park as one of the newest beauty spots. The garden will be located adjacent to the hothouses, just beyond the polo field. The commissioners of the park have set aside the necessary amount of ground for the proposed garden.

The Mastin Automatic White-wash and Spraying Machine

is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass. The pump is of brass throughout, simple and powerful. The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for fifteen minutes.

All parts are made to gauge, and may be had for repairs. Just the thing for distributing liquid fertilizer in greenhouses. Ask your dealer about our EXTENSION HOSE, EXTENSION RODS, and the MASTIN WHITE-WASH NOZZLE for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

J. G. Mastin & Co.,

3124 West Lake Street

POTASH

Potash has a direct relation to the increase in your bank account. It is like money put into a successful manufacturing plant. It pays dividends.

Potash produces more and better crops, and the difference between a good bank balance and none at all, frequently is—Potash

Potash Pays

Potash isn't all there is to fertilizing, but it is so essential that you must consider it.

Urge your fertilizer dealer to carry Potash Salts in stock. He will have no trouble in buying them if he will write to us about it.

Violets and
Sweet Peas
A Specialty.

JOHN H. SLOCOMBE,
FLORIST,
555 Townsend Ave.

New Haven, Conn., March 7, 1910.

Aphine Mfg. Co., Madison, N. Y.
Gentlemen:—

After using your product for past three months find that it has effectively killed all the green and black fly on double and single violets in our houses—without injuring in the least the flowers, or even tender center leaves. We sprayed our young sweet pea vines, which were badly infested with green fly and that one application has cleaned out every aphid visible to date.

We have placed order for ten gallons Aphine with your local agents to keep on hand—as we cannot afford to be short should another crop of fly appear.

Your truly

J. H. SLOCOMBE.

See pages 397 and 401 for other Aphine endorsement.

New Chicago Sprayer

This sprayer is made of aluminum with two brass plates, one fine, one coarse. These are easily removed and quickly cleaned. Spraying face 4 1/2 inches wide, nozzle 6 1/2 inches long; 3/4 inch pipe connections. These sprayers will never wear out and are said by users to be the finest on the market.

Send to us for testimonials from growers using them.

Price \$2.50 Each

GREENHOUSE MATERIALS

Boilers, Pipe and Fittings

If you use anything along this line you should have our catalog and get our prices before you buy. We are in position to quote very attractive prices on this class of goods and can save you money no matter where you are located. Our catalog No. 5 tells all about boilers and greenhouse heating. You need it whether you are in the market now for a boiler or not. Catalog No. 6 contains 100 pages of information about pipe and fittings, valves, hose goods, radiators, etc. Get one of these and keep it handy. Then don't forget to send for Catalog No. 4—our greenhouse catalog. Our estimates on the construction material for any new houses you are going to build will interest you. Write today before you forget it. This advertisement will not appear again so send at once.

The Castle Automatic Circulator

The Summit of Perfection. No Device has ever been invented for Forced Hot Water Circulation which will do what this little machine accomplishes, for Economy in First Cost or in Operation.

Requires no Supervision or Manual Manipulation.

Prices and Discounts on Automatic Circulator, several sizes, with or without Motors, also Testimonials from Large Greenhouse Establishments, east or west, furnished on Application.

While the method of producing a forced circulation of liquids is the same as in the Original Electric Circulator, some modifications in construction which we consider to be of vital importance are made.

The great improvement of its being equipped with a valve which requires no manual manipulation to change from forced to gravity circulation will be at once recognized as extremely valuable.

"They have more than met my expectations"

Irvington, N. J., February 9, 1910.

Messrs. Wm. W. Castle Co.,
170 Summer St., Boston, Mass.

Dear Sirs,

Answering your inquiry with reference to the two Automatic Circulators furnished by you, I would say that they have more than met my expectations. While the makers of my Boilers advised me that, with the additions I had made, I could not heat the range with the Boiler power I had, I have found with the Circulators that I have been able to maintain temperatures in the houses in the most severe weather, and by their use I have made a saving of 25 per cent. in my coal bills. I have found that there is but five degrees difference in temperature of the flows as compared with the returns (at the Boilers) when the Circulators are running. As already informed you, I have no trouble taking care of the entire range, about 70,000 feet of glass, with the two Circulators.

Very truly yours,

(Signed) E. W. FENGAR.

The above is but one of many high commendations which we have received and are constantly receiving as to the efficiency and economy of this apparatus.

W. W. Castle Company
170 Summer St., Boston

For the Man Who Counts the Pennies Saved and the Dollars Earned

If a boiler saves you money then it makes you money. Here is a boiler that was especially constructed to meet the demands of greenhouse heating. Particular attention was given to not alone its economy in coal, but also to the rapidity of circulation it would induce in the coils - and it's circulation that counts.

Being cast in sections, it is easy to erect, easy to enlarge. Send for catalog.

General Offices & Factory
Elizabeth, N.J.

A Mighty Good Little Layout

Perchance some such arrangement may be just the thing for you. In this case the space was limited so the work room and greenhouse were attached directly to the stable, and the heating plant put in its basement.

The greenhouse is 33 feet long and 18 wide, with seven heated frames at the south side.

The construction is our Sectional Iron Frame which at once fixes it in your mind as an extremely light, enduring house.

If you want us to, we can give you by return mail, an approximate estimate of what a duplicate of this house would cost.

Plant Novelties From China

Rubus is a vast and cosmopolitan genus containing a large number of species of use and value to mankind. The species exhibit considerable variety (probably hybridizing freely among themselves) and the genus is a particularly troublesome one from the point of view of the systematic botanist. In China over a hundred species occur and, curiously enough, the majority are "fixed" and easily distinguished. Indeed, though the genus is so largely concentrated in China the species present fewer difficulties and are more readily distinguished than those of other lands.

The Chinese brambles include quite a number of ornamental and useful species though the bulk are of course more fitted for Arboretum and Botanic garden than elsewhere. In *R. flagelliflorus* and *R. Bambusarum* we have two species distinct in habit and general appearance from all others and extremely ornamental pillar plants. The first-named is a woodland species with simple, cordate, pointed leaves dark, velvety green above and covered on the underside with a dun-colored felt. The branches are long, slender and whip-like giving the plant a very graceful appearance.

VITIS ARMATA VAR. VEITCHII
Cultivated in Coombe Wood Nursery.

RUBUS FLAGELLIFLORUS
As cultivated by Messrs. Veitch.

R. Bambusarum is a denizen of thickets and has slender, horizontally spreading and arching branches. The leaves are trifoliolate with narrow, lance-shaped leaflets, dark green above, grey below. The flowers in both species are inconspicuous, the fruits black, edible but of indifferent flavor.

R. Henryi is another good bramble similar in habit to *R. Bambusarum* but with trifid instead of trifoliolate leaves.

R. coreanus is a strong-growing species with pinnate, shining, metallic green leaves and white stems. In winter the white, waxy bloom on the stems is very strongly developed making the plant particularly attractive and conspicuous.

R. lasiostylus is another bramble having white and ornamental stems. This species is also a strong grower with pinnate leaves. The fruits are large, woolly in appearance but of good flavor. The stems in addition to being white are densely clothed with bristly hairs.

R. irenaeus and *R. polytrichus* are prostrate growing woodland brambles suitable for planting under trees or on rockeries. The first-named has broadly-reniforme leaves, dark green, smooth above, dun-colored below and prominent stipules. *R. polytrichus* has ovate, pointed leaves and shoots covered with orange-yellow, bristly hairs. Both species are small growing with large, white, axillary flowers and red fruits.

As species worth cultivating for their fruits and as possible forerunners of a new race *R. innominatus* and *R. corchorifolius* are strongly recommended. The first-named is a erect-growing and very ordinary looking bramble with pinnately three to five-foliolate leaves, grey-green in appearance, covered on underside and also the stems with soft hairs. The flowers are pinkish and inconspicuous, produced in August in terminal thyrsoid panicles 20 to 30 inches long. The berries are of good size, orange-red and of an agreeable sub-acid flavor.

R. corchorifolius, the jute-leaved bramble, is a very different looking species with small, ovate, simple leaves (trifid on young shoots) and white flowers opening as the leaves unfold. The berries are oval, of good size, orange-red and of a rich and sweet vinous flavor. The fruits are usually solitary and possess the finest flavor of any Chinese bramble known to the writer.

There are quite a number of other Chinese brambles well worthy of culture and the above may serve as a sort of introductory selection to the class as a whole.

One of the great horticultural assets resulting from recent work in China is the number of new, distinct and ornamental species of *Vitis* discovered and introduced into cultivation. In China forty or more species of *Vitis* occur wild. The true grape (*V. vinifera*) is cultivated in a few localities and is very probably a genuine native of China also. Several species, for example, *V. armata*, *V. Romaneti*, *V. flexuosa* and *V. sinensis*, have edible fruits of fair size and flavor and may be useful to the hybridist. Nearly all have decided horticultural merit and the majority are well worthy of cultivation. Although useful in a variety of ways these new introductions are most effective and ornamental when grown as pillar plants and trained to stout poles. To obtain the best foliage and effect these plants should be pruned hard back in March and the young shoots as they develop neatly tied to the poles. When used to cover pergolas or, when planted at foot of trees, less pruning is required.

Botanists divide "Vitis" up into several genera but for the purpose of this article they may all be conveniently grouped under the one head.

One of the finest of these new *Vitis* is *V. armata*, a species growing 20 feet tall, with glaucous, prickly stems and large, cordate leaves of much substance, deep green with metallic lustre above and somewhat glaucous below. The fruits are globose, black, of good size and flavor. The varieties "Veitchii" and "Wilsonae" are forms of superlative merit having even bolder foliage than the type and more brilliant autumnal tints of yellow, orange and bronze, passing to the richest shade of red and crimson.

V. sinensis is a strong growing species with very variable foliage covered with grey, woolly hairs more especially on underside. These leaves are more or less reniforme-cordate in shape, either simple, variously incised, or trifoliate.

V. flexuosa var. *Wilsoni* is a small growing species five to six feet tall, with neat foliage, shining, metallic green above and bright purple below when young. This is really a charming vine but, unfortunately, of a more delicate constitution than many of the others.

V. repens is another strong-growing species with smooth, broadly cordate, trilobed leaves on long reddish petioles.

Very different in appearance to the ordinary species of *Vitis* are *V. lecooides* and *V. megalophylla*. The first-named is a comparatively dwarf-growing vine six to ten feet tall with pinnate leaves one to one and a half feet long. The leaflets are glabrous, dark, glossy green above and deep claret-purple below. This *Vitis* resem-

VITIS HENRYANA

bles the genus *Leea* in foliage and is quite distinct in every way from any other species.

V. megalophylla is a wonderful species with much-divided leaves resembling those of *Aralia spinosa* and two to three feet across. These leaves are dark green above, pale and somewhat glaucous below and glabrous. This species is native of woodlands where it forms a huge climber scaling to the tops of tall trees. It grows 10 to 15 feet in a single season and should be hard pruned annually. Though it assumes no brilliant tints

in autumn its strikingly handsome and altogether remarkable foliage makes it one of the most desirable of all climbers for pillar work.

V. Thomsoni is a small growing species six to eight feet tall with digitately five-foliolate leaves greenish-purple above, bright claret color below. In autumn the foliage changes to lovely shades of reddish purple and is then frequently glaucous below.

V. Henryana is another small growing species and is perhaps the most attractive of its set. The foliage is digitately five-foliolate with lanceolate-ovate to obovate, toothed leaflets, dark, velvety green with midrib and secondary veins silvery white. This variegation is more pronounced in the fall when the ground color of the leaves changes to varying shades of red whilst the veins retain their silvery appearance. In its adult (fruiting) stage this plant loses its variegation to a large extent and presents quite a different appearance in general.

V. Henryana is a self-clinging species and though not so hardy as the more vigorous growing kinds should be cultivated by all. It is a splendid subject for pot-culture or a cold greenhouse when it retains its brilliantly colored foliage practically throughout the winter.

S. W. Wilson.

Calceolaria

In a recent number of *HORTICULTURE* there was published a Preliminary Schedule of Prizes for the National Show to be held, I believe, in the latter part of March, 1911, and among the many excellent classes provided Calceolarias were included. March as a rule is considered early to have these useful and beautiful plants in flower, but if the herbaceous hybrids are sown early, say the end of that month or early in April, they can be flowered in the latter part of the following March. I may here say that plants raised from cuttings will flower earlier than those produced from seeds, but this method of reproduction is not often practiced in this section, although we have raised excellent plants from cuttings. We have experimented a little with early and late sown batches and have invariably found that those sown the last week in March or early in April, will give better results than those sown later in the season. The early sown ones being stronger when the hot months arrive, give less trouble to coax them through that period, and when flowering time arrives a much larger plant, if desired, can be secured. A good plan to prevent damping off during the hot months is when watering the plants to do it thoroughly and immediately dust them over with powdered charcoal and not to water again until the soil begins to have a dusty appearance, which can be found out by rubbing the surface of a pot or two with the finger, or a piece of pointed stick.

The shrubby calceolarias commonly grown for pot plants around here are varieties of, or hybrids obtained from *C. rugosa* (syn. with *C. integrifolia*). Golden Gem is probably the best known in this section. Cuttings are the easiest way to raise them, which can be

secured from plants that are pinched into shape during the fall and early spring. These plants are generally flowered by the trade for Memorial Day, but they can be had in bloom the last of March, if desired for Easter use, by growing spring-rooted cuttings right along until August, giving them their last pinching in that month, and if Easter is to be in April the last stopping may be done in September. This section of calceolaria is largely used as bedding plants in Europe, but they are not a success around Boston as far as I have seen. I am told, however, they do well at Bar Harbor, Me.

For seedlings a good compost is equal parts of osmunda fibre, sharp sand and charcoal, ground through a fine sieve. Put about an inch of this material in a well-crooked seed pan, level the surface, scatter the seeds thinly and evenly and cover them as lightly as possible with finely sifted sphagnum moss. Water by dipping the seed pan in a tank of water, allowing it to soak through the holes in the bottom of the pan. A temperature of sixty degrees will germinate the seeds, but do not allow the sun to get at them until the cool nights in the fall. From the end of September until March they will stand the full sun, and should be grown in a temperature of 40 degrees at night and 50 to 65 degrees

HOUSE OF CALCEOLARIAS

during the day. Through the summer, a house facing north is the best place for them, giving all the air possible.

For a first potting the same mixture as the seeds were sown in is the best, and as the plants are shifted into larger pots equal parts of fibry loam, fern root, sand, leaf mold and dried cow manure may be used always having the compost as rough as can be packed equally around the plant. When the plants are well established in their flowering pots and begin to show signs of setting for flowering, they may be watered with manure water until the blooms begin to show color. A good mixture is a half bucket of green cow manure, and a half pail of soft coal soot to fifty gallons of water applied alternately with clean water. To keep green and white fly in check use the formula described in my article on *Cineraria*, always taking care that the foliage is perfectly dry, and in the hot months of summer an hour's exposure to the gas is long enough.

that makes for prosperity in an organized capacity, the most useful and influential gathering of professional rose growers ever brought together in this country. The present opportunity for reaching and focusing the attention of a refined and affluent community on the radiant product of the rose grower certainly has never been surpassed.

Two problems intimately related to the prosperity of the flower industry have been referred to in these columns on a number of occasions of late, in the desire to properly fulfil our duty as a journal devoted to the welfare of the profession. We mean the artificial flower craze and the backwardness of the florists as a class in adopting modern ways and means of business exploitation. These questions are closely allied to each other as both are to the subject we considered last week—that of the lack of stability in the wholesale values of the flower product and the extreme and unhealthy variation in prices in different centres at one and the same time. It is our conviction that the subject broadly comprising these topics is one the urgency of which the clubs, societies and associations will be obliged to recognize and take up in a vigorous and comprehensive way before long. The organizations have done a world of education on social and cultural lines. They have brought the workers, isolated before, into amicable relationship and are to be credited with a large share of the prodigious advancement in the art and science of plant development and cultural methods under glass which fills so illustrious a page in the history of American floriculture for three decades. Now the horizon widens and there spreads out before the S. A. F. and her numerous kin a vast field hitherto almost untouched, and insistently demanding strenuous attention. We must have a bigger and better market for the products of our industry. Salesmanship in the flower business is as yet in its infancy.

To attempt proper inspection of nursery stock at ports of entry as provided in the Simmons Bill, H. R. 15656, which is now before the House Committee on Agriculture at Washington would be to undertake an impossible task and would entail extended delay and practical ruin of the goods. It is stated that the arrivals of French nursery stock at the port of New York for the last eleven days of January—a fair average of the past three months—amounted to 1375 cases, containing an approximate total of 17,000,000 seedlings, having a value of about \$100,000 including about \$26,000 paid to the United States Government in import duties. The goods are almost exclusively raw material for nurserymen, which cannot—at least under present conditions—be produced in this country. The seedlings are packed tightly by special machinery and their proper examination and repacking would be a manifest impossibility. The American Association of Nurserymen fully realize the necessity for and cordially approve of the effort to guard against the introduction to this country of insect and other plant pests. They have prepared a bill which provides full protection while it is free from the serious defects of the proposed Simmons act and it would seem only just and reasonable that they be given an opportunity to have it considered by the House Committee as a possible substitute for the Simmons bill. Readers of this paper can render no better immediate service to the nursery industry than to express their disapproval of the Simmons Bill, urging the substitution of the Nurserymen's Bill or that otherwise an adverse report be made.

As we close our forms the devotees of the Queen of Flowers are in the midst of their annual celebration and the public of the great city are doing homage to the grace and beauty of the first and fairest of the floral kingdom. We expect that, after the returns are all in and the complete story of this occasion is told, it will transpire that the present is, in all

The assembling
of the roses

March 19, 1910

SEASONABLE NOTES ON CULTURE OF FLORISTS' STOCK.

Cobaea.

As a very fast growing climber for covering the exterior of dwellings, summer houses, stumps of trees, and the weather-beaten sides of old houses, there is nothing better for quick effect than *Cobaea scandens*. Seed can be sown any time now. Sow in flats of light sandy soil and keep in a warm house, say about 60 degrees. Place the seeds edgewise in the flat, just so the edge of the seed is even with the surface. When they show their true leaves they can be potted off into 2 or 2½-inch pots, and in a short time they will be ready for a shift into 4-inch pots. Put a stake about two feet high to each one so they will not get entangled with one another.

Time to Propagate.

Those who wisely manage their propagation already have the largest and main part of this work done. As the season advances the reverse of favorable conditions for propagation of most plants will confront you. There is ample time for the growing of good plants of most varieties, and if you have not the required number, or are in doubt, get another batch of cuttings in as soon as possible of such plants as chrysanthemums, coleus, ageratum, achyranthes, santolina, lemon verbena, heliotrope, lantana, German ivy, and petunias—in fact, all that class of plants they may enter into your spring trade. They will not need to be handled till after the Easter rush, when you will have bench room available.

Handling of Seedlings.

Good ventilation is the chief essential in promoting and maintaining healthy growth of young seedlings. Air must be admitted with caution. All cold currents sweeping over the young plants must be eliminated by proper regulation. When the seedlings show above the ground—which will be from two to twenty days with most varieties, although there are a few that take three or four weeks to germinate—they should be exposed to all the light possible. They will need constant watching and careful watering to guard against any excess of dry or too wet, which may mean the loss of some valuable stock. As soon as seedlings show the character leaf they should be transplanted into flats. Give them plenty of room; you will have stouter and better stock that can remain in the boxes until they are of a suitable size for small pots, hot-beds, or frames. Sow seeds of asters, balsams, browallias, celosias, coreopsis, marigolds, petunias, ricinus, phloxes, scabiosas, stocks of all kinds, tropaeolum and zinnias and many others.

Plants for Vases.

The florist who does a general retail plant business, adjacent to town or near some leading cemetery, will have many vases to fill. Much depends upon the plants used. Vases are sometimes in an exposed situation, while others are in a shady position, and for this reason you should select plants that will not suffer in either. Where the vases are to be exposed to the sun the following named plants will be found very satisfactory. For the cen-

ter, *Dracaena indivisa*, *Chamaerops humilis*, or any of the Phoenix family; to fill the remainder of the vase, geraniums, coleus, *Centaurea gymnocarpa*, *Begonia Vernon*, petunias, ageratum and achyranthes will give a fine color combination; for trailers *Vinca major variegata*, *Solanum jasminoides*, *Abutilon vexillarium*, nasturtiums, verbenas, German ivy, and ivy-leaved geraniums and many others. If the vases are required for a shaded situation, the centers can be made up of any of the following: *Latania borbonica*, *Areca lutescens*, kentis or *Ficus elastica* and for the remainder use fuchsias, begonias, small plants of *Ficus elastica*, aspidistras and ferns. Among the trailing plants are tradescantias, selaginellas, Kenilworth ivy and German ivy. Where you have such a trade it would be wise to work up such stock as you will need in this line.

EDWARD HATCH.

Caladium esculentum.

You can start roots of this subtropical plant any time during the month of March. To make them break well a moist brisk heat is desired. Place them on a bench where there is bottom heat and pack closely between the roots with moss, leaf-mold or sand. You can keep them much more moist than cannas. They can also be started in flats 3 inches deep; placing the bulbs quite close, almost touching and filling all around the same as if placed on a bench and after watering place them on the hot water pipes. When they have made a growth of four or five inches they can be potted into five or six-inch pots using any good soil.

Sweet Peas for Outside.

The grower who prepared his land last fall by heavily manuring and deep plowing has the advantage over others who have this yet to do. Early sowing is of the utmost importance. Sweet peas should be the first thing to go into the open ground. As soon as the upper six or eight inches of the surface can be worked they should be sown. It is very important that most of the growth may be made in the cool, damp weather of the first part of

the season. They require an abundance of potash, in order to produce strong vigorous stems, and I think unleached hard wood ashes affords the best and cheapest form in which to supply this element of plant food. Fine ground bone is an excellent source of nitrogen and phosphoric acid, which is needed to enlarge and perfect the flowers. The rows, if possible, should run north and south and be at least four feet apart. Scatter the seeds somewhat broadly in furrows from 6 to 8 inches deep and cover with two inches of fine soil. After the plants have come to the surface, hoe or cultivate about them frequently and use small amounts of nitrate of soda to stimulate early development and flowering. Keep gradually drawing in the soil until the trenches are filled. A mulch of partly decayed manure will prevent rapid drying about the roots.

JOHN J. M. FARRELL.

Mr. Farrell's next notes will be on *Asparagus plumosus nanus*, *Calanthes*, *Dracaena indivisa*, *Euphorbia fulgens*, Shading, Swainsonas.

OBITUARY.

Edward Hatch.

Edward Hatch, beloved treasurer of the Gardeners' and Florists' Club of Boston, and prince of good fellows, has passed on into the great beyond. The news will bring a pang of profoundest sorrow to many hearts, for few there are, or have been, among us who have given so much time and thought in the effort to make others happy as generous-hearted Ed Hatch has been continuously doing for the past thirty years. A business man in the strictest sense of the word, he has been a bulwark of strength to the Gardeners' and Florists' Club of Boston, conserving its resources with wisdom and untiring zeal, and ready at all times to give encouragement and substantial aid towards any of its philanthropic efforts, notably the landscape gardening class. He was passionately fond of flowers and it only needed the incident of his being called upon to officiate as plant auctioneer in the early days of that industry to kindle within him a love for the society of florists and gardeners and cause him to open his heart to the active spirits in that profession with a cordiality exceeding even that extended to his direct business associates.

Mr. Hatch has been in failing health for a year and a half and his death took place on Friday, March 10, at Columbia, S. C., whither he had gone in the hope of finding in that climate needed vigor. The funeral took place from his residence, 328 Commonwealth avenue, Boston, on Wednesday, March 16.

Mr. Hatch was prominently connected with large mercantile interests and with the club and social life of Boston and suburbs.

Frederick J. Broetje.

Frederick J. Broetje, a well-known resident of Mount Tabor, Ore., died March 4 at his home, 31 East 61st street, at the age of 49 years. He had lived in Mount Tabor for the past twenty-six years. He is survived by a widow and five sons.

AMERICAN ROSE SOCIETY

Annual Meeting and Exhibition

The Annual Meeting and Exhibition of the American Rose Society, at the American Museum of Natural History, New York city, drew together a very large and representative attendance of rose growers and others from far and near. The opening session of the Society was to have been held on Wednesday evening, 16th, but the program was not adhered to, and the meeting was postponed until Thursday forenoon. There was much to occupy the time of the members, however, in exchanging mutual greetings and inspecting the exhibition which, while not so extensive as had been expected, was made up of goods of the highest quality. The judges were busy all the afternoon and we append the prize awards so far as decided upon up to time of this report.

PRIZES AWARDED.

Division A.

Breitmeyer prize for best display of hardy roses in bloom, won by H. C. Steinhoff. Mr. Steinhoff also won the Welch Bros.' prize for collection of hybrid perpetuals, first on six climbing roses, six roses not climbing, twelve Baby Ramblers, specimen in pot or tub, specimen Crimson Rambler, specimen Dorothy Perkins, and, second J. N. May prize for collection of teas and hybrid teas. Julius Roehrs Company won first for Lady Gay specimen, Hiawatha specimen, and second for six climbing roses and Dorothy Perkins specimen.

Division B, Open to All.

A. T. Boddington prize for 25 American Beauty blooms, Brant Hentz Co., first; Gude Bros., second. A. H. Langjahr prize for Bride; Poehlmann Bros., first; L. B. Coddington, second. L. B. Coddington prize for My Maryland, J. W. Young, first; A. Behre, second. W. F. Sheridan prize for Killarney, J. W. Young, first; W. G. Badgley, second. W. G. Badgley prize for Richmond, A. Farenwald, first; Ed. Towell, second. Robert Simpson prize for largest and best collection of teas and hybrid teas, Gude Bros., first. First prize winners in the general classes in this division were H. Hentz, Jr., for Bridesmaid; Robert Scott & Son, for Kaiserin Augusta Victoria, Wm. Gregor, for Mrs. Jardine; Robert Simpson, for Mme. Abel Chatenay; U. S. Cut Flower Co., for Ivory; Benj. Dorrance, for Sunrise; Gude Bros., for Wellesley, F. R. Pierson Co., for White Killarney; Robert Simpson, for Enchanter.

In Division B, open to private gardeners and amateurs only, there was neither competition nor interest. William Hastings was first on Bridesmaid and Richmond.

Divisions D and E—hybrid perpetuals, were entirely ignored by the exhibitors.

Division F, Specials.

The Dorrance challenge trophy for largest and best collection of cut roses was won by Benj. Dorrance. The Poehlmann Bros.' prizes for fifty White Killarney were won by F. R. Pierson Co., first, and Waban Rose Conserva-

tories second. The H. E. Froment prize for fifty Richmond, won by A. Farenwald. There were thirteen entries for the Moore, Hentz & Nash \$50.00 cup for six roses, and the Elmira Cut Flower Company was the lucky winner. The A. J. Guttman special was won by W. G. Badgley.

Horticultural Society of New York Prizes.

The R. & J. Farquhar silver cup for twenty cyclamen plants was won by James Stuart. Mr. Stuart also won first on specimen cyclamen and Mrs. H. Seigel, second. Six plants of rhododendrons, first, Samuel Untermeyer, gardener W. H. Waite. Six Schizanthus, Samuel Untermeyer.

The orchid display in this section was very fine. For best display Lager & Hurrell were first; second, Julius Roehrs Co. Cattleya Trianae specimen, W. A. Manda, first; Julius Roehrs Co., second. Cattleya Schroderal, ditto, ditto. Display of Cypripediums, Lager & Hurrell. Dendrobium nobile specimen, W. A. Manda, first; Lager & Hurrell, second. Cattleya specimen, Clement Moore, first; Lager & Hurrell, second. Dendrobium Wardianum specimen, W. A. Manda, first; Julius Roehrs, second. In the palms and other foliage plant displays, F. R. Pierson Co., and Julius Roehrs Co., were the main contributors. Messrs. Roehrs won first on group of bay trees, silver medal for display of crotons, and silver medal for display of stove and greenhouse plants all being superb examples of good culture. F. R. Pierson Co. were first on Nephrolepis Bostoniensis, N. elegantissima, N. Scotti, N. Piersoni, and for the largest and best specimen Nephrolepis.

Among the exhibits not for competition we mention the following: John Lewis Childs, Calla Elliotiana. Julius Roehrs Co., group of new Croton F. Sander. H. C. Steinhoff, group of Formosa lilies. A. N. Pierson Company, Adiantum Farleyense, Lily of the valley, roses White Killarney, Pink Killarney and My Maryland. Thos. De Voy's Sons, new violet, Marie Elise, sport of Marie Louise. Cottage Gardens Co., carnations Mrs. C. W. Ward, Alma Ward and seedling 405.

THE OPENING SESSION.

The opening session on Thursday was called to order by President Poehlmann, who proceeded to read his annual address. Then followed the report of Secretary Hammond, as follows:

Secretary Hammond's Report, 1910.

The records of the year show that the American Rose Society blooms and grows in strength and influence. The idea "A Rose for every Home, a Bush for every Garden," takes hold. During the past twelve months there has come to hand more inquiry for information than ever before, and the weakest point in the organization is the lack of a quarterly publication absolutely its own, that may be sent to every member and to kindred societies. In my opinion, until this is done the membership will continue restricted.

The interest and fame of the Rose Society surely is increased by the judicious use of its medals. These afford much pleasure and are not bestowed loosely. They carry with them esteem, and when given for good work in home gardens, in the communities where local interest is taken, stir up a lot of earnestness in rose planting. The annual bulletin was issued for 1909, being sent to every member and filed up in many libraries and is called for by horticultural societies.

The last year, our life membership fund has passed the \$3,000 mark. We hope to see it get to \$30,000, and take much pleasure in enrolling more in the life membership, as this insures permanency. The income has been above its regular outgo, but that is not saying much, because the prizes offered regularly each year run up to quite a sum and a year ago a number of gentlemen made up this amount separate from other support.

The exhibition in the city of Buffalo was so well attended by visitors, who after the first day came in such numbers that four gentlemen from the police force assisted in piloting the crowd, which comprised people who were greatly pleased with the show and several joined as associate members.

This year we meet in the most congested city on the continent, in which there is no room for home gardens, but whose taste and appreciation for things beautiful and lovely is so great that it is the best flower market we have. Therefore under the sheltering wings of the Horticultural Society of New York, we make a spread without money and without price, of choice and lovely roses for whosoever will, to admire and to profit by. The florists and the gardeners who thus show their products deserve well of all who are thus entertained.

Our thanks are due to the trustees and others connected with this hall for many gracious attentions. The society owes much especially to ex-President Simpson, Messrs. H. O. May, F. R. Pierson and the executive committee for detail work in doing the many things required for such an exhibition.

The State Florists' Association of Indiana have filed a request for the annual exhibition to go to Indianapolis in 1912, the year following the great National Flower Show is to be held in the city of Boston.

Treasurer's Report.

Treasurer H. O. May presented his annual report, of which the following is a summary:

Annual report of the Treasurer of the American Rose Society:

Receipts	\$4 524.32
Disbursements	3,902.13
Balance	\$622.19
Permanent Fund	\$3,050.
Hubbard Medal Fund	250.

HARRY O. MAY, Treasurer.

The rest of the proceedings of the Society and account of the banquet given by the New York Florists' Club will appear in our issue of next week.

Personal

Thomas W. Head, of Groton, Conn., is at the Bellevue Hotel, Belleair, Florida, for a week.

Mansfield, Ohio.—Albert Helbrook, formerly of Columbus, is now with the Berno Floral Co.

Davenport, Ia.—Edward Patton has accepted a position with Ludwig Stapp. He was formerly gardener for Miss Woltmann.

Lenox, Mass.—Robert MacConnachie, gardener for Mr. A. Kneeland, was married March 11 to Miss Margaret Williams.

Wm. B. Jones, formerly head gardener for T. L. Manson, East Hampton, L. I., has taken charge of A. B. Boardman's estate at Southampton, L. I.

Van Wert, Ohio.—C. H. Trefflinger has resigned his position at the McConahy greenhouse and has gone to Spartanburg, S. C., to accept a similar position.

Waverley, Mass.—Wm. S. Grassie, who has been with the Harvard Botanic Garden for three years, has bought several acres of land in Waverley and will build a range of houses and grow for the market.

George C. Butler, for the past eight years gardener to Hon. W. A. L. Bazeley, of Uxbridge, Mass., has resigned and has accepted a position as superintendent of the Messrs. Wells' estate at Southbridge. Thomas Houlihan has succeeded him in Uxbridge.

Visitors in Boston: H. Suzuki, Yokohama, Japan; A. Kakuda, New York; Samuel Parsons, New York; C. C. Laney, Rochester, N. Y.; H. S. De Forest, New York; P. M. Read, New York; C. B. Weathered, New York; J. S. Hay, of Dreer's, Philadelphia; Robert Miller, Cromwell, Conn.

CONSTRUCTING HOTBEDS.

To the experienced private or market gardener the hotbed is a very essential adjunct. Necessarily the expense may not be very large, as a cheaply constructed frame and sash may be made to answer a very good purpose; but a well-constructed frame and good glazed sash, if properly taken care of, are the cheapest in the end. The manure may be taken for other purposes after being used in the bed, and being well decomposed is admirably fitted for other crops. Frames constructed of good plank, and as often recommended, with iron loops on the ends of the sides, to pass through mortices in end pieces at the corners, and fastened by inserting keys through the loops will make the most convenient ones, as they may be readily taken apart when through with for the season, and packed away so as to occupy but little space. Sash 3 x 6 feet are about as handy as any size.

In constructing the bed I prefer to

excavate a pit about a foot larger on every side than the frame, and some five or six inches deep. Fill this and raise about two feet above the surface with manure, and on this place the frame and bank up with earth, covering the manure five or six feet deep outside the frame; place the sash on and let the manure steam. When the heat has subsided to about 90 degrees—it will go to 100 degrees or more—spread on five or six inches of fine, rich garden mould well filled with vegetable matter, and in this after warming up, sow your seed in drills running from back to front side of bed. The bed should face the south to receive the full benefit of the sun's rays. Beginners are too apt to sow their seed in the hotbed before the heat begins

to subside, and thus lose them. It is needless to state that horse stable manure, plentifully supplied with strawy litter is commonly used, as this is of a quicker nature than other animal manure. Care must be taken when forming the bed that it is beaten well down with the fork, and packed so as to keep an even surface when the bed settles, as settle it will, after heating a while.

The large variety of plants that the hotbed is useful in starting or forwarding early in the season needs no repetition here, but for all that requires a long season, it is almost indispensable. March is the proper time for making up the hotbed, as a general thing, in this latitude.

RICHARD J. HAYDEN.

EASTER PLANTS

THOMAS ROLAND

Nahant, Mass

NEWS OF THE CLUBS AND SOCIETIES

MORRIS COUNTY (N. J.) GARDENERS' AND FLORISTS' SOCIETY.

Annual Carnation night, March 9th, was a very interesting affair. Not so many new soldiers in the field as we would like to have had. There were some good recruits there, though, and the old veteran varieties did great credit to themselves, too.

From E. L. Enggren, Aqueduct, L. I., there was a grand vase of a new seedling; color, cerise pink, fine stem and erect flower. Mr. Enggren, who was present claims it to be a great cropper. If this quality should be fixed, it ought to be a fine addition to our list. A certificate of merit was awarded. From Henry Eichholz, Waynesboro, Pa., Princess Charming, certificate of merit. From same grower, Washington, honorable mention. Chicago Carnation Co., Joliet, Ill., Conquest and Mary Tolman; unfortunately arrived in poor condition. Mr. Enggren spoke for these two varieties as seen by him at Pittsburg, saying that both varieties showed well there. Cottage Gardens Co. sent Alma Ward and Mrs. C. W. Ward. John Downing, Morris Plains, N. J., had a magnificent vase of Winsor, which was awarded cultural certificate. Wm. H. Duckham had a peerless exhibit of Craig, Bay State, Enchantress and Rose Pink Enchantress. Cultural certificate.

A general discussion on the carnation then took place. Mr. Enggren gave us a nice little talk; so did Messrs. Duckham, Herrington and Totty and many others.

April 11th will be "Rose Night." We have always had a fine exhibition heretofore, and we hope this one will be up to the standard. The rose thrives around here. We are hoping to get some new ones that we hear are around. Everybody likes novelties.

GARDENERS' AND FLORISTS' CLUB OF BALTIMORE, MD.

At the annual meeting of the Gardeners' and Florists Club of Baltimore, this week, the following named officers were elected for the ensuing year: President, Geo. Morrison; vice-president, Wm. Christie; secretary, Noah F. Flitton; treasurer, Fred G. Burger; financial secretary, Geo. Talbot; librarian, Chas. M. Wagner.

The club is in fine financial condition and added many new members to their roll the past year. The election was followed by a banquet attended by nearly one hundred members. The banquet hall was well decorated with flowers and plants. The following responded to toasts given out by Robert L. Graham the toastmaster: George Morrison, Geo. O. Brown, Wm. Christie, N. F. Flitton, Wm. Fraser, James Hamilton, W. J. Johnson, Geo. S. Kalb, Isaac H. Moss, J. J. Perry, Chas. L. Seybold, E. A. Seidewitz and P. B. Welsh.

The retiring president served two terms and was very popular with the club. All the other officers, except vice-president, have been their own successors for several years. At the banquet some warm remarks were made regarding the "butchery" of trees now going on in the parks of Baltimore.

B.

NEW YORK FLORISTS' CLUB.

The meeting on last Monday evening was well attended and a number of interesting and entertaining debates held the members until nearly 11 p. m. Such celebrities in wit and humor as Patrick O'Mara, Robert E. Berry, Harry A. Bunyard and John Birnie can always be depended upon to captivate an audience, not to mention two old spellbinders of such renown as Alex. Burns and James Dean.

Secretary Young was absent (first time in 20 years, it was said), being in attendance on the sessions of the S. A. F. executive board at Rochester, and his place was capably filled by J. H. Pepper as secretary pro tem. On motion a vacation for one day was granted to Mr. Young with full pay, and this was duly telegraphed to Rochester.

The outing committee announced the annual picnic for July 1, steamer Isabel and Witzel's Point Grove. A. C. Zvolanek, who was expected to speak on "Sweet Peas," was unable to be present, so Secretary Bunyard of the American Sweet Pea Society filled the gap most acceptably. Joseph A. Manda spoke a good word for the American Rose Society. Mr. Birnie spoke enthusiastically for the American Carnation Society, which he declared to have more energy than all the rest. A. T. Boddington and C. H. Totty were also among the eloquent ones.

There was an exhibit of ferns from Kessler Bros., fine freesias from Phil. Kessler, a cultural certificate being awarded to the latter.

LENOX HORTICULTURAL SOCIETY.

The meeting held Saturday, March 5th, was largely attended and full of interest from start to finish. The show schedules for this year were adopted and the following exhibitions will be held: Annual and perennial, July 27; fall show, October 26-27. In addition to the society's many prizes for the later show, three silver cups have already been generously donated—Henry A. Dreer Co., for a group of miscellaneous plants arranged for effect, 100 sq. ft.; Mr. Eustace Jaques for eighteen varieties of vegetables; Mr. W. B. O. Field for twelve varieties of vegetables, and it is safe to predict that the high standard of vegetable culture for which Lenox is so famous will be fully maintained this coming fall.

Edward Jenkins gave an interesting description of the recent Boston mid-winter show, congratulating that city on its splendid exhibition; special praise, however, being bestowed on W. N. Craig's collection of orchids.

The annual dinner will be held Wednesday, March 30th, and is being looked forward to with much interest by members and friends, some excellent talent having been engaged for the occasion.

Rose and Carnation Night will be on Saturday, April 2nd, and competition in the various classes will be keen. Mr. George Breed will read a paper on "The Neglected Orchards of the Berkshires."

GEORGE H. INSTONE, Sec'y.

CONNECTICUT HORTICULTURAL SOCIETY.

For lack of better accommodations, our allotted room in the County Building, at Hartford, was filled almost to repletion on the night of the 11th inst., which our society observed as "Carnation Night" and "Ladies' Night," and which was attended by a goodly proportion of ladies. Seats were arranged on all sides of a long center table filled with splendid carnation blooms of all prevailing colors.

After the routine business, in which two new members, Messrs. Walter Zutter and John W. Crowell, both of Hartford, were elected, President Huss appointed Messrs. John Gerard, J. A. Weber, and Alex. Cumming, Jr., judges of the carnation exhibit; and, after a long and very careful examination, they gave the following report by scales of points:

A. N. Pierson, Cromwell, Conn.: White Enchantress, 75; White Perfection, 85; Georgia, 90; Beacon, 85; Winsor, 85; Pink Delight, 85; May Day, 85.

John F. Huss, Hartford: White Enchantress, 80; White Perfection, 65; Beacon, 65; Rose Pink Enchantress, 70; Winsor, 75; Red Lawson, 65; Splendor, 75.

Whiting's Greenhouses (Carl Peterson, Manager), West Hartford: White Enchantress, 90; Harlowarden, 85; Enchantress, 85; Winsor, 80; Red Lawson, 90; Pink Lawson, 90.

John Coombs, Hartford: White Enchantress, 80; White Perfection, 75; Beacon, 75; Harlowarden, 75; Enchantress, 85; Rose Pink Enchantress, 80; Viola Sinclair, 80; Pink Patten, 65; Mrs. Patten, 75; Seedling of Victory, crossed with Beacon, 80.

W. H. Shumway, Berlin: Almira, 85. John Brodribb, Hartford: Beacon, 70.

President Huss, in referring to the carnations before him, said that a finer display of them had never been made by the society. Mr. Coombs' seedling of Victory crossed on Beacon, a bright and attractive red, and Mr. Shumway's seedling, Almira, produced in 1905, by crossing Wm. Scott on Enchantress, and occasionally bearing four-inch flowers, attracted special attention.

Appropriate to the occasion, Howard A. Pinney read an able and most engaging paper on "The Carnation," or divine flower; tracing its history back to the days of antiquity, and especially outlining the remarkable improvement made in this popular flower in the last twenty-five years. Mr. Pinney received a cordial vote of thanks.

E. F. Atwood, of Hartford, one of our members, who has had the misfortune to break one of his shoulders, has received by vote of the society a letter, through the secretary, expressive of the sympathy, good-will, and best wishes of the members, and of their hope for his speedy restoration to health and strength.

GEORGE W. SMITH, Sec'y.

Melrose, Conn.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Department of Registration.

As no objections have been filed, public notice is hereby given that the registration of the Begonia, "Glory of Cincinnati," by J. A. Peterson of Westwood, Cincinnati, Ohio, becomes complete.

H. B. DORNER, Secretary.

NATIONAL GARDENERS' ASSOCIATION OF AMERICA.

The third annual convention and exhibition of this Society was held in Philadelphia, March 15, 16, 17. We give below President Kleinheinz's address:

Gentlemen: It is a great pleasure to me as your President to say a few words at this convention.

In the name of the National Association of Gardeners, I must express my heartiest welcome to all present members.

Through the courtesy of the Pennsylvania Horticultural Society it was possible to hold our annual convention and exhibition in conjunction with the Spring Show of the latter society, and I feel as a member of the Pennsylvania Horticultural Society that this society is also very much pleased to receive you in their home and that everyone wishes our guests will make themselves at home and spend a few days of enjoyment in the city of Philadelphia and part from us under the impression that Philadelphia is the City of Brotherly Love and will return again in the near future to renew the friendship and acquaintance.

A year ago, at the last convention, in New York City, I had the honor to be elected as your President, of which I am very proud and think that I have kept my promise to do all in my power for the National Association of Gardeners.

Since my election the number of active members has grown up to 1387 and associate members, 38.

The credit for this increase is by a long way not all due to me, but more to our Secretary, Mr. W. E. Maynard.

But being in harmony with my friends and brother gardeners, I was able to secure a few members also, and I feel that I have to ask all the present members, as well as the absent members, to do their best to get this society stronger and stronger from year to year by getting their friends to join us. We have in this glorious country a large number of societies, such as Society of American Florists, American Carnation Society, American Rose Society, Chrysanthemum Society of America, and a great many others, which are all of great benefit to the commercial grower as well as to the private gardener, but I must say that the National Association of Gardeners is also a necessity.

At our yearly conventions, we show how things are done on private estates by exhibiting flowers, plants, etc., and a good many of those can be seen at the shows which we never would have the opportunity to see if it were not for private estates. Some of the finest specimens of palms, ferns, foliage plants as well as cut flowers are only grown on the estates of wealthy people, as it would never pay the commercial man to grow those for years without getting returns, and so I must say that it is the private gardener that keeps us in touch with many beautiful plants, etc., which would be forgotten long ago were it not for them and their employers.

I am sure every one attending our conventions will profit one way or another by seeing the exhibits, meeting friends, asking questions between themselves as well as in the open meeting and, by closing time, I think every one will start for home at least a little wiser than he was on arriving.

I am under the impression that all present have the same feeling in regard to our association and convention, and I must appeal to you again to do all you can to make this association stronger, so that by our next convention we will have 2,000 members or more and have a larger meeting and a larger exhibition, and the opportunity to meet and make more friends and learn from them by their good advice as much as possible.

A banquet was held in Dooner's Hotel on the evening of the 15th inst., at which 65 sat down and spent a very enjoyable evening. William Kleinheinz, the president of the National Gardeners' Association, was chairman, and Robert Craig acted as toastmaster. The cups won at the exhibition were presented on this occasion and many brilliant speeches graced the event. The next convention will be held in Boston, spring 1911.

YONKERS HORTICULTURAL SOCIETY.

The first annual dinner of this society was held at Park Hill Inn on Thursday evening, March 10th. About 100 members and friends from New York, Long Island, and other places were present. The dining-room was very tastefully decorated and much thanks are due W. H. Waite for supplying the plants, and W. Macdonald for arranging the same. All the speakers took occasion to warmly compliment the society on the excellent showing it has made since its start two months ago, and expressed the hope that success will attend the plans to hold a show in the fall.

A. T. Boddington as toastmaster was

Dreer's Hardy Delphiniums

Belladonna. The freest flowering of all the Delphiniums and the most valuable for cutting, its beautiful turquoise-blue flowers appeal to all who see it. Plant these early and you will have a continuous display of bloom from June until freezing weather. We offer an exceptionally fine lot of extra heavy one-year-old plants, \$2.00 per dozen, \$15.00 per 100; \$125.00 per 1000.

Dreer's Gold Medal Hybrids. Unquestionably the finest strain of mixed hybrids ever brought together, being seedlings of one of the best named collections and containing some wonderful varieties. Strong one-year-old plants, \$1.25 per dozen; \$8.00 per 100; \$75.00 per 1000.

Formosum. A splendid strain of this popular favorite dark blue variety, 85 cents per dozen; \$6.00 per 100; \$50.00 per 1000.

Chinese Blue and White. 75 cents per dozen, \$5.00 per 100.

CHOICE NAMED HYBRID VARIETIES.

Alfred Henderson. Bold, massive spikes of semi-double rosy-lavender flowers, 2 inches across, white eye. 20 cents each; \$2.00 per dozen; \$15.00 per 100.

Beatrice Kelway. Deep, rich blue with a conspicuous yellow eye, flowers 2 inches across and perfectly arranged. 20 cents each; \$2.00 per dozen; \$15.00 per 100.

Cerberus. Sapphire with black-brown centre, a handsome spike. 35 cents each; \$3.50 per dozen.

Chinese Cineraria (Spurless Hardy Larkspur). The large flowers without a spur, strikingly resembles a fine, rich sky-blue Cineraria. 20 cents each; \$2.00 per dozen; \$15.00 per 100.

Duke of Connaught. Rich oxford-blue, with distinct bold white eye; fine large flowers. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

J. C. Jenkins. Very large, semi-double bright mauve edged with royal blue and white eye. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

King of Delphiniums. Most vigorous growing, immense size, semi-double, rich deep blue with large white eye. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Lizzie. Lovely azure-blue, flowers 2 inches across, bold, creamy-yellow eye, arranged in bold massive stems. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Lemartin. Similar in growth and habit to Belladonna, but with rich Gentian-blue flowers with white centre. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Mrs. Creighton. Semi-double, outer petals deep sky-blue, centre rich plum with black eye. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Persimmon. Comparatively new; beautiful delicate turquoise-blue. 50 cents each; \$5.00 per dozen.

White Seedlings. These have been carefully selected and will be found desirable in any collection. 30 cents each; \$3.00 per dozen.

For the most complete list of Hardy Perennial Plants offered in America see our current Wholesale List

Henry A. Dreer, Inc.

714 Chestnut Street, PHILADELPHIA, PA.

The above prices are intended for the trade only.

both snappy and humorous. President Bennet responded to the toast, "The Yonkers Horticultural Society." He gave a brief outline of the work accomplished, saying there are now 80 members and predicting great things for the future. Mayor Lennon was the next speaker and congratulated the society on its splendid showing, and, on behalf of the city, offered assistance at the show to be held in the fall.

The other speakers and their subjects were as follows: "Kindred Societies," H. A. Bunyard; "The Private Gardener," J. Mooney; "The Nurserymen," James Scott; "The Visitors," Harry Turner; "The Seedsmen," Albert Rickards; "The Florist," Louis Melliot; "The Ladies," J. Austin Shaw; "The Horticultural Press," J. H. Pepper. The entertainment was furnished by the Rickards Bros., comic and sentimental songs; James Anderson, baritone solos, W. H. Waite, tenor solos.

The committee in charge were W. H. Waite, Hamilton Scott and Peter MacDonald.

LEE WHITMAN, Cor. Sec.

BUFFALO FLORISTS' CLUB.

The regular meeting and annual election of officers was held on the evening of March 1st at the Iroquois Hotel. Not that the club rooms were not large enough, but on account of the entertainment committee selecting this hotel as the proper place to hold a flower show, banquet and entertainment. Some excellent blooms were seen. A vase of carnation "Ideal" shown by

W. C. Stroh of Attica was fine, the color being a pink deeper than that of Enchantress but the bloom a trifle smaller. Melody and White Perfection by A. Pauly, assorted varieties and Killarney roses by W. J. Palmer & Son, assorted carnations by White Bros. and Wm. Ehmann, together with some very fine sweet peas, mignonette, etc., from the latter; also fine red carnations by Jno. Priesach, good collections by Chas. Guenther and by F. Dorner & Son. A shipment from the Chicago Carnation Co. arrived the following morning, but in excellent condition, and were seen at the wholesale house, among the varieties being Conquest, Sangamo and Mary Tolman. Mrs. W. W. Coles also arrived late.

The election was a hot contest, Jos. Streit being elected president; O. G. Gilles, vice-president; Wm. Legg, secretary; Jerome Deutscher, financial secretary, and Chas. Sandiford, treasurer. The annual banquet followed, with Wm. F. Kasting as toastmaster. Songs and other entertainment was enjoyed by the members, and good remarks by the outgoing officers and others.

A paper on color harmony was read by Edw. Slattery, which will appear in some later issue of this paper. The lantern slides, operated by O. G. Gilles and W. Palmer, Jr., were excellent.

At a meeting of the local Florist Club, Dayton, Ohio, a petition was drafted favoring the setting aside of a certain section in the Central Market for a flower market.

If You

Are not yet familiar with the true merits of

APHINE

Send for our new descriptive circular.

We claim Aphine to be the most effective general insecticide now on the market for greenhouse use, both for florists, and truck gardeners.

It destroys White Fly, Red Spider and Mealy Bug.

Also Green and Black Fly, Thrips and Scale.

It is safe to apply to the tenderest flowers and foliage.

NATIONAL SWEET PEA SOCIETY OF AMERICA.

Additional Prizes Offered for the
1910 Exhibition.

The Peter Henderson & Co.'s Prizes; a \$10.00 gold cash prize to be awarded the amateur exhibitor of the best and most distinct collection of 25 varieties of sweet peas including not less than six of the Spencer type. The number of sprays to each variety to accord with the Society Rules. Also a \$10.00 Gold Cash Prize to be awarded the amateur exhibitor of the two best vases of George Washington and Martha Washington sweet peas. Each vase to contain not less than 25 sprays.

The Henry F. Michell Co.'s Prizes; \$10.00 for the best three vases of sweet peas (one vase of each variety): Frank Dolby, White Spencer, and Mrs. Alfred Watkins. First prize, \$5.00; second prize, \$3.00; third prize, \$2.00.

The C. C. Morse & Co.'s Prize; a silver cup, value \$25.00, for the finest collection of sweet peas (open to the trade only).

HARRY A. BUNYARD, Sec'y.
342 West 14th St., New York City.

NASSAU COUNTY HORTICULTURAL SOCIETY.

At the meeting of this society on March 9, rose prizes were awarded to J. Everett and G. Wilson and sweet pea prize to H. Gaut. Cultural certificates were bestowed on R. Marshall for cyclamens, I. McDonald for schizanthus, Alex. Mackenzie for roses and Mr. Treppess for Coelogyne cristata. Honorable mention to F. Petroccia for primulas; vote of thanks to J. F. Johnston for conifers. Mr. Johnston will talk on evergreens at the next meeting.

Six new members were elected. We elected our first life member—Mr. Mortimer L. Shiff of Oyster Bay—and the following as honorary members: Messrs. L. Tiffany, Evelin Roosevelt and Chandler Moore, from Oyster Bay; A. G. Rodenpyle, Locust Valley, Colgate Hoyt, Centre Island; D. Munger, Glen Cove; and Congressman W. W. Cocks of Washington, D. C. Credit is due to our president for securing all these members. There was also a shower of checks for our fall show; we were sure of the goods, now we are sure of the cash. Summer show date was set for June 15th.

ELBERON HORTICULTURAL SOCIETY.

This organization held a meeting on the 7th of March. There was a good attendance to hear A. Bauer read his paper on bulb forcing which was very interesting and quite a discussion followed. Mr. Bauer displayed a very fine collection of bulbs which was awarded a cultural certificate. The novelties in tulips were much admired. The best ones shown were Queen of the Netherlands, delicate pink; Flamingo, dark pink; Pink Beauty; Van Del, a magnificent single white. The bulbs were supplied by the Stump & Walter Co. The following points were awarded: Wm. Seymour for White Enchantress, 90; P. Ewen for Dracaena, 90; A. Bauer for Anthrinum, 90.

The next meeting will be rose night.
ALEX. FLEMING, Rec. Sec.

PREPARE FOR EASTER

Headquarters for Easter Plants

WELL CROWN, RIGHT FOR EASTER

AZALEA INDICA, one of our specialties.

In large sizes we have, all covered with buds, the following: **Bernard Andrea Alba** (white), **Niobe** (double white), **Dr. Moore** (pink), **Memory de Van Houtte** (large flowering pink), **Mme. Van der Cruyssen** (light pink), **Empress of India** (double variegated), **Hellena Tellman** (light pink), **De Schreveriana** (double variegated), **Apollo** (red). Price: \$1.50, \$1.75, \$2.00, \$2.50 to \$3.00 each.

In smaller sizes we have a big house full of the well-known **Mme. Van der Cruyssen** (the best of all the pink), all as round as an apple and covered with buds. Price: 60c., 75c., \$1.00, \$1.25, \$1.50, \$2.00 and \$2.50.

SIMON MARDNER (double pink), **Vervaeana** (double variegated), **Niobe** (double white). Price: \$1.00, \$1.25, \$1.50. **DEUTSCHE PERLE** (white), **Apollo** (red), **Empress of India** (double variegated), **De Schreveriana**. Price: 60c., 75c., \$1.00, \$1.25.

CINERARIA Hybrida Grandiflora, best strains, very fine colors. 6-inch pots, 25c., 35c., 50c., 75c. to \$1.00.

SPIREA Gladstone, full of buds, 6-7-in. pots, 50c., 75c. to \$1.00.

PRIMULA Obconica, 5-in. pots, \$2.50 per dozen.

TOURNESOL TULIPS, best double variegated, 3 bulbs planted in a 4-in. pot, \$1.50 to \$1.75 per dozen pots. **Murillo Tulips**, best double pink, 3 bulbs in a 4-in. pot, \$2.00 per dozen pots.

HYACINTHS. Raised from the best bulbs of Holland production; **King of the Blues**, **Grand Maitre** (light blue), **Gertrude** (best pink), **La Grandesse** (best white). Price: \$12.00 per 100 pots.

Von Sion DAFFODILS (best double Narcissus known), 3 double-nosed bulbs planted in a 6-in. pot. Price: \$2.50 to \$3.00 per dozen pots.

HYDRANGEA Otaksa, 6-7 in. pots, 35c., 50c., 75c., \$1.00, \$1.25 to \$1.50.

FERNS for dishes, 2½-in. pots, strong \$5.00 per 100.

KENTIA Forsteriana. Imported last spring (1909) from Ghent, Belgium, in fine condition, 6-7-in. pots, 35-40-50 inches high, \$1.25, \$1.50, \$2.00, \$2.50, \$3.00; 4-in., 20c. **Belmoreana**, 6-in., \$1.25 to \$1.50 each; 4-in., 25c.; 3-in., 10c.

EASTER LILIES. **Multiflorum**, 10c. per bud, about five buds to the plant; under five buds, 12c.

A reasonable amount of other plants must be taken in connection with lilies. **Japanese Multiflorum**, of our own importation, raised from special 10-in. bulbs, 6-in. pots, right for Easter. This year I can say we have the finest lot, free from disease, we have had for years past. The large demand for Lilies exceeds the supply every year; we, therefore, ask that you order early. Price, plants with five buds and upwards, 10c. per bud; plants with under five buds, 12c. per bud. We can satisfy all wants if ordered soon.

Cash With Order

GODFREY ASCHMANN

Wholesale Grower and Importer of POT PLANTS

1012 W. ONTARIO ST., PHILADELPHIA, PA.

AZALEAS

We offer a fine lot of Azaleas, shapely specimens, well "headed," double and single flowered, which should make splendid plants for Easter sales.

We offer the following well known and popular sorts:

Mme. Van der Cruyssen, Niobe, Deutsche Perle, Mme. C. Van Langenhove, Vervaeana, Empress of India, Helen Thielman, and Simon Mardner.

Deutzia Lemoinei

Is one of the choicest small shrubs, covered in the blossoming season with a profusion of pure white flowers. The tall varieties of Deutzia are also among the most beautiful flowering shrubs and should receive more attention from planters who aim to produce effective results.

A beautiful catalogue with many new illustrations will be mailed on request. It contains descriptions of these charming shrubs, also of the largest and most complete collections to be found in this country of

RED Cut Flowers can be sold Christmas week, 1910. My **20th** Century red Christmas Novelty will supply the increasing demand for red flowers at this red flower season. My practical knowledge will put 500% profit in your pocket at a nominal cost to you. It beats the Poinsettia 100 ways. I am the originator of new good things for florists

Write today and inclose 10c in stamps for reply.

L. I. NEFF, Florist,

BELLEVUE, PENNA.

FLORISTS' CLUB OF WASHINGTON.

The March meeting of this club was the date for the annual election of officers and a good crowd was in attendance. John Robertson was unanimously elected president. He is a man eminently fitted for the office, of sterling integrity and most popular among his fellow-florists. E. C. Mayberry, of the firm of Mayberry and Hoover, was elected vice-president; for secretary, O. A. C. Oehmler, chief decorator for Gude Bros., succeeded himself. W. W. Kimmel, David Bisset and O. A. C. Oehmler were elected directors to serve a two-year term.

The annual banquet tendered the incoming and outgoing officers is always given at the April meeting and a committee consisting of John Robertson, Geo. Cooke, W. W. Kimmel and O. A. C. Oehmler was appointed to decide as to every arrangement therefor. After some unimportant routine business the business session adjourned to enjoy a musical and social treat. Mrs. Naecker, Messrs. Merritt and Sunsbau delighted the audience and appropriate delicacies appeased the inner man.

The executive committee of the Canadian Horticultural Association, H. Phillpot president, met at Saint Catherine's, Ont., and it was decided to hold the annual convention at that place August 10-12, at Carnegie Library.

MANCHESTER, CONN.**

Horseshoe Brand Products

In Giganteum indicates the acme of quality. Large growers know they produce the largest percentage of cut flowers per thousand bulbs of any brand. The reason why is because they are produced by the choicest seed-bulbs in the world; are properly planted and cultivated. The actual profits indicated by your cash register when the final show-down time comes are greater from Horseshoe Brand Giganteum than from any other brand receiving the same treatment in forcing. Don't take our word for it, try them, count the cut.

Write Us.

WALDEN, N. Y.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The club will hold a field day with W. W. Edgar Co., Waverly, Mass., on Saturday, March 19, 1910. Members and friends will please take electric cars for Weverley, leaving Park Street Station (Subway) at one o'clock. A cordial invitation is extended to all interested growers to join in this outing.

The next club meeting will be held at Horticultural Hall on Tuesday evening, March 22, at 8 o'clock. The Speaker of the evening will be Arthur E. Thatcher, of the Arnold Arboretum on "New and Desirable Hardy Herbaceous Plants." Many subjects of interest will come up at this meeting and it is hoped there will be a large attendance.

W. N. CRAIG, Sec.

CINCINNATI FLORISTS' SOCIETY.

A meeting of this society was held on March 14th at the Jabez Elliott Flower Market. The committee on by-laws made their report and same was adopted as amended by the committee. After the meeting adjourned the members went to Wielert's as guests of the Society, where they had lunch and refreshments, and spent the balance of the evening bowling. A. O.

CLUB AND SOCIETY NOTES.

The Lenox Horticultural Society, at their recent meeting, voted to offer a prize of \$25 for the best specimen tree planted in Lenox since 1905, and also \$25 for the best orchard of not less than 200 trees, which are ten years or more growth.

At the meeting of the New Haven Horticultural Society which was held March 9, the following new officers were installed: President, John N. Champion; vice-president, James Kidd; secretary, Fred Woods; treasurer, Daniel Kidd; press agent, J. C. Morton; board of managers, John N. Champion, James Kidd, John H. Murray, Fred Woods, John C. Morton, Richard Bell, William Beattie and Robert Paton.

The Worcester County Horticultural Society celebrated its annual reunion the evening of March 9th with a banquet and reception in Horticultural Hall. Mr. Joseph Green was toastmaster. The keynote of the addresses was that New England having as fertile soil as any other section of the country should take its place in the front rank in amount and quantity of horticultural products. Following the

banquet and speaking there was dancing.

At the Royal Horticultural Society's exhibition on February 22, Carnation Bay State was shown in excellent form by H. Burnett. A first class certificate was awarded to Sander & Son for *Odontoglossum splendens*, a cross of *O. eximium* with *O. Wilckeanum* and an award of merit for *Odontoglossum Black Prince*, a cross between *O. Lambertianum* and *O. Rolfeae*. Charlesworth & Co. received an award of merit for *Odontoglossum Ceres*, a cross of *O. rubescens* with *O. Rolfeae*. *Odontoglossum eximium* var. *E. C. Rogerson*, a cross between *O. crispum* and *O. ardentissimum* won an award of merit for the exhibitor, Mr. E. Rogerson, and a similar award was given to H. S. Goodson for *Cattleya Schroderae* The Prince. A gold medal was awarded to a grand collection of orchids from Sir Jeremiah Colman.

Florists are back of the bill for an appropriation of \$50,000 for teaching floriculture at Cornell University. William F. Kasting stated yesterday that the bill was indorsed by the florists of the state. The Buffalo Florists' Association favors the bill.—*Buffalo Times*.

Don't Get Left - Last Call on Rooted Cuttings, April Delivery

ited quantity of fine rooted cuttings for April delivery, which, from past experience, however, won't last long. Meanwhile our

Carnation Dorothy Gordon

has added to its laurels. At the Toronto show, just closed, a gold medal was awarded this splendid carnation when exhibited in competition with others. Carnation Dorothy Gordon is a winner—a winner of prizes and a winner of profits, so our customers are learning.

Some of its merits are: strong constitution—absolutely free from disease; wonderful productiveness—50 per cent. more flowers than Enchantress; good color—clear, uniform pink; splendid form and keeping qualities—flowers last four and six days after cutting; and enormous size—averaging three inches in diameter. We know of no other variety possessing all these strong qualities.

Order NOW some of the splendid stock we offer for April. Prices remain the same—\$10.00 PER 100, \$75.00 PER 1,000—and you'll find, long before the season is over, that it was the best investment you made this year. If you want to investigate first, come to see us, or write for particulars—but don't delay, for the stock won't last!

ROBERT CRAIG CO., 4900 Market St., Philadelphia, Pa.

Seed Trade

Trade Conditions.

Trade is not quite satisfactory to the seedsmen of the country, as a whole, and just what is the cause is interesting the most of the larger dealers at the present time. In some quarters it is charged to the weather—in others to local condition, but so far as can be ascertained, these local conditions appear to be country-wide. No doubt the weather has cut some figure, but it is quite possible that the real reason may be as stated by a prominent Philadelphia seedsman recently, when he said that "the average prices were too high."

There is little doubt that prices are higher than for many years, and in all probability they do control the demand to a considerable extent. It is the opinion of the writer that the rather unsatisfactory trade is due to a combination of causes, and cannot be charged to anyone, although the high price theory is probably more potent a factor than any other single one.

With the situation in Europe affecting next season's root crop, and with the prospect that the price on this line of seeds will be even higher than the present season, there seems little prospect of a material reduction in this season's figures, except possibly on peas, beans, and other annuals which are this year exceptionally high. Extremely high prices, as a rule, stimulate the home-growing of many seeds, and at the present time a notable case in point is onion seed. We believe the trade are practically unanimous in stating that onion seed is moving very slowly, and this is very largely due to the large quantities of seed grown in the onion-producing sections. There are thousands of pounds for sale in Ohio at the present time, and in the State of New York, in the onion-growing sections, large quantities of seed have been grown, and no doubt the same facts would be discovered in other states if the matter were investigated. It cannot be said that onion seed is high in price—as a matter of fact, it is one of the staples that is comparatively low, yet the demand is sluggish and very unsatisfactory. What can be done about it?

This matter of high prices should be studied by both the wholesaler and the retailer, as there is danger of killing the goose that lays the golden egg. Some growers of staple varieties of seed have missed many thousands of dollars' worth of business because of being a little too greedy to get the last farthing possible. Others, more recently, have secured this business, and the producer should bear in mind one fact, that when he loses an old customer to someone else, if the change proves satisfactory to the customer in the matter of quality of goods received, it is not always an

easy task to win the customer back. In fact it is often easier to get a new customer.

Potatoes seem to be on the downward toboggan, and where they will finally rest, is problematical. Early in the season it looked as if seed potatoes would be good property, and that the price, as spring neared, would advance. This was charged largely to the Maine crop last fall, which showed strong symptoms of rot, and it was feared that this would extend and become a very serious matter. Whatever the cause, however, potatoes are undeniably cheaper in price than three or four months ago, and as stated, the tendency is still downward.

The Government seed contract has been awarded, and a number have received plums of more or less size and value. No one concern has been given the entire contract, and it was generally believed that it would be settled in this way.

Notes.

New York, N. Y.—A new seed store has been opened by Chas. McTaggart at 123 Warren street. Mr. McTaggart was formerly with J. M. Thorburn & Co.

The following resolution was passed at the Detroit Convention of the American Seed Trade Association and ordered printed separately:

Resolved: That this Association discontinue all indefiniteness in the use of a disclaimer and urges all loyal members to stand by the official disclaimer adopted by the Association, and by so doing strengthen the position of each and strengthen all; and that we urge the use of this disclaimer on all letter-heads, bill-heads, contracts, catalogues, seed bags, order sheets, labels, tags and other printed matter, as well as framed store cards.

Should some members desire further conditions to those stated on this disclaimer, we nevertheless urge that for the first section of their printed disclaimer they use the official wording, viz.:

"We give no warranty, express or implied, as to description, quality, productiveness, or any other matter of any seeds, bulbs, or plants we send out, and we will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned."

A NEW POTATO DISEASE.

The wart disease is a new enemy of the potato crop which is attracting great attention in Europe, and which is liable to be introduced into the United States at any time. It affects the tubers, forming large rough unsightly warts, and, in severe attacks, completely destroys the crop. Once the fungus gets into the soil, it is impossible to grow a crop of potatoes on the land for several years.

The fungus which causes this disease was discovered in 1896 in potatoes grown in Hungary. It is now prevalent in many places in England and there is great danger that it may spread to Ireland. It is also found in Germany and some other European countries. It has been carried to Newfoundland, but has not yet appeared in the United States.

It is spread by using affected potatoes for seed, and, as this country imports considerable quantities of potatoes every year, there is danger that it may be introduced.

The U. S. Department of Agriculture has recently issued a circular (for free distribution) giving a brief account of this disease.

Roses and Carnations Our Specialty

Flower Market Reports.

BOSTON There is very little that we can say as to the market this week beyond the fact that it is no worse than it was last week and has a good many encouraging signs for the present and especially for the Easter blow-out. All bulbous stock continues abundant and cheap, as would be expected. Lily of the valley is as badly affected as anything in the list. Violets are overplentiful. Carnations hold their own in a gratifying manner. There are a good many small, low-grade roses about, which are disposed of with difficulty. American Beauty continues in the high-flying class and retailers are inclined to put in a demurrer when trying to make a purchase. Lilies are already beginning to brace up in value in anticipation of the Easter demand.

One of our best known **CHICAGO** wholesalers sums up the condition of the Chicago market in the one word—"unruly." It is a series of surprises and you wonder what will come next. Stock at this writing is in better proportion to the demand than it was two weeks ago. Last week it seemed as if it was a race to see whose prices would be the lowest. It was difficult to move to advantage all the good stock that the warm weather had suddenly thrust upon the market, and the medium and poor stuff sold for a song or was thrown away. Carnations fared badly, many bringing ridiculously low prices. Roses were not much better off, pink faring the worst; white held up better. Violets and sweet peas were not in the race. Bulb stock is too plentiful always, and now that the southern stock is in the excess is greater. The only stock short is asparagus and smilax. The men who are growing sweet peas are wondering where the profits are coming from. Gardenias are arriving from the East in good condition and the demand as reported by Chas. McKellar is fair. Southern bulb stock continues to arrive and the Chicago florists last week were inclined to feel as if they had troubles enough of their own.

A few springlike days have been followed by snow and a fresh edition of winter, and counter trade, which is already long delayed, will be still later in becoming active. It will no doubt result in an overwhelming rush, taxing the resources and staying powers of all to the limit. But better late than never

All kinds of stock was plentiful the past week with the exception of Bride and Beauty roses. Beauties are off crop and the heavy demand for Brides causes a shortage. The receipts of carnations were heavy, but several big openings helped clean up the market on this flower. Lily of the valley and violets were in good supply, with very little demand. Lilies of both kinds were good property and sold out clean every day. The cut of sweet peas has started up with a good call for same. There being no overproduction of bulbous stock this season, prices are firm and stock moves to good advantage. Green goods of all kinds are in ample supply with the exception of Asparagus plumosus.

(Reports continued on page 457)

Easter Plants 1910

EASTER RIBBONS AND SUPPLIES

Easter Plants 1910. Immense variety—well grown. Easter Lilies especially fine.

Easter Cut Flowers. Finest long stemmed roses—orchids, gardenias, carnations. Full Supply.

Flower Market Reports

(Continued from page 455)

The visit of the rose
NEW YORK growers this week
adds a little to the
gaiety of the town, horticulturally, and
suffices to enliven things socially
even if it injects no new activity into
the market. Considering that Easter
is now only a week ahead the market
is noticeably free from strenuosity al-
though it cannot be said that it has
retrograded any during the past few
days. Of course, there is an exasperat-
ing accumulation of some things,
which are received in quantity every
day far beyond the capacity of the
market in the way of consumption.
But outside of lily of the valley and
bulb stock generally, low grade roses
and violets, things are moving and the
end of the trouble is now apparently
in sight. It looks as though lilies of
first quality would be a good proposi-
tion for their possessors next week.
Watch out.

The cut flower
PHILADELPHIA trade in Phila-
delphia—week of
March 7 to 12—was fairly satisfactory.
While great quantities of flowers came
in, mostly everything was cleaned up
pretty well by Saturday. Easter pros-
pects seem all right. Advance book-
ings up to date (March 15th), both in
cut and plants, are very favorable.
Every indication points to a big trade.

There is nothing to
WASHINGTON say of the flower
market situation in
the capital city, except that the out-
put greatly exceeds the demand. Vio-
lets and carnations as well as sweet
peas are a perfect glut. Thousands of
the former are left on the plants as it
does not pay to pick them. The spring
weather has brought out everything in
super-abundance, and no relief is prom-
ised till the Easter rush. Everywhere
the spirit of St. Patrick is apparent,
even to the grass, which is showing
beautifully everywhere. Shamrocks in
3-inch pots are in the usual demand.
Nearby violets are virtually past for
this season. There is a better demand
for bulbous stock than usual at this
time. There are quantities of trailing
arbutus on the sidewalk stands.

CHICAGO NOTES.

Trade and Miscellaneous Items.

Among the retailers are found plenty
who think that Lent each year makes
less difference with the florists' busi-
ness. Harry Rowe says this year there
has been practically no difference
caused by Lent. He thinks indications
are for a good Easter trade.

department stores last week helped out
some of the decorators and growers.
A noticeable feature this year was the
increased amount of natural flowers
and plants used. One store used doz-
ens of window boxes filled with bloom-
ing plants and vines. Another had
high hanging baskets of natural vines
and in the centers concealed by the
plants were cages of singing cana-
ries. A white trellis, six feet wide,
outlined balconies, etc., and was grace-
fully draped with wild smilax. Quan-
tities of roses, palms, etc., were used
by all and the spring openings did
their share to liven up business.

Destitute crippled children will have
the benefit of the proceeds of a flower
sale, March 26th, at the Virginia Hotel.
If flowers continue so plentiful florists
will not have to make a great sacrifice,
but if flowers are scarce they will con-
tribute just the same, for they have
often proven their willingness to do so.

Members of the small parks com-
mission are greatly pleased over the
gift to the city of a piece of land by
former Congressman Geo. E. Adams
and wife, located on Seminary avenue,
between Center street and Clybourne
avenue.

Personal.

Ernest Wienhoeber has just returned
from an eastern trip. His son, W. H.
Weinhoeber, who accompanied him,
stopped off at Pittsburg on his return

to take his position with H. L. Blind
& Bros.

C. A. Alles, for fifteen years with
Wietor Bros.' wholesale store, is
mourning the loss of his father, Nich-
olas Alles, organist of St. Henry's
church.

George Peiser, who has been with
Hoerber Bros. since their opening, six
months ago, has resigned and accepted
a position with Zeck & Mann on the
15th inst.

On March 3rd occurred the wedding
of Miss Ida Kroeschell, daughter of
William Kroeschell, to Ernest von
Ammon.

LILIES IN THE HOME GARDEN.

E. S. Miller of Wading River, N. Y., was the lecturer at Horticultural Hall last Saturday morning in the weekly course under the auspices of the Massachusetts Horticultural Society. His subject was "Lilies in the Home Garden," and the lecture was illustrated by a series of beautiful stereopticon views, colored by Mrs. Cornelius Van Brunt. Mr. Miller gave a lively and entertaining account of the history of the lily, of which he said about 150 species are known. The "lily of the field" mentioned in Scripture was probably not a lily, but an anemone.

The culture of lilies varies with conditions of climate and soil. Directions for growing were given, also for raising *L. tenuifolium* and others from seed. The beds are covered with hay or excelsior in the early stages of germination. Two of the reasons why lilies are not more generally grown in the home garden is because dealers too often recommend as reliable species which are not hardy in our variable climate. Many lilies cannot stand our hot, dry summer. To raise them successfully we must produce artificial conditions which resemble the natural conditions in which they originated. Rockwork, plenty of moisture and some shade give favorable conditions.

Many amateurs do well by planting lilies among shrubbery. Soil is not as important as drainage. Planting should be done in October. Small bulbs should be planted three inches deep, and the largest bulbs from eight to twelve inches. The lily has few insect enemies, and it is one of the most desirable of all flowers for the garden.

In the discussion which followed Mr. Miller's address, E. H. Wilson gave some very interesting information regarding the native lilies of China.

SPRING FLOWER SHOW AT PHILADELPHIA.

The annual spring show, March 15, 16 and 17, under the auspices of the Pennsylvania Horticultural Society was augmented this year with the exhibits of the National Association of Gardeners, who held their third annual convention in Philadelphia on the above dates. Many of the regular prizes of the P. H. S. were not offered because N. A. G. premiums were ample to bring out a good show. The exhibits as a rule showed high skill in culture, and were very creditable to all concerned. Azaleas, lilies, roses, hyacinths, tulips, daffodils, and the usual line of Easter flowering subjects comprised the bulk of the display. Two handsome specimens of palms (*Caryota sobolifera*) one facing the stairway the other gracing the center of the hall, came from Clement B. Newbold's and helped to take some of the bare effect off the show, but there was a great lack of good palms and other foliage plants, such as should always be present in an exhibition of this nature to tone down and relieve the blaze of color and give rest to the eye, and a general sense of pleasure to the visitor. By "visitor" is meant the general public, of course, as they are the object aimed at in all shows. The principal prize winners were: Winthrop Sargent, Fishkill on Hudson, N. Y., gar. F. C. Whitney; P. A. B. Widener, Ogontz, Pa., gar. W. Kleinheinz; John Wanamaker, Jenkintown, gar. J. H. Dodds; Jno. W. Pepper, Jenkintown, gar. William Robertson; Countess Santa Eulalia, Elkins Park, gar. Thos. Gaynor; Clement B. Newbold, Jenkintown, gar. Samuel Batchelor; Prof. H. F. Osborne, Castle Rock, Garrison, N. Y., gar. James Bell; Mrs. F. C. Penfield, Germantown, gar. Jno. McCleary; Mrs. W. L. Elkins, La Mott, gar. Jno. Hedland; J. W. Geary, Chestnut Hill, gar. James Bell; Miss Gertrude Ely, Bryn Mawr, Pa., gar. R. W. A. Schneider; A. C. Zvolanek, Bound Brook, N. J.; R. B. Ellison, Bryn Mawr, gar. Apel Landroth.

The Waterer premium for hyacinths and other bulbous stock brought out a splendid display—two long tables running from side to side of the hall being entirely filled. The high quality of the Waterer bulbs and the skill of the growers were both well illustrated here. This section was a Mecca for everybody, and showed what can be done for the education of the public when brains and money are back of it. The Michell premiums were along the same general lines and brought out a fine display.

The stage circle was occupied by a large number of small plants, foliage and flowering, from the Dreer greenhouses at Riverton—begonias, anthuriums, ferns, palms, etc. The gems of this collection were the Cocos Weddeliana, absolutely perfect in health and finish—and the admiration and despair of all good palm growers.

There were but two groups of foliage and flowering plants. First prize went to Mr. Batchelor who had a rich and effective showing of rare plants the most striking being the wistarias, laburnums and lilacs. Mr. Robertson's group was splendid from an artistic viewpoint and many good judges liked it even better than the other.

The men who had the deciding cer-

tainly had a hard struggle between these two. Dreer, Michell and Waterer all had attractive displays of seeds, bulbs and sundries.

A pyramid Lady Gay and a balloon Farquhar rose graced the main stairway, showing the splendid things that can be done with these ramblers. They were some four feet high and three feet through and carried thousands of blossoms. William Kleinheinz and William Robertson were the artists in this connection.

Nephrolepis Schoelzeli held the center of attention in the fern department. This variety has come rapidly to the front and from its healthy growth, fine habit, dark deep green crested fronds, seems to be the king of all the crested nephrolepis. Dreers were the pioneers in this and their good judgment is being borne out by the experience of others. Empress Elizabeth stocks, Calla Rossi and Solfaterre, were bright little stars in the general galaxy.

Lager & Hurrell had a collection of orchids comprising about twenty-five species and were the center of attention with the lovers of these aristocrats of the floral world. Their genial representative had his hands full taking orders and answering questions. Alphonse Pericat also had a good collection of orchids on exhibition. William Kleinheinz took the first prize for specimen orchid plant with Schomburgkia undulata, seven feet high, three feet diameter, eight flowering stalks, each umbel carrying from 15 to 25 flowers.

Cineraria stellata appeared in many groups and was well done as a rule and a great feature. Cineraria grandiflora was also in good evidence. It seems rather unfair to pit the very dwarf against the half-tall form of this. Most judges will give the prize to the bigger plant even if the flowers be equally good. Mr. Robertson won an honor on this on size, and strange to say, lost it for the same reason with Primula obconica. In the latter the prize winning lot didn't show anything like the flowers in Robertson's, but they were bigger plants. Cyclamen and amaryllis were both well represented.

A variegated Asparagus Sprengeri and a variegated pineapple (*Ananas sativa*) were attractive novelties. The latter would make a good badge for the Ananias Society, perhaps. On second thought, no. The members of that society get their finest work in in the dark, and the last thing they'd think of is proclaiming themselves by wearing a badge.

We must say a good word for Acanthus montanus. Of course, it's only a thistle, but it is dwarf and has really handsome leaves of the loveliest deep green. Primula Sieboldi, Phlox canadensis, Myosotis semperflorens, Iris pumila hybrida, Roses Walter Speed, Mrs. Aaron Ward, Geo. C. Wand, Margaret Molyneux, The Lyon, Harry Kirk were among the good things exhibited for the Dreer prizes.

Lord & Burnham Co. had a nice alcove at the head of the stairway with a display of framed photos on the walls, showing specimens of their greenhouse building, etc. Mr. Tuthill called the erection an Irish pagoda. The form of their stand was in honor of the saint, of course. D. T. Connor ably represented his firm and disseminated

much useful information to an eager and anxious public. They also had a good exhibit of glass and slat cold-frames on exhibition.

Kleinheinz and Zvolanek were the sweet pea kings. Greenbrook, Mrs. Chas. Totty, No. 45, No. 107, were especially fine.

The cut carnations and roses were excellent and made a great feature. Kleinheinz, Dodds, Robertson, Gaynor and Batchelor all shone in this section. Jno. McCleary won first on the best display of cut flowers of bulbous stock. This was a good feature and brought out a fine display. The Delytras from Robertson's were a splendidly done lot. Of course, this ought to be Dicentra, but they had bad spellers in Holland once so the Delytra error still continues.

The challenge prize for the most points—given to the biggest prize winner in the show by the Pierson U-Bar Co.—was won by W. Kleinheinz with 46, the second being William Robertson with 29, third, S. Batchelor with 21.

G. C. WATSON.

LILIES AT EDGAR'S.

One of the show places in the Boston district, particularly at Easter time, is the W. W. Edgar Co.'s place at Waverley, Mass. On Saturday of this week the annual visit of the members of the Gardeners' and Florists' Club of Boston to inspect the Easter display will take place on invitation of Mrs. Edgar, who takes pleasure in perpetuating this custom established by the late Mr. Edgar many years back. The visitors will find much to praise and admire this year. Herman Barsch, who has been for a number of years foreman at this plant, is well known as one of our most reliable and skillful growers, and what he has to present from year to year is always creditable to his ability as a plantsman, but this year he has outdone himself and no better demonstration of the skill of the modern commercial plant grown can be asked for than is here presented, in a season particularly unfavorable and an Easter which is so early.

The lilies are said by competent judges who have had the privilege of inspecting the stock of many of the largest growers from Chicago eastward, to be the best in the country and never excelled and rarely equalled in America up to the present time. The multiflorums and giganteums are superb, particularly the former, which seem to have outgrown the disease which has been such a handicap in former years and taken a place distinctly in advance of the giganteums. But beyond all and incomparable in size, texture and abundance of bloom is the Formosa stock. As seen at W. W. Edgar Co.'s this is the lily par excellence, and it is a refreshing treat to see the noble carriage and rich luxuriance of this newcomer which seems to possess all the qualities which the lily grower has been sighing for.

There are azaleas of the most approved sorts, hydrangeas with no suggestion of hurrying or necessity therefore, acacias, genistas, and Rambler roses in profusion. The plant industry will thrive whilst we have such exponents of its best possibilities as the W. W. Edgar Co., and Thomas Roland, whose Easter stock we described last week.

DURING RECESS.

Lenox Horticultural Society.

Alfred Jenkins is the chairman of the committee of arrangements for the annual banquet of the Lenox Horticultural Society, to be held in Curtis Hotel, March 30th. It has been decided to allow members of the society to invite ladies. George Foulsham, president, will preside at the post-prandial exercises.

Grand Trunk Horticultural Society.

The celebration in commemoration of the sixth anniversary of the Grand Trunk Horticultural Society, Battle Creek, Mich., occurred on the evening of March 2nd in the large assembly room of the new offices. It was the most successful one ever held and the attendance was large.

The entertainment consisted of instrumental and vocal selections and sleight of hand performances; dancing followed. Hon. John W. Bailey acted as chairman.

The Mastin Automatic White-wash and Spraying Machine is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass.

The pump is of brass throughout, simple and powerful.

The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for fifteen minutes.

All parts are made to gauge, and may be had for repairs.

Just the thing for distributing liquid fertilizer in greenhouses.

Ask your dealer about our EXTENSION HOSE, EXTENSION RODS, and the MASTIN WHITE-WASH NOZZLE for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

J. G. Mastin & Co.,

3124 West Lake Street
CHICAGO, ILL.

New Chicago Sprayer

This sprayer is made of aluminum with two brass plates, one fine, one coarse. These are easily removed and quickly cleaned. Spraying face 4½ inches wide, nozzle 6½ inches long; ¾ inch pipe connections. These sprayers will never wear out and are said by users to be the finest on the market.

Send to us for testimonials from growers using them.

PUBLICATION RECEIVED.

Agriculture for Schools of the Pacific Slope, by E. W. Hilgard, Professor of Agriculture, University of California, and W. J. V. Osterhout, Assistant Professor of Botany, Harvard University. Published by The MacMillan Co., New York.—It is generally admitted that at the present time no more worthy and useful study can be given a place in our schools than that which imparts a knowledge of soil tillage and plant growth. We are convincingly impressed with the value of the book before us as we turn over its pages and note how comprehensive is the field it takes in, how concisely and plainly the fundamental facts in such a wide range of subjects are stated and how interestingly both illustrations and text matter are presented to the eye and understanding of the pupil. The topics of the needs of plants, how these needs must be supplied, how plants are improved, methods of crop increase, fertilizers, foes of the plant, diseases, garden vegetables, fruit and flowers, farm animals, are all covered in detail in the 28 chapters which are splendidly illustrated by over two hundred drawings, half-tone views and wood cuts. The publisher's price is \$1.20 net. Copies of the book can be supplied from this office.

A contract for reconstructing portions of the Garfield Park conservatory, at a cost of \$56,122, was let to Henry Sierks and John Langelan at a special meeting of the west park board March 10. This includes repairs to the glass roof, out of which 110 panes of glass were blown last Sunday, show house, stove house, aquatic house, conifer house and economic house.

ROSES

We offer for immediate delivery the following roses on own roots, dormant, field-grown plants, first-class in every way:

1,000 HELEN GOULD (Baldwin) 12c.
300 PINK BABY RAMBLERS 12c.
500 NEWPORT FAIRY 12c.
1,000 DOROTHY PERKINS 12c.
2,000 TAUSENDSCHON 20c.

also a limited number of dormant, field-grown plants, own roots of the following roses at 12c. each:

SWEETHEART, LADY GAY,
DEBUTANTE, TRIER,
LA FIAMMA, HIAWATHA,
TAUNUS BLUMCHEN.

Clematis paniculata, field-grown, 1-year 5c.

Clematis paniculata, field-grown, 2-year 8c.

Hydrangea paniculata grandiflora, 18 to 24 in. 6c.

Hydrangea paniculata grandiflora, 2 to 3 ft. 9c.

Viburnum plicatum, 2 to 3 ft. 12c.
Chinese Sacred Lilies, \$3.00 per 100;
\$25.00 per 1,000.

As a work of reference, our catalogue is almost indispensable and was produced at a cost of \$10,000. FREE to all who ask for it. Write today.

THE NEW ENGLAND NURSERIES, Inc.

BEDFORD, MASS.

Plant Novelties From China

Botanically the most remarkable feature of the Chinese flora is its close affinity with the flora of the Atlantic States of this country. The trees of China emphasize this affinity in an extraordinary manner. China has its own Tulip tree, Yellow-wood, Sassafras, Tupelo, Coffee-bean, etc., etc., just as this country has, and in the case of several of these the differences between the representatives of the two continents are extremely slight. The mixed forests of China are composed of species belonging to the same genera which form our forests here. Several of these genera extend right around the temperate regions of the Northern Hemisphere, but in nearly every instance the Chinese species are more nearly related to the American than the European. Much work remains to be done before we can claim to have, in any sense of the word, a complete knowledge of the forest flora of China. So far approximately 550 species of trees are known from China, and this number, incomplete as it is, is considerable in excess of the number of trees found in this country, though the territory here is considerably greater.

To prove the value of new trees, their adaptability to climate, and what not, longer time is necessary than for the other subjects dealt with in these articles and the writer in this, his last article, is not prepared to say

POPULUS LASIOCARPA

POPULUS LASIOCARPA
65 feet high, at Home.

very much on this subject. The object of this series of articles has been to endeavor to bring under general notice certain new plants of proven merit which can be obtained right now by those interested. In the case of trees obviously less is known to date and this precludes any extended notice of them for the time being. There are, however, two, unique in their way and of outstanding merit, which are obtainable at the moment, and these articles would be incomplete were mention of them omitted; namely, *Davidia involucrata* and *Populus lasiocarpa*.

The *Davidia* is perhaps the most remarkable and ornamental flowering tree in the whole temperate flora. This tree is a near relation of our native *Cornus florida*, although the relationship is not very obvious to the uninitiated. The *Davidia* is a tree, 40-60 ft. high, pyramidal in part, after the manner of a wild pear tree. The leaves resemble those of a lime or a mulberry and are either smooth or hairy below. The flowers are borne on short spurs as in many fruit trees and the ornamental part consists of two bracts which subtend the flowers proper. These bracts are opposite, ovate, and unequal in size. The largest measures 6-8½ inches x 3-4 inches. The lesser 3-6 inches x 2-3 inches. The bracts unfold with the leaves but reach their full size by the time the leaves are three parts grown. At first green, the bracts soon become snow white, and being membranous in texture, are pendulous. The gentlest zephyr moves them and they forcibly remind one of an army of giant butterflies flitting hither and thither amongst the leaves. The tree is very free-

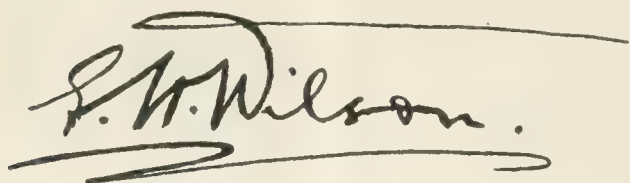

flowering and when in full bloom looks from the distance like a green pyramid heavily flecked with snow. On a dull day and in the evenings it is particularly conspicuous, standing out in sharp contrast from all its neighbors in the woods and forests.

Davidia is quite hardy in the Arnold Arboretum, where it has stood out for several years now. In Mons Vilmorin's garden, at Les Barres, France, where three plants were raised from seeds sent there by a missionary some years ago, it has flowered several times, and last year fruited. In England trees eight years old, raised from seed sent there by the writer, are now upwards of 12 feet high, and may be expected to flower before very long.

This *Davidia* was the special object of the writer's first journey to China, and upwards of thirteen thousand plants were raised from seed sent home. These have now been distributed far and wide and in the near future, when its merits are fully known, this tree will probably be more generally in demand than any other ornamental flowering tree.

Populus lasiocarpa is a magnificent tree with the largest and most handsome foliage of any of the family. This new poplar is a denizen of moist woods and forests, where it forms a shapely tree 50-70 ft. high. The leaves are broadly cordate, pointed, upwards of a foot in length, and correspondingly broad. In adult trees the foliage shows no marked diminution in size.

In China some forty odd species of Maple occur. Many of these are now in cultivation and show much promise of being both hardy and ornamental. Then we have many flowering trees belonging to Rosaceae and other families; new Magnolias, Oaks, Ashes, Walnuts, Chestnuts, Birches, Beeches, Hornbeam, Willows, etc., etc. There will be no dearth of new trees for many years to come, and, in all earnestness, those interested will do well to visit the Arnold Arboretum more frequently in the near future than maybe they have done in the past. With a hearty *au revoir* to HORTICULTURE and its readers the writer now lays down his pen and takes up his traveling kit, bound once more for the back blocks of Far Cathay.

Our readers will, no doubt, part reluctantly with our distinguished correspondent and we shall all keenly miss his interesting and instructive weekly letters.

It is with much pleasure, therefore, that we are enabled to announce that Mr. Wilson will not be entirely lost to the readers of HORTICULTURE while absent, as it has been arranged, with the cordial approval of Prof. Sargent, that such notes of new discovery and incidents of interest to horticultural readers as may come from the explorer, will appear in HORTICULTURE from time to time as received.—Ed.

Important

Intending exhibitors are reminded that the rules relating to the great orchid show which is to be held in Boston during the last week in May, require that all entries in the competitive classes shall be made previous to April 1. There are only four days left for those who have not already made entry in which to do so in compliance with the rules.

Trans-Atlantic Notes

A HARDY COMPETITOR IN CARNATIONS

A variety of the hardy out of doors carnation has at length been raised in the Swiss canton Graubunden by Mr. H. Spengler-Aibli, a florist at Chur, who has for many years been engaged in the improvement of carnations, and more particularly with the intent of obtaining a perfectly hardy race. His latest achievement is the variety *Ruhm von Chur*, which has flowers of gigantic dimensions, the perfection of shape and coloring, and of fine quality as a cut flower, and quite the equal of the American carnation, according to M. Thos. Schweizer of Zurich, who has an article about it in the "Gartenwelt" for March 5, last.

Graubunden, and the Engadine, have been famous for carnation culture for generations, and their productions have been the wonder of the many foreign visitors to these parts of Switzerland. The plants are quite at home in the mountain air of the place, and may be grown in the valleys likewise, with considerable success, and far beyond the Swiss frontiers. The variety *Ruhm von Chur* has been grown in the open air for five winters without protection of any sort, at Chur, by the Zurich See and in southern Germany; and has established its reputation for complete hardiness. The bloom is of a light rose pink, has a fine shape, is borne on a stout stalk 18 to 24 inches high and needs no support. The flower opens well even in bad weather. A second harvest of flowers is obtained in the autumn.

JUBILEE BULB SHOW AT HAARLEM

This show that is organized by the General Bulb Growers' Society of Haarlem will be opened to the public by H. R. H. Prince Henry of the Netherlands on March 25. A building has been erected for plants and flowers; but owing to the available area having been planted in the autumn with bulbs, no other buildings can be erected. The exhibition will offer attractions from the time of opening to the finish at the end of May. The international jury will assemble in March and April, under the presidency of Mr. de Marez Oyens, ex-minister of commerce, and present President of the Netherlands Federation of Horticultural Societies.

CISSUS NJEGERRE

There is figured in the "Gartenwelt" for February 19 of the present year, a species of wild vine under the name given above. According to H. Strauss of Dahlem Botanical Garden, Berlin, ripe seeds of this plant were gathered in 1903 by Privy Councillor Engler, director of Dahlem, near Amani in German East Africa, where, in the primeval forests it is widely distributed, growing to the tops of the tallest trees, and hanging in beautiful festoons. The seeds vegetated at Dahlem and many of the plants have been raised at that place and are growing luxuriantly. The plant resembles *C. adenopodus* (Sprague) from Uganda very closely, but from which it chiefly differs in the hairy flowers; and from *C. Buchananii* (Planch) from the Zambesi region, in the ternate

Iris Xiphium, syn. Iris hispanica

Iris xiphium, or the Spanish iris, as it is commonly called, is in my opinion the handsomest species of xiphion—or bubous section. Being a native of the Pyrenees mountains, in spite of its southern home it has proven perfectly hardy and under cover well endures even the frigid winters of our northern states. The deeply channeled linear leaves are from $\frac{1}{8}$ to $\frac{1}{4}$ inch wide and seldom exceed one foot in length. Stems reach a height of from one to two feet, each bearing two or three closely set terminal buds. Flowers open in July. They show great diversity in colors, which run in light blue, lilac, purple and yellow shades. Plants, whenever desired in great quantity, may be raised from seed. It is advisable to sow right after ripening in flats or pans, filled with light, sandy soil. Overwintered in cold frames the seed usually does not germinate until the following spring and it takes about three years for the young bulbs to reach the flowering size.

In the garden they prefer an open sunny position, but, in every instance care should be taken that the plantation is protected from heavy winds, which, when accompanied by rain, are very apt to lay the top heavy stems flat or break them off. It is also necessary to look for proper drainage, or choose a location high enough to prevent water or ice from accumulating during fall and winter. Bulbs in time produce numberless offsets and thus when left undisturbed for several years form good sized clumps. This clump formation is desirable when that mass effect is wanted which is shown in our illustration.

As cut flowers Spanish iris possess good lasting qualities and marked fragrance. Like some of the dwarfy spring flowering Caucasian, Persian and Asia Minor varieties, noteworthy the pretty *I. pumila*, our Pyrene mountain representative, is well adapted for the rockery. More recently I have frequently seen Spanish iris used also to good advantage both on the mixed herbaceous border and in formal garden plantings. Though not quite as showy as the rhizomatous German and Japanese types, when planted for mass effect, Spanish iris soon shows that it merits space and the moderate amount of care required.

Richard Rothe

Northeast Harbor, Maine.

(not in fives) standing leaves, and the glandulous inflorescence. The area of the leaves is covered in spring and summer with hair of a violet to a blood red color, but in the winter, probably from the decrease of sunlight, they are of a much less lively color. The flower stalks arise from the axils of the leaves and display greenish or reddish insignificant flowers. It would make a bright-looking stove creeper.

FLORENCE

The city of Florence and the Royal Horticultural Society of the same are busy with the project of a horticultural show in the month of May, 1911, in commemoration of the 50th year of the establishment of the Italian kingdom. The event will be a national one, and will enjoy the support of the Italian minister of agriculture. The show committee to which the presidents of various foreign horticultural societies belong have determined that in some of the divisions foreigners may compete; and intentions to exhibit must be sent into the show committee not later than March 31, 1911.

THE SWEET PEA ANNUAL

This publication of the National Sweet Pea Society, issued recently, proves that the Society is advancing in

its policy and making reasonable progress. The Annual has increased in size on previous issues, and there is a chapter on the Sweet Pea Carnival at Bozeman, Montana, contributed by S. B. Dicks; notes on the trials at Reading by Chas. Foster; and Sweet Peas from Cuttings by J. Chisholm is an interesting contribution. In the full report given of the Sweet Pea Conference that took place in December last the papers read by W. J. Unwin on "Sweet Pea Names and Naming," and by W. Cuthbertson on the "Imperfect Seeding of Waved Sweet Peas," are given.

The official catalogue of sweet pea names fills sixteen pages. In an article contributed on the subject of "The Most Popular Sweet Peas" the writer states that certain varieties thrive under practically every condition, otherwise there would not be such a consensus of opinion in their favor. The twelve varieties receiving most votes are Helen Lewis, 105; Etta Dyke, 101; Countess Spencer, 99; Mrs. Hardcastle Sykes, 97; John Ingman, 81; Evelyn Hemus, 78; The King, 69; Constance Oliver, 67; Mrs. Henry Bell, 67; Frank Dolby, 64; Mrs. A. Ireland, 60; Clara Curtis, 53.

Put a horticulturist on the Park Board

As expected, the hearing on the matter of the Commonwealth Avenue tree planting before the Boston Park Commission had no effect on the carrying out of the plans as previously adopted by that board. They had gone so far already that a change of front could not have been reasonably expected. The citizens have Mayor Fitzgerald to thank and not the Park Board for the privilege of even presenting their views on this matter which means so much to them. The size and character of the protesting delegation was such as to show the mayor that the demand for at least one member on the board who has some horticultural intelligence is well-founded and may wisely be acceded to. We earnestly hope that at the proper time the mayor will so act. As for Commonwealth

Avenue it will stand in time to come a perpetual reminder, each year more convincing than the last, of a frivolous, short-sighted and ill-advised measure. The remedy against further malpractice is obvious and the mayor has it in his keeping.

An ever-ready ally

The New York Sunday Herald of March 20 was worth a lot of money to the florist trade. It was announced as a great Easter edition, giving a colored sheet and a large amount of space to interesting information concerning the annual feast of the flowers which grows in importance and beauty each year. Publications of this character, when the story is told truthfully and without absurd sensationalism, are of incalculable benefit to the flower grower and dealer, helping to make a market for his products and carrying the story of his fragrant offerings to every nook and corner of the land in alluring dress. In the campaign for wider publicity which already is and will be still more convincingly forced upon the florist industry the power of the newspaper is not adequately realized by those who would be the largest beneficiaries through a more persistent and systematic use of this ever-ready medium for business exploitation. In all our affairs—exhibitions and other projects where public interest is sought—we are woefully behindhand in the use of our best ally. No amusement enterprise worthy of the name would ever think of success without the services of the advance agent. And what would they not give to have the universal entre to the heart of all humankind which is at all times at the disposal of the florist but which the average florist makes so little use of.

Securing the exhibitors

As noted in our brief report last week, the New York exhibition of the American Rose Society and the Horticultural Society of New York jointly, although excellent as to quality of material shown, was of very moderate extent. We have heard more or less criticism of the growers of florists' roses, both East and West, for their failure to contribute more liberally to the rose display and of the members of the horticultural society for similar neglect in the section devoted to conservatory plant groups, etc., with not a few expressions of disappointment on the part of visitors who had come long distances expecting to see something to justify the effort. The dereliction cannot be remedied now, of course, and there can be no question in anybody's mind as to the extent and character of the show that will be provided at Boston next year. Yet a word of counsel to those who bear the responsibility of arranging for the exhibitions of such organizations may not be considered too intrusive or untimely. There is at least one direction in which the methods employed for securing exhibits for these annual affairs might be much improved. So far as the American Rose Society is concerned there is certainly no lack of generosity and public spirit in the response made by its members and friends when special premiums are called for, as the prize schedule well attests each year. Why not put some of the same energy into the work of getting exhibitors which is displayed in the securing of special prizes? True, it does seem a little like overdoing things after big prizes, fine exhibition halls and an attendance of cultured admirers have all been assured, to have to go out into the highways and byways to plead with exhibitors and all that but it is more desirable to do this than to put up a slim show. We have known of many a fine exhibition, even in Boston, which owed the best part of its success and completeness to the element of persistent personal appeal in the securing of entries.

SEASONABLE NOTES ON CULTURE OF FLORISTS' STOCK.

Asparagus plumosus nanus.

To have vigorous stock for June planting can only be accomplished by avoiding any check in the growth of the seedlings. While the culture of *Asparagus plumosus* in a general way is not especially difficult, the raising of good stock involves the exercise of care and caution as to watering and airing. They want a light, warm house when young, with proper amount of moisture to push them forward. By the first week in April they should be big enough to shift into 3-inch pots and as soon as they need a shift they can be potted into 4-inch pots, which will suffice till they are planted out into their permanent beds. When intended for decorative purposes it can be grown on in 6-inch or 8-inch pots, using a rich soil; a heavy loam with third or fourth of cow manure is a good compost for it. When 18 to 20 inches long the tops can be nipped off, so as to make well-proportioned and bushy plants for the various decorative purposes for which this handsome variety is used.

Calanthes.

These orchids produce an abundance of showy flowers that last a long time in perfection. If potted now they will flower in January and February. Start the bulbs in flats of sand until roots and growths start, then place two bulbs in a 6-inch pot or three or four in an 8-inch pan. A compost of fibrous soil and well dried and decayed cow manure in equal parts, to which may be added some peat and silver sand, will grow them well. Be sure and pot them firmly, tying the bulbs to short stakes so as to keep them steady. In their growing season they require a hot and moist house, and when growth is complete a cooler house will be more beneficial. Watering with liquid manure occasionally will be to their liking. They are subject to thrips, which must be continually searched for and destroyed by sponging the plants over often. Attend to watering, syringing over head in fine weather, and keeping the floors and benches well damped and they will pay for the trouble.

Dracaena indivisa.

This dracaena is indispensable to all growers of miscellaneous stock. It is unapproachable for vases, window boxes, or when a graceful plant is wanted to withstand the sun and drought of our hot summers. The young plants should be encouraged to make as vigorous growth as possible. They are better for being grown under glass the first year, and the following year they may be planted out in good rich soil, where they can be left till September, when they should be lifted and potted into 4-inch or 6-inch pots, using a good loam that is quite lumpy with about one-fourth of well-rotted cow manure and some leaf-mould with addition of a little charcoal. Use plenty of broken crocks so as to have good drainage. They do well in a night temperature of 50 to 55 degrees when established.

Euphorbia fulgens.

The plants that flowered during the winter will have plenty of wood suit-

able for making into cuttings. Don't use the hard wood. By cutting back the old plants in April young growth will start and make good cuttings to root in May. Watchful shading and care when potting will place the plants beyond any further danger. It is well to allow the young and old plants time to become fairly root-bound before repotting. They like a soil of such a texture that the water will freely pass through. A good compost should consist of two parts turfy sod, one part of leaf-mould, and the remaining fourth well decayed manure with some sand. The plants thrive best in a warm and rather moist atmosphere where the temperature will never be less than 60 degrees at night. When the growing period is complete, the plants should be removed into a drier air, and where they will have ample ventilation, and withhold water gradually. This will allow a rapid and thorough ripening of the wood, which will produce exceptionally fine sprays. Some years ago this beautiful plant was one of our standard winter flowering plants. It seems strange that it is not more extensively grown. A few difficult details in its culture no doubt stand in its way.

Shading.

Such plants as palms and ferns will now require some shade. It will be better to apply only a light shade as yet, and as the season advances you can apply more. To retard and make them hold their color a moderately heavy shade over violets will be found very beneficial. It also keeps the house cooler. A good mixture to use is one gallon of kerosene with ten pounds of white lead, and mixed well before applying. This shade will withstand the rains well and is not hard to remove.

Swainsona.

Cuttings of *Swainsona galegifolia* that were rooted the last of February, if regularly attended to as to potting and repotting, watering and curing, will grow into good 4-inch or 5-inch flowering plants by Decoration Day, suitable for cemetery planting. They are good for indoors and if planted out on a bench will flower from June until far into the winter. If picked when nearly all the blooms are fully open, and the bunches of sprays are placed in water and kept in a cool but light place for a day, the flowers will not wilt. The bloom with its deep-green setting of fern-like foliage is good for all kinds of made-up work if rightly handled. Cuttings can be put in now, but be careful and not let them flag or they will be worthless. Any side shoots taken from thrifty grown plants, by pulling them sideways out of the axil formed by the leaf and main stem will make good cuttings.

JOHN J. M. FARRELL.

Mr. Farrell's next notes will be on Camellias, Left-over Stock, Nephrolepis, Poinsettias, Rose Compost and Stevias.

DAHLIAS.

Dahlias are among our most popular tuberous garden plants, and some of the types, especially the cactus and single varieties, are very useful in cut flower work, especially for large decorations, cemetery bouquets, etc., and may be artistically arranged to make very good effects in home decorations.

Many of the varieties increase very

rapidly by tuber divisions, while a few of them increase too slowly to be a profitable crop. New varieties may be easily produced from seed, many new ones of great merit having been introduced in the past few years, and new ones are coming out each year. In order to get good ones from seed only the best hand pollenized seed should be used.

They may be planted here in New England from the time the frost is out of the ground in April until July. The July planted ones grow quickly and produce the best flowers. The earlier plantings will produce much larger clumps of bulbs; but, coming in flower when the weather is warmer, the flowers are not apt to be as large or as perfect as those from later planting, and the "tarnish bug" being active at this season blasts many buds or causes them to produce imperfect flowers, while the later ones escape this as the bug does not work in cool weather.

These bugs may be controlled in part at least by spraying with Bordeaux and paris green in weak solution or by using "bug death," or even coal ashes sifted fine and dusted on the plants when the dew is on will check them to some extent.

In planting, the tubers should be laid on the side, rather than stood up straight as many growers practice, and covered from four to six inches deep, placing the tubers 1½ to 2 ft. apart, the rows being 3 ft. or more apart.

Keep the soil well stirred through the first part of the growing season, to keep down weeds and conserve moisture, being careful to cultivate after every rain to break up the soil particles and prevent baking or crusting over, until the plants are about 2 ft. high. The balance of the season a mulch of straw dressing or any waste material to shade the ground is better than cultivation.

The pompon and show varieties bloom more freely usually than the cactus, single or decorative types. A. D. Lavoni (pink), Frank Smith (variegated), Gloire de Lyon (white), Storm King (white), Meteor (red), and Dr. J. D. Kirkland (maroon), are some of the best blooming show varieties. Grand Duke Alexis (white tinted lavender) is very large and handsome, but a shy bloomer in most places.

Among cactus varieties *Florodora* (wine crimson), and *Countess of Lonsdale*, are extra free bloomers. *Kriemhilde* (pink), *Master Earl* (orange), *Mrs. Chas. Turner* (yellow), are among the most beautiful of the older cactus varieties.

The bulbs should not be dug in fall until the frost kills the tops, when they may be dug, the stalks cut quite close to top of clump. When thoroughly dry, store them in barrels or boxes, packing the clumps bottom up. A cool, dry cellar is best, but any place where they will not freeze or dry up too much will do. A cool room upstairs is better than a damp cellar, or one with too much heat.

Before planting, divide tubers so as to produce only two or three stalks to the hill; one is enough and if the top of that one is nipped off above the second or third leaf joint it will branch and stand up better and produce better blossoms.

E. R. MACOMBER.

AMERICAN ROSE SOCIETY

Annual Meeting in New York City

Next Meeting in Boston, March 1911—Officers Elected: President, Wm. H. Elliott; Vice-President, A. Farenwald; Secretary, Benj. Hammond; Treasurer, Harry O. May

In an evil hour the telegraph company "went back" on us and a despatch from the scene of activity got sidetracked, so we were unable to announce in our notes of last week the names of officers elected and other details of Thursday's proceedings in New York.

The first thing after the addresses and reports of officers and other routine work at the opening session on Thursday forenoon, was the selection of meeting place for 1911. Wallace R. Pierson of Cromwell, Conn., and P. Welch of Boston, presented Boston's claims so well that the New England metropolis was unanimously selected and the time of the National Flower Show in that city was agreed on as the date.

Then came the election of officers, resulting as follows, all by unanimous votes:—President, Wm. H. Elliott, Brighton, Mass.; vice-president, A. Farenwald, Roslyn, Pa.; secretary, Benj. Hammond, Fishkill, N. Y.; treasurer, Harry O. May, Summit, N. J.

The secretary was instructed to prepare a fitting memorial to be sent to the family of the late Mrs. Gertrude M. Hubbard, a friend of the Society. Interesting papers, as provided in the program were read.

In our report on the exhibition in last week's issue, we credited Clement Moore as winner of first prize for specimen cattleya. F. L. Moore was the lucky gentleman.

Among the exhibits not mentioned in our previous report were the following:—Siebrecht & Sons, specimen palms; A. L. Miller, group of daisies and pansies; F. C. Gully of Ramsay's, N. J., fine antirrhinums and Beauty of Nice stocks; W. H. Waite, *Cytisus præcox* and *hippeastrums*; The Rosary Company, designs of violets and *Dendrobium Wardianum*, in form of lady's hat and fan.

THE ROSE THE BRIGHTEST OF FLOWERS.

A paper read before the American Rose Society by Adolph Farenwald.

When I received word to write a paper on the above subject, I felt that it was sent to the wrong man. I am

a rose grower, no poet, so I tried to wriggle out of it; but the powers that be wanted me to stick to the gun, and as I am an enthusiastic member of this society, and a lover of roses as well as a grower, I consented.

I shall now do my best to honor the Queen of Flowers. If I fall short, you

W. H. ELLIOTT

President-elect, American Rose Society.

must remember that I am only a rose grower, not a poet. Of course, there are other flowers in the race, such as orchids, carnations, violets, and a host of others "also ran." They are all beautiful; they all fill their places, but which one has sufficient popularity to fill the place of queen? With its exquisite form, its graceful carriage, its thousands of different hues of color, coupled with the grandest foliage imaginable, we see in it the embodiment of all that is beautiful in the kingdom of flowers. For ages the poets have sung their praise of its charms. The composer has put to music what stirred his soul when face to face with its matchless beauty. Innumerable

times the painter has tried to copy its wonderful forms and colors.

Our Queen is the object of our fondest affections as well as of our deepest sympathy. Her mission is varied, fitting all occasions and all lives. Her bright coloring and delicate perfume are silent messengers of comfort and cheer to the sick in body and soul. She also brings to the memory of most of us thought of the long ago—"the days of love and roses." No human being can resist the charms of our Queen, no matter how lowly his station or how crude his ideas of beauty.

Truly, fellow members, no nobler profession exists than ours—the rose grower's, whose everlasting patience and skill tries to improve on Mother Nature. To think that we send every day to thousands and thousands of homes these messengers of love and cheer. No, we need not be afraid of any other flower taking the place of our beloved Queen as long as we keep on producing and improving in the future as we have done in the past, to which fact the present exhibition now being held in this hall testifies.

All growers of roses are rose lovers. Whether they produce the flowers for commercial purposes, or simply for pleasure, the aim is one—perfection. A few weeks ago I said publicly in Philadelphia that the carnation was pushing hard for first place. Of course, we know the carnation has its charms, but the rose is its superior, and always will be. It is simply the fact that its producers, as a class, are putting forth their best efforts. But, if all rose growers should strive as hard what marvelous results might be obtained!

The Rose Society has a motto—"A bush for every garden, a rose for every home." It is to educate the masses of our people to the point of appreciating the value of the rose as a means of culture, so that in the future men will discuss with each other the merits of their several rose gardens, and compare notes on the different varieties. In the spring time, before leaving in the morning for their places of business in the dark and dusty cities, they will take a run into their gardens and receive an inspiration from the

bedewed beauties such as will enable them to wrestle more effectively with the problems of the day. Furthermore, they will enjoy talking to their neighbors and friends on these beauties of nature, instead of simply filling each others minds, as they do now, with exchanges of opinions on the various sports of the day, stocks and bonds, etc. That education no other flower can bring, as no other creation of nature has attained, as I said before, such beauty, and won such universal love as our Queen, when once thoroughly understood by the great amateur public.

"The Rose the Brightest of Flowers." When I started on this subject, I felt that I could not do it proper justice. But I caught the inspiration as I thought upon it, as everyone must be inspired when once thoroughly aroused to the charms of the Queen of Flowers. I have tried to convey some of my innermost thoughts on our glorious Queen, and doing it has brought back to my memory dreams of long, long ago; and I hope that for some, or all of you, it will also call up memories of the "days of love and roses."

THE BANQUET.

On Thursday evening, March 17, the time-honored annual gathering of the New York Florists' Club around the festive board, came off with full glory and refulgence, as befitted the verdant holiday and the distinguished guests which it was the Club's privilege to entertain. The members of the American Rose Society with their ladies, were treated to an entertainment such as only the Metropolis could provide, and no more care free and joyous company of nearly 300 banqueters was ever gathered together than that of which our cover illustration gives but a faint suggestion. The menu was excellent—of course it was—and the Fifth Avenue Restaurant did its part splendidly. There was music galore during the feasting which lasted till nearly midnight before the speech-making was commenced. That only the merest fragments of most of the speeches were heard by anybody didn't seem to give any worry and although Toastmaster O'Mara and his gifted fellow talkers were full of eloquence and wit, yet so infectious was the prevailing merriment that had all the speeches been left out, nobody would have been any less happy.

But an affair of this kind without some post prandial proceedings would, of course, be quite out of the question, and so the following program had been prepared and was adhered to as well as the circumstances would permit:—

PROGRAMME.

M. H. KIRK, Conductor.
PATRICK O'MARA, Toastmaster.
"The Star Spangled Banner"....Orchestra
Song, "Still wie die Nacht".....Emory B. Brante
Toast, "Our Guests".....Miss Daisy Pollock
A. L. Miller, Pres., N. Y. F. C.
Song, "Danza," by Chadwick.....Miss Daisy Pollock
Address, "Floriculture from the Standpoint of the Experiment Station".....Prof. John Craig
Cello Solo, Selected.....Russell Kelly
Address, "Horticulture as an Educative Force".....Geo. V. Nash
Song, "Pearl of Brazil".....Miss Sabery Dorsell
Toast, "Our Night".....W. A. Manda
Recitation, Selected.....Miss Barnett
Address, "National Horticulture".....E. R. Pierson, Pres. S. A. F.
Song, Topical.....Maurice J. Hayes

Song, "Come Back to Erin".....Miss Sabery Dorsell
Toast, "The American Rose Society," August F. Poehlmann, Pres. A. R. S.
Recitation, Selected....Master K. J. Casey
Toast, "Our Hosts," Hon. Phil Breitmeyer
Song, "Lass mich dein Auge Kussum," by Fielitz.....Miss Daisy Pollock
Toast, "The Ladies—'God Bless 'em'" Richard Connel
Song, "Spirito Gentil"....Emory B. Brante
Song, "The Heather"....Miss Sabery Dorsell
Song, 1 "Der Wanderer," Schubert....2 Irish Love Song, Margaret R. Lang.....Edmond A. Jahn
"Auld Lang Syne."

After perusing the above nobody will wonder that it was well along past the midnight hour before there was any thought of home. As the picture shows, there was no lack of ladies on this occasion and they applauded with glee Toastmaster O'Mara's reminder that the first time

A. FARENWALD

Vice-president elect, American Rose Society.

the American Carnation Society was entertained in New York there was only one lady present at the banquet and she certainly brought a lot of fame to the New York Florists' Club. "Today," he said, "members don't have to explain and apologize to their wives after attending a club dinner, which shows how we are growing."

NEWS NOTES.

Eldora, Ia.—J. M. Pierce of Des Moines, publisher of the Pierce Farmers' Weekly, has formed a company with J. S. Polland, a local florist, under the name of the J. S. Polland Floral Co. A large acreage has been purchased and greenhouse buildings will be erected. It is expected they will eventually branch out into a large nursery business.

New York—R. Grelsch is successor to O. V. Zangen as wholesale florist at 52 West 28th street.

The new 12-story Peter Cooper Building at the corner of West 28th street and Fourth avenue, is looked upon favorably as a possible new centre for the wholesale flower trade of New York. The first and second floors are well adapted for the purpose and the subway elevated and surface car transportation accommodations are excellent.

DINGEE, HELLER, SMITH ROSE.

Perhaps this note on the warm controversy now going on as to the identity of the above rose ought to be prefaced by an explanation of what was intended by the S. A. F. when it introduced its nomenclature registration.

The main purpose was to prevent duplication of names. That idea was for the protection of buyers, and is sound in morals, ethics and business. It has worked well and is doing good right along. The writer is in thorough sympathy with same and always will be.

A correspondent of HORTICULTURE wishes to know why Conard & Jones wish to register the name of W. R. Smith at this late date—years and years after the variety has been on the market under various names, seeing that they were neither the originators nor had anything to do with the early history of the variety. The natural supposition is that E. G. Hill, who bought the stock from John Shellem, who bought it from Richard Bagg (the originator), would be the right party. Where do Conard & Jones come in on it? This question your correspondent is unable to answer.

A recent interview with E. G. Hill enables the writer to put his finger on the real reason why this rose has appeared under various names—and that reason absolves all those who have been by implication accused of renaming by this belated proposed registration. It is this: John Shellem was one of the most amiable of men. He would give a friend a plant of anything new or good he might happen to have—he did that with this then new rose in many instances, long before it was named, and long before he finally sold the whole stock of it to E. G. Hill and long before it was named W. R. Smith at a private lunch at McGowan's restaurant, Philadelphia, at which only Jno. Shellem, Robert Craig and W. R. Smith were present. No doubt Richard Bagg did the same thing while he was in Bridgeton and before he went to work for Jno. Shellem.

One can readily see, therefore, that many people might have become possessed of this new rose, and in some instances without knowing where they got it, and on recognizing its merits considered themselves doing a public service in giving the unnamed a name and letting the public know about it.

This is an entirely different thing from deliberately stealing another's novelty and renaming it, and should be so considered. It also invalidates to a large extent, the present effort to register the rose under the name of W. R. Smith—whatever the motives of the Conard & Jones Co. may be. No doubt they are perfectly honorable.

In my judgment the S. A. F. have a right to protect the innocent holders of this rose under the names given it—and should not boost any one of them by registration at this late date, nor do an injustice by implying dishonesty to honest people.

G. C. WATSON.

Headquarters for Hardy JAPANESE LILIES

FOR IMMEDIATE DELIVERY

The Hardy Lilies are planted by many florists now. They bloom outdoors in July and August and are extremely useful for decorative purposes. The Auratum, Album and Rubrum are excellent for forcing.

	Per doz.	Per 100	Per 1000
Lilium Auratum (Golden Banded Lily).			
8 to 9 inches	\$0 90	\$6 00	\$50 00
9 to 11 inches	1 25	9 00	80 00
11 to 13 inches	2 25	15 00	140 00
Lilium Auratum Platyphyllum. A great improvement on the old Auratum, otherwise similar except that the flowers are very much larger.			
8 to 9 inches	1 50	10 00	90 00
Lilium Album (Praecox). Pure white.			
8 to 9 inches	1 10	7 50	72 50
9 to 11 inches	1 60	12 50	115 00
Lilium Album Kraetzleri. Pure white; an improvement on Lilium Album.			
9 to 11 inches	2 25	15 00	135 00

	Per doz.	Per 100	Per 1000
Lilium Magnificum (Rich pink).

NEWS OF THE CLUBS AND SOCIETIES

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The regular monthly club meeting at Horticultural Hall on Tuesday evening, March 22, was remarkably well attended, considering the demands of Easter week and spring activities.

The special interest of the evening centered in the address on hardy herbaceous perennials, by Arthur E. Thatcher of the Arnold Arboretum. Mr. Thatcher is no stranger to the readers of HORTICULTURE, to the columns of which he is a frequent and valued contributor. His paper was of exceptional value because it included comment on the species of recent introduction and their respective qualities as compared with the older sorts. A rising vote of thanks was accorded.

A letter to the secretary from U. S. Senator Murray Crane in approval of the club's action in favor of parcels post and condemning the free seed distribution by Congress was read and vigorously cheered.

P. Welch, Thos. J. Grey and others spoke on the great loss the club had sustained in the death of its treasurer, Edward Hatch. William J. Stewart, William Downs and P. Welch were constituted a committee to prepare suitable resolutions to be presented at the next meeting.

The matter of electing a successor to Mr. Hatch as treasurer was assigned for the next meeting.

On the platform a number of attractive exhibits were displayed. William Sim contributed eighteen varieties of sweet peas, also violets and cyclamen. From Chas. Sander came the lovely Azalea balsamiflora. W. N. Craig showed Laelio - cattleya Frederick Boyle var. Kerchovianum, a cross between a white Laelia anceps and a white Cattleya Trianae. Schizanthus hybrida grandiflorus oculatus came from G. Bleicken, carnations from J. F. Flood, seedling cannas from Eber Holmes, and Paul De Nave brought from Fall River a fine group of com-

mercial orchids. Mr. De Nave, on being questioned, replied that he grows his orchids in a temperature of 55 to 58 degrees with plenty of ventilation and bottom air—oncidiums on the north side and dendrobiums and cattleyas on the south side of the same house. Spraying overhead frequently on sunny days he regarded as an essential. The only feeding he gives is a little sheep manure about three or four weeks before flowering time.

MINNESOTA STATE FLORISTS' ASSOCIATION.

The regular monthly meeting of the Minnesota State Florists' Association was held on March 15. The flower show committee submitted a preliminary premium list (total amount about \$2,700.00). The same rules for judging will be used as in the respective National Carnation, Rose and Chrysanthemum Societies. The promised lecture of Professor Clements was postponed until the April meeting.

Tausendschon, exhibited by Holm & Olson, scored 91½ points; Lily of the valley, 81; Lady Bountiful carnation, Winsor, all by Nagel & Son, 85; Lilium longiflorum giganteum, 82½, Primula obconica, 73½, Hydrangea otaksa, 78½, Bride roses, 85, all by Lakewood Cemetery.

ELBERON HORTICULTURAL SOCIETY.

March 21st was "Rose Night." C. Duncan and Peter Murray were the principal winners; C. Duncan was also awarded a cultural certificate for a collection of roses. Mr. Duncan gave a short talk on rose growing, which was very interesting. Mr. Murray was awarded a cultural certificate for three very fine plants of calceolaria and he also gave us a few points on their culture. D. Kelley was awarded cultural certificate for sweet peas, and Wm. Seymour for callas.

ALEX. FLEMING, Rec. Sec.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

The Executive Board held its regular mid-Lent meeting at Rochester, N. Y., March 12 to 16. The sessions of the Executive Board have never been considered public property until reported in his official capacity by the secretary of the society. In deference to this very proper restriction we refrain from any statement as to the proceedings on this occasion. Secretary Dorner will, no doubt, in due time make a report through these columns.

Department of Registration.

As no objections have been filed, public notice is hereby given that the registration of the rose, "Wm. R. Smith," by The Conard & Jones Company of West Grove, Pennsylvania, becomes complete.

H. B. DORNER, Sec.

March 17, 1910.

ROCHESTER FLORISTS' ASSOCIATION.

The Rochester Florists' Association had the honor of entertaining the Executive Board of the Society of American Florists on the occasion of the second annual dinner of the association held at Rochester, N. Y., on the evening of March 14. About 150 ladies and gentlemen were present. E. S. Osborn acted as toastmaster and toasts were responded to as follows: The S. A. F., by President F. R. Pierson; The Convention, by W. N. Rudd; The Flower City, W. C. Barry; The Ladies, W. J. Vesey; The Man that Holds the Bag, W. F. Kasting; The Retailer, J. A. Valentine; The Carnation, H. B. Dorner; The Rose, George Asmus. Prof. John Craig, Prof. L. B. Judson and others also spoke. There were also present among the visitors H. B. Beatty, John Young, Eugene Dailledouze and Robert Craig.

Dreer's Hardy Delphiniums

Belladonna. The freest flowering of all the Delphiniums and the most valuable for cutting, its beautiful turquoise-blue flowers appeal to all who see it. Plant these early and you will have a continuous display of bloom from June until freezing weather. We offer an exceptionally fine lot of extra heavy one-year-old plants, \$2.00 per dozen, \$15.00 per 100; \$125.00 per 1000.

Dreer's Gold Medal Hybrids. Unquestionably the finest strain of mixed hybrids ever brought together, being seedlings of one of the best named collections and containing some wonderful varieties. Strong one-year-old plants, \$1.25 per dozen; \$8.00 per 100; \$75.00 per 1000.

Formosum. A splendid strain of this popular favorite dark blue variety, 85 cents per dozen; \$6.00 per 100; \$50.00 per 1000.

Chinese Blue and White. 75 cents per dozen, \$5.00 per 100.

CHOICE NAMED HYBRID VARIETIES.

Alfred Henderson. Bold, massive spikes of semi-double rosy-lavender flowers, 2 inches across, white eye. 20 cents each; \$2.00 per dozen; \$15.00 per 100.

Beatrice Kelway. Deep, rich blue with a conspicuous yellow eye. flowers 2 inches across and perfectly arranged. 20 cents each; \$2.00 per dozen; \$15.00 per 100.

Cerberus. Sapphire with black-brown centre, a handsome spike. 35 cents each; \$3.50 per dozen.

Chinese Cineraria (Spurless Hardy Larkspur). The large flowers without a spur, strikingly resembles a fine, rich sky-blue Cineraria. 20 cents each; \$2.00 per dozen; \$15.00 per 100.

Duke of Connaught. Rich oxford-blue, with distinct bold white eye; fine large flowers. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

J. C. Jenkins. Very large, semi-double bright mauve edged with royal blue and white eye. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

King of Delphiniums. Most vigorous growing, immense size, semi-double, rich deep blue with large white eye. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Lizzie. Lovely azure-blue, flowers 2 inches across, bold, creamy-yellow eye, arranged in bold massive stems. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Lemartin. Similar in growth and habit to Belladonna, but with rich Gentian-blue flowers with white centre. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Mrs. Creighton. Semi-double, outer petals deep sky-blue, centre rich plum with black eye. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Persimmon. Comparatively new; beautiful delicate turquoise-blue. 50 cents each; \$5.00 per dozen.

White Seedlings. These have been carefully selected and will be found desirable in any collection. 30 cents each; \$3.00 per dozen.

For the most complete list of Hardy Perennial Plants offered in America see our current Wholesale List

Henry A. Dreer, Inc.

714 Chestnut Street, PHILADELPHIA, PA.

The above prices are intended for the trade only.

YONKERS HORTICULTURAL SOCIETY.

A very interesting meeting of the Society was held March 16th, with H. Scott in the chair as President Bennet was sick.

The prizes offered at our last meeting by Messrs. Waite and Woodrow for the most meritorious exhibit were won by the following: First, R. Cochrane, string beans; second, H. Nichols, single violets; third, H. Scott, roses.

Vice-President Cochrane read a very instructive paper on "Mushrooms," after which a very lively discussion took place. Mr. Nichols exhibited some very fine mushrooms. Mr. Cochrane and L. Melliot offered prizes for the most meritorious exhibits at our next meeting.

An invitation was received from Mr.

Melliot to visit his greenhouses on March 18th, and a large number of the members took advantage of the invitation and enjoyed a very pleasant afternoon. Mr. Melliot's hospitality was dispensed lavishly and a hearty vote of thanks was given him.

The next meeting will be held in Wiggins' Hall, April 1. G. Stanton will read a paper on "Water Lilies."

LEE WHITMAN, Cor. Sec.

NEWPORT HORTICULTURAL SOCIETY.

A regular meeting of this society was held on the evening of March 22, when the unfinished schedule for the June show was probably given its final addition, the latest being a class for sweet peas which was considered desirable on account of the interest which is being taken in the newer and improved varieties of that flower. Several of the gardeners around here have taken advantage of the recent fine weather to sow their sweet peas in the garden last fall, then covered them over with loose manure and those are already well through the ground.

At the above stated meeting John B. Urquhart, gardener for Mr. R. L. Beechman, had on exhibition a vase of unusually well grown antirrhinums of several colors, each spike being nearly five feet in length and having about forty open flowers. They were examined by a committee and awarded the Society's first-class certificate of

cultural merit. The same grower had also on exhibition a beautiful plant of *Lilium longiflorum* Formosum in a six-inch pot. There were seventeen flowers and buds on the two spikes which came from the one bulb of the seven to nine-inch size, and the foliage was spotless. This was also awarded a first-class certificate of merit. It was arranged for the secretary to communicate with a well-known orchid grower of Massachusetts, with a view to get him to give a talk on orchids or some other horticultural subject at the next meeting, April 12th.

MORE ABOUT GLADIOLUS.

In regard to Mr. L. Merton Gage's article on the Gladiolus in *HORTICULTURE* of February 5th, on page 182, in which he states that he bought a certain variety under two names, I should say that such things occur with those growers who grow no seedlings or who do not hybridize, but select some certain kinds out of a lot of purchased bulbs and name them, while these same varieties may already be under name for some time, but he don't know it.

Just such an accident occurred to me about twelve years ago when I first began gladiolus growing. I bought a strain which was called Extra Florist Mixture, which was a very high grade at that time. I found a few of one kind which struck my fancy and kept them separate. In five years I had a nice lot of them and made up my mind to name them "Wisconsin." Gladiolus May was then getting extensively advertised and I invested, and when May came into bloom it proved to be my Wisconsin. After that I never picked out another one of any mixture I bought, and I think no grower should do so, no matter how nice a variety looks—at least not to name them. I have the following remarks in my Gladiolus list:

Remember, that I reserve the right of any one buying Koerner's New Giant Flowering Hybrid Gladiolus not to select any kind and name them, for I have selected about 100 kinds which I intend to name from time to time as I get stock; all these same kinds can be found in the mixture and if any one should select any and name them there will be a confusion in the names.

H. W. KOERNER.

THE NATIONAL ASSOCIATION OF GARDENERS.

William Kleinheinz of Philadelphia, was re-elected president; W. E. Maynard, secretary and treasurer, and James Bell, vice-president at the annual business session held in Horticultural Hall, Philadelphia, 7 p. m., March 16th, 1910. Routine business only was taken care of at this session. A committee was appointed as follows, to get a charter: Thomas Logan, Xavier Schmitt, W. E. Maynard, W. Kleinheinz, W. Robertson and James Bell.

MRS. ELLEN M. GILL.

The Gardeners' and Florists' Club bestowed a well-deserved compliment on its oldest member when, at its meeting on Tuesday evening, March 22, it unanimously endorsed the recommendation that Mrs. E. M. Gill be made an honorary member of the club.

Mrs. Gill, whose portrait appears herewith, is past eighty years of age,

MRS. ELLEN M. GILL

but still devotes her well-preserved energies to her beloved occupation as florist at Medford, Mass. For nearly fifty years Mrs. Gill has been a regular exhibitor at the shows of the Massachusetts Horticultural Society and a constant prize winner in the classes calling for the exercise of refined taste in floral arrangement.

Mrs. Gill was born on Essex street, Boston, and counts among her ancestors John and Priscilla Alden and Richard Warren, who came over in the Mayflower.

PHILADELPHIA NOTES.

Lloyd G. Blick, Norfolk, Va., is the latest entry at Philadelphia in the "Race to Rochester" by auto, next August. He will make the journey accompanied by Mrs. Blick and friends. It is expected that about twenty-five

machines—each with four to ten occupants—will make the start from Philadelphia.

Visitors in Philadelphia last week (among many others) were: Lloyd G. Blick, Norfolk, Va.; Adolphus and William F. Gude, Washington, D. C.; P. Welch, Boston, Mass.; E. Howard Smith, Hazelton, Pa.; George H. Cooke, Washington, D. C.; Fred Burger, Miss Held, E. A. Siedewitz, Mrs. Thos. Schuler, Mr. and Mrs. Johnston, all of Baltimore, Md.; Frank Clark, Trenton, N. J.; F. E. Ridenour and Parker Thayer Barnes, both of Harrisburg, Pa.; Mayberry and Hoover, Washington, D. C.

There is a society with headquarters in Dublin, Ireland, for the suppression of caricatures of the Irish. The irane rubbish in the way of post-cards, etc., is certainly in very bad taste. The noble qualities of any nation are what should be emphasized. We are with the Irish every time in this endeavor and in our own line are fighting the same evil. Only in our business it happens to be "Artificial Flowers." Of course, we know the growers of "Real Flowers" are not interested in this fight. So we only mention the matter "out of pure contrariness," as Robert Craig would say.

CLUB AND SOCIETY NOTES.

The Gardeners' and Florists' Club of Boston, to the number of about fifty, had a delightful time at the annual visit to the greenhouses of the W. W. Edgar Company at Waverley, Mass., on Saturday, March 19th. The Easter stock was found, as described in the previous issue of this paper, in splendid shape and readiness. Refreshments were served to the visitors, several of whom made appreciative speeches.

A meeting of the ex-employees of the late firm of Pitcher & Manda was called at the Museum of Natural History, New York, on the occasion of the Rose Society exhibition and some eighteen or twenty gentlemen responded. It was voted to organize and the following officers were duly elected: President, Charles Russell; vice-president, F. L. Atkins; secretary, W. Merkel; treasurer, Harry A. Bunyard. The secretary's address is Bronx Park, New York. Messrs. Bunyard, Coan and J. Russell were constituted a committee to arrange for a banquet or other social affair in the near future.

Julius Roehrs Co. Exotic Nurseries

RUTHERFORD, N. J.

NEWS NOTES.

New York.—R. Gretsich succeeds O. V. Zangen as wholesale florist at 52 West 28th street.

Kelso, Wash.—An extensive nursery plant is to be developed by James Stevens & Son, formerly of Barton, Ore.

Trenton, Mo.—It is reported that the Trenton Floral Co. has dissolved and that the president, L. A. Worder, has gone to St. Louis.

Rocky River, Ohio.—The J. M. Gasser Co. will rebuild a range of 16 houses which contain an area of 100,000 feet. This company has a total of 34 houses of 200,000 feet, and employs twenty-five men.

Salt Lake City, Utah.—The Miller

Floral Co. is an organization incorporated by Robert Miller and Louis Barton. A range of modern houses will be built and they will begin business with a capital stock of \$15,000 to \$20,000.

Richmond, Va.—The Hammond Co., incorporated, has purchased the Hammond property consisting of 20 acres of land and greenhouse plant. J. Scott Parish, president; H. A. Higason, vice-president, and F. F. Apt, secretary.

Springdale, Pa.—John James has formed a partnership with Mr. Butler of New Kensington. They have bought the L. I. Neff Greenhouse. The plant will be remodeled and they will grow stock for their New Kensington store.

Klamath Falls, Ore.—Brittan & Krause will begin immediately to erect a greenhouse plant on the Enterprise tract. They will use natural hot water from the mineral springs on the Mill's addition, as was done in the Lewis greenhouses.

Dayton, O.—Miami Floral Co. will build an addition. They now have 20 greenhouses with an area of 200,000 sq. ft. and cultivate 17 acres. This concern is incorporated with a capital stock of \$50,000. Geo. Bartholomew is manager and buyer.

Oregon, Ill.—C. G. Gilbert & Co. will build an addition. They now have four houses with an area of 10,000 feet and cultivate five acres of land. Their specialties will be carnations and chrysanthemums, asters and dahlias being their field specialties.

West Berkeley, Calif.—The E. Gill Nursery Co. has purchased 85 acres of land at Eden Vale and is now planting it to nursery stock. This will be run in connection with their present place, upon which is grown roses for the wholesale trade.

Westerly, R. I.—Conrad S. Schultz, proprietor of the Elm Street Greenhouses for two years past, has taken possession and is now operating Smith's Greenhouses on Franklin St. These houses are four in number, each 25 x 120 feet, and are devoted to carnations.

Minneapolis, Minn.—Max Kaiser, formerly with the L. S. Donaldson Co., has been appointed Forester of the Minneapolis Park Board.

J. Jorgenson, superintendent of L. S.

Donaldson's greenhouses, has sent out invitations to inspect the Easter display in the greenhouses. The firm is to be congratulated on having such a skillful and successful grower as Mr. Jorgenson. There was a crowd of visitors streaming through the houses from morning till night.

Ambler, Pa.—The officers of the Pennsylvania School of Horticulture held a meeting March 4 at the College Club at Philadelphia to discuss plans for a permanent organization of the institution. The school will be located at Ambler. A twenty-acre farm will be laid out in plots for the cultivation of flowers, plants and vegetables. A greenhouse will be built in which pupils will be instructed in propagation of the soil, plant producing, fertilization, etc. The course will extend over two years and is very comprehensive in scope. Surplus products will be sold in the best markets. J. B. Haines, president; E. L. Lee, vice-president; E. P. Williams, secretary.

OBITUARY.

Joseph W. Moulton.

Joseph W. Moulton died March 12th at his home in Hampton Falls, N. H., at the age of 84 years. He had been for many years engaged in the nursery business and the raising of fruits.

Edward Ladiges.

Edward Ladiges, well known to the florists of Chicago and New York as an expert decorator, died in Chicago, March 19th, of pleuro-pneumonia, after an illness of two days. The remains were taken to Closter, N. J., for interment.

John Booth.

John Booth, an old-time gardener of Newport, R. I., died March 19th at his home in that city at the age of 72 years. He was gardener many years ago for the late Governor Lawrence of the State of Rhode Island, and after leaving that position he erected the greenhouses on Roseneath avenue where, up to the time of his death, he occupied a good part of his time in the growing of grapes and nectarines. He was a man who attended faithfully to his own duties and on that account was highly respected by all who knew him. He is survived by a widow and grown-up family of seven, John Booth, Jr., being employed as assistant gardener at the Eugene Thayer estate, Lancaster, Mass.

Horseshoe Brand Products

In Giganteum indicates the acme of quality. Large growers know they produce the largest percentage of cut flowers per thousand bulbs of any brand. The reason why is because they are produced by the choicest seed-bulbs in the world; are properly planted and cultivated. The actual profits indicated by your cash register when the final show-down time comes are greater from Horse-shoe Brand Giganteum than from any other brand receiving the same treatment in forcing. Don't take our word for it, try them, count the cut.

Seed Trade

The Outlook.

The notes appearing in last week's HORTICULTURE were intended for the week before, but unfortunately arrived a little too late to be used in that issue. Hence, the information about trade conditions was not quite up-to-date. Since that time there has been a marked improvement in retail trade, both counter and mail orders, and the retailers are about as busy as they care to be. In fact, the information which we have indicates that most of the larger concerns are from twenty-four hours to three and four days behind with their orders, and they are working every night up to 10 and 11 o'clock. Beyond a doubt, the final close will show as good a season as we have had in a number of years. All indications point to an early spring. It is generally stated that frost is nearly out of the ground and a warm rain followed by pleasant weather would make the soil suitable for cultivation in a very short time. This is a condition quite general, although of course there are a few exceptions in the northern sections of the state of New York, northern New England and some of the northwestern states. It is generally regarded as a good omen for the trade when spring opens up early, and this year will doubtless be no exception.

Corn and Potatoes.

Reference has been made to the very unsatisfactory condition of seed corn this year, particularly field varieties, and as the season advances, conditions do not show any marked improvement. Much of the corn which has been received by seedsmen has been kiln-dried, but, having been frozen before it was thoroughly dried, the vitality has been greatly impaired and germination tests show very low vitality in many instances. No doubt the trade will manage to worry through in some way, as it always does, but there will be a very great amount of complaining on the part of consumers of corn; especially for seed purposes.

Prices on seed potatoes do not materially improve, and good stock is offered as low as 40c. per bushel, while excellent eating stock is quoted as low as 25c.

Help Wanted.

From all parts of the country comes the complaint of the scarcity of competent and experienced help. It is akin to the servant question. Seedsmen are unfortunate in not being able to keep their hands the year around, but must needs take on a large number of inexperienced people every year. It needs no argument to convince any intelligent person what a handicap this must prove, not only in despatching business, but in the probability of making errors, yet no one has found any solution of the problem and none is likely to be found. Keeping the full force the year around might solve it, but that of course is impossible.

A Rochester Boom.

The seed business in Rochester must be booming this spring according to reports received from James Vick's Sons. They are highly elated over the big increase in trade all along the line,

retail mail order, wholesale and store, and are very agreeably surprised at the way the orders are coming in. While there are serious shortages in some lines of seeds, the concern is fortunate in having a good general supply. In the wholesale department, Mr. W. H. Dildine, superintendent, reports that there is an increase of nearly one-third in the number of orders received for the first three weeks in March in comparison with similar period last year. Since they had a rushing business a year ago, the figures this year make a new high record. This tremendous increase in the volume of business has made necessary a complete reorganization of the working force in the wholesale department, putting on practically a double force of help, and Mr. Dildine reports that they are handling orders so promptly now that nearly all are filled on the day they arrive. All of which goes to show that the name of "Vick" is still one to conjure with and if properly presented to the public will always receive prompt and appreciative recognition; and then, we might add, Jas. Vick's Sons are generous advertisers in HORTICULTURE this season, which surely counts.

THE SEEDSMEN'S GUARANTEE.

Mr. Kendel in his official capacity as secretary of the American Seed Trade Association, has paid HORTICULTURE the high compliment of replying to a suggestion for the improvement of the time worn waiver. No other trade paper as far as we can recollect has ever succeeded in drawing a public expression of this kind. The seed trade has a right to be conservative but it is possible to be too conservative. The seed trade is suffering from that very thing today. If they had come out in the open twenty-five years ago and kept persistently hammering for their rights all the time, they would hear far less now of adverse legislation in the various states. As to Mr. Kendel's plea about the Iowa judge and the "will and the won't," there's only one thing to be said—"You can catch more flies with molasses than you can with vinegar." The Burpee waiver reaches the same spot as the other, but with the very important difference that it does this inoffensively. That's why it's clever.

The seed trade attacks this thing in the right spirit, respectful and all that; but isn't there such a thing as being afraid of ghosts? Don't the old boys want the new boys to do better than they did?

"Rise on stepping stones of their dead selves to higher things."

Take another look at the Burpee waiver. It may dawn on you that it will really hold in law better than the other, maybe, and look at the beautiful suavity of it! Of course, precedent is good. But a clean slate and a new deal all around is pretty good too. Where would George Washington and Benjamin Franklin and the rest of them have been unless they'd had the courage to stand up for a rub out? No doubt George the Third thought they were "blawsted anarchists!" Benjamin Franklin had it right when he said about the Union—"If we don't hang together we're pretty sure to hang separately."

In the writer's opinion the Burpee waiver is far and away the best.

Notes.

Henry Nungesser sailed from New York on the Kronprinzess Cecelie on Tuesday, March 22. Business and recuperation in equal proportion.

R. M. Ward & Co. are about to send out a unique calendar, 23 x 28 in., giving the date on which Easter will come for the next thirty years and other equally useful information.

L. P. Gunson & Co., of Rochester, N. Y., report a very excellent mail order trade, and say they are having more trouble to secure stocks with which to take care of orders than in securing the orders.

The Joseph Harris Co., of Coldwater, N. Y., also report a very fine trade, claiming they are 30 per cent ahead of last year up to this time. They are several days behind in their orders, although working their full force overtime.

We extend our sincere sympathy to Frank Emerson and Mrs. Emerson, under the staggering misfortune our dear friend has suffered. We trust the loss of his eyesight—which resulted from an overstrain in helping to right an overturned auto—may prove only temporary; and that he may soon be restored to us in his full health and vigor.

Flower Market Reports.

BOSTON At present writing, Thursday afternoon, there is no indication of any inadequacy in the supply of flowers of any kind for Easter, with the possible exception that single violets seem to be nearly down and out. The weather has been balmy and with abundant sunlight for a week and all vegetation is responding in the liveliest fashion. Not much advance in prices is thought of, although there is a mild stiffening up in the market value of the choicer grades of roses and carnations. Lilies are seemingly in sufficient supply and the old established rate of twelve cents prevails generally. Up to the present moment the Easter orders and shipping trade have been somewhat erratic, so that it is not yet possible to say more than that, thus far, it is assured that the Easter demand will be fully up to the record average, with a possibility that it may run ahead.

BUFFALO A good supply of all material was had last week except white carnations, which, on account of St. Patrick's Day, were sold on sight. Trade in general was fairly good on all lines on Friday and Saturday. The weather being springlike, everything seemed to move except bulbous material, especially tulips, which have had no demand and are hard to move at even the lowest prices. Peas are in excellent quality and variety and have sold well. Violets and lily of the valley are plentiful, with demand weak. The demand has grown stronger on carnations and prices are holding at a point where the bargain signs cannot be displayed. Roses not too plentiful. Kaiserin and President Carnot are of excellent quality. Asparagus bunches scarce.

CHICAGO At this writing, Tuesday, Chicago market is in the lull before the storm. The firms that have a shipping trade are quietly booking orders and as the list grows longer the smile of satisfaction broadens. It is generally conceded that lilies are the only flowers of which there will not be plenty. Many growers who sold at ten and twelve now realize that they could just as well have had more. Some speculation is heard as to what price reserve lilies may bring later in the week, some anticipating twenty-five cents, but by the time this reaches our readers the Easter will be in the past. The retailers are hinting of the window decorations they will have, but at this writing no changes have been made. Carnations are rather more scarce than roses, and especially is this true of white carnations. Trade was only fair the week ending March 19 and the following Monday showed an improvement, which relaxed to the former conditions on Tuesday. No special increase in business was noted on account of President Taft's visit and, outside of the increased demand for white carnations for coloring, St. Patrick's Day showed little increase in quantity of sales.

Detroit reports stock plentiful and in very good shape, with probably an over-supply of short lilies.

Flower Market Reports
(Continued from page 410)

CINCINNATI Business is moving along at a first-class clip. All buyers have

been skirmishing for stock and their only difficulty was to get proper stock with which to fill orders. An unusual circumstance is the fact that flowers of all kinds have been scarce, with the single exception of violets. Everything cleans out of the wholesale houses as fast as the stock arrives, and all orders received in the afternoon have had to be turned down. The prospect for Easter now forms the topic of conversation. The outlook is bright for a large demand. There will undoubtedly be a shortage of Easter lilies and Beauty roses. Beauties are off crop and a good many growers will just miss by a few days with their lilies. Tea roses, generally, will be in good crop; same may also be said of carnations.

NEW YORK Those who find time to read these observations on the flower

market situation as it is a few days previous to the Easter occasion will know far more about it by that time than we do now, and there is very little that can be said at the present moment concerning it, with profit to anybody. It will then be known to a certainty how the lily crop held out under the Easter onslaught; whether there was anything more substantial than the wish that is "father to the thought" in the predictions of scarcity which have been so freely expressed of late. At present writing the supply coming in does look formidable, and with a great majority short stemmed, although in other respects the quality runs fairly good. Callas are in better request for the moment than are the lilies, and it is not possible to supply all that are called for, the price being nearly double that obtainable for lilies. American Beauty roses, after a very long period of scarcity, are now coming in quite plentifully. Apparently there will be no great trouble to fill all demands, and the prices of

two weeks ago are not likely to be again reached for a long time. In fact, all tea roses are very abundant, as are carnations—the latter being of excellent quality. As to violets, there would probably be no more than the Easter demand would consume in a normal way—weather conditions for their use being favorable—but it is generally known that the growers are picking and storing the blooms in advance and an accumulation of "pickled" stock and ragged market in consequence, is feared by the wholesale handlers. Lily of the valley, tulips, and daffodils are in heavy receipt—the market value suffering somewhat from the wagon loads of outdoor bloom being sent to this city from southern sources. As to any radical change in wholesale prices on cut flowers of any kind for Easter it is not expected. Cattleyas may be the exception as there are very few to be had at any price.

PHILADELPHIA Conditions were pretty good last week—a little

sluggish early but the wind-up was very good. The carnation market especially showed marked improvement. This crop shortened up a little in supply—and the demand was better. Beauties are still scarce and the Easter week prospect for these indicates high prices for good stock. Pink roses are very fine—Maryland and Killarney exceptionally so. New crop Kaiserins

are coming in in good shape and quite a quantity—so there should be ample in white for all demands. Orchids are fairly plenty—mostly schroederæ—and are in fair demand. Easter lilies (both cut and in pots) will be enough to go around. Violets are of fine quality and not too many—selling about normal. Lily of the valley, pretty good stock—not quite so abundant, and demand probably a little better. Sweet peas not as plentiful and holding much stiffer in price. Bulbous stock, as usual about this time, showed a distinct lull in supply—many of the growers keeping same at home for local Easter demand instead of shipping as usual to the wholesale centers. A good trade was also done with the smaller outlying towns, the local dealers who do much of their own growing buying here for immediate use in order to save their own growing crop for Easter use. Greens in good demand—no surplus.

It is reported that **TWIN CITIES** for Easter there seems to be plenty of good stock at hand. The weather this month has been ideal so far to bring forth the best of everything.

NEWS NOTES.

J. A. Peterson is spending a week at French Lick Springs, but will be home in time for the Easter rush.

James Allan, of the firm of George & Allan, has received the appointment as city nurseryman from the Park Commissioners.

Falling walls at the collapse of a greenhouse in Eden Park, March 13, injured several people. Wm. Huber and Ruth Tauschardt both had their skulls fractured. Two others were less seriously injured.

A visit to Thos. Windram's place at Cold Springs, Ky., shows that he will be right in crop with an elegant lot of carnations. Mr. Windram has also bought an automobile, which shows that he is prospering.

A jury verdict on March 17, awarded George & Allen \$1,065 damages from the city for loss resulting from a broken water main Dec. 6, 1908. The heating plant was rendered ineffective and claim for \$5,695.75 was made.

Charles W. Dudley of J. W. Dudley & Sons, Parkersburg, W. Va., was a caller on the trade the past week. They have four houses of hydrangeas in bloom for Easter and he stated he had taken orders for all of same.

Cincinnati, Ohio—The establishment of A. Sunderbruch Sons at 232 W. 4th street was broken into last Thursday night, the cash drawer being rifled of 200 two-cent postage stamps. The thieves also tried to force the safe, but succeeded only in loosening the hinges.

WANTED SITUATION by English gardener; experienced in all branches; excellent references; age 35; private place preferred. B. Disley, 425 West 13th St., Oklahoma City, Oklahoma.

FOR SALE

FOR SALE—Special 16 x 18 and 16 x 24 double thick glass in "A" and "B" qualities. Buy now and save money. Write PARSHELSKY BROTHERS, INC., 59 Montrose Ave., Brooklyn, N. Y.

THE PLAIN TRUTH.

Here is a man talking about neckties, for instance—he says: "We are noted for supreme leadership in neckties." Just think of it:—"supreme leadership!" I've got a good opinion of myself, but I'd never admit that I'd got "supreme leadership" in anything!

Go back thirty years and see how Jno. Wanamaker built up on plain truth! Sam Pennock said to me the other day: "George, I've been studying this advertising proposition these twenty-five years, and I have finally come to the belief that only the plain truth is worth spending money on!"

Go over the big successes, as great world-wide advertisers—what do they all say? Speak the absolute truth, and back it up with acts. That's the way to make advertising pay. If not at first, by and by imperceptibly it comes in. You don't know where nor how, but it comes. No one says, "I saw your adv. in the Podunk Gazette," but you know the silent heaven has been working all the time and that your good dollars are at last bringing in their harvest.

As for exaggeration, I believe more fortunes have been thrown away on space for that (exaggeration) than on all the gold-brick schemes and wild-cat mining ventures that the world ever knew. Never exaggerate! Tell the plain truth in the plainest language you know how to use and you will win out.

Of course, there is an art in telling the plain truth without exaggeration; but as Rudyard Kipling says—that is another story. That's where Wanamaker and the rest of them come in. Another thing, I don't believe in spasmodic advertising! Fortunes are thrown away in that.

Mr. Editor, I guess I'm getting into deep water now, and had better not say any more. I have a good many spasmodic customers, and they might jump on me; and a customer is a customer, however you may look at it. All the same, I'm not going to side-step. I have courage enough to sign my name, as I've always done these last thirty years.

G. C. WATSON.

CHICAGO NOTES.

The Parks.

As is the custom at this time the various conservatories are ablaze with color, and thousands of visitors throng the aisles and enjoy to the full the special display which marks the approach of Easter. The opening day was Palm Sunday and at Garfield Park it was estimated by the guards that 15,000 people passed within the doors. The show room naturally attracted the most attention and the color schemes, now brilliant and again subdued, were well carried out. Each day during Passion Week, new plants were added, the Easter lilies being held back till the end.

The rebuilding of the roof of the great dome last fall is now pronounced a success, as it has withstood the test of the winter. The contract for the remaining houses is now under contemplation. Mr. Sell has had to labor under difficulties, every wind storm carrying off from fifty to one hundred lights, and three men were kept busy all winter making repairs on the roof. These conservatories were built two years ago and were a failure. In rebuilding no curved glass is used, and each glass is set in copper.

Head Gardener Rudolph Schiele was host to the throngs who filled the Lincoln Park greenhouses at their formal announcement that spring is here once more. Lilies were a predominating feature and Mr. Schiele has been successful in getting them out at just the right time. The houses will be open till 10 p. m., each evening till after Easter.

A Practical Idea.

It is not generally known that the West Park Board has fitted up kindergartens at Parks No. 3 and No. 2, where plants are furnished from the park conservatories and used as object lessons to the little children.

The idea originated with the Society for Permanent School Extension and was adopted by the West Park Board. Easter lilies, daffodils, tulips, etc., are used as the basis for stories by the teachers and are reproduced in pictures, etc., by the little folks.

Lessons on seeds, bulbs, the care of plants, how to make and care for a garden, etc., will all be taught, and as these schools are in a crowded portion of the city these children would doubtless have no other opportunity to learn of plant life. Perhaps these schools will produce some new lights in the horticultural world, who knows!

A Close Call.

The various florists in the Fairbanks Building, Wabash avenue, had a close call, March 21st, when fire practically destroyed the upper floors and shut off the elevator service. On the second floor is located the Flower Growers'

POTASH

Harvest Time, whether it's corn, cotton, or any other crop, will show you your profit from the liberal amount of

Potash

you put in your commercial fertilizer this Spring, or drill, or broadcast to follow manuring.

No crop can be a success without a balanced "feed ration." See that there's enough **Potash** in the fertilizer you feed your crops—from 6 to 12 per cent according to the crop and soil.

Potash Pays

Urge your fertilizer dealer to carry **Potash** Salts in stock. He will have no trouble in buying them if he will write to us about it.

GERMAN KALI WORKS
Continental Bldg., Baltimore, Md.

Market, and the water from the rooms above poured down through the ceiling. Notwithstanding, business went on as usual.

An Instructive Exhibit.

A study for the florist and one that might be of real help to him is the "Garden" reproduced by Marshall, Field & Co. It occupies the entire large south room on the eighth floor and the amount of material used is enormous. It is designed as a setting for artistic summer furniture, and far surpasses anything else of its kind attempted by this house. There are masses of flowers and foliage, surrounding a court with a fountain, vine-covered trellises, lanes overhung with roses, clematis and wistaria. A dozen men are employed to do the decorating of this store and under the supervision of an expert obtain results that are worthy of careful study by the florist who would do tasteful decorating.

Personal.

Archie Spencer, for several years with Peter Reinberg in his wholesale store, is now with Lubliner & Trinz, 44 Randolph street.

Michael Stauch, formerly of Joy & Son, Nashville, Tenn., was in Chicago for a few days on his way home from six months in Germany.

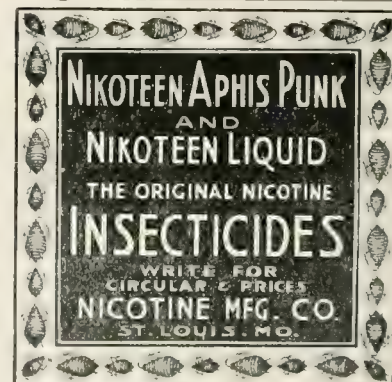

Visitors: R. A. Lalham, Minneapolis, Minn.; Geo. Vatter, Marinette, Wis.; Miss E. Kaber, Laporte, Ind.; W. Anderson, Kenosha, Wis.; J. Litzall, Geneva, Ill.; J. H. Shelton, Rochester, Ind.; Michael Stauch, Nashville, Tenn.

BRITISH JOTTINGS.

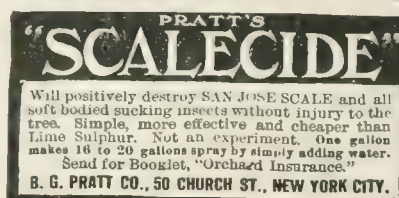

A party of Canadian fruit growers will visit this country this year, on the invitation of the National Fruit Growers' Federation.—The Horticultural Club continues to make good progress on prosperous lines, judging from the report presented at the re-

cent annual meeting.—The first of the "Masters" lectures for this year has been given by Mr. A. D. Hall, director of the Rothamsted Experimental Station, the subject being, "The Adaptation of the Plant to the Soil."—As previously announced in my notes, a fund is being raised to provide a suitable memorial to the late Mr. Peter Barr, the "Daffodil King." The promoters desire to provide a Barr medal to be awarded annually in connection with work amongst daffodils and the maintenance of an orphan through the medium of the Royal Gardeners' Orphan Fund.—The spring bulb show of the Royal Horticultural Society, held on March 8 and 9, was a great success.—The National Chrysanthemum Society has arranged to hold a trial of all varieties of single chrysanthemums during the forthcoming season, with a view to determining varieties that are too much alike.

Swamp & Walter Co. 50 Barclay St., New York.

Begin Fighting Caterpillars Now; Band Your Trees With Strokum

DO it before the caterpillars or tussock
moths begin to crawl up the trunks.
Keep the first ones from attacking the
tender leaves. Every crawler killed now
means hundreds less later on.

STROKUM is a perfectly harmless veg-
etable product that is the most effectual
banding substance known.

It's easy to apply, does not stick to the
tree when removed, will last an entire
season. The caterpillars can't crawl under
it because it fills up the chinks of the
bark. They won't crawl over it. Birds
will not carry it away as they do cotton.
Fly paper does not fill bark chinks and
dries up in a few days. Smeared-on tar
preparations dry up and disfigure trees
indefinitely.

STROKUM besides being effectual, is not
unsightly.

Send \$3.00 at once for a sample package
of 15 pounds, which is enough to band 15
trees, 3 feet around. Delivered free any-
where East of the Mississippi. West of
the Mississippi, 50c. extra.

Let us mail you our illustrated booklet.

Best for Garden Spraying

In vegetable or flower garden, on fruit trees
and vines; for whitewashing, fire protection
window and carriage washing; wherever you
use it, the Deming "Perfect Sprayer" saves
time and trouble and does better work.

Deming Spray Pumps

Hand and power, nearly two dozen
kinds; designed and tested by practical
growers, approved by government and
Experiment Station experts. Catalogue
and spraying calendar free. Write for
Pumps for all uses. Ask your dealer.

CHARLES J. JAGER CO.
281-285 Franklin Street, BOSTON

The Mastin Automatic White-wash and Spraying Machine is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass.

The pump is of brass throughout, simple and powerful.

The mixing device keeps the contents of the tank well stirred up from start to
finish.

When the machine is filled to within six inches of the top, a few strokes of
the pump will compress enough air in the tank to produce a continuous mist-like
spray for fifteen minutes.

All parts are made to gauge, and may be had for repairs.

Just the thing for distributing liquid fertilizer in greenhouses.

Ask your dealer about our **EXTENSION HOSE**, **EXTENSION RODS**, and the
MASTIN WHITE-WASH NOZZLE for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

OUR

MARBLE LIMESTONE

(CALCITE)

ground to 80 mesh, is the ideal form of lime for most soils.

Approved by all Experiment Stations. No discomforts from its use and no bursting of bags.

CAN BE APPLIED AT ANY SEASON WITHOUT HARM TO GROWING CROPS. The fine grinding insures quick results. We will accept orders NOW for delivery AFTER April 15th in the order of entry.

SEND FOR CIRCULAR.

GET YOUR ORDER IN EARLY.

THE STEARNS LIME CO., Danbury, Conn.

Mastica is elastic and tenacious, admits of expansion and contraction. Putty becomes hard and brittle. Broken glass more easily removed without breaking of other glass as occurs with hard putty. Lasts longer than putty. Easy to apply.

GREENHOUSES BUILDING OR CONTEMPLATED.

Oregon, Ill.—C. G. Gilbert & Co., addition.

FIRE RECORD.

Espy, Pa.—Greenhouse, two barns, stock, etc., of Bert Miller, damaged March 12; loss \$5,500.

Hammonton, N. J.—A fire in the greenhouse of Watkis & Nicholson, Monday evening, March 21, did considerable damage. The weather being mild and above freezing luckily prevented more loss.

Pittsfield, Ill.—The greenhouse of Mrs. George Hansen, partially destroyed March 14th; loss covered by insurance.

Knoxville, Tenn.—The grafting house of the Knoxville Nursery Co. was destroyed by fire the night of

March 7th with an estimated loss of \$35,000, partly covered by insurance. It is thought the fire was of incendiary origin.

Greenlawn, Ohio.—The greenhouse at the East entrance to Greenlawn cemetery, damaged March 14 to the extent of \$100.

EAVE PLATES

Here are two kinds: our regular Standard Galvanized Steel Eave, which is the simplest and most practical — and the same plate equipped with a Galvanized Steel Drip Gutter. This last is a combination which we patented as long ago as December, 1901.

Both these plates have the cast iron roof bar brackets which firmly secure the bars to the plates and prevent end rot.

Switzerland as Seen by An American Horticulturalist

Mr. Editor:—In reply to your request for a few lines regarding my visit to certain parts of Europe, relating especially to agriculture and horticulture, as seen from the standpoint of a grower of flowers, I do not propose going into any particular line of horticulture, but rather to give your readers who have not visited these places an idea of the great love of plants, flowers and shrubs prevailing all parts of Europe today, and describe the conditions in which they are grown in a general way in Switzerland, Germany and Belgium. I will first take up Switzerland, where I had the pleasure of spending a month last summer in the city of Thun.

This section is considered the most beautiful part of Switzerland, situated as it is at the end of Lake Thun, facing the great chain of peaks such as Eiger, Monch, Younfrau and the Blomesheshalps (the Blooming Alps), towering from 12,000 to 14,000 feet and capped with snow. At the head of the lake the famed city of Interlaken nestles at the base of the Younfrau.

Nature here seems almost perfect, and any addition or embellishment by the landscape architect or gardener would at first sight seem superfluous. But such is the artistic nature of the Swiss that they have been able to add to the natural beauty of the landscape and emphasize it by their care, thrift and knowledge of horticulture without destroying it.

In appearance Switzerland is like a great park, perfectly kept, with the added advantage of its magnificent scenery standing out boldly in all its glory, groomed carefully, but so artistically done that it emphasizes, but does not spoil nature's own perfection. Looked at from a gardener's standpoint, he sees the sward a perpetual green, mostly clover, cut in the valley four times a year, producing the effect of a perfectly kept lawn.

The Swiss love nature, and as they are surrounded by green and white, appreciate coloring which harmonizes with the landscape. This is shown in their houses, but especially so in their gardens. The grounds around their chalets are planted with brilliant shrubs, roses, *Salvia splendens* and gladioli, climbing geraniums, and other bright flowering plants. Their windows are adorned with window boxes, filled generally with scarlet geraniums. No matter how poor they may be, they always have a small garden and their windows brilliant with plants.

Crimson Rambler is seen here in all its glory, either planted as a hedge, trailing up one side of the chalet, or grown as specimen plants in the garden. One beautiful bush was seen in front of what was no more than a farm house, but it had been trained, pruned, tied and carefully nursed, until it covered a space 20 feet in circumference. When I saw it about the 20th of July it presented a magnificent appearance, and a sight of red buds, with fine, thrifty foliage, never to be forgotten. Owing to the cool nights their season of bloom-

ing is much prolonged, and the flowers are fuller and more perfect in shape and form than with us.

Another very interesting find was in a garden, where in a centre-bed raised above the garden grade was seen our own beautiful golden rod, with its magnificent golden coloring, flowering, however, in July instead of as with us, in September.

Sweet peas, carnations and roses of all kinds flower there through the summer in quality, coloring and substance as fine as can be produced here in winter. Tuberous begonias are also grown finer than it has been my pleasure to see, either under glass or even as cultivated out of doors in England. The flowers are beautifully colored, large size, perfect shape, and splendid foliage.

The Swiss are known mostly as hotel keepers. This is true, and to their credit. Travelers come here from all climes, and (nolens volens) must be housed and entertained. In doing so they show their guests not only their magnificent mountains, but know how to frame them with a unique, charming and useful house called chalet. These chalets are built to combine usefulness and conform architecturally with the landscape. They are pleasing to the eye because they are, and form part of, the surroundings, giving a natural, restful tone to the landscape. Their type of architecture has evidently been evolved from experience, just as our log cabins and dugouts were the outcome of necessity and the best protection from the elements. In summer these chalets, with their wide, over-lapping roofs, broad balconies, and their outside stairway, become in winter a protection against snow, and their outside stairway helps to dislodge the too heavy snow from their eaves, and is also a means of exit when the snow is too deep to open the front door.

The Swiss, living amongst these beautiful surroundings, have inherited the love of the beautiful in nature more than any other people. In living with them even for short time one is impressed with their fearlessness and energy, and with it all their love of their country because of its beauty. But, not forgetting the material side, their forests return them a large yearly revenue. These consist mostly of pine forests which are under government supervision, and only those trees of a certain size receive the legal sanction by a certain mark, allowing them to be cut. For every tree removed, another must be planted, thus keeping up and improving their forests. Great care is exercised against fire, and all small timber, weeds, etc., are carefully kept trimmed, only leaving the decaying leaves for a mulch to help feed and sustain with moisture the trees.

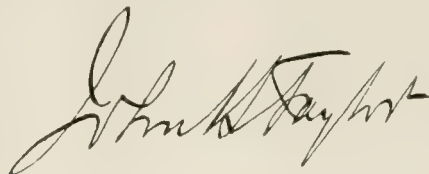

Again, in the last few years since electricity has been made available for commercial purposes, thanks to their waterfalls and swift moving streams, the Swiss have harnessed nature's power so that not only has it been possible to use it in their factories, but owing to its cheapness for even the most humble to have a wire in his chalet which supplies light, heat and power. These electric wires are strung all over the mountains, and when lighted at night produce a wonderfully beautiful scene. These chalets illuminated look like little stars sparkling on the hills, and as the eye descends toward

the valleys and along the shores of the lake, make a picture seen in no other land.

Add to this, as always occurs on fete days, music, colored lanterns, and beautiful fireworks, and one would almost think oneself with Alice in Fairyland.

Agriculturally and horticulturally the Swiss show what can be accomplished even from a cold, barren, mountainous country, half the year under snow and ice. These people not only get a living, but are making money, because of their courage, energy, intelligence and love of nature.

The Swiss live in as beautiful a park as God has ever made, and they help the setting by the thorough and splendid manner in which they do their part.

Bayside, N. Y.

Trans-Atlantic Notes

A DEPARTMENT OF HORTICULTURE

The Journal of Horticulture contains a thoughtful article on the much felt want of a Department of Horticulture—not the first one by any means, for it has been written about frequently. Although the Board of Agriculture does deal with some matters connected with horticulture, it has no recognized authority on the subject directly connected with its staff, or responsible for horticultural interests. Several years have now elapsed since an exhaustive inquiry concerning fruit growing in the country was conducted by a departmental commission. In our opinion the establishment of such a department is, among other things, badly wanted at the present time to arrange a rational system of co-operation among small holders and horticulturists.

FRANCISCIAS (BRUNFELSIA)

One of the finest of the Franciscias is *F. calycina*, with its beautiful violet blue flowers, two to three inches in diameter, and appearing in great numbers on a plant of moderate dimensions, particularly useful in spring and in early summer. The plant is unfortunate in not being so well known as it deserves to be. The Brunfelsias are all of easy culture.

NATIONAL DAHLIA SOCIETY

A conference was held by this society on March 4, at Carr's Restaurant, in the Strand, London, Mr. Ed. Mawley in the chair. Papers were read by G. Gordon on "The Dahlia in Garden Decoration"; by J. Stredwick on "The Culture of Dahlias for Exhibition"; and J. B. Riding on "Methods of Exhibiting Dahlias." As regards the first two papers there was nothing practically new to the gardener. Useful reminders were given as to picking back the earliest growths when show blooms are looked for; and timely shading of the blooms is insisted upon. The advice tendered on

exhibiting was much needed, and the wire grid-iron frames were justly condemned, and bamboos, vases etc., recommended in their place.

LOW MARKET PRICES FOR PLANTS IN LONDON

There is considerable dissatisfaction among the growers about London and it is only those who grow the best varieties and in the best manner that make decent profits. Anyhow, the fact remains that prices are not what they were several years ago and this holds good for ferns and flowering plants, such as zonal pelargoniums and others. The famous Paul Crampel are coming in capitally flowered examples, but the demand for them as yet is inactive. Intermediate stock, in whites and crimsons, are good. Indian azaleas are in abundance and pyramidal plants fetch better prices than the flat-headed form. Genistas are abundant and good. Begonias, now quite favorite indoor plants, sell at fair prices. Ericas are in fair demand at good prices.

CERTIFICATED ORCHIDS

On the occasion of the meeting of the Manchester and North of England Orchid Society on February 14, in the Corn Exchange, A. Warburton, of Haslingden, was awarded a first class certificate for *Odontoglossum crispum* var. *xanthetes* Warburtoniae, a flower of great purity, abnormally large and of perfect shape. A similar award was made to *O. × ardentissima* var. Sultan.

NEW "ENGLISCHE" SHOW PELARGONIUMS

The following three show pelargoniums have created a furore in German gardening circles and flower loving towns-people in that country. The so-called show varieties with large blooms, sometimes semi-double and decorated on all the petals with blotches of color, have lost favor among English cultivators and are not nearly so well grown as formerly. The Germans, on the contrary, have taken up their culture *con amore*, and greatly improved them in regard to size of truss, intensity of color, in compactness of growth, and in vigor. Graf Ferdinand von Zeppelin has a ground color of carmine brown with red-bordered scarlet blotches of equal size. The variety is semi-double, a good doer, close in habit and blooms continually. *Deutscher Ruhm* is cattleya blue with two large, veined magenta red blotches—quite a new color in pelargoniums. *König Wilhelm Von Württemberg*, raised in 1907, was shown at Munich in 1909, but was not in competition at that time (the Jubilee Exhibition.) The ground color is bright rose, with a bluish tinge, and two large chestnut-brown, darkly veined blotches. The blooms are of enormous size, waved, and form gigantic corymbs.

New Montbretias

Montbretias have been so much improved during the last ten years by hybridization that they now occupy a position almost equal to lilies among bulbous plants and nothing surpasses them for cut flower purposes, wherever these are largely in demand. One obtains the best results by planting the varieties separately in beds or in groups in a border and from August till late in fall one may be sure of having a good display of blossom.

Montbretias are extremely easy to grow and will succeed in almost any soil in a good open position but an

ideal medium for them is a moderately stiff loam over a sub-soil of sand. Plenty of room should be allowed so that the spikes have room to develop and except for giving good waterings in very hot weather little other attention is necessary. Mulching, however, is of great assistance, and whatever the material used it keeps the ground moist and prevents the bulbs from ripening up prematurely.

So far as my experience goes with the magnificent varieties mentioned below I do not find they are so hardy as the older and well known sorts such as *crocsmiæflora* and *Pottsii* and it is probable that they will not survive the trying and variable winters we experience in the East if left in the open ground but this should not prove any deterrent to their being extensively cultivated for it is well to remember that all good plants need a little more attention than those of inferior quality. As soon as the foliage has become quite brown in the fall it should be cut off within four inches of the ground and the bulbs lifted carefully, without breaking off any of the stolons, and placed in boxes in sand or stored on the floor of a cool cellar where they will remain in good condition till planting time comes in April.

Too much cannot be said in favor of these new *Montbretias* and anyone interested in bulbous plants cannot do better than include them in their gardens. They have a wide range of color varying from the richest orange-scarlet to the palest lemon and the selection appended will give a succession over a very long period. On the other side they are greatly appreciated and will, I am sure, be fully as popular here when opportunities are given for flower lovers to see and realize the immense improvements over older kinds.

The most desirable varieties are as follows: *George Davison*, which grows four feet high with very branching stems and is one of the earliest to come into flower. The individual blossoms are three inches across, pale orange-yellow in color somewhat deeper on the outside. *Ernest Davison* is similar in habit but the flowers, which are equally as large, are a deep orange internally suffused with red on the outside. *St. Botolph* is a magnificent yellow variety with the same free branching habit as the preceding but the flowers are a pleasing soft yellow shade suffused deep orange on the outside. Each flower is very large and opens out quite flat which is one of the charms of these newer sorts. *Lord Nelson* is one of the handsomest and grows from three to four feet high with very branching stems and great quantities of deep orange scarlet flowers externally crimson with a yellow eye. *Lady Hamilton* is equally as tall but the flowers are yellow with a rosy-orange suffusion in the center. This variety is remarkably floriferous. Hereward is similar in color to *George Davison* but it does not commence to flower till fully a month later. *King Edmund* has rich golden flowers and the base of each petal is spotted with chocolate. This variety grows with great vigor. One of the most beautiful and attractive varieties is *Prometheus* which has enormous flowers four inches across and these are a deep orange with a deep crimson band around the center. A bed of this produces a wonderful color effect. *Westwick* is also remarkable, the color being orange red with a clear yellow eye, surrounded with deep maroon. For bedding purposes *Norvic* is excellent. It has a dwarf habit, flowers late and the color is a good rich yellow marked with crimson on the outer side.

Arthur. E. Thatcher

Erica

There seems to be a revival of interest in the genus *Erica*, and many of the species deserve to be more generally grown than they have been of late years. In several places I have visited this spring I have noticed nice specimens of some of the varieties of these excellent decorative plants. Thos. Roland of Nahant, Mass., is trying to work up an interest among the florist trade for them, and on a visit to his place recently, we saw specimens from 3½ up to 8 or 9 inch pots of several varieties, that would charm the heart of any plant lover to look at them. Mr. Roland intimated that it was hard to get a paying price for them. However, the public may be educated up to it, as they have been with many other plants which they cannot now get along without when their season comes around.

Ericas have been always considered hard to grow, and I can remember as a young man that if a gardener was a good heath grower he was worth taking notice of. The climate here has been considered very unsuitable for these plants; but it may be with them, as with some other plants I have known, never properly tested. They certainly will not stand some of the slap-dash methods of growing that have been too common in recent years. I am convinced that failure with a number of plants may be attributed to the use of hard water, and I think it would pay plantmen to collect the rain water from the greenhouse gutters and convey it into a tank where it could be pumped as required. I know of one instance where this was done, and the plantsman that managed that establishment told me he attributed a great deal of his success as a grower to that tank of rain water. *Ericas* will never give the same satisfaction if hard water is used for them and it may be that much of the failure with many of the varieties may be traced to that source.

Cuttings may be obtained from the points of the shoots after they have flowered and should be about an inch long, the wood being neither too hard nor too soft.

Insert rather thickly in not too large a pot in silver sand; place the pots in a tight case in a temperature of sixty degrees, care being taken to remove all appearance of damping as soon as detected. When they show signs of having rooted admit air to the case, and get them hardened up a little before potting into small pots. The best soil for *ericas* at any stage of their growth is a good, fibrous peat, and if this cannot be obtained the siftings from *osmunda* fern root will do. Add about a third of clean, sharp sand, with a little finely broken charcoal. They must be finely potted and never allow the stem of the plant to be buried in the soil. Watering must always be done with care as severe drying or soaking will be injurious to them. When in vigorous growth a bag of soot may be placed in the tank containing the water they are watered with. A temperature of forty degrees should be maintained during the winter with plenty of light and air; throughout the summer months they may be plunged out doors. It is a hard question what varieties to recommend to grow, but I have seen the following do well: *E. arborea*, *caffra*, *Cavendishi*, *hybrida*, *hyemalis*, *melanthera*, *persoluta* and *Wilmoreana*.

More competition wanted

Our observations in last week's issue in reference to the disproportionate number of competitors as compared with the many liberal special premiums listed in certain prize schedules has brought an unusual number of comments to the editor's desk, all approving of the sentiments expressed. It has become quite the custom among organizations, both local and national, when contemplating an exhibition to solicit cups and other special premiums from seedsmen, specialty growers and others, and the number of appeals of this nature is increasing so rapidly from year to year that with some firms it means quite a heavy out-

lay. It not infrequently happens that the prizes thus pledged are not even competed for and again there is often but one entry, which may or may not be fairly worthy of the award. It is true that in most schedules a clause is inserted authorizing the judges to withhold awards when exhibits are not worthy, but how seldom this most unpleasant function is exercised by the judges is pretty well known. We frequently read in the accounts of various exhibitions that Mr. ——— "captured" this or that prize when those who happened to be present at the affair know that it was simply an award through default of competition. The remedy suggested by some of our correspondents is the adoption and enforcement of a rule prohibiting any award when there is only one entry in a class. Donors of special prizes have it in their power to make this stipulation in cases where the rule is not a general one if they so wish, but it might be better to make it of universal application. At least there are many who so think.

In regard to the bill now before the New York Legislature providing for the building and equipment of a range of greenhouses for the purpose of education in floriculture, a copy of which appears on another page of this paper, Mr. W. F. Kasting writes:

"In order to get this bill out of the committee and not let it get asleep, I would request every florist in New York State to write to the Assemblyman or Senator for his district, urging him to have the bill presented. This state is doing considerable in the agricultural department and I believe that we, as horticulturists, should see that our interests are taken care of."

We gladly endorse Mr. Kasting's appeal. The State of New York has already done nobly for horticulture, especially the fruit interests. "The Grapes of New York," and "The Apples of New York," are works that stand without a peer in the literature of any other state or of the nation, and Geneva and Ithaca have long ago earned in many ways the respect and gratitude of the floricultural industry of the Empire State. But agriculture is growing—growing away from those lines in the field of horticulture on which the interests of floriculture touch, and it must be apparent to anyone who is at all observant that horticulture must in the near future be accorded recognition independent of its relationship to agriculture. Not only in New York and other states, but at Washington, the time now approaches when horticulture's needs must be cared for by a separate and independent department in which floriculture will receive its due share of consideration. The Agricultural Department at Washington already finds its hands full with pure food laws and inspection work not dreamt of when the department was inaugurated. A package of Department literature just received gives details of prosecutions for misbranding "Headache Cure," misrepresentation as to the efficacy of "Mother's Friend" and other advertised nostrums, adulterations of milk and of hydrogen peroxide, misbranding of turpentine, etc., etc.—all work of vital importance to the welfare and health of the people, but having no correlation with the bureau of plant industry, which also is finding boundless fields of activity in which horticulture as an art has no concern. Illinois has set an excellent example to her sister states in the provision made for the advancement of education in ornamental horticulture. But Illinois would never have gotten it if her florists and gardeners had not got busy. So Mr. Kasting's call for similar activity in his State merits attention and a willing response. "God helps them that help themselves."

SEASONABLE NOTES ON CULTURE
OF FLORISTS' STOCK.

Camellias.

Those who grow Camellias that are wanted in bloom by Christmas should by this time have them started into new growth. The plants require a shaded house during the summer. They are much more easily managed under glass than when put in the open. They should have abundance of water, especially in their growing season, but soil must not be kept in a soaked condition, as this would prove a great injury. When the plants have just fully completed their season's growth—which can be easily known by the developed terminal leaf of each new shoot—withholding water until the new growth shows signs of flagging, will cause the forming of a fine crop of flower buds which will develop into flowers instead of the buds dropping before opening. They do well in winter in a temperature of from 45 to 50 degrees at night.

Left-Over Stock.

The benches are now pretty well cleaned out of Easter plants. For some weeks we have all been taxed for room. The most important bedding plants—the geraniums—that have been quite badly crowded of late should now be spread out. If you have any remaining in 2½-inch pots give them a shift at once. Cannas will need some of your spare bench space; they will be starting freely now and should have good attention as they always sell well. Easter stock that is left over should not be left here and there dotted all over the houses. If worth holding, get them together. Azaleas that are left unsold should have all the seed picked off after blooming, and repotted if needed. Soak the ball well before potting. As soon as the genistas are through flowering trim off the old flowers with a pair of shears and when the weather gets good they can be plunged outside. Spiraeas can be planted out in the border.

Nephrolepis.

Those who are thinking of raising a stock of young Nephrolepis for next year can from now up to July start to propagate them. First of all see that you have the drainage perfect so that the bench will let the water through freely. Then put in some light, sandy soil and plant the ferns out and you will get abundance of runners that will root and lift without losing a single frond. A light shading and frequent sprinkling to create a fair amount of atmospheric humidity and a moderate degree of moisture at their roots is about all that is needed in the way of care. There are few members of the great family of ferns that are so easy of propagation as the Nephrolepis, and they still enjoy a marked degree of popularity. The Boston fern seems to lead all others as a seller. Nephrolepis Whitmani is the best of the sports and shows very little signs of reversion. N. Scottii makes a nice compact plant. N. elegantissima is something similar to Whitmani. They are all good and satisfactory for most florists.

Poinsettias.

The old plants of poinsettia that have been resting since the new year

under the benches can now be started by shortening back the stems and repotting in as small pots as the roots will permit. They can be placed on a sunny bench where the temperature of 60 degrees can be maintained; at night give them a good soaking of water. Keep rather on the dry side until the plants start to break and they will soon produce a quantity of fine cuttings. Take the cuttings off with a heel when three or four inches long. Trim with leaves off fairly close before inserting them in sand. Water carefully and shade until rooted. When potting them off use small pots and a mixture of loam, leaf mould and sand. It is a great mistake to allow them to make long roots before being taken from the cutting bench; pot as soon as the plants have made roots from one-half to one inch long. Cuttings can be rooted at any time from now until the middle of August. Those propagated in July and August are fine for making up pans, but the earlier ones will give the finest bracts for cutting.

Rose Compost.

The importance of good compost for roses cannot be overlooked. We may have every advantage as to good houses, fine heating system and everything that goes for the production of good crops, but the selection of a suitable soil for planting purposes is imperative. Get your compost together now so it will have time to be thoroughly incorporated and in a condition for the young stock to draw its food supply from. A stiff fibrous loam is the most suitable for most of the varieties cultivated under glass. The top spit of six or seven inches deep of some old pasture land will make an ideal compost. Stack it in square piles and add a load of well decomposed cow manure to every three or four loads of sod. The pile should be turned over two or three times; this will put the compost into a mellow condition so that the young roses when planted out in it will immediately take hold and grow.

Stevias.

Stevia serratifolia, so highly valued at the holidays, cannot be passed without notice. The old plants that have been kept in cool houses will give a great many cuttings now which should be rooted in good season so as to have well established plants by the time the call for them is the greatest. Constant pot culture produces the best plants. Of course, this method of growing them into good-sized specimens requires a greater amount of care and attention than usually goes with field culture, but I think it pays.

JOHN J. M. FARRELL.

Mr. Farrell's next notes will be on Dendrobiums, Ericas, Palm Seed, Pansies, Planting out Carnations, Rambler Roses for next Easter.

The Gardeners' Chronicle for March 19, speaks of Peterson's Glory of Cincinnati as a variety of Begonia Gloire de Lorraine. This we believe to be incorrect. Mr. Peterson says it is a seedling and the appearance of the plant, especially the foliage which is large and glossy in the way of B. Socotrana, seems to bear out Mr. Peterson's claim.

HARDY ROSE AMERICAN PILLAR.

The Blue Rose and the American Pillar rose were late arriving exhibits at the Philadelphia spring show and did not receive mention in our previous issue, which they both well deserved, the former for its novelty and the latter for its extraordinary merit. It was exhibited without name (a grave omission), and to make certain of its identity your correspondent communicated with the exhibitors and was gratified to receive the following complete account from the pen of Antoine Wintzer:

Of the many new hardy roses introduced during the past ten years it is doubtful if any possess more desirable qualities than the American Pillar, introduced by the Conard & Jones Company in 1906. The history of this remarkable rose is rather unique. It grew and bloomed on the trial grounds of the introducers without attracting any special attention. Why? because it was a single rose and in the past single roses, like single dahlias, were not appreciated. During a beautiful June morning in 1904, a lady visitor noticed its charming bright single flowers produced in immense clusters covering the bush. The rose colored flowers in combination with the prominent yellow stamens produced such a fine color effect that she desired to have a plant for her rose garden. We grew a plant for her and it is now one of the finest specimens in the country.

Since its introduction the merits of this rose have been fully appreciated by our English cousins; they know a good thing when they see it, and rate it according to its merits. American Pillar was not introduced to the floral world with a great blare of trumpets claiming it to be superior to all other roses in existence and so forth. One man had unfaltering faith in its merits or he would not have given it the name of "American Pillar" until he was sure that the rose was worthy of the name.

The first point noticeable is the great vigor of the bush, then its enormous shiny green leathery foliage, but the center of attraction is in the beautiful clusters of single flowers. When first opening the color is a rich carmine changing to clear rose; it continues long in bloom and endures the hot weather with perfect impunity; its lasting qualities are surprising. It is an annual bloomer and can be trained as a climber or pillar rose, also can be kept in bush form or trained as a standard.

Those desiring a good single rose for Easter flowering cannot handle a better subject. One-year-old field-grown plants produce three to five large clusters if potted into 5 or 6 in. pots. No previous preparation is necessary to bring them into bloom. We have several hundred such plants in bloom, lifted from open ground and potted last December without any special treatment; of course all rosarians understand that the better the preparation the finer the bloom. The plants above referred to were pruned close, consequently there were not so many flowers per plant as they would have given if allowed more blooming wood. Young plants of this variety in 2½ in. pots, planted in field during April or May will grow large enough by following November to fill 6, 7 or 8 in. pots if given rich soil and good cultivation.

ANTOINE WINTZER.

STILL FANCY FREE.

Editor HORTICULTURE:

Dear Sir: I notice in your last issue of HORTICULTURE that Mr. Lloyd G. Blick of Norfolk, Va., expects to be in the race for Rochester in his auto, accompanied by Mrs. Blick. I have been knowing that gentleman for many years and never knew there was a Mrs. Blick. He is an "old batch" and his old maid sister is going with him to have a good time. The two of us are fairly healthy specimens, weighing about 650 pounds and are always in for fun. So be on the lookout for Blick and his sister. Yours truly,
L. A. BLICK.

NEWS OF THE CLUBS AND SOCIETIES

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Mid-Lent Meeting of the Executive Board.

The regular mid-Lent meeting of the Executive Board was held at the Seneca Hotel, Rochester, N. Y., March 12, 14 and 15. The entire board consisting of President Pierson, Messrs. Asmus, Young, Vesey, Dailledouze, Rudd, Craig, Valentine, Vick, Kasting and Dörner were present during the entire session. The usual routine of business was transacted.

The report of the Treasurer and the financial report of the Secretary for 1909 and also the supplementary reports for January and February, 1910, were received. These reports were referred to a committee consisting of Messrs. Valentine and Dailledouze and were reported by them to be correct. They were then accepted by the Board.

The Treasurer was instructed to deposit all interest, received from the funds of the Society, to the credit of the reserve or permanent fund.

Several changes in rules relating to the management of the Annual Trade Exhibition were adopted. For floor space the rates are to be as follows: Minimum charge, \$5.00; 100 ft. or less, 20c. per sq. ft.; excess over 100 ft. and not over 200 ft., 18c. per sq. ft.; excess over 200 ft., 15c. per sq. ft. All signs in any exhibit, whether on wall or elsewhere, shall not extend higher than 6 ft. 6 in. above the floor. Sign space outside exhibition space shall be charged for at same rate as floor space. For wall space for exhibition purposes and not for signs, the rates shall be one-half that for floor space. All signs used in the exhibition shall be black letters on a white ground. No other color may be used either for lettering or for ornament.

A resolution was adopted providing that the public should be admitted to the exhibition every evening at 7 p. m., and on Thursday from 2 p. m. until closing time and at all other times the exhibition to be closed to the public. An admission fee of 25 cents will be charged. All arrangements attendant upon the admission of the public are to be under the control of a committee consisting of Messrs. F. W. Vick, Wm. F. Kasting, and G. B. Hart.

Mr. Chas. H. Vick, on the recommendation of Vice-President Vick and the Rochester Florists' Association, was unanimously elected Superintendent of the Trade Exhibition.

In connection with the committee of the local club, the Board visited the large convention hall offered for the Trade Exhibition and Meetings and accepted it. This building contains about 48,000 square feet of floor space and was considered by members of the Board to be the best hall ever offered for a trade exhibit.

President Pierson appointed John Westcott as chairman of the Committee on Convention Sports with A. F. Vick, R. G. Salter and J. M. Keller as the other members.

The usual appropriations were made for the year.

Mr. Valentine submitted to the Board

an outline for the organization of a Retailers' Section of the Society. The plan in general provides that all members of this section must first become members of the Society. It contemplates a trade arrangement by which business in distant towns may be exchanged on a safe basis as to quality of stock and credit. It was the unanimous opinion of the Board that the idea is an excellent one for the Society and will prove valuable to the retailers.

It was the unanimous opinion of the Board that a special meeting of the Society should be held during the time of the National Flower Show. A recommendation to that effect was made to the Society.

The following resolution was adopted:

"Resolved, That if five or more members write to the Secretary expressing an especial interest in any given floricultural topic and request the organization of a section devoted to that subject, the Secretary shall assign a place on the program to that topic and shall designate it by a suitable name as a separate section." The object of this arrangement is to provide sections so that members interested in these various subjects may get together and discuss them.

A tentative program for the coming meeting was adopted.

The Executive Board further indorsed the work of the Experiment Stations by passing resolutions commending the proposition for the State of New York to appropriate money for the erection of glass houses at Cornell University for experimental and teaching work in Floriculture. A bill was recently introduced in the Legislature at Albany embodying an appropriation of \$50,000 for this purpose.

The Tariff and Legislative Committee was directed to fully investigate the cause of the present high price of glass and to take whatever steps are necessary to relieve the situation. They were also requested to recommend such tariff legislation as will prevent a recurrence or continuation of the present conditions.

The following amendments to the constitution and by-laws were presented, ordered placed on record and printed in the program for action at the next annual meeting:

To amend Article V, Section 1, to read as follows:—The first annual meeting of the Society shall be held at Buffalo, N. Y., on the first Tuesday of August, 1901. Subsequent meetings shall be held annually at such time and place as may be fixed by ballot at the morning session of the second day of each annual meeting and shall continue for at least three days.

To amend Article IV, Section 2, by striking out the figures 25.00 and insert therefor 50.00, meaning to increase the Life Membership from \$25.00 to \$50.00.

On Monday night the members of the Executive Board were guests of the Rochester Florists' Association at their second annual banquet. The entertainment by the Association was much appreciated.

The following final resolutions were adopted:—"The Executive Board of the Society of American Florists and Ornamental Horticulturists desires to place upon record their appreciation of all the courtesies which have been shown them by the Florists' Association of Rochester and to recognize the spirit of hearty co-operation shown by the members thereof. We can confidently look forward to an unusually successful convention next August. We recognize the liberality of the Chamber of Commerce in placing at the disposal of the Society the finest hall we have ever had for our meetings and exhibition entirely free of charge. We have enjoyed a most pleasant time at the banquet and are more than delighted with the cordial expression of the various local speakers. We leave for our homes with the conviction that the earnest workers of Rochester will do their full share in making the Convention of 1910 a complete success.

H. B. DÖRNER, Sec'y.

NATIONAL SWEET PEA SOCIETY OF AMERICA.

Preliminary Schedule of the Second Annual Exhibition, 1910.

President Harry Turner's Cup, value \$25.00. For the best 25 vases of Sweet Peas.

The W. Atlee Burpee Cup. For the finest and largest collection of Sweet Peas.

The W. Atlee Burpee Prizes. For vase of waved or Spencer type Sweet Peas introduced 1910. First prize \$5.00, second \$3.00, third \$2.00.

W. W. Rawson & Co.'s Prizes. Silver Gilt Medal for a vase of Sweet Peas never before exhibited or disseminated of American origin. Silver Medal for the best 25 vases Spencer or Unwin types; open to the trade only. Silver Medal for the best 20 spikes of Sweet Peas "Rawson's Snowflake." Bronze Medal for the best three vases comprising white, lavender and pink; open to amateurs only. Silver Medal for the most successful exhibitor among the amateur classes.

Watkins & Simpson's Prize, value \$10.00. For the best vase of Nora Unwin, Frank Dolby, Mrs. A. Watkins, A. J. Cook, E. J. Castle.

Arthur T. Boddington Prize, a silver "Challenge Cup," value \$50.00—\$25.00 to the winner of the cup, second \$15.00, third \$10.00. For a collection of Sweet Peas, 25 varieties.

Henry A. Dreer Prizes. For 21 vases of Sweet Peas, the incomparable standard varieties as enumerated in Dreer's Garden Book for 1910. First prize \$20.00, second \$5.00.

Jerome B. Rice Seed Co.'s Prizes. For vase of white Sweet Peas; first prize \$5.00, second \$3.00, third \$2.00.

Peter Henderson & Co.'s Prize. \$10.00 gold cash. To be awarded the amateur exhibitor of the best and most distinct collection of 25 varieties of Sweet Peas, including not less than six of the Spencer type. The number of sprays to each variety to accord with the Society Rules. Also a \$10.00 gold cash prize to be awarded the amateur exhibitor of the two best vases of George Washington and Martha Washington Sweet Peas. Each vase to contain not less than 25 sprays.

The Henry F. Mitchell Co. Prizes. For three vases of Sweet Peas (one vase of each variety) Frank Dolby, White Spencer, Mrs. Alfred Watkins. First prize \$5.00, second \$3.00, third \$2.00.

C. C. Morse & Co.'s Prize, a silver cup, value \$25.00. For the finest collection of Sweet Peas (open to the trade only).

Florists' Exchange Prize. For vase Countess Spencer. First prize \$3.00, second \$2.00.

The time and place to be decided later. For further information write to

HARRY A. BUNYARD, Secretary,
342 West 14th Street, New York City.

CLUB AND SOCIETY NOTES.

The Engelman Botanical Club, of St. Louis, held a meeting on Monday night which was largely attended. Prof. Wm. Trelease, director of the Missouri Botanical Garden, entertained the members with a talk on Botany.

Mr. Jerome Jones has offered through the Horticultural Society of New York and same has been accepted by the Council, a special prize of \$15.00 for the best 12 blooms of Chrysanthemum Mrs. Jerome Jones, to be competed for at the exhibition of 1910.

The State Horticultural Society of Michigan opened its spring session in Fremont, Mich., at the Auditorium on March 12th. C. E. Bassett of Fennville, C. B. Welch of Douglas, Prof. H. J. Eustace, of Lansing, T. A. Farrent of Eaton Rapids, and Edward Hutchings of Fennville spoke on the "Use of Lime Sulphur Sprayers," and the discussion took the greater part of the day.

At the last meeting of the Gardeners' and Florists' Club of Baltimore a committee was appointed to draft resolutions in favor of "parcels post" to be presented to Congress. The club also adopted a resolution against the Simmons bill recently presented to Congress, to have all imported nursery stock examined at points of entry to this country. The club concluded that as foreign countries accepted our inspection we should accept theirs, etc.

The Gardening Association of Berkeley, Cal., will give a flower show sometime during April. A committee to formulate plans for such a show has been formed and F. H. Meyer has been named chairman. Eleven thousand packages of seeds were sold to the school children. The committee who have charge of the distribution of these seeds reports that these are to be planted at the homes of the children; others were distributed for planting in the school yards.

The annual spring exhibition of the Chestnut Hill Horticultural Society was held March 20th in the Library at 8711 Germantown avenue, Philadelphia. Many society women of Germantown and Chestnut Hill enjoyed the exhibition of spring blooms. F. J. Day read an interesting paper on "Bulbs and Their Cultivation," and a general discussion followed. The exhibition was a very creditable one—carnations, hyacinths, cinerarias, tulips, narcissi and Easter lilies making up the exhibit.

INCORPORATED.

Sedalia, Mo.—Archias Floral Co., West 2nd St., capital stock \$5,000. L. H. Archias, M. T. Slane, H. G. Tompkin and L. A. Kipping.

Nashville, Tenn.—Greenbrier Nursery Co., capital stock \$25,000. Incorporators, R. R. and Annie M. Harris, Ida N. and S. M. Pribble.

Cleveland, Ohio.—Smith & Feters Co., capital stock \$20,000. Frank Munroe Smith, William S. Kruzen, Louis A. Kooms, Jr., Timothy Smith and Clarence Meyers.

WREATH OF LILY OF THE VALLEY AND ORCHIDS.

Made at Galvin's, Boston.

AN INDEPENDENT ATTITUDE.

Our readers will be interested and amused over the following translation from "Moeller's Deutscher Gaertner Zeitung" setting forth the attitude of that journal towards flower shows held in Germany. It has been suggested by a facetious friend of HORTICULTURE that the American trade papers should follow the lead of their independent German contemporary and adopt similar rules for their own procedure! How do you think it would work out? Don't all answer at once.

COMING EXHIBITIONS.

We recommend to all whose intention it is to take part in the following Horticultural exhibitions at home, to obtain the absolute assurance that the prizes offered are for the Quality of the plants exhibited and not so called Tips for work done on behalf of such exhibitions.

Further, should they make positively sure that no exhibitors shall act as judges, that all Firms be allowed to put their business cards on their exhibits, and that no obstacle be put in the way of the reporters.

All exhibitions to which this paper receives no invitation, will not be reported as it will be assumed that none is desired.

Invitations to exhibitions received less than three weeks beforehand cannot be considered and will not be reported, as it is impossible at too short notice to keep a date open.

We demand for the reporters of "Moeller's Deutscher Gaertner Zeitung" the same social courtesies as are accorded to the judges. If denied, no report will be printed.

No report of Home Exhibitions will be made at which exhibitors act as judges. All shows at which exhibitors are for-

bidden to attach their cards immediately after groups are completed will be ignored.

Printed exhibition leaflets filled with ads. will not be published. Only original exhibition reports will be printed in "Moeller's Deutscher Gaertner Zeitung."

SWEET PEA NOVELTIES.

Once again the sweet pea specialists are making known the new aspirants to fame and fortune which are being offered to the growers. There appears to be no limit to the new varieties which each season claim attention. In addition to the novelties from home raisers, several of the seedsmen are listing the chief American introductions. From Wem, in Shropshire, one of the chief homes of new introductions, there have emanated Picotee Waved, a pure white, with a delightful picotee edge of carmine; Vicomte de Janze is of a deep bright rose; Mary Vipan Waved is a splendidly waved, bold bloom, of a rose tint; Mrs. E. Gilman is an expanded bloom with a creamy ground, suffused with bright rose. Messrs. Watkins & Simpson, a firm of wholesalers known in America, are offering Picotee, white, edged with carmine; Edward VII Improved, and Miss Wilmott Improved. In several instances growers have suffered through the prevalence of streak amongst their crops, whilst the very unfavorable weather last year militated against a successful harvest.

W. H. ADSETT.

Headquarters for Hardy JAPANESE LILIES

FOR IMMEDIATE DELIVERY

The Hardy Lilies are planted by many florists now. They bloom outdoors in July and August and are extremely useful for decorative purposes. The Auratum, Album and Rubrum are excellent for forcing.

	Per doz.	Per 100	Per 1000
Lilium Auratum (Golden Banded Lily).			
8 to 9 inches	\$0 90	\$6 00	\$50 00
9 to 11 inches	1 25	9 00	80 00
11 to 13 inches	2 25	15 00	140 00
Lilium Auratum <i>Platyphyllum</i> . A great improvement on the old Auratum, otherwise similar except that the flowers are very much larger.			
8 to 9 inches	1 50	10 00	90 00
Lilium Album (<i>Praecox</i>). Pure white.			
8 to 9 inches	1 10	7 50	72 50
9 to 11 inches	1 60	12 50	115 00
Lilium Album <i>Kraetzerei</i> . Pure white; an improvement on <i>Lilium Album</i> .

Henry F. Michell Company, 518-1018 Market St., PHILADELPHIA, PA.

THE MASSACHUSETTS AGRICULTURAL COLLEGE.

The short course in floriculture closed March 11th. It is to be regretted that so few took advantage of the excellent opportunities to avail themselves of practical and theoretical information along floricultural lines, and it is hoped the course may be more largely attended next year. The registration for this course included:

Albert C. Bradstreet, Topsfield, Mass.; Lydia A. Bowser, Cohasset, Mass.; George A. Gray, Beverly, Mass.; Edward L. McCarroll, Waban, Mass.; Albert Lewis, Rockaway, Long Island,

The talks by the various practical men who have generously assisted in the course have again proved most valuable. Aside from the general lectures of the course the following spoke on some feature of glasshouse work. F. J. Elder, heating expert; Lord & Burnham Co., Irvington-on-Hudson, N. Y., on heating; Eber Holmes, Montrose, on rose culture; W. H. Elliott of Brighton, on the same subject; Peter Fisher, Ellis, Mass., on the development of the carnation; M. A. Patten, Tewksbury, on cultural methods with the carnation. E. O. Orpet of South Lancaster gave a very fine talk on orchid growing, and exhibited a large

All the young men had positions when the course was completed and several more might have been placed. The demand for men was greater than the supply.

Some important changes are planned for the course next year. The morning will be occupied in class-room work and lectures will be given on such subjects as the management of greenhouses, greenhouse crops, fertilizers, insects, diseases, and like subjects. In the afternoon the class will be divided in two sections, one section to consist of those students who have little knowledge of horticultural work and the time will be spent in practical

Short Course Students in Agricultural and Horticultural Subjects at the Massachusetts Agricultural College. Winter Session, 1910.

N. Y.; John L. Killam, Boxford, Mass.; Willard M. Pease, Monson, Mass.; William Seace, Pittsfield, Mass.; Edwin G. Scott, Garfield, Wash.; Edwin R. Selkregg, North East, Pa.; L. E. Torrey, Southbridge, Mass.

While it is difficult to arrange a course which will meet the needs of all classes of students, the aim is to give the beginner as much elementary information as possible without neglecting those who are more advanced, and at the same time to make the work sufficiently scientific to satisfy the needs of those who have been longer in the business.

number of varieties in bloom. E. J. Canning of Northampton spoke on the work of the private gardener. Aside from these speakers, C. H. Totty of Madison, N. J., gave a very excellent talk on chrysanthemums, J. K. Shaw of the Horticultural Division of the Experiment Station spoke on the principles of plant breeding, and H. D. Haskins of the Chemical Division of the Experiment Station gave an instructive talk on fertilizers for the greenhouse crops. Edward MacMulkin of Boston was scheduled to speak on the retail trade, but was prevented from doing so because of sickness

work in the greenhouses; the other section will consist of men of considerable practical training and the afternoon will be spent on assigned reading or some special branch of research. It is hoped in this way to meet the needs of all taking the course.

The Saturday observation trips proved especially profitable. The following are among the ranges visited: H. W. Field's, Northampton; A. N. Pierson's, Cromwell, Conn.; The Montgomery Co.'s, Hadley; Smith College Conservatories, Northampton; Mt. Holyoke College Conservatories, South Hadley; Waban Rose Conservatories, Natick;

Dreer's Hardy Delphiniums

Belladonna. The freest flowering of all the Delphiniums and the most valuable for cutting, its beautiful turquoise-blue flowers appeal to all who see it. Plant these early and you will have a continuous display of bloom from June until freezing weather. We offer an exceptionally fine lot of extra heavy one-year-old plants, \$2.00 per dozen, \$15.00 per 100; \$125.00 per 1000.

Dreer's Gold Medal Hybrids. Unquestionably the finest strain of mixed hybrids ever brought together, being seedlings of one of the best named collections and containing some wonderful varieties. Strong one-year-old plants, \$1.25 per dozen; \$8.00 per 100; \$75.00 per 1000.

Formosum. A splendid strain of this popular favorite dark blue variety, 85 cents per dozen; \$6.00 per 100; \$50.00 per 1000.

Chinense Blue and White. 75 cents per dozen, \$5.00 per 100.

CHOICE NAMED HYBRID VARIETIES.

Alfred Henderson. Bold, massive spikes of semi-double rosy-lavender flowers, 2 inches across, white eye. 20 cents each; \$2.00 per dozen; \$15.00 per 100.

Beatrice Kelway. Deep, rich blue with a conspicuous yellow eye, flowers 2 inches across and perfectly arranged. 20 cents each; \$2.00 per dozen; \$15.00 per 100.

Cerberus. Sapphire with black-brown centre, a handsome spike. 35 cents each; \$3.50 per dozen.

Chinense Cineraria (Spurless Hardy Larkspur). The large flowers without a spur, strikingly resembles a fine, rich sky-blue Cineraria. 20 cents each; \$2.00 per dozen; \$15.00 per 100.

Duke of Connaught. Rich oxford-blue, with distinct bold white eye; fine large flowers. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

J. C. Jenkins. Very large, semi-double bright mauve edged with royal blue and white eye. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

King of Delphiniums. Most vigorous growing, immense size, semi-double, rich deep blue with large white eye. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Lizzie. Lovely azure-blue, flowers 2 inches across, bold, creamy-yellow eye, arranged in bold massive stems. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Lemartin. Similar in growth and habit to Belladonna, but with rich Gentian-blue flowers with white centre. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Mrs. Creighton. Semi-double, outer petals deep sky-blue, centre rich plum with black eye. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Persimmon. Comparatively new; beautiful delicate turquoise-blue. 50 cents each; \$5.00 per dozen.

White Seedlings. These have been carefully selected and will be found desirable in any collection. 30 cents each; \$3.00 per dozen.

For the most complete list of Hardy Perennial Plants offered in America see our current Wholesale List

Henry A. Dreer, Inc.

714 Chestnut Street, PHILADELPHIA, PA.

The above prices are intended for the trade only.

DELPHINIUM BELLADONNA

William Nicholson's and S. J. Goddard's, Framingham; Butterworth's, South Framingham; Peter Fisher's, Ellis; Geo. Sinclair's, Holyoke, and Wm. Sim's, Cliftondale. Full notes on each of these trips were required.

The Massachusetts Agricultural College stands ready to assist the state florists in every way possible; the mission of the floricultural department is to be of service to the practical growers and retail men. This can be accomplished only through the most cordial co-operation.

TO DEVELOP FLORICULTURE IN THE EMPIRE STATE.

State of New York.

No. 1026. Int. 874.

In Assembly,

March 7, 1910.

Introduced by Mr. WILKIE—read once and referred to the Committee on Ways and Means.

An Act

To build and equip a range of glass houses and service building for teaching floriculture at the New York State College of Agriculture at Cornell University, and making an appropriation therefor.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

Section 1. The sum of fifty thousand dollars (\$50,000), or so much thereof as may be necessary, is hereby appropriated for the purpose of building and equipping, at Cornell University, a range of glass houses and service building, suitable for experimental and teaching work in floriculture. Such buildings shall be a part of the New York State College of Agriculture at Cornell University, and shall be located on such portion of the land of the university as may be designated by the trustees of such university. Plans and specifications

for such glass houses, service building and equipment shall be approved by the department of horticulture of such college of agriculture. Such buildings shall be built and equipped by such university and such appropriation shall be paid by the state treasurer on the warrant of the comptroller on the order of the treasurer of Cornell University, but no part of such appropriation shall be available, except for advertising and for plans, until such university has entered into a contract with a responsible party for the completion of such work within the amount appropriated.

Section 2. This act shall take effect immediately.

Privet GROWN for Hedges

Satisfactory hedges are only obtained by proper nursery treatment. Plants not properly treated in the nursery must be cut back close to the ground and practically started all over again. Our California privet is grown specially for hedges and makes a dense growth of dark green, very shiny, ornamental foliage.

	Price per 100	Per 1000
12 to 18 inches	\$2.50	\$20.00

ORCHID PEAT—Osmunda Fibre

The best material for **Orchid Potting**. The grade which we offer is of the best material, well cleaned and sold in chunks or hand picked. **Leaf Mold, Rotted Peat and Baled Sphagnum** also in stock.

The C. W. BROWNELL COMPANY

WALDEN, N. Y.

CHICAGO NOTES.

The Easter Trade.

Easter in Chicago had its special features to make it differ from the usual Easter. Lilies, the central figure in the flower world at this time, did not come forth from all sorts of stowaway places in the greenhouses as they so often do, and surprise the dealers towards the end of the week. On the contrary, many were greatly surprised at their scarcity and those who had predicted the usual appearance of plenty of lilies and low prices at the last had to admit their mistake. The large plant growers had been turning away customers for over a week, and the many small growers did not appear this year with the held-back stock that generally depresses the price on lilies at the last. The totals will not foot up so high as anticipated, even with the advance price, for the plants averaged less blooms than usual, many buds having fallen off before they were two inches long, owing to the dark weather earlier in the season. The large retail stores had their stock safely assured long before Easter week, and the one who failed to do this found nothing to console himself with, for there was nothing to sell to the customer who had set his mind on an Easter lily plant. Prices received by the retailers were high enough to secure them a good profit, and the growers have nothing to complain of as they practically fixed the price themselves. Fifteen cents per bud and bloom was probably the average price for perfect stock. The department stores used thousands of the smaller plants with from one to four lilies, many of them somewhat imperfect, and sold them at 35 cents a plant.

Not a Beauty from lowest grade to highest was left over, is the statement of the growers of American Beauty roses. Some think the absence of the tall lily plants turned the demand to Beauties, while others think it was simply a case of having just enough. The quality of Beauties in general was first class, the early Easter being favorable rather than otherwise. Other roses were not quite so fortunate. If there was too much of anything at Easter, it was roses. Perhaps it would be more correct to say, too many open and weak-stemmed roses, the result of

the hot sunshine of the week previous. These roses brought one-half the price of good carnations in some cases. Even good stock was too plentiful.

Park Notes.

Active steps have been taken to beautify the schoolhouse grounds of Chicago by Superintendent of Streets Fowler and City Forester Prost. Conferences between the Superintendent of Schools Mrs. Young and District Superintendent Miss English have resulted in getting the work under way. Congressmen have been appealed to for flower and vegetable seeds for seventeen school yards, though it does not seem to the writer that this is the best way to obtain them. Chicago should be able and willing to pay the small sum required for seeds, and give the dealers the little profit there is in handling them.

The small parks of the city are under consideration as the proper home for the "nickel theatre," where it can be properly controlled and made of real educational value to all, and especially to the children. It looks like a good idea.

The Park Commissioners of Chicago last week declared themselves in favor of further changes in street names on the West Side. This will change all the boulevards to drives, giving an Anglo-Saxon word for the French one, which means bulwark, and is not so fitting as parkway or drive. The request for the change was presented by the Municipal Art League.

An appeal to the City Council to establish a municipal greenhouse and nursery on the city's Riverside property, known as Gage Farm, is made in the Special Park Commission's report for 1909. The report, which will be sent to the Council tomorrow, emphasizes the point that the city is losing money on the operation of Gage Farm and claims that a nursery for street-planting needs would soon pay "handsome returns to the city."

Considerable diversity in selling prices existed in various parts of the market owing largely to the quality of stock and the extent of the shipping trade. White carnations reached \$5.00 or \$6.00 and sold out clean on first-class stock, while overheated, weak-stemmed blooms, in pink especially, sold as low as \$1.00 per hundred. Sweet peas had a similar experience. There were thousands of short-stemmed ones

that would move slowly at half price, while the prime stock sold at sight for full figure. Violets are not much of a factor for Easter in Chicago, but the orchid dealers report sales of that flower very satisfactory.

Losses from Gas.

Defective gas mains have caused loss to a number of Chicago growers during the past four years. The difficulty of carrying on a suit successfully against a large company by a single individual is easily understood, but by forming an alliance in the shape of a law or claim department in connection with the Florists' Club, it is believed that much better results would follow. P. M. Broadbeck of Evanston has three times this winter lost every leaf and bud. The gas escapes from the man-holes and when the ground is soft, escapes outside the houses; but when the ground is frozen the gas finds escape in the electric conduits nearby and travels along till it finds the unfrozen ground of the greenhouses. During its passage of forty or more feet through the soil it loses its odor and its presence is unknown till results are seen in the plants. Efforts are being made for peaceable settlement, but so far the Gas Company has ignored his just demands. John Lange of Robey street, four years ago had similar loss of plants and employed a professor from Chicago University to assist him in locating the cause, which he attributed to escaping gas. Herman Boski of Bowmanville, has not reached a settlement yet in his suit against the Gas Company for \$5,000 for loss of plants one year ago and two years ago. Some special insurance against gas similar to hail insurance has also been suggested. There is money enough invested in greenhouses in Chicago and vicinity to make the matter of protection an important one.

Personal.

Mrs. Edwin Kanst has the sympathy of the trade in the loss of her mother, Mrs. Alice Hastings, who died March 23rd in Minneapolis, Minn.

Miss Josepha Then has accepted a position with the Masonic Temple Floral Co. Miss Then has been for several years in charge of her father's stock at the Flower Growers' Market, which was recently given up.

O. P. Bassett took his friends by surprise and word comes that he has ventured for the third time upon the sea.

OBITUARY.

Benjamin Kimball.

Benjamin Kimball, a retired florist, died March 21st, of general debility at his home 151 Sterling Place, Brooklyn, N. Y.

John Christiany.

John Christiany, of Sheldon, Ia., died recently, death being due to heart failure. Mr. Christiany was proprietor of the Sheldon Greenhouses for many years.

Abraham Dean Hartley.

Abraham Dean Hartley, landscape gardener of Philadelphia, Pa., died at his home Woodlawn, Bellevue, at the age of 73 years. He came to this country from England in 1867, and settled in Philadelphia, later coming to Pittsburgh.

Arthur Boyle.

The death of Arthur Boyle, of Santa Fe, New Mexico, has just been reported. He was a man of varied attainments with a cosmopolitan knowledge obtained in Europe, Asia, Australia and America. His greatest interest was centered in horticulture in which he had a wide information regarding fruits and flowers and a great affection for horticultural things.

Drewett O. Drewett.

We regret to record the death of this gentleman, an ardent horticulturist, which took place on March 9th, at his residence Riding Mill on Tyne, Northumberland. He was an enthusiastic cultivator of hardy herbaceous alpine and aquatic plants and of trees and shrubs. He likewise interested himself in the crossing and hybridization of orchids and was especially successful with American species of cypripediums and those which flower in the winter season. One of his finest crosses is *C. insigne* James Renwick, named after his gardener.

Geneva, Ill.—Rebuilding operations are in force at the Riverbank Greenhouses. Five of their old houses are to be rebuilt. They will also add four new houses, each 26x9 by 200 feet. This concern has a 50,000-foot boiler plant. Mr. Charles McCauley is superintendent and buyer.

NEWS NOTES.

Portland, Ore.—Clark Bros. have purchased a 10-acre tract on Division street, known as the Gearin tract.

Athens, Ga.—A nursery is to be started here by T. W. Dennington. He has purchased land on the Jefferson road, several miles from the city.

Chicago, Ill.—Eighty acres additional have been leased by Vaughan's Nurseries at Western's Springs. This property adjoins the present and gives a nursery area of 150 acres.

Sumner, Wash.—Ten acres of land, two miles east of this place, have been purchased by the Woodland Floral Co. A large part of it will be put under cultivation as soon as weather permits.

Spokane, Wash.—A general florist and gardening business will be conducted here under the firm name of Burnett Bros. They have purchased two and one-half acres of land and have most of the material on the ground for erection of their houses. W. J. Burnett formerly had charge of the greenhouses of Hoyt Bros.' Co.

DOUBLE YOUR CARNATION PROFITS—LAST CHANCE TO BUY

The trade has certainly bought liberally of Carnation Dorothy Gordon this winter and spring—orders for rooted cuttings have taxed our producing capacity nearly to the limit, but we're proud of the stock we sent out, and judging by their kind letters, our customers are pleased, too. And next winter, when all those splendid plants come to bloom and these florists begin to make money as they have never before made it from carnations, they'll be still better satisfied.

Have YOU delayed getting in your order for this mag-

nificent new Carnation? If so, this advertisement is addressed to you; we have just a few thousand more cuttings in the sand for April 15th delivery, and when these are taken, no more will be available till next winter.

We urge you, if you want to double your carnation profits, not to delay; the merit of this splendid new variety has been thoroughly proved, and the only possible loss you can experience in the matter is to let this opportunity slip by and stick to the old sorts you've been growing in the past.

Carnation Dorothy Gordon

has a splendid pedigree, a long list of good qualities and an enviable record of prizes and awards. It is a seedling of Lawson on Enchantress, possessing the principal merits of these varieties without their faults. It is vigorous in growth and perfectly free from disease. Its flowers are a trifle darker than Pink Enchantress; they are borne in double the quantity and are of exceptional size—averaging over 3 inches in diameter. They are very fragrant and keep exceptionally well. The market price paid for Carnation Dorothy Gordon is regularly 50 per cent more than that paid for Enchantress.

From the very first, Dorothy Gordon has established a

splendid record as an exhibition variety. High awards were given it at the meeting of the American Carnation Society in 1908 and at the National Gardeners' Association meeting in New York. This season it has attracted much attention and has won further renown at the Pittsburgh and Toronto meetings.

In order to give the trade a fair opportunity to test it thoroughly, we have from the first sold rooted cuttings at a price which would get it established everywhere. This low figure still prevails, and the remaining stock will be sold at these prices: \$10 per 100; \$75 per 1,000. No further offers this season.

JOSEPH HEACOCK COMPANY, Disseminators, - WYNCOTE, Pennsylvania

BUSINESS CHANGES.

Canton, Ill.—The Barnhart Greenhouses have been leased by C. E. & W. H. Savill.

Mount Gilead, Ohio.—The property of Armondo L. Munk, bankrupt, was sold on March 12 to O. A. White of Chicago.

Lockland, Ohio.—The Bloomhurst Floral Co. has purchased the plant of W. K. Partridge. The corporation was recently chartered at Columbus.

Colorado Springs, Col.—The greenhouse of A. D. Jones was sold to Oscar Lillyback of Memphis, Tenn., on March 17. Mr. Lillyback has given a five-year lease to R. L. Pemberton and D. A. Harris, who will carry on the business.

Salt Lake City, Utah.—Judge Armstrong of the district court rendered a verdict March 14 in favor of Thomas Meehan & Sons against the Pioneer Nursery Co. for the sum of \$551.47 and interest from Jan. 21, 1908. This amount was what was found due for a shipment in 1908.

Fairview, Ill.—B. Eldridge is now sole owner of the Bellville Plant and Flower Co. August Lembke will have charge of both Mr. Eldridge's houses. They intend to do a wholesale business in connection with the business from his private greenhouse. Business will be conducted under the name of the B. Eldridge Co. The charter of the Bellville Plant and Flower Co. has been surrendered.

GRAFTED ROSES.

Killarney, White Killarney, My Maryland, Bride, 'Maid, Richmond, Golden Gate, Mrs. Jardine and Chatenay, all \$15.00 per hundred.

Onion sets are practically cleaned up and prices are stiff on what little is left in dealers' hands.

SEED PACKAGE RULING.

Mailing Division.
UNITED STATES POST OFFICE,
Philadelphia, Pennsylvania.

March 14, 1910.

Dear Sir: The Post Office Department has called the attention of this office to the fact that packages of seeds mailed by seedmen in Philadelphia are not properly packed for mailing under the third class rate of postage, that is, one cent for each two (2) ounces or fraction thereof.

The regulation in regard to this matter reads as follows:

"Seeds . . . which are liable from their form or nature to loss or damage, unless especially protected, must be put up in sealed envelopes made of material sufficiently transparent to show the contents clearly without opening."

The packages mailed by your firm do not comply with this requirement, as the sealed envelopes are not sufficiently transparent to show the contents.

In view of the fact that your firm has been permitted to mail seeds in this manner heretofore without question, I am instructed to immediately bring the provisions of the Postal Laws and Regulations cited to the attention of all seed concerns in this city, advising them that mailings of such seeds on and after July 1st next cannot be accepted at the third class rate of postage unless the requirements of the aforesaid regulations are met.

Before you prepare any further envelopes for the mailing of seeds under these regulations permitting the mailing of such matter at the third-class rate of postage, I have to suggest that you submit samples of the envelopes to the Superintendent of Mails, Room 204, this office, for decision as to whether they are sufficiently transparent to be transmitted in the mails under this rate of postage.

Very respectfully,
RICHARD L. ASHURST, Postmaster.

FIRE RECORD.

Mankato, Minn.—The greenhouse of E. C. Willard, Baker and Moreland Aves., with its stock of vegetables, has been destroyed by fire. A fire occurred at the same time last year with a total loss.

Washington, D. C.—On March 14 the heating plant and ends of three greenhouses belonging to Michael J. McCabe, Walker road, were destroyed, with an estimated loss of between \$2,000 and \$3,000, not covered by insurance.

E. W. Guy, of Belleville, Ill., had a bad loss on Thursday, March 24, from fire which broke out early in the morning and burned him out almost completely. His loss will be great as all of his Easter plants and spring stock was lost. Mr. Guy's many St. Louis friends express their sincere sympathy.

The residence of Campbell Erdman, a Baltimore florist, was destroyed by fire early last Saturday morning, causing a loss of \$3,000. Mr. Erdman was at work in his greenhouses at 6 a. m., when he discovered fire. In order to save his family he had to brave the flames, but he succeeded in getting wife and children out in safety.

SAVING THE PEACH CROP.

For years the peach brown rot has been recognized as a most destructive disease of stone fruits. This is a fungous disease, and it is widespread, and very destructive to the peach crop. The loss which it inflicts on peach growers will easily average \$5,000,000 yearly. The loss to the peach crop of Georgia alone is estimated at \$1,000,000 a year.

Much work has been done with a view to discovering a satisfactory remedy for this trouble. Spraying with diluted Bordeaux mixture has been most commonly recommended, but its injury to the foliage has made it unsatisfactory, since the remedy must be applied during the growing season.

The peach scab (often called "black spot") is another disease which seriously affects the peach crop in all sections east of the Rocky Mountains, although not causing such serious losses as brown rot.

As the result of experimental work by the U. S. Department of Agriculture, a cheap and simple remedy for this disease has been found in the self-boiled lime-sulphur wash. This can be applied during the growing season with very little danger of injuring the fruit or foliage, and it is very effective. Furthermore, by mixing arsenate of lead with the fungicide, the curculio can be destroyed at the same time.

The Department has just issued a bulletin describing the preparation and use of the remedy. This publication will be of great interest to peach growers in all sections.

CATALOGUES RECEIVED.

"Velvetlawn" Seeder Co., Springfield, O.—Folder of Velvetlawn Seeders.

Berrydale Experiment Gardens, Holland, Mich.—Folder of specialties in new flowers and small fruits of merit.

Ross Bros. Co., Worcester, Mass.—General Catalogue of Seeds, Plants, Farm and Garden Supplies. Cover in colors, handsomely illustrated and in all respects creditably representing a wide-awake seed house.

William Tricker, Arlington, N. J.—Water Lilies and Hardy Old-Fashioned Garden Flowers. Mr. Tricker is at home with these subjects, as everybody knows, and his catalogue is just what we should expect—a well-selected list of the best.

Felix & Dykhuis, Boskoop, Holland.—Wholesale Trade List, 1910-1911. This is an elaborate production, very systematically arranged and covering the entire field of garden plants and trees, forcing plants, fruit trees and other Belgium specialties. A plate in colors, of Spiraea Peach Blossom is inserted as a frontispiece.

Bobbink & Atkins, Rutherford, N. J.—General Catalogue for 1910. In this publication this well-known nursery firm have placed in the hands of the public one of the most complete descriptive price lists issued in this country, and one that is elegant in every respect. The covers in grey tint are artistically adorned with cluster of roses on front and view of rhododendron garden on back page. The illustrations throughout are profuse and beautiful. It is the kind of book that will help sell the goods.

NEWS NOTES.

Boston.—Henry M. Robinson & Co. have secured a long lease of the entire three upper floors in the Perry Building, 15 Chapman place. This, added to the two floors they have been occupying at 9 Chapman place, will give them abundant room for contemplated extensions in their florists' supply department.

Brookings, S. D.—Correspondence courses for home study in agriculture, horticulture, poultry culture, domestic science and nature study are now provided by the South Dakota State College. These courses are for all members of the farm family, for school teachers and everyone everywhere who wishes to learn. The courses of study are planned not for financial profit but to bring scientific and practical instruction within the reach of those who cannot attend college yet are ambitious to gain instruction helpful in their work and life. Four systematic courses are offered in horticulture covering the subjects: 1. Vegetable Gardening. 2. Fruit Culture. 3. Floriculture. 4. Forestry. Full information will be furnished free to any of the readers of HORTICULTURE on request to A. A. Brigham, director College Extension.

THE MYSTERY.

"Tain't me," says the farmer,
"Who's gettin the stuff."
"Tain't me," says the packer.
"I get just enough
To pay a small profit,
As fair as can be."
And all of them chorus
Together: "Tain't me."

"Tain't me," says the tanner,
"Who gets the high price,
For high shoes and low ones,
For slippers and ties."
"Tain't me," says the rancher;
"I live and that's all."
"Tain't me," says the dealer;
"My profits are small."

"Tain't me," says the canner;
"My margin's the same."
"Tain't me," says the huckster,
"Who's bracin' the game."
"Tain't me," says the gardener;
"I'm poor all th' time."
"Tain't me," says the grocer;
"I ain't seen a dime."

It's surely a puzzle
To know where it goes;
No maker or seller
Or any of those
Partake of high prices,
So they all agree;
And I'm a consumer,
I'm certain "tain't me."
—J. W. Foley, in Boston Herald.

PERSONAL.

Chas. P. Collins will have charge of
the Kingston Plains Cemetery, North
Danville, N. H., this year.

Frank Warrington, Mt. Kisco, N. Y.,
is now gardener for W. H. Vreden-
burgh, Esq., Freehold, N. J.

Julius Schuenhoff, formerly with J.
V. Tilton, Wellesley, Mass., is now at
the Sunnyside Nurseries, Dundee,
N. Y.

Peter J. Olinger, florist, and family
of 132 Division street, Cincinnati, Ohio,
were recently taken very ill with
ptomaine poisoning.

C. P. Owens has accepted a position
in the store of Mrs. J. W. Rodgers,
Summer St., Boston. He was former-
ly with R. T. McGorum.

James B. Allan, of the firm of George
& Allan, Cincinnati, Ohio, has received
from the park commissioners the ap-
pointment as city nurseryman.

Mr. and Mrs. Thos. F. Galvin of Bos-
ton, announce the engagement of their
daughter, Alice Marguerite to Mr.
James Samuel Willoughby of Balti-
more. The wedding will take place
early in June.

**PERSONAL.**

F. Schwalbe has resigned his position as City Florist for Savannah, Ga.

T. M. Barrett of Rutland, Vt., has bought a florist business in Portland, Ore.

Jas. L. Carbery, Washington, D. C., is temporarily with the Department of Agriculture.

John Peters is now employed as gardener for the Compton Hill Park, St. Louis, Mo., under Phil Goebel.

J. McHutchinson of New York sailed on March 30 per S. S. Lusitania for Europe on annual business trip.

Miss Margaret Crotty and Miss Elver Schaefer have accepted positions with the Baur Floral Co., of Erie, Pa.

A. E. Madden, rose and carnation grower and designer for the Trimble Greenhouses, Princeton, Ill., is seriously ill with pneumonia. Mr. Madden was formerly with Washburn & Sons in Bloomington.

E. H. Wilson sails today (April 2), on S. S. Laurentic from New York, en route to China, where he is to resume his explorations. Mrs. Wilson and daughter accompany Mr. Wilson as far as London.

James Wheeler, head gardener for Joseph White, Brookline, Mass., is succeeded by W. D. Nickerson, who has been his assistant. As has been reported in these columns before, Mr. Wheeler is building a range of commercial greenhouses at Natick.

J. Krug & Son, Alton, Ill., celebrated their 29th year in the florist business last week at both of their stores, and each caller received a flower of some kind. Their new branch store in the Pike Building, is doing a big business,

also the old one in the Commercial Building.

Flower Market Reports.

BALTIMORE The Florists' Exchange did more business than at any previous Easter. Shipments to northern cities was unusually large and the blooms sent very excellent. The warm weather forced some plants and caused an over-abundance of flowers to come in at one time. Jonquils from the South put in their appearance in great numbers and they kept prices down somewhat.

Easter in Boston was generally satisfactory to the retailers, moderately satisfactory to the wholesalers and varyingly satisfactory or disappointing to the growers. We are not including the plant people in this statement; they were all satisfied, as usual—the only exception being some of the lily growers who, in their anxiety to get their crop on time, had hastened their plants with overheating to such an extent that the stuff went to pieces as soon as delivered and—"listen to my tale of woe." The net result of the Easter cut flower trade in the wholesale marts was a well-filled cash register, due to the local fakir trade, a lot of bulb stock, including lilies, left over and a conviction that, hereafter, the only way to make the most of the Easter demand is to let the people have their flowers at minimum prices. The hot weather and resultant heavy crops put all forecasts into "innocuous dessuetude." The markets were overburdened with an avalanche of flowers such as never before confronted the Easter buyer. There was nothing to do but to unload and, thanks to the street men, they did unload. Hive of bees let loose on a clover patch never equalled the onslaught of the street men when the situation was understood. A thousand hives of bees never compared with the swoop of the public on the street men as soon as they realized that they could have some Easter flowers at a price they could afford. Never before were flowers sold so cheap in Boston; never before were so many sold, and never before did the street shopper get such an opportunity to buy for Easter. It is worth thinking over—this 1910 Easter experience. The aftermath is a raft of protests about violets which fell to pieces after delivery; lilies which shrivelled brown on being transferred to the living room; azaleas that lasted but an hour. Violet growers do not "salt" their flowers—they merely leave them on the plants; keep them for weeks and then pick for Easter; and then complain because the people decide to buy something else. Tulips sold slowly; daffodils were far overstocked. White carnations sold best; Enchantress came next in favor; scarlet, once invincible, was left far in the rear. There was an overstock of Killarney, Bride and Bridesmaid roses. Beauty sold well. Gardenias and lily of the valley enjoyed only a moderate call, while orchids flew very high and there were not half enough of them. High quality sweet peas were at the head of the list. Stocks and mignonette were dead ones and anyone who wants to grow them should figure on Decoration Day, not Easter, as their objective point. This week nothing is selling. It's a dead proposition on all sides.

(Reports continued on page 527)

HIGHLY FINISHED TYING TAPES

This is the strongest, neatest and most economical tying tape we know, and should be used always where elegance and exclusiveness is desirable in tying flower boxes. Also very useful for tying mats and crepe paper around pots, etc. Price per spool of 1000 yards., \$1.75. Stock Colors: Foliage Green, Red, Light Blue, Violet, White.

Ribbons and Supplies.

Every florist using our ribbons feels that he has the latest and choicest the world affords, and that his work has that exclusiveness and individuality about it not obtainable in using inferior makes. We also have the finest line in florists' fancy pins and all kinds of supplies.

Send for Catalog.

Flower Market Reports

(Continued from page 527)

With the exception of NEW YORK violets and orchids this market was oversupplied with all kinds of cut flower stock for Easter. Warm weather, oncoming crops of roses, contributed to a condition that made it impossible to maintain prices to move all the material shipped in. The majority of shipments were of good quality—roses particularly. Beauties were not in heavy supply and the price realized on them was better proportionately than for other varieties. Richmond, however, sold very well and fairly good figures prevailed for prime stock. Considering the large quantity of Killarneys received they fared pretty good, though considerable stock was left over. Brides and Bridesmaids were far down on the list of sellers and with resultant low averages so far as prices are concerned. There were plenty of carnations and quotations never reached high figures, the results falling below a year ago. Much stock had little staying quality because of its mature condition. Orchids were not over-plentiful and were in demand, as were first quality gardenias and violets for corsage wear. There were all kinds and conditions of violets in the market; some were almost worthless and many were good. The latest shipments fared the best. The bulk of the stock went to the street people and small stores, though the larger dealers used more than usual. Bulbous stock was very plentiful and the demand for it was small. All of the cut lilies were not moved—many were left over. The best trade bought sparingly of cut flowers, those having preference with them being the flowers usually worn.

The retail establishments express satisfaction generally with the Easter results. As in all recent years, the plant trade ran far ahead of the cut flower section, especially in those stores frequented by select society patrons. It was noted, however, that even in these places plant buyers were looking for low-priced goods. All were disposed to send a remembrance so that their friends should know that neither they nor the day were forgotten, but the emulation of past seasons as to who should send the handsomest plants was not in evidence, and the man who could be depended upon to buy the big azalea on Saturday never showed up. Still the plant trade, in the aggregate, was enormous and anything good and of medium size generally found an eager purchaser. The worst feature of the plant situation was one that many feared. On account of the early Easter and the inclement weather of mid-winter, growers were

frantically anxious and pushed their plants to the limit of endurance, and it turned out that the condition of much of the plant stock at Easter was very unfavorable as to keeping quality, many Rambler roses, azaleas and other blooming plants going to pieces in a shocking manner and entailing losses on the dealer who was obliged to replace the goods in many cases.

The retail stores did not indulge heavily in cut flowers and only ordered as call materialized. While the demand for flowers, on the whole, showed an increase it was apparent that the increase was for church use and religious observance rather than for private gifts—and in the case of the latter the same disposition to economy and moderation as in the plant trade, was very noticeable. Some retailers are inclined to criticize the wholesale prices of cut flowers at Easter as unreasonable, but this complaint is not universal, by any means.

Easter week in PHILADELPHIA the cut flower market was fairly satisfactory as to volume, and the aggregate of receipts realized compared favorably with former years. Some growers were foolish enough to hold back their stock and late in the week prices suffered disastrously. This was especially so with carnations, and in the poorer grades of roses. Violets sold out clean, and more could have

been handled. Singles did not give good satisfaction—it being too near the end of the season. American Beauty roses improved as the week advanced—the new crop gradually getting better. In fact, the fine, warm, clear weather brought increased quantities of everything, and this with the "salting" caused the break in prices Friday and Saturday. Easter lilies had a great sale; but there were too many of them. A large remainder had to be carried over. Orchids were good stock right through and brought good money. Lily of the valley also cleaned up well, it being unusually popular. Bulbous stock also sold fairly well, as did gardenias. The plant market may be summed up in much the same way as the cut flower market. There was quite a break in prices towards the wind-up and large lots were thrown on the market at half price and less. The ideal weather made things very favorable for the street men. All in all, the aggregate returns in plants and cut flowers were probably larger than last year, notwithstanding the unsettled industrial conditions locally for some months past.

FOR SALE—Special 16 x 18 and 16 x 24 double thick glass in "A" and "B" qualities. Buy now and save money. Write **PARSHELSKY BROTHERS, INC.**, 59 Montrose Ave., Brooklyn, N. Y.

Cheap land for a bulb grower; set of basket material; ideal place for man wishing to retire. A. G. Cobb, Anna Maria, Fla.

Flower Market Reports.

(Continued from page 529)

Easter week, 1910, was **BUFFALO** one of the busiest in the history of the florist trade of Buffalo. The finest of weather prevailed, with the thermometer registering 50 to 65. Business practically began on Friday previous to Palm Sunday and continued until Easter Sunday noon. The plant trade was excellent and there was no shortage of anything except hydrangeas. The lily plant was the leader, and there were enough to fill all orders. Many azaleas, pans of tulips, daffodils, deutzia, Baby Rambler roses, rhododendrons, primulas and other plants too numerous to mention, were in bloom for the season. Primulas were had by the thousand, but managed to move with the rest. In the cut flower line there is much to be said. No scarcity prevailed in any line except on sweet peas, which were the heaviest in demand of any flower during the week. They were the finest yet received in this market and not enough could be secured. Carnations came in by the wagon-load and good quality considering the oncome of the warm weather, but high prices were out of the question. Some varieties suffered somewhat from the warm weather, and with not an order remaining unfilled, a good portion were left with the wholesaler to carry along. Violets were the corsage flower and the demand was heavier than in previous years. A good portion of those received on Friday showed signs of "held too long," and were of the shaky kind. An enormous supply of roses was had, especially White Killarney, and the warm weather brought them in in a much-opened condition. Pink roses were not so plentiful and sold to better advantage. Richmond was in demand, but short in supply. Lily of the valley shared well in the demand and cleaned up satisfactorily. Beauties had very little call and remained with the wholesaler. Cut lilies were in enormous supply and a large quantity still remains in the wholesalers' hands. Shipping trade was good, and all are rejoicing over the best Easter trade in our history.

The week following **CHICAGO** Easter opened up quietly. Few flowers comparatively were shipped in for Monday. As the market was pretty well cleaned up Sunday all sold readily, but Tuesday saw the ice boxes and counters rather too well supplied by the growers who had had time to get their stock in. The difference between well-grown flowers and poorly grown ones never shows up more decidedly than in the first warm days of the spring. There are quantities of all kinds of stock, but the stock that sells well is the stock that is right. Green stuff is not too plentiful and prices are holding up well. Southern Asparagus Sprengeri is coming in rather faster than it can be used in some cases.

Had you any trouble with the **MARCH WIND** coming through crack or crevice in the Greenhouse?

In 5, 10, 15, 20, 25 or 30 Gallons.

HAMMOND'S PAINT AND SLUG SHOT WORKS, Fishkill-on-Hudson, New York

A week of bright **CINCINNATI** summer weather brought immense quantities of flowers into the market for Easter, and it also played havoc with the violets. These with callas and lilies were the only flowers that were short in this market. Local outdoor daffodils made their appearance and indoor blooms suffered accordingly. The only varieties maintaining near a living price were the Golden Spur and Empress. All other bulbous stock was in good demand. There were enough roses and carnations for all orders. A good many Beauties and Killarneys came into the market half blown, and consequently sold for less than the quoted price. It looked as though sweet peas would be a drug on the market, one wholesaler alone having nearly 10,000 on hand at 5.30 Saturday evening, but owing to the scarcity of violets the public turned to sweet peas, which helped clean up on this flower. Closing time Easter Sunday noon found the wholesaler pretty well cleaned out, and reports from different sources show that the volume of business done for Easter was equal to that of last year.

Ideal spring weather prevailing for the last ten days helped very materially to increase sales for Easter to something like 30 per cent above last year's. Prices obtained were full value for goods offered and were willingly paid, but there was no opportunity to boost rates up to the fancy line. Notwithstanding an enormous out-of-town demand the wholesale market was overloaded. Some growers will persist in holding back too large a quantity of bulbous stock and the warm weather greatly increased the supply of carnations and roses. All these factors combined brought about a comparatively low wholesale price. All in all Easter was very satisfactory and

all the stores cleaned up well. Beautiful combinations in baskets could be seen, especially at Breitmeyer's, where fancy caladiums and Japan maples in baskets with Rambler roses, white lilac or wistaria were arranged with fine effect.

Easter business in **ST. LOUIS** was fully up to expectations of all in the trade, and the weather was most favorable to the buyers. From what we can learn, all did a much better business in everything than on any Easter for years. Extra fine blooming plants had the call over cut flowers and especially so with the uptown florists. With the downtown dealers cut flowers seemed to have the lead. Prices were good on everything. Our wholesalers had everything that the season affords. Lilies, the prevailing flowers for Easter, had a big call and everybody had plenty of them as the warm weather brought them out almost too quickly, while a few weeks ago every grower feared he would be late. Sweet peas sold better than ever. Violets were scarce and as usual had a large demand. All varieties in roses came in heavily, also carnations. Bulb stock, as usual at this time of the year, almost overloaded the market; still the market soon cleaned up on anything that looked good. If reports from those in the trade go for

The Home Correspondence School

Dept. H, Springfield, Mass.

anything, this Easter must go down in history as the best of all.

Despite the fact that Easter came as early this year as it can come, the weather was as warm as it generally is in May. There was an abundance of all kinds of greenhouse flowers except violets, which were almost entirely out of commission and what few were shown were very poor. There were quantities of outside jonquils, but they were of poor quality, and the long-stemmed house-grown flowers led in popular demand. There was a predominance of yellow this Easter, among the most attractive of the "yellows" being the hardy azaleas. They were of fine quality. The consensus of opinion seemed to be that the Easter lily crop was the scarcest in years, and the greater quantity of these shown were not up to the standard of quality of former years. Fruit blossom was much missed for cheap decorations. There was a big demand for white roses for altar decoration.

Stop the Caterpillars with Strokum; Bind It Around Your Trees

Do it now, don't wait until they have crawled up and spun their webs in the trees and hatched out by the thousands. It is easier to prevent their going up than it is to burn them out after they are up.

Don't wait until they are dropping down by their silken threads, to spin their cocoons for another crop—stop the progress of the first crop by banding your trees with Strokum now.

Anyone can put Strokum on, and once on, it remains effective through the entire season.

Caterpillars or tussock moths can't crawl under it, and won't crawl over it. Better than burlap, cotton or fly paper. Does not disfigure the tree. Does not dry up and stick to bark as do the smeared-on tar preparations. Strokum is entirely harmless. Endorsed by the leading horticulturists and tree experts.

Send \$3.00 at once for a sample package of 15 pounds, which is enough to band fifteen trees, 3 feet around. Delivered free anywhere East of the Mississippi, 50c. extra West of it.

PRATT'S SCALECIDE

Will positively destroy SAN JOSE SCALE and all soft bodied sucking insects without injury to the tree. Simple, more effective and cheaper than Lime Sulphur. Not an experiment. One gallon makes 16 to 20 gallons spray by simply adding water. Send for Booklet, "Orchard Insurance."

B. G. PRATT CO., 50 CHURCH ST., NEW YORK CITY.

The Mastin Automatic White-wash and Spraying Machine is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass.

The pump is of brass throughout, simple and powerful.

The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for fifteen minutes.

All parts are made to gauge, and may be had for repairs.

Just the thing for distributing liquid fertilizer in greenhouses.

Ask your dealer about our **EXTENSION HOSE, EXTENSION RODS, and the MASTIN WHITE-WASH NOZZLE** for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

Look At This Curved Eave

See what a fine piece of construction it is.

The roof bars are small, and the curved part is cut from the solid wood with metal backing extending to the sill.

The rafters are so narrow and neatly framed in that you scarcely notice them.

The glass is 24 inches wide. The sill and gutter are combined in one.

It has proven such a success that most of our private jobs are being built that way.

Send for our Special Curved Eave Circular.

F. W. KELSEY NURSERY COMPANY, 150 Broadway, NEW YORK

Anemone canadensis, syn. A. Pennsylvanica

Anemones or windflowers are with a few exceptions harbingers of spring. Those of us who have seen beautiful May days in Great Britain or the central part of the European continent, especially in Germany will vividly recollect the myriads of half-drooping blossoms of *Anemone nemorosa* abounding on field and meadow. Reminiscences of the vernal aspect of the woodland and forests abroad always revive within my memory the graceful picture of swaying masses of the snowy white flowers of *Anemone sylvestris* responding to a gentle breeze. Like the song of the lark, high up in midair and the jubilant warble of the wooing starling on the tree-top the European windflowers are part of the spring. From the view point of the florists I don't hesitate to say that they neither possess the showiness of the summer and fall-flowering Japanese varieties of our gardens, nor could they compare with the dazzling hues of the tuberous rooted *Anemone fulgens* of Greece and other parts along the Mediterranean sea coast. The chief attributes of the wild Anemones of the northern temperate zones consist in a certain modest appearance combined with that gracefulness in form invested both in their foliage and flowers which not only impresses but also endears. The same characteristics may be fittingly ascribed to our native North American wind-flower *Anemone canadensis*. I have never been fortunate enough to see it in a wild state growing in equal profusion as we often met the first mentioned European species abroad. In this case I imagine the total effect must be unquestionably more beautiful for in foliage and the free carriage of flowers *Anemone canadensis* is superior to both the *nemorosa* and *sylvestris* varieties.

Our native windflower perhaps merits some space on the informal herbaceous border. Furthermore it is the ideal thing to beautify the ground along the outskirts of woodlands. The illustration herewith shows what a small amount of cultivation is apt to make out of it. For the Northern States a sunny exposure seems best, still the instances are by no means rare where we can see

plantation do very well in a half-shady position. Around New York and farther south I believe the rather low and moist half-shady location may be preferable.

Anemone canadensis should be always planted in masses in a thoroughly natural way. The wild flower garden and especially the thinly wooded park sections offer excellent opportunities for effective employment. Plantations once established as a rule require a very moderate amount of care; in fact, it is better if they can be left undisturbed as much as possible. Our native wind-flower is in the habit of spreading out its roots under ground, rambling and covering more space each season. Foliage and flowers year after year aid in enhancing the vernal beauty of our natural wood and park landscapes to an extent as to justify my endeavor to arouse increased interest for this modest, but nevertheless handsome native flowering herb. Landscape gardeners and park superintendents should not lose sight of it.

Richard Rothe

Northeast Harbor, Maine.

British Horticulture

INTENSIVE CULTURE EXHIBITION

Dean Swift's eulogy on the man who makes two ears of corn "grow upon the spot of ground where only one grew before" can be fittingly bestowed on the new race of intensive cultivators in Britain who are marvelously increasing the fertility of "Mother Earth." The men (and women, too) who are getting from the land three crops where only one was obtained before deserve the highest praise. The new system is yet in its infancy in this country, but some tangible evidence of the progress which has already been achieved was afforded at a special show held by the Royal Horticultural Society on March 23rd. Many of the leading growers exhibited, furnishing a very useful object lesson of the adaptation of French methods to British requirements.

There was a time when France had practically a monopoly of the market for early salads and vegetables, which usually realized a satisfactory price, coming as they did when the supplies were not too plentiful. Some five years ago it occurred to Mr. McKay, an alert member of a Covent Garden firm of seedsmen, that a considerable portion of this trade might be diverted to English growers. A voyage of discovery was organized amongst the Evesham growers, who from an inspection of the gardens around Paris were convinced that the French system of hot-beds and cloches might be profitably transferred to English soil. The new industry has since been established in various parts of the country. In order to demonstrate what can be done under this system the Royal Botanic Society has undertaken to conduct a series of trials during the summer at their gardens in Regent's Park.

"Befuddling nature"

Sensation, for the time being, switches from waning Burbank to a new luminary in the wizard firmament and now we have the newspapers from the Pacific to the Atlantic lauding the reputed wondrous accomplishment in "cross-grafting" by Hugo Lilienthal who claims to have thus given to the world the inestimable treasure of a climbing rose bearing edible fruit. Mr. Lilienthal, it should be said, hails from Burbankland where, as the Boston Advertiser naively remarks, "horticulturists are habitually dissatisfied with nature and seek to befuddle her!" Imagination fails us as we hold our breath and wait for the news of the next surprise from that land of marvels.

To develop a bigger market

The canning industry of the United States, in annual meeting assembled, at Atlantic City, a few weeks ago, assessed themselves for newspaper advertising at the rate of one cent per case of output, which will net their Association the sum of about a quarter million dollars to be used for purposes of publicity in the year 1910. Instead of lamenting about their business being overdone and advising one another against the folly of putting up more factories they get to work in a practical way at the other end to enlarge their market. There is a lesson in this for the horticulturist. We hear florists bewailing the overdoing of greenhouse building and nurserymen gravely recommending the burning up of the surplus stock as preferable to unloading at cut prices. Why not try the canners' remedy when congestion threatens? Two hundred and fifty thousand dollars is, of course, away beyond the possibilities for the florist, but if the cohesion and co-operative spirit so much to be desired existed among the trade which the S. A. F. represents, a start on the work of broadening and developing a bigger market and building up a steadier demand for our products could be made and we believe the results would fully justify the investment.

A radical proposition

The most significant act of the S. A. F. Executive Board at its annual session, as indicated in the report of its deliberations by Secretary Dorner in our last week's issue, is the approval of a proposition to decide the date of each annual convention of the S. A. F. by vote of the Society at the previous meeting. This movement contemplating, as it would appear, the practical abandonment of the time-honored annual mid-August convention, is all the more surprising when we consider the strength of the older and presumably more conservative element in the personnel of the present Executive Board. It would be interesting to learn something of the reasons which influenced the Board to favor a departure so radical. A very large section of the Society's membership will be, we believe, like the man from Missouri when it comes to deciding a proposition so revolutionary in character. In any event the purpose

of this amendment should be clearly indicated by those who have favored the contemplated innovation. As it stands now its purport is somewhat obscure and is liable to be misunderstood.

**A remarkable
season**

With forsythias, magnolias, *Lonicera fragrantissima*, *Rhododendron Dahuricum*, daffodils and hyacinths in full bloom, scillas, *chionodoxas*, crocuses

and *Daphne mezereum* already finished and lilacs showing their flower-spikes April 7, Boston in common with the rest of the country is certainly going through an experience the equal of which the oldest inhabitant cannot recall and the youngest inhabitant is not likely to see duplicated before the time when he, in turn, shall have become the oldest inhabitant. Nobody can say what havoc the weather man or the Halley comet may have in store for us but it is frightful to think of the possibilities in destruction of fruit and verdure should things turn, as they are apt to do in a precocious spring, and make a normal average temperature for the season; but we shall live in hope and it can be said that outside of the breaking by the great ice storm in early winter, garden material generally has come through the winter practically unscathed. Not in many years have broad-leaved evergreens especially, looked so well as they do this spring.

Trans-Atlantic Notes

A HYBRID REHMANNIA BRISCOEI

At a meeting of the Scientific Committee of the Royal Horticultural Society on March 18, H. J. Veitch showed a hybrid between *Rehmannia angulata* female and *R. Henryi* male, and the parents were also shown. The hybrid showed in the chief points that it was intermediate between the two species, the growth being dwarfer than that of *R. angulata*, and in having an erect inflorescence instead of condensed, as in that of the pollen parent.

The blooms are in tint a soft pink. The leaves form a rosette and resemble those of *R. Henryi* in having dark colored veins, but they are more hairy than *R. angulata*. A botanical certificate was unanimously recommended.

NOVELTIES EXHIBITED

At the meeting of the Royal Horticultural Society on March 22 the hall was crowded with exhibits among them many very brilliant displays. The visitors were very numerous also and included many purchasers—and perhaps that is the main thing thought of nowa-

days, for a large amount of trade is done by the keener dealers. It is, in fact, a bazaar, pure and simple. An award of merit was given to Sir Trevor Lawrence for *Lælio-cattleya Trimyra*, an orange colored flower, deeper orange in throat. Sir J. Colman received an award of merit for a plant of *Odontoglossum Thompsonianum* Gatton Park Hybrid (*O. Edwardii* × *O. crispum* Mary Colman), flowers white with a tint of purple and edging of white. A similar award was given to F. Sander & Sons for *Houlettia Sanderi*. Sir T. Lawrence showed a good decorative stove plant in *Calathea crocata*, a low growing species having orange-scarlet flowers arranged on spikes slightly taller than the leaves. From the same exhibitor came a showy *Anthurium conchiflorum* (*A. Scherzerianum* × *A. Chamberlainii*). The spathe is almost circular, and cupped, hence its varietal name. Messrs. Barr & Sons were large exhibitors of narcissus, his greatest novelties being *N. incomparabilis* Fire Dome which has a striking red or orange corona one inch in diameter and sulphur colored perianth. *Seraphin*, another novelty, has a lemon yellow corona 1½ inch in breadth, and 3 inches in depth, and perianth white; a noble flower. *N. incomparabilis* Argent shows on the corona a kind of collection of perianth segments with its divisions. Lack of space forbids mention in detail of other fine exhibits.

Fredrick Moore

Primula Reinii

The pretty little primula shown in the accompanying illustration is a native of Japan, where it grows in Mt. Fuji and is said to be perfectly hardy. The flowers are pale pink in color. We are indebted to the Yokohama Nursery Co. for the photograph.

Preserve and file your weekly copies of HORTICULTURE. The contents are always selected with attention to their permanent value. They will be found useful for reference, tomorrow, a year from now or still later.

MASSACHUSETTS HORTICULTURAL SOCIETY

Schedule of the Exhibition of Orchids and Other Plants to Be Held May 26, 27, 28, 29, and 30, 1910

HORTICULTURAL HALL, BOSTON, MASS.
Where Exhibition will be Held.

Intending Exhibitors must file their entries with the Secretary of the Society not later than April 30, 1910.

No. 1.—Display of Orchid plants in bloom, arranged for effect, embracing at least 20 Orchid genera and bi-generic hybrids, and unlimited as to number of species, varieties and hybrids, to fill 400 square feet of space.

In the arrangement stove and greenhouse foliage plants may be used, and the general effect produced (with or without such plants) will be considered by the judges in making awards as per the following scale of points:

Variety of Orchids.....	30 points
Quality	35 "
Arrangement and Decorative Effect	25 "
Novelty of Orchids.....	10 "

Cut blooms of rare sorts not exceeding in number five per cent. of the total number of varieties of Orchid plants in the exhibit will be admissible.

First Prize, Gold Medal and \$1,000.

Second Prize, Silver Medal and \$500.

Third Prize, Bronze Medal and \$250.

No. 2.—Display of Orchid plants in bloom, arranged for effect, embracing at least 10 Orchid genera and bi-generic hybrids, and unlimited as to number of species, varieties and hybrids, to fill 150 square feet of space.

In the arrangement stove and greenhouse foliage plants may be used, and the general effect produced (with or without such plants) will be considered by the judges in making awards as per following scale of points:

Variety of Orchids.....	30 points
Quality	35 "
Arrangement and Decorative Effect	25 "
Novelty of Orchids.....	10 "

Cut blooms of rare sorts not exceeding in number five per cent. of the total number of varieties of Orchid plants in the exhibit will be admissible.

Commercial growers excluded from competition.

First Prize, Gold Medal and \$200.

Second Prize, Silver Medal and \$100.

Third Prize, Bronze Medal and \$50.

No. 3.—Best recently introduced Orchid plant not previously exhibited in the United States. Gold Medal.

No. 4.—Best new seedling Orchid plant not previously exhibited in the United States. Gold Medal.

Note.—The same specimens cannot be entered in both Classes 3 and 4. Class 3 is intended for Orchids introduced from their native habitats.

No. 5.—Largest and best display of cut Orchid blooms arranged with ferns or other foliage. Variety and decorative effect will be considered.

First Prize, Gold Medal and \$100.

Second Prize, Silver Medal and \$50.

Third Prize, Bronze Medal and \$25.

No. 6.—Best collection of cut Orchids of new varieties not before exhibited in the United States. Gold Medal.

Ferns or other foliage may be used in the arrangement.

No. 7.—Group of flowering and foliage stove or greenhouse plants arranged for effect.

First Prize, Gold Medal and \$100.

Second Prize, Silver Medal and \$50.

No. 8.—Best species of stove or greenhouse plant in bloom, not previously exhibited in the United States. Gold Medal.

No. 9.—Best species of stove or greenhouse foliage plant, exclusive of ferns, not previously exhibited in the United States. Gold Medal.

No. 10.—Best species of coniferous plant, not yet disseminated, likely to be hardy in Massachusetts. Gold Medal.

No. 11.—Best species of shrub or climber in bloom, likely to be hardy in Massachusetts, not previously exhibited in the United States. Gold Medal.

No. 12.—Best species of hardy herbaceous plant in bloom, likely to be hardy in Massachusetts, not previously exhibited in the United States. Gold Medal.

ORCHID PLANTS.

No. 13.—Group of botanical Orchids, not less than 25 plants and 15 genera.

First Prize, Silver Medal and \$25.

Second Prize, Bronze Medal and \$15.

No. 14.—Six Orchid plants, distinct genera.

First Prize, Silver Medal and \$50.

Second Prize, Bronze Medal and \$25.

No. 15.—Three Orchid plants, distinct genera.

First Prize, Silver Medal and \$25.

Second Prize, Bronze Medal and \$15.

No. 16.—Three Cattleyas, distinct species.

First Prize, Silver Medal and \$25.

Second Prize, Bronze Medal and \$15.

No. 17.—Specimen Cattleya, any species.

First Prize, Silver Medal.

Second Prize, Bronze Medal.

No. 18.—Specimen Cymbidium.

First Prize, Silver Medal.

Second Prize, Bronze Medal.

No. 19.—Three Cypripediums, distinct species.

First Prize, Silver Medal and \$15.

Second Prize, Bronze Medal and \$10.

No. 20.—Specimen Cypripedium.

First Prize, Silver Medal.

Second Prize, Bronze Medal.

No. 21.—Specimen Dendrobium.

First Prize, Silver Medal.

Second Prize, Bronze Medal.

No. 22.—Three Laelias, distinct species.

First Prize, Silver Medal and \$25.

Second Prize, Bronze Medal and \$15.

No. 23.—Specimen Laelia, any species.

First Prize, Silver Medal.

Second Prize, Bronze Medal.

No. 24.—Three Laelio-cattleyas, or Brasso-cattleyas, distinct.

First Prize, Silver Medal and \$25.

Second Prize, Bronze Medal and \$15.

No. 25.—Six Miltonias.

First Prize, Silver Medal and \$25.

Second Prize, Bronze Medal and \$15.

News of the Clubs and Societies

No. 26.—Specimen *Miltonia*.
First Prize, Silver Medal.
Second Prize, Bronze Medal.
No. 27.—Six *Odontoglossums*, not less than three species.
First Prize, Silver Medal and \$25.
Second Prize, Bronze Medal and \$15.
No. 28.—Specimen *Odontoglossum*
First Prize, Silver Medal
Second Prize, Bronze Medal.
No. 29.—Specimen *Oncidium*.
First Prize, Silver Medal.
Second Prize, Bronze Medal.
No. 30.—Specimen *Saccolabium* or *Aerides*.

First Prize, Silver Medal.
Second Prize, Bronze Medal.
No. 31.—Specimen *Sobralia*.
First Prize, Silver Medal.
Second Prize, Bronze Medal.
No. 32.—Specimen *Vanda*.
First Prize, Silver Medal.
Second Prize, Bronze Medal.
No. 33.—Three Orchids, bi-generic hybrids other than *Laelio-cattleya* or *Brasso-cattleya*.

First Prize, Silver Medal and \$25.
Second Prize, Bronze Medal and \$15.
No. 34.—Specimen Orchid, bi-generic hybrid other than *Laelio-cattleya* or *Brasso-cattleya*.

First Prize, Silver Medal.
Second Prize, Bronze Medal.
No. 35.—Three Orchids, distinct genera, not otherwise provided for in the schedule.

First Prize, Silver Medal and \$25.
Second Prize, Bronze Medal and \$15.
No. 36.—Specimen Orchid, any genus not otherwise provided for in the schedule.

First Prize, Silver Medal.
Second Prize, Bronze Medal.
Best specimen Orchid plant in the exhibition, Gold Medal.

A NOTABLE EXHIBITION NEXT FALL.

The preliminary schedule of the 15th Annual Flower Show of the Morris County Gardeners' and Florists' Society, in conjunction with the Chrysanthemum Society of America, to be held at Morristown, N. J., next November, has been received. The premiums amount to \$2,500 already and there are more to come. Chrysanthemum blooms, chrysanthemum plants and groups, roses, carnations, violets, decorative plants, orchids, hothouse grapes and vegetables are all liberally provided for. There is a grand array of special prizes and a sweepstake prize cup, value \$50. Copies of this preliminary schedule can be had for the asking. Send to the Secretary, Edward Reagan, Box 334, Morristown, N. J.

THE BRUSSELS EXHIBITION.

We have received from the office of the Director of this great exhibition which opens next week a communication stating that the entries are so numerous that they will tax the available space and it is possible that some of the latest arrivals may be turned away for lack of room. All indications point to a most successful and altogether remarkable show. On any matter connected with the exhibition and management address Monsieur le Commissaire General du Gouvernement (Concours horticoles) 12 Rue de Berlaumont, Bruxelles.

CHRYSANTHEMUM SOCIETY OF AMERICA.

The following special prizes are offered for the exhibition of the Chrysanthemum Society of America, to be held at Morristown, N. J., in conjunction with the Morris County Gardeners' and Florists' Society, November 2, 3 and 4, 1910:

Class A.—Chrysanthemum Society of America. Special silver cup for the best 10 blooms, one variety.

Class B.—Wells & Co. Specials. 1st, gold medal; 2nd, silver medal; 3rd, silver gilt medal for six blooms of Chrysanthemum Howard Gould.

Class B.b. 1st, gold medal; 2nd, silver medal; 3rd, silver gilt medal for three vases of single Chrysanthemums in three varieties, six sprays of each variety. Offered by W. Wells & Co., Merstham, England.

Class C.—Lord & Burnham Co. Special. Gold medal for the best thirty blooms in six varieties, introductions 1909 and 1910. Open to private gardeners only. Offered by Lord & Burnham Co., Irvington-on-Hudson, N. Y.

Class D.—Hitchings & Co. Annual Special. Silver cup, value \$25.00, for the best six vases, six varieties, five blooms in each vase. Open to all. Offered by Hitchings & Co., New York.

Class E.—J. C. Vaughan Special. Silver cup for the best specimen Chrysanthemum plant, any variety. Open to private gardeners only. Offered by Vaughan's Seed Store, Chicago and New York.

Class F.—Peter Henderson & Co. Special. 1st, \$10.00; 2nd, \$5.00; for six vases of Ostrich Plume Chrysanthemum, six varieties, three blooms to a vase. Offered by Peter Henderson & Co., New York.

Class G.—Chas. H. Totty Special. Silver cup, value \$50.00, for the best twelve blooms of R. F. Felton. Offered by C. H. Totty, Madison, New Jersey.

Class H.—Elmer D. Smith & Co. Special. \$25.00 for the best six blooms of Rande. Offered by Elmer D. Smith & Co., Adrian, Mich.

Class I.—Wm. Duckham Special. 1st, \$10.00; 2nd, \$5.00; for six blooms of Onunda. Offered by Wm. Duckham, Madison, N. J.

Class J.—A. C. Zvolanek Special. \$10.00 for the best three varieties, three blooms to a stem, any Chrysanthemum. Offered by Anton C. Zvolanek, Bound Brook, N. J.

The secretary will be pleased to add to this list any other specials from firms or individuals willing to contribute a prize.

President Elmer D. Smith has appointed E. G. Hill, of Richmond, Ind., chairman of the executive committee of the Chrysanthemum Society of America.

C. W. JOHNSON, Sec'y.

SPRINGFIELD (O.) FLORISTS' CLUB.

At the March meeting of the Springfield Florists' Club, reports were received from the special committee on the fall flower show, which had been appointed at the previous meeting. The meeting voted unanimously in favor of a show to be held some time in November, 1910. Practically all of the leading floral concerns of the city have pledged their support and promised to make some kind of an exhibit. A list of premiums is in course of preparation and competition may be opened to local amateurs and to out-of-town florists.

An executive committee was appointed to have charge of the show, consisting of Roger Murphy, president ex-officio; C. L. Reese and C. P. Bethard for the local retailers, and John M. Good and George D. Leedle for the wholesale growers.

AMERICAN ASSOCIATION OF NURSERYMEN.

The thirty-fifth annual convention of this organization will be held June 8, 9 and 10, 1910, at the Brown Palace Hotel, Denver, Colo. Secretary John Hall writes:

"Who has not heard of Denver! One of the most beautifully situated cities of the West! Its streets are wide and shady—thanks to the nurseryman; and its residences and public buildings are stately, handsome and attractive. Denver has been appropriately called 'The Queen City of the Plains.' It commands a magnificent view of mountain scenery, including Pike's, Long's and other noted peaks perpetually covered with snow. Just the place for the nurseryman, worn out with his winter's campaign and spring delivery, and the more exasperating chase after his delivery returns. Take a rest; take your wife or mother or daughter and get into a climate that is peculiarly serene and healthful."

"The Entertainment Committee has been 'on the job,' and Brother F. A. Weber and his associates have already arranged a delightful series of events for the ladies and for 'us,' the most notable of which (subject to action of the Program Committee) will be a sight-seeing trip over the marvellous Moffat Route to Corona—said to be the finest scenic route out of Denver, and one of the greatest pieces of civil engineering in the world. The trip will be a complimentary one to members and their ladies."

"We have been unable to secure reduced rates from the Passenger Associations, but have received a letter from the chairman of the Western Passenger Association, saying:

"On behalf of the individual lines interested would respectfully refer you to the Summer Tourist fares that will be in effect to Denver, Colorado Springs and Pueblo this year, which will be available for your convention."

"The Summer Tourist fares referred to are on the basis of \$30.00 from Chicago, \$26.75 from Peoria, \$25.00 from St. Louis, \$17.50 from Missouri River points and proportionate fares will be in effect from intermediate points. Tickets will be on sale daily from June 1st to September 30th, inclusive, with return limit of October 31, 1910."

"Whilst we have regretted our inability to secure the reduced rates, yet we think, in the long run, that members will be better pleased with the Summer Tourist rates, because they will not be under the necessity of cutting their visit to Denver short for the sake of the reduction they might have expected to get under the certificate plan. The Rochester nurserymen are getting up a special car load for Denver."

The Exhibits.

For information under this head application should be made without delay to Mr. E. P. Bernardin, Parsons, Kan., Chairman of Committee on Exhibits. Intending exhibitors should write him now.

Program.

J. W. Hill, Chairman of Committee on Program, announces that the following gentlemen will appear on the program:

E. S. Osborne, Rochester, N. Y.; Jas. M. Irvine, St. Joseph, Mo.; Professor C. P. Gillette, Fort Collins, Colo.; Professor W. L. Howard, Columbia, Mo.; Vice-President E. A. Smith, Lake City, Minn.; W. N. Scarff, New Carlisle, O.; A. Willis, Ottawa, Kan.; Professor John Craig, Ithaca, N. Y.; A. B. Morey, Dansville, N. Y.; C. S. Harrison, York, Neb.; E. W. Kirkpatrick, McKinney, Texas; W. H. Stark, Louisiana, Mo.; H. W. Marshall, Arlington, Neb.; Geo. H. Whiting, Yankton, So. Dak.; J. R. Mayhew, Waxahachie, Texas; Professor E. P. Taylor, Columbia, Mo.; Peter

Youngers, Geneva, Neb.; E. M. Sherman, Charles City, Iowa.

The secretary's address is John Hall, 204 Granite Bldg., Rochester, N. Y.

ELBERON HORTICULTURAL SOCIETY.

At the Elberon Horticultural Society meeting on the 4th of April, R. R. Hughes read a paper on landscape gardening which was very interesting and opened up a large field for discussion. Mr. Hughes talked for some time on the best trees and shrubs to grow along the coast and also the best grass seed mixture to use. The awards for competitive exhibits were as follows: Wm. Seymour, 92 for Callas; D. Kelley, 90 for cauliflower; P. Murry, 85 for gardenias; P. Ewen, 85 for dracaenas; C. Duncan, 75 for roses; A. Bauer, 70 for tulips.

ALEX. FLEMING, Rec. Sec.

CLUB AND SOCIETY NOTES.

The annual banquet of the Lenox Horticultural Society took place on March 30, at the Curtis Hotel and was a great success. The floral and electrical decorations were very fine. Allen Jenkins served as toastmaster.

W. H. Elliott, president-elect of the American Rose Society, who was not present at the meeting which elected him, has written to Secretary Hammond accepting the honor and promising his best efforts towards the success of the society.

The best wishes of the members of the Morris County Gardeners' and Florists' Society are extended to Arthur Herrington on the assumption of his new landscape gardening business. Mr. Herrington was one of the main workers in organizing the Morris County Gardeners' and Florists' Society, was its first president and is still one of its most active members. No one knows what to plant and how to plant it for results better than he. His training abroad and his experience here stand him well in hand now.

INCORPORATED.

Hamilton, Montana.—Bitter Root Valley Nursery Co., capital stock \$200,000. T. H. Hanbridge, S. P. Kerr and G. I. Watters, directors.

San Francisco, Cal.—California Ladies' Flower & Plant Co., capital stock \$75,000. The company is to be managed entirely by women.

Oroville, Wash.—East Oroville Orchard Co., incorporated, capital stock \$40,000. A. P. Murray, L. L. Work and C. S. Barns, incorporators.

Hoboken, N. J.—Henry Nungesser & Co., capital \$50,000. Incorporators Henry Nungesser and Geo. S. Mitten-dorf of New York and Wm. A. Proescholdt of South Orange, N. J.

Nashville, Tenn.—Tennessee Pecan Co., nursery, capital \$50,000. Incorporators, H. G. Baker, Masterson & Peyton, John D. Benedict, J. Sam Morton, T. J. Collins, J. R. Young, W. W. Baird and A. R. Doddson.

New York, N. Y.—A corporation to deal in flowers, seeds, etc., under the name of "Buds," capital stock \$5,000. Incorporators, Carl R. Gloeckner of Jersey City, N. J., Wm. F. O'Connor and Wm. H. Siebrecht, Jr., of New York.

MAKING SKYLINE.

In the formal herbaceous and rose-garden at Riverside Farm, the estate of Mr. Edward Porter May, in Framingham, Mass., the east and south boundary lines are left open to air and sunshine, while the north and west winds and cold draughts are excluded by a high spruce hedge and the greenhouses, those making a distinct contrast between the two sides of the rectangle.

Now we know by the pictures of famous Italian gardens, and by what we have been told and seen of other formal gardens, that these are mostly on terraces, elevations, mountain slopes, seashores, lake sides, etc., in short somewhere where you can get a view of the surrounding country or water scenery. Gardens at the base line of some monumental building or at the base of some monument we will have to except, because in such the garden is mainly laid out to view those architectural objects. But taking it for granted that in general a formal garden to look its best, in fact to completely justify its existence as a formal garden, must be a sort of a platform from which to look at a larger part of beautiful natural scenery, it becomes of course necessary to leave these sides or parts towards this scenery open.

The views of natural woodland and rural scenery extending toward the east and south in the above described garden, save for a low privet hedge, were left open. Yet it became obvious that the high spruce hedge, thirty feet on the west side, and the long glass roofs of the greenhouses on the other side, were throwing the garden in some way out of balance. To counteract this it became therefore necessary to lighten the skyline of the low privet hedge in various places. How this was accomplished without spoiling the airy, sunny outlook toward the southern and eastern fields and groves on the shores of the Framingham reservoirs of the Metropolitan system, the accompanying pictures illustrate.

Picture No. 1 shows two pear trees

left from an old orchard breaking the skyline on the northeastern corner close to the greenhouses.

Picture No. 2 shows an opening in the middle of the east side hedge, leading through an adjoining raspberry field toward a grape arbor and beyond into farm lands. In this view you see also in the background a part of the woodland scenery along the eastern horizon. The arch is made of cedar posts. The little tree to the left is a cornus and the vines over the arch are *Cobea scandens*. Permanent vines like wistarias, honeysuckles, clematis, etc., have been planted by these posts,

as well as by the other posts shown in these pictures, but *Cobea scandens*

were used along with them for immediate covering.

In the picture No. 3, we come to the south side privet hedge. This was taken in the late autumn after the cobears had been pulled down. It shows how this south side was left comparatively open and unobstructed and yet has in this summer-house a definite ending of the formal garden. Two pear trees were left standing

when the garden was made, breaking the sharp horizontal line of the hedge but not enough to shut out any view. This same principle may be applied to the summer-house, and there is really no impression of any obstruction although it has a comparatively large roof.

The roof of the summer-house is made of rattan matting such as used for hot-bed covering. It is about 1½ to 2 inches thick. The first layer of matting was put over smooth, the second layer with 16-inch lapping. Between the two layers Rubberoid paper was placed, thus making a rain-proof thatch looking like old country straw thatching. The overhang on the beams is about 10 inches.

GERHARD BLEICKEN.

ANOTHER APHINE DEMONSTRATION.

An Aphine demonstration under the auspices of the Nassau County Horticultural Society will be held on the date of the society's next meeting, Wednesday, April 13th, at Pembroke Hall, Glen Cove, Long Island, between the hours of 3 and 6 o'clock. Mr. Ebel is anxious to have the gardeners and growers submit a goodly collection of insect infected plants, so that he can prove decisively that Aphine will do all that is claimed for it.

The company last month reported the largest business in its history, and the merits of Aphine seem to have been discovered both on the Pacific Coast and in the South, from both of which sections large orders are being received.

SEASONABLE NOTES ON CULTURE OF FLORISTS' STOCK.

Dendrobiums.

This genus includes many very handsome species as well as some of the most useful orchids for the florist to grow for the cut flower trade. At this season of the year and after a long period of rest many fine species should be bursting into bloom, while others that have finished flowering will be starting their new season's growth. When they have finished blooming is the best time to repot and top-dress. A good compost is made of equal parts of fibrous peat and live sphagnum, with some broken charcoal mixed among it. Be sure that they have plenty of drainage. They can be grown in either baskets or pots. I prefer baskets for the pendulous varieties, such as *Devonianum*, *lituiflorum*, *Pierardii*, *superbum*, *chrysanthum*, *Wardianum*, and kindred sorts. They will require more frequent syringing than those grown in pots, but you will find them less subject to attacks from slugs and wood lice when grown in this manner. Cold water is highly injurious. The water for syringing and dipping should be warmed to the same temperature as the house. When in flower if hung in a cooler and shaded house they will last a much longer time.

Ericas.

Now is the time to start in order to have well-balanced plants for next year. Those that are unsold and past their bloom should be cut in just enough to give them a good shape. Ericas that are perfectly healthy can go into a pot one size larger, while doubtful specimens that look sickly will be improved and frequently restored to vigor by repotting into a pot of the same size as the one previously occupied. The ball of earth in such a case should be loosened with a piece of pointed wood, and the outer soil shaken off. Should the inner part of the ball be dry, which is very often found to be the case, they should be dipped for some time into a tub before repotting. The soil for potting should be a fibrous peat and some good loam with about one-third of silver sand. All heaths like plenty of drainage. They will stand nothing like a sodden soil. In potting care should be taken to set them rather a little too high than too deep. Be sure that the soil is well firmed around their roots. Frequent syringing is essential, but in watering great care must be taken not to overdo it. At the same time the plants must never be allowed to become dry. When put out of doors in the summer the pots should be sunk to their rims into some loose material such as hay or leaves—anything that will allow the air to pass through. They prefer a place that is benefited by the shifting shade of some large trees during the hottest hours of the day. Some of the best ericas for the florists are *regerminans*, *persoluta*, *caffra*, and *gracilis*.

Palm Seed.

It is a good plan where you have the room to spare to sow some palm seed every year so as to have them in any size needed. All our leading palms grow quite easily from seed. Leaf-mold, sand and loam in equal parts

A FIELD OF BODDINGTON "QUALITY" TRUE HARRISII, BERMUDA.

make a good mixture for any variety. The seeds can be sown in a bench, flats or pans where they can have a bottom heat of 75 to 80 degrees. As the hot weather comes on a mild hot-bed makes an ideal place. During the summer they may not need watering oftener than once a week. A light shade on the glass will save them from drying out too much. Palm seed germinates very irregularly. While some will come in two months' time, there are many others that will not show for many months, and for that reason I prefer flats or pans to sow in. When they show one or two leaves, pot off singly into 2-inch or 2½-inch pots. They should be kept close and warm until they have started. They will grow slowly the first year, but after that it is astonishing how soon they grow into salable plants.

Pansies.

When your violets give out, especially the single ones, they can be replaced by pansies that have been grown in flats. Just lift the plants from out of the flats with sufficient soil attached to insure their taking hold. A few weeks will suffice to put them in fine condition for spring sales. As the pansy thrives best in a low temperature and only needs a bare protection from frost, so at all times now keep the air pure by ventilation on all possible opportunities. They can be made up in pans or pots of eight or ten plants, and placed somewhere in view of passersby. They are a favorite with most people.

Planting Out Carnations.

Preparation for planting out carnations should be started as soon as the ground is in condition and danger of frost is over. As to the time for beginning to plant out, that will depend on your climate. Caution should be used against planting too early. While a slight frost may do no damage, if the plants are in good condition I don't think it does them any good. How far apart to plant will depend largely on

how much ground you have to spare and how you wish to cultivate them. Those who have plenty of land and intend to cultivate with a horse must have their rows 2½ to 3 feet apart. There are several ways of planting, and each has its advocates. I like to plant in rows 15 inches apart and 12 inches in the row. This will allow you to use a Planet Junior cultivator both ways, but be sure the rows are straight both ways. An acre planted this way will hold 34,848 plants. See that the plants are clear of insects before planting. Pests such as red spider or aphids are harder to fight in the field than in the house. See that the plants are kept moist at the root during planting. Don't lay out too many ahead of the planters, as they will dry out very rapidly while exposed to the sun and air.

Ramblers for Next Easter.

Those intended for next Easter should be one year old now. They can be potted into 6-inch pots at once, and cut back quite hard. Give them the coolest house you have and grow them under glass until August. Leave five or six strong canes; all other growth should be rubbed off. Set them outside in July and in about a month withhold water so as to ripen up the wood. Careful attention to details with regard to ventilating and fumigating is necessary during their growth in order to avoid mildew or green fly, or anything that is liable to give them a check.

JOHN J. M. FARRELL.

Mr. Farrell's next notes will be on *Antirrhinums*, *Cosmos*, *Cyclamens*, *Gladstoll*, *Lilies* for Decoration Day, *Lily of the Valley*.

Elizabeth, N. J.—Police officers were called upon last week to preserve order among a lot of Sicilians, employees of the Hiram T. Jones nurseries who were on strike and were disposed to maul some of their fellows who had declined to join the strike.

"PROFANING THE ROSE."

A horticulturist of California, where horticulturists are habitually dissatisfied with nature and seek to befuddle her, has so confused the rose bush that it has dropped to the unaesthetic level of the pea vine and the muskmelon. A climbing rose at Berkeley has produced an edible fruit, simulating the flavor of the pine apple, allied to the loganberry which it will in course of time, we are told, supplant. We assume that this fruit is as free from thorns as the modern, familiar kitchen brand of codfish is free from bones, and perhaps more so. We assume that it is not a prey to the homely and determined rosebug. We assume that its similarity to the pineapple does not extend to its oppressive taxation of the human digestion.

Such inventions (or perversions) as this, however, we cannot welcome as blessings. In an age of utilitarianism, when the cold and unfeeling motor car has encroached on the field of the poetic though hungry horse, and when the linen ruffle has in some instances given way to the celluloid collar, each additional assault on the temple of unalloyed and useless loveliness must be met with caution and even opposition. The things of life which are yet allowed to remain merely ornamental are already too few. They include the violet, the rubber plant, the angora cat, the canary, the democratic party and Halley's comet. In time these things, and others, will be taken from us. The rubber plant will produce erasers, the violet will bear berries, comets will run mills and the democratic party will produce statesmen. The age of beauty follows swiftly after the age of chivalry into oblivion, and unrelieved utilitarianism crowds in, like a man beating seven women to the only seat in the street car.

Who wants to pick loganberries or imitation pineapples from a climbing rose bush? Does the useful though woody pineapple seek to bloom in rose-like gorgeousness? These triflings with fine-garbed nature are menacing the little altruism left in sunshine and showers. It is enough that sweet corn

has come from a weed, and that we neglect the white flowers to dig the roots from under the potato; enough that we have fallen upon and eaten the ornamental love apple of our grandmother's day; enough that the flowering bean and the sweet pea are less esteemed than the marrow-fat and the cranberry, lima, string and kidney; enough that we cast aside the yellow, sun-like blossom to pickle and preserve the hard root of the Jerusalem artichoke; enough that we brutally beat and eat the dried remains of the fragrant flowering buckwheat. Let the rose, at least, be free from this taint of the less refined appetite.

It is well enough to pervert the unkempt cactus to food-and-drink uses, or to take liberties with the soulless prune, or to issue an official cook book filled with poisonous directions how to make the masses of round steak believe they are the classes of porterhouse. Leave the rose to bloom in innocence and inedible distinction. Let the moss rose gather no moss, let the tea rose remain cheering and not inebriating, and let the ramblers ramble, care free and useless.—*Boston Advertiser.*

PERSONAL.

George Golsner of College Point, N. Y., will start on a European visit about June 1.

John Miesem and wife, of Elmhurst, N. Y., are booked for a European trip, June 1st.

Robert Armstrong is now head gardener for the Realty Syndicate, Oakland, Calif.

A. N. Pierson of Middletown, Conn., sailed for Europe on April 4 for a vacation of two months.

David Miller, formerly of West Roxbury, Mass., has accepted a position as gardener to H. C. Pierce, St. Louis, Mo.

Joseph Proval, a florist of Brooklyn, was to have sailed for Europe last week but the trip is indefinitely postponed owing to the visit of a burglar

who entered Mr. Proval's home on Clarkson street and made off with \$1000 in cash.

N. D. Gachor, for 28 years proprietor of the Broad St. Station, Philadelphia, Flower Stand, retired from business March 31st.

Mr. Brice, formerly for eight years florist at the University of Illinois, has taken a position with Adden, Morgan Co. in Paxton, Ill.

Louis Hayet is now head gardener at Waller's Gate, River Forest, Ill. Mr. Hayet was formerly foreman for A. J. Lanternier & Sons, Fort Wayne, Ind.

Visitors in Boston: Lee Whitman, Yonkers, N. Y.; Arthur Zirkman and Robt. Shoch, representing M. Rice & Co., Phila.; Winfried Rolker, New York.

A. A. Tracey has moved to Wenham, Mass., from Somerville to take charge of the bulb department of the gladiolus farm of his brother, B. Hammond Tracey, at Cedar Acres.

Visitors in New York: Alex. Dallas, Waterbury, Conn.; Frank Witney, Fishkill, N. Y.; A. H. Wingett and A. J. Loveless, Lenox; Mr. Etherington, Stockbridge, Mass.; H. G. Eyres, Albany.

A. McMeans, head gardener at the Experiment Station, Vegetable Department, Agricultural College at Guelph, Ont., has gone to the Agricultural College in North Dakota to take a similar position.

Robert E. Miller started from East Brookfield, Mass., last Thursday for Salt Lake City to erect two large rose houses at Farmington, Utah, the material for which will be supplied from Chicago.

John H. Taylor, of Bayside, N. Y., is contemplating an extended trip abroad and has published for sale at auction on April 14 and 15, the entire contents of the family mansion which he has so long occupied.

NEW ENGLAND FLORISTS!

Announcement Extraordinary

We are now shipping to Boston a most attractive, interesting and extensive display of **Florists' Supplies**, including every requisite for

MEMORIAL DAY
JUNE WEDDINGS
GRADUATIONS

Far superior to anything in this line ever brought together for your inspection.

The Goods Will Be On Exhibition
At Rooms 408-410 Quincy House, Boston,
April 11th to 16th Inclusive.

We shall be represented there by Messrs. Martin Reukauf, Stephen Green and Sydney Bayersdorfer who will be constantly in attendance and will be pleased to have a visit from you to look over this display of things choice new, and useful from the best stock in our Philadelphia Warehouses.

This effort is put forth for the convenience and benefit of the florists' of Boston and New England.

It will pay you to take a look at it.

H. Bayersdorfer & Co.

The Florists' Supply House of America
1129 Arch St., Phila., Pa.

DOUBLE YOUR CARNATION PROFITS—LAST CHANCE TO BUY

The trade has certainly bought liberally of Carnation Dorothy Gordon this winter and spring—orders for rooted cuttings have taxed our producing capacity nearly to the limit, but we're proud of the stock we sent out, and judging by their kind letters, our customers are pleased, too. And next winter, when all those splendid plants come to bloom and these florists begin to make money as they have never before made it from carnations, they'll be still better satisfied. Have YOU delayed getting in your order for this mag-

nificent new Carnation? If so, this advertisement is addressed to you; we have just a few thousand more cuttings in the sand for April 15th delivery, and when these are taken, no more will be available till next winter.

We urge you, if you want to double your carnation profits, not to delay; the merit of this splendid new variety has been thoroughly proved, and the only possible loss you can experience in the matter is to let this opportunity slip by and stick to the old sorts you've been growing in the past.

Carnation Dorothy Gordon

has a splendid pedigree, a long list of good qualities and an enviable record of prizes and awards. It is a seedling of Lawson on Enchantress, possessing the principal merits of these varieties without their faults. It is vigorous in growth and perfectly free from disease. Its flowers are a trifle darker than Pink Enchantress; they are borne in double the quantity and are of exceptional size—averaging over 3 inches in diameter. They are very fragrant and keep exceptionally well. The market price paid for Carnation Dorothy Gordon is regularly 50 per cent more than that paid for Enchantress.

From the very first, Dorothy Gordon has established a

splendid record as an exhibition variety. High awards were given it at the meeting of the American Carnation Society in 1908 and at the National Gardeners' Association meeting in New York. This season it has attracted much attention and has won further renown at the Pittsburg and Toronto meetings.

In order to give the trade a fair opportunity to test it thoroughly, we have from the first sold rooted cuttings at a price which would get it established everywhere. This low figure still prevails, and the remaining stock will be sold at these prices: \$10 per 100; \$75 per 1,000. No further offers this season.

JOSEPH HEACOCK COMPANY, Disseminators, - WYNCOTE, Pennsylvania

A PRESENTATION.

Alexander Montgomery, Jr., severed his connection with the Waban Rose Conservatories, Natick, Mass., on March 30, and will now assume the active superintendency of the new establishment of the Montgomery Rose Com-

pany at East Hadley, Mass., with his brother Robert as secretary. Mr. Montgomery, who has grown from boyhood on the noted rose-growing establishment over which his father has long presided, is and always has been very popular with the employees on the place, and they took opportunity at this time to show their esteem for him by presenting him with a handsome roll-top desk and set of office furniture. The presentation was made by P. J. Donahoe, who referred appreciatively to the companionable qualities of Mr. Montgomery, who had been at all times as ready to join the boys in their pas-

ALEXANDER MONTGOMERY, JR.

times as he was earnest in the performance of duty and extending hearty wishes for success in the new field. The recipient of the gift was taken completely by surprise and responded appropriately, after which there was a reception in which he greeted each one individually.

Mr. Montgomery is a graduate of Amherst Agricultural College and a particularly well-informed and successful rose grower. The two new houses at East Hadley are now being glazed and will be fully planted by May 1.

The Merits of

APHINE

Will again be publicly exploited at a demonstration before the NASSAU HORTICULTURAL SOCIETY, Pembroke Hall, Glen Cove, L. I., Wednesday afternoon, April 13th, from three to six o'clock.

We are anxious to have a large collection of insect infested plants submitted at this test, so that we can decisively demonstrate the wonderful merits of this new insecticide APHINE.

You are cordially invited

Aphine Manufacturing Company

Dreer's Hardy Delphiniums

Belladonna. The freest flowering of all the Delphiniums and the most valuable for cutting, its beautiful turquoise-blue flowers appeal to all who see it. Plant these early and you will have a continuous display of bloom from June until freezing weather. We offer an exceptionally fine lot of extra heavy one-year-old plants, \$2.00 per dozen, \$15.00 per 100; \$125.00 per 1000.

Dreer's Gold Medal Hybrids. Unquestionably the finest strain of mixed hybrids ever brought together, being seedlings of one of the best named collections and containing some wonderful varieties. Strong one-year-old plants, \$1.25 per dozen; \$8.00 per 100; \$75.00 per 1000.

Formosum. A splendid strain of this popular favorite dark blue variety, 85 cents per dozen; \$6.00 per 100; \$50.00 per 1000.

Chinense Blue and White. 75 cents per dozen, \$5.00 per 100.

CHOICE NAMED HYBRID VARIETIES.

Alfred Henderson. Bold, massive spikes of semi-double rosy-lavender flowers, 2 inches across, white eye. 20 cents each; \$2.00 per dozen; \$15.00 per 100.

Beatrice Kelway. Deep, rich blue with a conspicuous yellow eye, flowers 2 inches across and perfectly arranged. 20 cents each; \$2.00 per dozen; \$15.00 per 100.

Cerberus. Sapphire with black-brown centre, a handsome spike. 35 cents each; \$3.50 per dozen.

Chinense Cineraria (Spurless Hardy Larkspur). The large flowers without a spur, strikingly resembles a fine, rich sky-blue Cineraria. 20 cents each; \$2.00 per dozen; \$15.00 per 100.

Duke of Connaught. Rich oxford-blue, with distinct bold white eye; fine large flowers. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

J. C. Jenkins. Very large, semi-double bright mauve edged with royal blue and white eye. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

King of Delphiniums. Most vigorous growing, immense size, semi-double, rich deep blue with large white eye. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Lizzie. Lovely azure-blue, flowers 2 inches across, bold, creamy-yellow eye, arranged in bold massive stems. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Lemartin. Similar in growth and habit to Belladonna, but with rich Gentian-blue flowers with white centre. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Mrs. Creighton. Semi-double, outer petals deep sky-blue, centre rich plum with black eye. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Persimmon. Comparatively new; beautiful delicate turquoise-blue. 50 cents each; \$5.00 per dozen.

White Seedlings. These have been carefully selected and will be found desirable in any collection. 30 cents each; \$3.00 per dozen.

Perle des Blancches. White.
Persian Yellow. Yellow.
Prince Camille de Rohan. Dark crimson.
Ulrich Brunner. Cherry-red.

For prices see above.

Also we have on hand a very fine collection of Hybrid Teas, Everblooming Roses, such as Killarney, Cochet pink and white, Kaiserins, etc.

Prices upon application

Ramblers and Other Climbing Roses

CRIMSON RAMBLER. American Grown. The only stock for forcing. Large heavy plants, two years old, mossed and packed in bundles of 10, 3 to 4 feet, \$1.25 for 10, \$12.00 per 100; 4 to 5 feet, \$1.75 for 10, \$15.00 per 100; 5 to 6 feet, extra heavy, \$2.25 for 10, \$20.00 per 100.

PAUL'S CARMINE PILLAR. Flowers large and free; color rosy carmine. Two-year-old, field grown. 85c for 5, \$15.00 per 100.

DOROTHY PERKINS. Lovely shell-pink color. \$1.25 for 10, \$12.00 per 100.

TAUSENDSCHON. The new Rambler Rose. The name translated means a "thousand beauties." Color beautiful rose, shading to pink. \$2.25 for 10, \$20.00 per 100.

LADY GAY. A seedling from the popular Crimson Rambler, which it resembles in habit and general effect. The flowers are of a delicate cherry-pink color, which fades to soft white. Strong plants, field-grown, 4 to 5 feet. \$1.75 for 10, \$15.00 per 100.

Flower of Fairfield The Everblooming Crimson Rambler

This variety is a sport from the beautiful Crimson Rambler, is similar in color, more brilliant and lasting than the old favorite. It also possesses the further advantage over the Crimson Rambler in the fact that it flowers profusely on the young wood the first year. Flower of Fairfield is a vigorous grower and free bloomer. It starts to bloom early in the Spring and continues until late in the Autumn. It is rightly termed "perpetual blooming." 40c each, \$3.50 for 10, \$30.00 per 100.

Veilchenblau (Violet-Blue)

It has long been the desire of rosarians to secure a blue Rose. In Veilchenblau we have practically approached this color. The steel blue flowers of this new Rose appear in large clusters, are semi-double, of medium size and keep in bloom a long time. The showy yellow stamens, contrasting with the blue flower, give the whole a striking appearance. 60c each, \$5.75 for 10, \$55.00 per 100.

Baby Rambler Roses

BABY DOROTHY. The same in habit as Baby Rambler, but the color of the flowers is similar to Dorothy Perkins. It makes an excellent pot plant for forcing. Price for strong, field-grown plants, 85c for 5, \$16.00 per 100.

CATHERINE SEIMETH. A White Baby Rambler Rose, larger and better flowers than the type. White with yellowish center. 85c for 5, \$15.00 per 100.

MRS. WM. H. CUTBUSH. Color intense crimson and exceptionally free-flowering. 85c for 5, \$15.00 per 100.

MME. NORBERT LEVAVASSEUR (Baby Rambler). Strong, field-grown plants. 85c for 5, \$15.00 per 100.

THE TREE BABY RAMBLER. (Grown as a Standard). The popularity of the Baby Rambler has suggested the growing of it as a tree or standard. 40c each, \$3.75 for 10, \$35.00 per 100.

BABY DOROTHY. (Grown as a Standard.) For description, see above. 75c each, \$6.25 for 10, \$60.00 per 100.

We also have a fine stock of Hybrids and Hybrid Teas, standard grown.

Something New in Roses for Florists

HALF STANDARD BABY RAMBLERS

These are Baby Ramblers, grown on stems or standards about one and one-half feet high, and will be a novelty for your trade you cannot profitably overlook. They are offered for the first time in this country in the following varieties:

BABY DOROTHY (Half standard). Deep pink. 60c each, \$6.00 per doz., \$45.00 per 100.

BABY RAMBLER (Half standard). Crimson. 45c each, \$4.50 per doz., \$35.00 per 100.

BABY CATHERINE SEIMETH (Half standard). White. 45c each, \$4.50 per doz., \$35.00 per 100.

BABY "STARS AND STRIPES" (Half standard). White and red grafted on the same plant; most attractive. 50c each, \$5.00 per doz., \$40.00 per 100.

THE BAY STATE NURSERIES,

ORTH ABINGTON, MASS.

NEWS NOTES.

Seattle, Wash.—A city nursery is under consideration for this place.

Rockford, Ill.—J. J. Soper has purchased a 20 acre fruit farm at Roseburg, Ore.

Corfu, N. Y.—Henry Fishel has sold his greenhouse business and intends to take up farming.

Fremont, Nebr.—G. L. Welch & Co., have expanded their nursery business by a purchase of 17 acres of the Dockstader land.

Portland, Ore.—L. O. Berry & Son of the Bay Tree Nursery Co., of San Francisco, Calif., have opened a branch at Union & Alberta Sts.

Gradyville, Pa.—The Jesse R. Baker farm has been purchased by Howard Keller of Falls of Schuylkill, Philadelphia; he will engage in the florist business.

Kennewick, Wash.—The Vanholderbeck Nursery Co., has purchased 80 acres of land at Kennewick Highlands and will plant the largest nursery in the Columbia River Valley.

Privet GROWN for Hedges

Satisfactory hedges are only obtained by proper nursery treatment. Plants not properly treated in the nursery must be cut back close to the ground and practically started all over again. Our California privet is grown specially for hedges and makes a dense growth of dark green, very shiny, ornamental foliage.

"NOT HOW CHEAP—
BUT HOW GOOD"

Horseshoe Brand Products

It is not the man who does different things than others who earns recognition—it's the man who does the same thing better.

In order to do the same thing better in the lily growing business, you must first have a solid foundation—the best bulbs.

Horseshoe Brand lily bulbs are of superior quality and will average better than any other brand known.

Write for prices.

Seed Trade

Condition of Trade and Prospects.

The condition in the seed trade so far as can be ascertained are very satisfactory as far as activity in all lines of the trade can be considered. The statements from the large mail order houses show that for the past two or three weeks they have done a larger volume of business than ever in their history. Counter trade is also very active, and in sections of the country where this class of business does not usually begin in earnest until April, the dealers have been crowded to their limit, and have been unable to take care of the orders, many of them being from two to four days or more behind, practically all of their time being taken up in waiting on transient counter trade, while their orders have been side-tracked for evening work.

How long this condition will last is a problem that is interesting the trade and worrying a considerable number. The latter are pessimistic, and are confident that we will have more winter, and that such an early spring is not a good omen, but means a short season and a smaller volume of business. This does not seem to be a wise view to take, as everyone should make the most of the conditions as they meet them, and trust to the fortunes of war for the future. If bad weather follows, a large replanting will no doubt be necessary, although in the matter of peas the shortage of many of the leading varieties is so great that there will be nothing left for replanting if any disaster should overtake the first planting. It is therefore a rather serious matter regarding peas, although as to most other varieties enough seed will probably be found for such replanting as may be necessary. It is reported that the growers of peas are planting such varieties as Gradus, Thomas Laxton, Telephone, etc., and unless the weather conditions are more favorable during April than is usual, a very large percentage of the seed will fail of germination. The replanting of these varieties will of course be practically impossible, as there are no reserves to draw upon, and either other varieties must be utilized, or the replanting of peas be omitted.

The Cannery's Plans.

Joint committees representing the Cannery's Machinery & Supply Association, and the National Brokers Association, met in Chicago on March 26th for the purpose of selecting a place for the next Annual Convention to be held during February, 1911. The place selected is Milwaukee, and while certain preliminaries are yet to be settled, there is little doubt that the place made famous by Schlitz will have the pleasure of entertaining the cannery and allied industries in 1911. The committee which met in Chicago discussed the claims of the various cities bidding for the convention, but as Milwaukee's offer was the most practical,

When Mr. Commuter comes into town and makes his purchases of garden necessities.

the other bidders received little attention. The first vote was practically unanimous for Milwaukee. Following this meeting in Chicago, a sub-committee was appointed to visit Milwaukee to interview the local association, and close the contract for next year's convention, which was done subject to confirmation by the Board of Directors of the National Cannery's Association. The Committees representing the Brokers' & Machinery & Supplies Association, have been fully empowered by their Associations to decide the matter. Milwaukee's new Auditorium or Convention Hall will be the place for the Machinery & Supplies exhibit, and as there are various large halls capable of seating from 300 to 1500 people, in addition to the main convention hall, the meetings of the different associations will be held right in the building, and there will therefore be no real necessity for hotel headquarters, although in all probability one will be chosen, but just which one has not been decided upon. We learn that a new hotel is to be erected which will be open for business January 1st, 1911, and it is not improbable that this new hostelry may be chosen as the headquarters. The local hotel men's association have given their pledge that their rates will not be advanced to members who attend this convention, but that the regular rates will be charged. The Business Men's League or Association, guarantee to furnish Convention Hall in its entirety for the use of the convention for a period of ten days, or such part thereof as may be necessary, free of charge. The differences which have heretofore existed between the National Cannery's Association and Machinery & Supplies Association are in a fair way of adjustment, as both committees were very much disposed to bury their differences and co-operate earnestly for the advancement of the canning industry. At this writing it looks very favorable for a harmonious and successful convention, and it is earnestly hoped that no discordant element will be permitted to butt in and upset things.

The Pea Outlook.

Peas are going into the ground earlier than in many years. During the last ten days of March, planting was quite general in Wisconsin, and if the

weather should continue favorable, canning will commence at least 3 or 4 weeks earlier than last year. Many hundreds of acres had been planted up to March 26, whereas last year practically no planting was done until the first or second week in May. It is to be hoped that the unfavorable weather may not destroy the seed or young plants just after coming out of the ground. It is very early, however, for seeding in Wisconsin, and all must admit that there is a considerable element of risk from unfavorable weather, still those who are planting are fully justified in doing so, and trusting to luck to pull through without serious damage. There is much complaint from the cannery of securing acreage this year, and in Indiana, Ohio and portions of Wisconsin the acreage will be greatly reduced unless the cannery rent the land and do their own farming. This they are not likely to do to any considerable extent, and the result will be decreased acreage, which will doubtless make for the best interests of the industry, while a considerable quantity of pea seed will be carried over and which probably will not be needed for next season, as it looks at present much as if this would be a year for a good crop of peas, both for seed and canning purposes. If the present outlook holds good we may expect a decided slump in values next fall, and Spot Pea Seed will be for sale at prices below those now quoted on futures. For this reason, it would seem that every bushel of future seed that can be sold by the growers will prove of advantage to them.

Notes.

Sheboygan, Wis.—The Allan Seed Co., has started on a three-story addition.

Milwaukee, Wis.—Louis Johnson & Son have purchased the seed business of C. H. Jackson.

Augusta, Ga.—N. L. Willett Seed Co., 309 Jackson St., has increased their capital stock to \$30,000.

FIRE RECORD.

Windsor, N. Y.—The large building occupied by D. M. Perry & Co. as a seed ware house, was recently gutted by fire, loss \$200,000.

NEWS NOTES.

Marysville, Calif.—Twenty acres of land have been purchased by the Marysville Flower & Seed Co., in Sunset Colony, Number 5, Sutter Co., where a nursery will be conducted and a greenhouse built.

Detroit.—Just now the ladies of the Gardening Club, a branch of the Twentieth Century Club, are engaged in their annual distribution of seeds to school children. In this way they dispose of \$1,500 worth of seeds at cost price. To further interest the children in this work these ladies have made arrangements with George Rackham to deliver short lectures to the children on gardening and he has offered his services gratuitously. In this connection and under the same auspices, Frank Danzer has volunteered to superintend the laying out and caring of model gardens. His services are given free as well. This will greatly facilitate practical demonstrations to the children in garden-work, which will sooner or later have a beneficial effect on the trade.

Of Interest to Retail Florists

FLORISTS' SUPPLIES ON EXHIBITION.

We hope our florist readers will not overlook the opportunity offered in the coming exhibition in Boston as announced in the large advertisement of H. Bayersdorfer & Co., on another page of this issue. It is a rare opportunity to inspect a complete collection of the newest and best things brought together for the florists' use from every part of the world—a privilege the value of which only those who have attended the exhibitions in connection with the S. A. F. conventions can fully appreciate. If you are a New England florist take a little jaunt to the Quincy House next week. It will be time well spent.

Among the Growers.

Chicago carnation growers are planting out their young stock in the field, work having begun the last week in March. This is the earliest that this has ever occurred in this vicinity, but the risk in the field is not so bad as the certainty of the stock being ruined under glass. The ground was so dry that the conditions are not altogether favorable on that account.

The writer noticed an interesting article on Spanish iris in the last number of HORTICULTURE. As noted in our flower market report, florists are growing it here very successfully under glass. One grower says he plants it between the rows of carnation plants in the fall, the same wire supports holding the iris and it comes into bloom without interfering in any way with the carnations, making the space do double duty.

A Wedding Decoration.

Differing from the usual decorations were those of the Stanley-Kimball wedding. Twelve white posts connected with ribbon outlined the path of the bridal party through the parlors. On the top of these posts were huge bouquets of white roses, excepting on those nearest the bride and groom, which were of lilies. The ceremony took place under a canopy of asparagus and white carnations. Fifteen small tables for the guests were trimmed with spring flowers and the bridal table was done in White Killarney roses and lily of the valley.

The Bowlers.

Interest in the bowling contest has kept up well and the end is nearly in sight. The club team has now but three postponed games to play to complete the necessary 81 and then the prizes will be awarded. Frank Pasternick, the head of the team, says that it will be immediately reorganized and that next season an evening will be selected which will not conflict with the meeting of the Florists' Club, as has been the case this season.

Personal.

Mr. and Mrs. J. W. Brooks have the sympathy of the trade in the serious illness of two of their children. Their little son, who was reported five weeks ago as undergoing an operation on his knee, as the result of a fall, is still at the hospital and their little daughter Daisy is now at the same hospital for an operation on her throat.

Chas. Drissler and Miss Mary Solt were married at St. Michael's Church last Tuesday morning. A reception was held in the evening at 4734 North Artesian avenue. Mr. Drissler has been with Wieter Bros. in the wholesale store for nine years and is very popular with the trade.

Mrs. Victor Bergman has just returned from a six weeks' visit at her old home in Pittsburgh. Mrs. Bergman is the daughter of Julius Ludwig, and Mr. Bergman is decorator-in-chief for the Wienhoeber Co.

Visitors: Mrs. J. Schroeder of Columbus, Neb.; Mrs. Schroeder was formerly Miss Malchea, florist, of Chicago; Milo Crozier, Cedar Rapids, Ia.; C. H. Woolsey, Rockford, Ill.

A PROGRESSIVE BUSINESS.

Messrs. Arthur Zirkman and Robert Shoch, suave and elegant representatives of M. Rice & Co., have been holding forth to the florists of the Hub this week with an excellent sample show of ribbons, baskets and florists' requisites innumerable. Among the things that particularly interested us were the preserved ferns and foliage of various kinds. *Adiantum cuneatum* so well done that it would defy detection by hand or eye and absolutely unfading; other *adiantum*s of the coarser species in autumn tints just as one would expect to find them in the woods in October; *Asparagus plumosus* and *Sprengeri* looking as if fresh cut. Among the baskets that attract admiration is the English "gathering basket," subdued green in color, first introduced by the Boston florist W. E. Doyle. A gold wall basket now largely used by Habermehl of Philadelphia, for large decorative effect, gives promise of being a valuable addition to the resources of the decorating florist. There are Etruscan art finished baskets in many artistic forms that one can't help admiring. A device with tinfoil mounted on a roller with cutter whereby it can be torn off in any length of piece desired struck us as something every florist will want. No doubt about it—the florists' supply business certainly keeps right up to the times.

Flower Market Reports.

BOSTON

So far as quotations are concerned, there is little change to report from last week excepting in the case of gardenias which after traveling along all season on parlor car rates have now come to the place where they must take a tumble. They are coming in from many sources and the question now is—as with other and more plebeian flowers—how to dispose of them. There is a heavy influx of material and it is not all unloaded easily, although all things considered, there is little to complain of. Much of the daily receipt is sold very cheap—to department stores and street stands or any other way to keep down the accumulation. Carnations are of splendid quality as a rule. Roses show little effect so far from the hot weather, but violets have practically succumbed. Among the roses Carnot shows up in beautiful form and looks enticingly summery. Sweet peas are seen in quantity, but in widely varying quality, the ordinary run selling slowly, the low-grade selling not at all and the fancy quality with stems a foot long and big luscious flowers being in quick demand at a figure from two to four times what is asked for average grade. As to lilies, the market is swamped with them and so it has been ever since Easter, many of them being sacrificed in the effort to maintain schedule rates.

CHICAGO

The condition of the market at the close of the week following Easter was about as bad as could be and the week following showed no improvement. Many of the old-time florists assert that never in their experience has trade so entirely dropped off at this time of the year. Stock in enormous quantities stands untouched upon the tables or accumulates in the ice boxes only to be carried off in barrels. Buyers no longer ask for prices, but state what they will give. Southern stock sells ahead of home-grown because if it comes through in good shape it is of better quality. Many large shipments, however, have come through heated and soft and have been a total loss. Many lay the conditions of the market largely to the early Easter which, like all other holidays, is always followed by a lull in business. Callas are in abundance and sell well for showy funeral work; but at a low figure. Mossae cattleyas are just coming into crop and gardenias are being shipped in considerable quantity. Spanish iris is now in the market. Last year it made its appearance a trifle later, though as Easter also was late it was in time for that event. Mr. Weiland of Evanston has grown it for the Chicago market for the last four years and Maywood growers also send in considerable quantity. It is very beautiful and sells readily when anything will sell. Trailing arbutus from the Michigan woods is in. It is not especially good quality, but no other flower has quite so much of the breath of spring in it for the Chicago people. Greenhouse stock has not only the excessive heat to endure, but this week has outdoor northern bulbous stock to compete with. Daffodils, tulips, jonquils, etc., home-grown, are

(Reports continued on page 595) A

HIGHLY FINISHED TYING TAPES

This is the strongest, neatest and most economical tying tape we know, and should be used always where elegance and exclusiveness is desirable in tying flower boxes. Flower Market Reports

(Continued from page 563)

adding their presence to the southern stock and the counters are filled to overflowing. Outdoor lilacs from Alton are also being received. They sell for 35 cents per bunch as against 50 cents last year. E. A. Hunt of Evanston is showing fine daisies of what he calls the California Giant variety for want of a better name. The stock was introduced by A. W. Myles three years ago, who grows it very successfully, but he has never named the variety. It blooms freely, comes on good long stems and sells readily.

Easter week turned

INDIANAPOLIS out all that could be desired. From

all accounts of the leading florists it was somewhat better than last year. The increasing demand was for flowering plants and some claim it was fifty per cent better than last year. The cut flower dealers claim that they did much better than the previous year. The month of March being warm and clear helped lilies, which it was feared would be scarce. But everybody had plenty and the sale was heavy. Other plants that were in heavy demand were azaleas, rhododendrons, hydrangeas, genistas, bulbous stock and various kinds of pot roses. The decorators say that the church decorations were the poorest in years.

Business at Easter

NEW ORLEANS this year was good and showed an advance over 1909. Buying during the early part of the week was very slow, but Saturday and Easter morning were a continuous rush. Lilies were scarce and a good many more could have been handled. The local supply as a rule was a little late and the flowers—mostly *Formosum*—shipped from the North were very mediocre in quality. The foliage was all brown at the tips and altogether not up to standard. A sharp advance in price was noted at the finish. Hydrangeas and rhododendrons were fine and met a ready sale. Many more light colored ones of the latter could have been sold. Azaleas, spiraea, Dutch hyacinths in pans, and lily of the valley were good and had a brisk call. Nice plant arrangements also caught the popular fancy. This market has never heretofore been strong on pot plants, but is improving greatly every year. Cut lilies were in short

supply, but roses and carnations were plentiful and of fine quality. Lily of the valley, sweet peas and freesias were good sellers. Nice flowered orchids were much in evidence and sale for same was fair. A great many bouquets were placed in the cemeteries.

NEW YORK The flower market of the past week has been simply a rout

for the sellers. The unprecedented summer conditions continuing without a break has brought about a situation which has driven the wholesale dealers almost to distraction and furnished the street fakirs with inspiration for great deeds in the line of barter. Never before has such an experience been forced upon the flower trade and the street fakir is the only one who wants ever to see a repetition of it. But with all his pestiferousness it must be acknowledged that he is the right man in the right place in times such as these. He makes the price as he pleases, to be sure, but he does carry off the stuff, turns it to some account and it melts in his hands with a rapidity which astonishes and convinces the onlooker of the exhaustless consuming capacity of this great city. Where it all goes is beyond comprehension. On the other hand the regular store people buy less, instead of more, at such times and retail prices within the portals of the fashionable marts remain about as they were before the deluge.

PHILADELPHIA This market continues as it has been ever since Easter—buried under a perfect avalanche of flowers of every imaginable variety and quality. The larger wholesale marts are almost overwhelmed and a sufficient outlet seems an impossibility. The staple goods find the slowest sale, odds and ends of unusual things being snapped up when good. Perhaps the greatest sufferer in the slump is the gardenia. It has broken badly in price and is moved with difficulty at that.

New York.—Real estate changes and rebuilding necessitate the removal of several well-known wholesale flower establishments from the locations which they have occupied for many years. Among them are Walter F. Sheridan and Traendly & Schenck, who have taken the entire floor and basement in the new building at 131 and 133 West 28th street. These stores are very large—giving each firm double the area they have had heretofore. They will move before May 1. At the same time the Growers' Cut Flower Company will remove from 39 to 41 W. 28th street.

Morristown, N. J.—St. C. Holmes re-
ports on Easter trade that cut flower
demand was about normal, but he
had a tidal wave in plant trade. Mrs.
E. A. Holton reports a large church
decoration trade. Business altogether
much better than last year. John
Greenwald, while only a year in busi-
ness, had a satisfactory experience,
with a very heavy run on carnations
and roses and pans of freesias. Mar-
cus Force did a thriving business, too;
lilies and azaleas were the main fea-
tures.

Concord Junction, Mass.—Leonard
Cousins reports the Easter business
as the best on record. Mr. Cousins
grows carnations in quantity for the
wholesale market and a new house for
this specialty is to be erected for him
this summer by the King Construction
Co., which will be planted with 15,000
White Perfection. This variety, Win-
sor and Beacon were the winners for
Easter. Pansies and geraniums and
a general line of bedding plants will
occupy attention now.

Detroit reports an enormous supply
of flowers with heavy demand, and a
rivalry between fakirs and department
stores in price-cutting on carnations.

IN BANKRUPTCY.San Francisco, Calif.—Alex. Mann,
Jr., liabilities \$3,062, no assets.

Woodside, N. Y.—Mrs. H. Dreyer
has sold the estate on which are lo-
cated the plant houses of the late Her-
mann Dreyer, to the Terminal Heights
Realty Company, for \$130,000.

Pleasant work and liberal pay make this a splendid means to add to your regular income. Write today for our exceptional offer.

Circulation Dept.

Horticulture Publishing Co.

11 Hamilton Place, Boston, Mass.

GARDENER WANTED

WANTED a thoroughly capable gardener to take charge of Tree and Shrubbery Department of a high-class suburban development. Must have knowledge of planting and care of all kinds of trees and shrubs, and be capable of handling a gang of men. American preferred.

Address, Roland Park Co., Roland Park, Baltimore, Md.

WANTED—Young man who thoroughly understands Orchids, and with experience with Sweet Peas, Carnations and Garden Stuff. Write giving full particulars as to experience to the Altimo Culture Co., Canfield, Ohio.

WANTED—Good salesman in wholesale cut flower establishment in eastern city. Address S. P., care HORTICULTURE, Boston.

WANTED—Experienced, well recommended clerk in prominent retail store, eastern city. Good wages. Address S. P., care HORTICULTURE, Boston.

WANTED—An experienced man to work in greenhouses where a large part of the product is carnations. Will pay good wages to the right man. Give references. Address Box 1092, Lowell, Mass.

WANTED—Second man in commercial plant growing establishment in middle West. Wages \$12.00 a week. M. W., care HORTICULTURE.

SITUATIONS WANTED

GARDENER—Landscape and floriculturist, has talent and fondness for his profession; competent to take charge of large estate; Swiss, 37 years of age; married; two children; wages \$70 and house. S. A. Leuba, 47 West 129th St., N. Y. City.

SITUATION WANTED—A head gardener on private estate, no small place. Single, American, 10 years' experience. G. Donovan, Sterlington, Buckland Co., N. Y.

PHILADELPHIA NOTES.

M. Rice & Co. report their building additions to their main warehouse now almost completed. This gives them over fourteen thousand square feet of floor space—probably the largest warehouse devoted especially to florists' requisites in the country. A. Zirkman and R. Schock of this firm have had a large display of seasonable florists' baskets and other stock on exhibition at the Quincy House, Boston, during the past week. M. Rice and Mrs. Rice, when last heard from, were at Gibraltar in the course of their foreign trip. They expect to make Italy, Egypt and other Mediterranean points before going through Europe.

W. Atlee Burpee will soon begin to build the contemplated addition to his big establishment on the adjoining property purchased last year, extending on Fifth street to Buttonwood street. A run through this busy place especially at this season, with its bewilderment of details, is enough to convince one of the marvellous growth of the mail order seed business under the direction of the genius whose conception it was and the system and order prevalent in every department compels admiration for the wonderful administrative ability which can bring into being such a bee hive of industry. The quarters are much too cramped for the force now found necessary and orders are fully a week ahead of the physical ability to fill them. The season is an unprecedented one in many respects.

FOR SALE

GREENHOUSE PLANT cost \$8000, 1908. Price \$5,000, cash. Big trade for someone. Owner dead. Hodge.

GREENHOUSE PLANT 12 miles from Boston, 8 acres, 8 large houses, \$15,000, \$5,000 down. Hodge.

Cheap land for a bulb grower; some basket material; ideal place for man wishing to retire. A. G. Cobb, Anna Maria, Fla.

Obituary.

Mrs. George M. Stumpp.

On the morning of April fifth, there passed away, in New York city, after a brief illness, one of the most estimable women that ever lived. Impulsively kind and generous, sunny of disposition and possessing a rare nobility of character, Mrs. Stumpp was beloved of a host of friends and Mr. Stumpp will have the sympathy of all in his irreparable loss. They were booked to sail for Europe on the 24th of May to spend the summer at Mr. Stumpp's home in Goenningen with his venerable mother. There will be sincere sorrow in Goenningen where Mrs. Stumpp was simply adored by the people of the neighborhood, when they learn of the death of their beloved American friend.

Joshua L. Wilcox.

Joshua L. Wilcox for 33 years a resident of Flint, Mich., died at the home of his son, Miles E. Wilcox, 948 Ave. A, on March 24th. Mr. Wilcox was born in Naples, N. Y., in 1837 and came to Michigan when four years of age. He came to Flint in 1871 and for 33 years lived here and conducted a greenhouse and truck garden for 26 years. The funeral was held Saturday, the 28th.

Mrs. George E. Fancourt.

Emma J. Fancourt, widow of the late George E. Fancourt, of Wilkesbarre, Pa., died on March 31, aged 49 years. Mrs. Fancourt had been an invalid for the past four years. She was born in London, England, and came to this country about 28 years ago. She is survived by two sons, George C. and Walter A., and two daughters, Helen M. and Edith C. Fancourt.

Mrs. E. C. Myers.

Mrs. E. C. Myers, who was engaged in the retail florist business at 79 South German St., Harrisonburg, Va., passed from this life March 29th "to where the flowers are always blooming."

CATALOGUES RECEIVED.

S. C. Moon, Morrisville, Pa.—Wholesale Price List of Morrisville Nurseries, spring 1910.

Thompson Carnation Company, Joliet, Ill.—Folder and Price List of Carnations, Chrysanthemums, Violets, Season 1909-1910. Quotations on rooted cuttings and pot plants.

Coolidge's Fernery and Rare Plant Nursery, Pasadena, Cal.—Catalogue of Rare Plants. This is a neat little illustrated pocket list of novelties and specialties in fruit and ornamental plants.

American Forestry Co., Little Tree Farms, South Framingham, Mass.—Catalogue and Price List for 1910. Anyone contemplating handling young trees in quantity will find this catalogue very useful.

Harlan P. Kelsey, Salem, Mass.—

Hardy American Plants. *Azalea lutea*, growing in its habitat in the Carolina Mountains, and *A. Vaseyi*, in natural colors, adorn the covers of this very interesting and beautifully illustrated catalogue.

Thos. Meehan & Sons, Germantown, Philadelphia, Pa.—Meehan's Garden Bulletin. This publication is issued monthly. It contains interesting information and comment on new and desirable garden material. The illustrations are particularly good.

Good & Reese Co., Springfield, Ohio—Spring Trade List, 1910, for Florists, Nurserymen and Dealers Only. Especially strong on roses, of which the list is large. A fine illustration of *Hydrangea arborescens grandiflora* appears on the title page.

E. F. Winterson Co., 45-49 Wabash Ave., Chicago, Ill.—Garden Guide, Spring, 1910. A complete general catalogue of flower and vegetable seeds, plants and shrubs. A flower of *Malva Marvel* in colors makes an attractive cover illustration.

Chicago Carnation Co., Joliet, Ill.—List of New and Standard Varieties for 1910. This is a high-class production. Among the excellent illustrations is a flower of *Conquest* in natural colors, which is the best color reproduction of a carnation we have yet seen.

Schaum & Van Tol, Boskoop, Holland; McHutchinson & Co., New York, agents.—Wholesale Trade List of Nursery Stock for 1910-1911. A comprehensive list of azaleas, rhododendrons, roses and other import specialties for forcing and outdoor planting.

Palisades Nurseries, Sparkill, N. Y.—1910 Wholesale Price List of Hardy Perennials, Roses, Evergreens, etc. This presents an excellent general list and also valuable novelties and specialties in which the florist and ornamental nursery trade should find much to interest.

John C. Moninger Co., Chicago, Ill.—Catalogue No. 6, Pipe and Fittings. A very complete and useful publication, compiled with great care and one which every greenhouse owner or manager should have within reach at all times. It tells the whole story about pipe and fittings. 100 pages. Send for a copy.

J. K. Alexander, East Bridgewater, Mass.—Catalogue of Dahlias for 1910. Mr. Alexander has the cognomen of the Eastern Dahlia King and his catalogue seems to bear out his right to same. Anyone looking for the real thing in dahlias will find this catalogue well-filled with it.

Bertrand H. Farr, Wyomissing, Pa.—"Hardy Plants." Irises, peonies, phloxes, delphiniums and all those gorgeous tenants of the hardy border have their innings in Mr. Farr's catalogue. Mr. Farr is a lover of these beauties and the simple perusal of his pages will inspire enthusiasm in the reader. Irises and peonies in colors embellish the covers and there are within some noble halftone illustrations.

CARNATIONS GROWN UNDER GLASS.

A Paper Read Before the American Carnation Society by Fred. Burki.

When I consented to read a paper on my experience in growing carnations under glass I meant carnations planted under glass in place of the field, as it is still an open question with most of us which method is the best, and with your permission I will confine my notes on this subject.

In the early nineties I set out some plants under glass in the spring with the object of getting salable flowers in the early fall, as at that time we did not house carnations as early from the field as we do of late years. The variety was Mrs. Fisher, which I at that time grew as my principal white and with which variety I had for some years great success, but only in solid beds, as it did not do well for me on raised benches.

I found that stock out of 3-inch pots planted under glass in spring gave me good flowers when such were scarce, say in September, October and November, and bloomed through the season as well as did those planted from the field. They did not make as much surplus grass but grew more slender with equally as good flowers and longer stems than the field-grown product and they could be planted closer. The soil I used at that time was taken from an ordinary piece of garden ground, as I could not procure sod, being located in one of the city suburbs. This piece of ground was manured heavy in the spring with cow manure ploughed in and kept ploughed through the summer. Sometimes we manured it a second time and pulverized it with the harrow before taking it into the houses.

Another variety I grew with great success at that time was Hector, a scarlet, which did better with me than any other red at that time and for some years after. The only fault it had was weak stems, and I had to give it up when the trade insisted on stiff stems. Hector grew very tall under glass in summer, but bloomed much better that way than when planted from the field. I simply could not make Hector pay when planted from the field and it did its best when I planted it in beds prepared in spring and cultivated the same as if under glass, and before fall built a greenhouse over it. I am of the opinion that this way of growing carnations on beds with no glass over them in summer until fall would be ideal if it were practical, but we find it impossible where we are located and with the kind of houses we build now.

Some years ago Uncle John Wyland said to me one day about the beginning of June, "I am going to take the glass out of my carnation house, clean it out, and plant the young stock in it in place of into the field." I said to him, "You are going to have a big job met him again and he said to me, "You cannot believe how quick we got that glass out and put away; it took us about two days." I said to him, "Well, you will find it a bigger job putting it in again in the fall and you have now no carnations to sell when I can get good money for them, \$2.00 per 100." He never did it again, although the carnations were a success.

Of late years we aim to plant the

Lawson varieties under glass instead of in the field. In this way we get earlier flowers and longer stems than we can from the field-grown plants, and unless we can house these varieties from the field by the first week in July, they hardly give us a first crop before the holidays and short stemmed flowers not up to the mark. We propagate them during December and January and get them into 4-inch pots by May. I find, though, that unless planted under glass not later than the first week in June, field-grown plants planted by the end of June or first of July are more satisfactory, as the plants in pots are liable to suffer during June from one cause or another.

The spaces we are able to plant in May are the beds we had in chrysanthemums the fall previous. Following these we take out a crop of Grand Rapids lettuce, then fill with potted-up cuttings of carnations. We prefer them all in pots as they come from the cutting bench, so that the plants will not suffer much if the ground happens to be dry and we cannot get them watered right away. Then as soon as the plants are in the field, we plant this empty space with Lawson and Winsor.

The soil we use is sod ploughed about 4 inches deep the fall previous; then before we bring it in we plough in a good coat of rotten manure, pulverizing it with the harrow. I have found that soil prepared this way in the open field is sweeter than when it is put up in heaps, and the labor is less. Besides, the sod piles are apt to sour unless they are turned and cut down, which means much work for the laborers.

I have found that other varieties than the Lawsons also do very well when planted under glass in spring; I rather think nearly all varieties would if we could only get the houses ready for them without having to sacrifice hundreds or thousands of dollars' worth of flowers to do it.

M. RICE & COMPANY'S VALUE

The Business Bringer

Advertising is excellent. The House which doesn't advertise nowadays is headed for "Extinction Street." We have used many forms of publicity and found that all have merit of some sort, but the best advertising of all can be summed up in two words,

"GIVING VALUE"

Give a man 100 cents worth for every dollar, and **do it all the time**, and he will be satisfied, and moreover he won't be quiet about it. He will tell his friends and acquaintances, and that is great advertising which doesn't cost a cent.

"Value" advertising is strongly in evidence in all our Extensive Lines. Our Beautiful Katalog tells all about it. Yours for the asking. It saves money for U.

Trans-Atlantic Notes

DENDROBIUM AUREUM (HETEROCARPUM)

We have in this orchid a native of India, Nepal, Ceylon, and Java, a very distinct and beautiful species, flowering in late autumn and onwards till March. The flowers appear after the leaves have dropped, and in short racemes of two and three flowers. These are yellow streaked with crimson lines, and they endure for several weeks in good condition, and are endowed with the fragrance of the violet. The plant succeeds under the same conditions of warmth as *D. nobile*; and in a mixture of polypodium roots one part and sphagnum one part, with abundance of clean crocks. A moderate amount of moisture must be afforded in the season of growth, and scarcely any in the resting season, otherwise its flowering will be irregular. Although flowering whilst in the leafless state, it is a plant worthy of anyone's cultivation, if for its delicious fragrance alone. The flowers differ in their ground tint, and size.

HONESTY (LUNARIA BIENNIS)

In the early days of spring bedding, when Cliveden under Fleming was at the height of its beauty, and Belvoir, with W. Ingram as gardener, was renowned for a free-natural style of bedding-out with hardy subjects, setting examples—both of them, to the halting gardeners of Great Britain in the new mode of replacing the bare beds in the flower garden of that time—in the late 50's and early 60's, *Lunaria biennis* was recommended, and frequently planted. Since that day, other varieties have been raised and distributed. I may mention *L. biennis alba*, *L. b. purpurea*, *L. b. rediviva*, and the creeping variety *L. b. coreyrensis*, which has flowers of almost a blue tint. It might be classed as a species seeing that the plant is so different to *L. biennis* of gardens. The flowering season lasts from March to May; and the plant is a native of the hilly districts of Corfu, and probably other islands of the Ionian archipelago, but nowhere else in the world. Under the trees on the bare soil and stony places, where nothing else will grow or bloom, the plant covers the ground with its innumerable blue flowers.

INTERNATIONAL EXHIBITION OF BULBS AT HAARLEM

The first Jubilee Floral Exhibition of the Dutch Bulb Growers Society was opened on March 23 by H. R. H. the Prince of the Netherlands. This formed part of a permanent exhibition of bulbs planted in the open ground for the purpose of which an extensive area, south of the town was fenced off; and beside this there were four special shows arranged for in temporary buildings. The first of these exhibitions under cover was opened on March 23, and remained open to the public until the

31st. This display consisted for the major part of hyacinths, tulips, azaleas, lilacs, and rhododendrons associated with *Primula obconica*, *cinerarias* and *callas*. The ground round about the Colonial Museum at one time a royal palace, and in the front of the chief temporary erection was planted with crocuses, relieved as regarded its uniform flatness by sunken grass panels and topiary objects in *Buxus* towards the margins. This scheme of gardening will be kept bright with fresh plants till May 29, when the exhibition closes. An avenue of trees a quarter of a mile long, extends until a pretty pavillion holding a collection of modern flower paintings many of them being the works of the famous Haarlem artist, A. L. Kosher, is reached. Beds of hyacinths and tulips almost cover the ground under the trees; but at the time of writing the only color afforded came from scillas, crocuses and *chionodoxas*.

Messrs. C. B. van Nes & Son showed among rhododendrons a lovely blush variety—Princess Juliana, having a waved edge; it is a cross between a variety of *R. hybridum* and *R. Griffithianum*. M. Koster & Son showed a novelty, a hybrid Azalea with fragrant flowers (*A. occidentalis* x *A. sinensis*). The flowers expand of a lemon yellow tint, and become white with age. Hybrid freesias came from C. G. van Tubergen; *Le Reve*, in deep mauve; *Dainty*, pink with a white stripe; *Luminosa*, clear rose; and *Robinetti*, pink, were the better ones. *Iris lazica*, not unlike *stylosa*, but hardy was flowering for the first time. It is a Caucasian species. Some good or new tulips (single) were General de Wet, an orange sport from Prince of Austria; *Rose d'Holland* white with an edge of pink; *President Taft*, white or rosy edge, and two Darwin tulips, one with rosy pink petals and blush edge, and the other a deep pink edge. Mr. Vander Hoef is a pale double yellow tulip; *Electra* is bright crimson; and *Courowne Royal* is a bright yellow flower.

MISCELLANEOUS

According to Herr L. Dittmann, in a communication in *Die Gartenwelt*, *Richardia* (*Calla*) *Elliotiana* may be raised readily from seed but it will be the third year after sowing before any of the tubers will attain flowering size and strength.

H. Burnett showed his new carnation *R. F. Felton*, at the March 22 meeting of the Royal Horticultural Society. It is a large, wide petalled flower, rich pink in color but so full that the blooms need an india rubber band to confine them.

Mrs. Eugene O'Sullivan will discourse on "French Gardening" at the congress to be held for women on July 5 at the Japanese-British Exhibition.

which the flower trade has taken of late. He asks, "Are we not stumbling along in the dark?" and other pointed questions, some of which are readily answered and others which are not so easy. We agree with him when he says "None of us make enough money," also with his frank acknowledgment that if it were not for the commission man and his hustling and liberal advertising to find an outlet for the growers' product the business would be still worse off. All will concur that something should be done to improve the present status and circumstances of the flower trade. Whatever the remedy may be, one thing is certain—talking alone will accomplish nothing and until some basis of widespread organized action on the line of "a strong pull, a long pull and a pull all together" has been found, isolated individual effort, however wisely it may be directed, will bring about nothing of general benefit. This is a case where "letting the other fellow do it" will not work. Perhaps a Florists' Board of Trade as suggested by Mr. Faust might furnish the means through which united action on practical lines could be secured. Let it be understood, however, that whether it be done through the S. A. F. or on an independent scheme, any plan that may be devised will take money and plenty of it to make it a success. The services of the kind of men needed for such work can't be had for any small compensation. But it will pay, as has been proven in many other industries.

Not over-
production but
under-consumption

Until a man knows he is sick and willing to acknowledge it there isn't much hope of getting him to a doctor. There is something of promise in the fact that the subject of flower market congestion and its train of evils is being thoughtfully discussed, wherever and whenever two or more of the craft get together. The patient is really beginning to realize that he needs medicine of some kind. The immediate and the ultimate effect upon the trade, of the continually increasing inequality between production and outlet are variously deduced according to the direct interests or bias of the party doing the talking but there is certainly hope in the recent evidences that all sides are beginning to recognize the exigency. Now let them get together. They'll find plenty of common ground on which to stand. With the society ladies of San Francisco incorporating to grow flowers because they "cannot afford to purchase them"; with the G. A. R. at Pittsburgh uniting to use artificial flowers and boycott the florists because "they are raising their prices unduly";—all this at a time when wholesale markets are swamped with material for which the retail stores have proved absolutely incapable of providing an outlet, it is manifest that there is surely a big screw loose somewhere. We have thought and have repeatedly expressed it in these columns and elsewhere when opportunity favored, that if anything practical is to be accomplished it must be done from the standpoint of the popular end. In short, we believe it is not so much a question of over-production as of inadequate selling. Talk of calling a halt in greenhouse building is a wasteful and profitless use of breath and time. Prosperity and better prices can never be attained or street fakirs' dictatorship overthrown that way. Get busy with the people. They don't consume a fraction of the flowers they ought to consume. If there were twice as many greenhouses for flower growing as exist today the public could easily get away with the product and there would be no use for the dump heap. What, after all, have the men who have the most at stake and who are the princi-

"Stumbling
along in the
dark"

In the latter part of Mr. Faust's admirable paper on Easter lily growing which appears in this issue we detect an echo of the discontent which the flower growers for some of the wholesale markets are not slow to express over the course

pal losers under prevailing conditions—the flower growers themselves,—done up to the present time, to broaden and enlarge the market for their products? How much have they contributed towards the publicity which is a vital principle in the conduct of any business according to modern methods? We think it is safe to say that there was money enough lost in stagnated flowers last Easter to have paid for a publicity service of wide range and practical utility, extending over the entire season.

An elegant art neglected

About sixty years ago M. Jules Lachaume wrote an elegant work on the art of composing crowns, garlands and bouquets of all kinds for balls and evening parties and this, no doubt, had its influence on the floriculture of the toilet as practiced at that time all over the civilized world. A knowledge of the culture of such flowers as from their form, color and keeping qualities were best adaptable to ornamenting the human form was no small part of the education of the old time gardener. The fondness for adorning the body with floral garlands and clusters dates back to the most remote antiquity, this custom being by no means confined to the fair sex. Recent articles condemning the use of artificial flowers in place of natural ones for personal adornment show a possible growing interest in this branch of floricultural art which furnished our predecessors in the florists' occupation a field for the display of refined taste almost unknown to the florist of the present day. Perhaps the cycle has now run its course and a revival of the fashions of 1850 might be enthusiastically welcomed by the public. A concerted movement by the most influential florists in several of the large cities supplemented by a diplomatic use of the society reporters might do the business. We take opportunity to quote in this connection from a comment on M. Lachaume's book which appeared in *La Belgique Horticole* in 1851.

At the present day there is an evident inclination to return to the better customs of Greece and Rome, and no fashionable lady can present herself respectably at a ball or an evening party without having a Rose or Camellia in her breast. Let us hope that in a short time the crown and the bouquet will be rigorously enforced in every reunion which has pleasure for its object. Why should not our ladies abandon the ungraceful cap for the elegant and odoriferous crown of flowers? Flowers are, besides, the natural emblem of luxury, riches and abundance.

In order to render this part of horticulture directly realizable, we shall pass on to the descriptions of head-dress in fashion, the first since 1847; the second during the present year 1851; and the third with some exceptions, at intermittent periods.

1. *Coiffure a la Florc* (Head-dress of Flowers).—This is suitable for those persons whose proportions and forms are of the most perfect character, and which come nearest the Grecian type. The profile especially must be one of those which are commonly found represented on ancient bas reliefs. This head-dress is worn with the hair arranged in graceful wavy locks, the back being tied in a bunch, merely with a narrow band, and the ends floating down. The crown of flowers does not in this case form a diadem, but is tied in a knot behind and at the lowest part of the head, from which point it gradually enlarges till it reaches the front, or the point immediately above the brow. This form of crown is composed of high-colored flowers, as the Rose, Narcissus, Hyacinth, Camellia, Carnation, and sometimes an Orchid, and it is bordered with *Ericas* and distichous Cypress, terminating in leaves, with the more slender or fine parts of branches of flowers which take an upright, and, at the same time, a nodding form. The ancient ear-rings, and the string of pearls round the neck, harmonize admirably with this head-dress, which, invented more than a thousand years, is not the less handsome and in keeping with good taste.

Paragraphs 2 and 3 referred to *Coiffure a la Ceres* and *Coiffure a la Pomone* respectively, the first indicating the use of ornamental grains and grasses among the flowers and the other the use of berries such as *Ardisia*, etc.

Hanging Baskets

Almost everybody admires a well grown, tastefully arranged, hanging basket, and their usefulness for the adornment of conservatories, piazzas, windows and any show house, are well known, in fact, a few suspended at intervals in any plant house will agreeably relieve the monotony of roof space. I should think the trade ought to be able to get rid of quite a number around Memorial Day, and the present is a good time to make up a few, so that when the time arrives, they will not have that recently-made-up look, that is quite often seen with baskets and tubs around holiday time. The wire baskets offered for sale by the florists' supply houses, are ideal receptacles. I am well aware that many have a preference for those made of rustic wood-work, but I think the idea should be not to show off the basket, but the plants that it contains, and those made of wire are more easily covered up than the wooden ones would be, also I think they are not so expensive. The position to be occupied by the basket should determine its size, for instance we find that one fifteen inches wide and ten deep is not any too large to hang between two large pillars, whereas if the supports are not so massive a smaller basket will harmonize better. In filling the baskets, a strong rich loam should be used, for such plants as I shall describe below.

For a sunny position ivy leaved pelargoniums and fuchsias are as good as we have found for piazza embellishment. We grow an ivy leaved pelargonium for a centre for the basket in a pot for a year previous to using and trained in pyramid form. This plant rises well above the rim of the receptacle and has a better appearance than if it were flat. *Vinca major* elegantissima makes an excellent trailing plant for the edge of a large basket, and *Linaria cymbalaria* is ideal for the smaller ones. A plant of *Fuchsia Black Prince*, rooted at the end of August is a nice size for a centre by the following March and *F. Trailing Queen* harmonizes well with it, the flowers being about the same shade of color.

Quite often one has to contend with shady positions to hang baskets in, and we have found the following plants useful for such places: *Cordyline indivisa*, for a centre plant with *Abutilon megapotamicum* for a trailing plant. *Dracaena Lindenii* with the variegated variety of the above-mentioned *abutilon* also makes a good combination for a foliage basket; also quite a number of the different varieties of *coleus* with such a trailing plant as *Othonna crassifolia* lend a touch of color to the others. *Asparagus Sprengeri* one of best introductions during the past twenty years, does well either in the shade or in the full sun. We have grown a stem of this plant almost fourteen feet long in a large basket. *Tradescantia zebrina pendula* is another plant for this class that does well in the shade. There are of course, many other plants suitable for basket work, but the above mentioned have been tried and proved here, and if fed frequently with manure water or Clay Fertilizer during the summer they will keep in good condition for over three months.

George F. Stewart.

West Medford, Mass.

NEWS OF THE CLUBS AND SOCIETIES

CONNECTICUT HORTICULTURAL SOCIETY.

Our second March meeting was omitted, on account of having fallen on Fast Day, a state holiday here. On the 8th inst., our first April meeting took place, with President John F. Huss presiding. The center of the room in the County Building, Hartford, was adorned with a beautiful collection of plants and cut flowers, as follows: *Amaryllis hybrida*, *Bougainvillea glabra Sanderiana*, *Haemanthus diadema*, *Primula obconica*, exhibited by Mr. Huss; *Antirrhinum gigantea alba*, by Alfred Cebelius, gardener for Professor Jacobus; *Calceolaria hybrida*, by J. A. Weber, gardener for Walter L. Goodwin; a freak geranium bearing two kinds of blossoms, by T. B. Brown of Windsor. The judges, who were H. A. Pinney, John Gerard, and W. H. Shumway, made awards as follows: Diplomas to Mr. Huss and Mr. Weber; certificate of merit to Mr. Cebelius, vote of thanks to Mr. Brown. The *Haemanthus diadema*, Mr. Huss said, is quite rare, coming from Belgium, but originating in the Congo.

The Society voted to give the president of the Lava Company of America, of Passaic, N. J., a hearing, in case he desires to come to Connecticut to address our members, at his own expense, on the lava fertilizer question, which is receiving considerable attention among some gardeners.

Arrangements have been started for our two fall exhibitions; and the executive committee have commenced work on the schedules of prizes. The dates are set as follows: *Dahlia* Exhibition at Unity Hall, Hartford, September 22-23, and *Chrysanthemum* Exhibition at Putnam Phalanx Hall, Hartford, November 3-4.

Concurrent bills before the Senate and House, at Washington, granting funds to each state agricultural college for extension work, were brought to the attention of our members; and the secretary was instructed to convey to the Connecticut senators and representatives our Society's desire for the support of the bills.

James M. Adams, at the request of the chairman, read an article concerning horticulture in Japan, showing many curious uses to which flowers, shrubs, and trees are put, especially in pursuance of the legends and traditions of that Oriental land.

Our next meeting, which will be held on the 22nd inst., will be Rose Night; and a paper is expected from Howard A. Pinney, on the subject of the rose.

The season here is quite forward, owing to high temperatures. Apricots are in blossom.

GEORGE W. SMITH, Sec'y.
Melrose, Conn.

CINCINNATI FLORISTS' SOCIETY.

The regular monthly meeting of the Cincinnati Florist Society was held at the Jabez Elliott Flower Market, Monday evening, April 11. Heretofore the Society has always held its monthly meeting on Saturday evening, but by a unanimous vote same was changed to Monday, thereby hoping to increase the attendance.

NEW YORK FLORISTS' CLUB.

The regular meeting of this club on Monday night, 11th inst., was a very interesting one. There were about seventy-five members present and the outcome of the animated discussion which ensued after the detailed report made by W. H. Siebrecht, Jr., of the committee on plant and flower market, is likely to be a great permanent public flower market, occupying an entire block, built by the city of New York and rented in the same manner as the other public markets. A special joint meeting of all interested organizations will be held next Monday night for the purpose of considering this important matter. The joint committee of the Club and the plant growers, of which Mr. Siebrecht is chairman, has done some excellent practical work and deserves the gratitude of the fraternity. The location proposed is between 59th and 60th street and is well adapted to the purposes. A central hall will be provided wherein exhibitions and meetings can be held. It is stated that the Park Commission is after the site for a public playground and prompt action is necessary in order to secure the place. In the debate it was incidentally mentioned that the installing of this market will have a far-reaching effect on the plant and flower trade, on prices of florists' products, etc., possibly revolutionizing the methods of distributing them.

A letter was received from Hitchings & Co., offering a \$25.00 silver cup for competition each year. It was referred to the exhibition committee and thanks tendered.

A motion was carried endorsing the efforts being made to secure an appropriation by the legislature of \$50,000 for greenhouses and other facilities for floricultural experimenting and instruction at Ithaca.

Messrs. Traendly, Young and Bunyard were appointed special committee on the S. A. F. convention, which is to be held in Rochester next August. The indications all point to a very heavy participation in that event by New York Florists' Club members. President F. R. Pierson, who was present, predicted that this will be the greatest convention in the Society's history.

A. C. Zvolanek addressed the meeting on the subject of sweet peas, giving a very entertaining account of his recent trip to California.

There were several exhibits on the table, including a display of Stocks Elizabeth and Queen Alexandra, and Ranunculuses, from E. Fardell, Great Neck, the first named being awarded a certificate of merit. Kessler Bros. showed a sport from the Scott fern, grown by Emil Savoy, of Secaucus, which won an award of merit. Louis Dupuy got a certificate of merit for *Hydrangea La Lorraine* (light pink) and *Avalanche* (snow white).

J. W. Pepper, Robt. E. Berry and J. Austin Shaw were appointed a committee to send resolutions of sympathy to Judge Vesey, in his great bereavement.

NEWPORT HORTICULTURAL SOCIETY.

An unusually well attended meeting of this society was held on the evening of April 12. The attraction was the announcement that E. O. Orpet of Lancaster, Mass., was to give a talk on orchids. This arrangement had been made on account of the growing demand for orchids during the summer season in Newport and the interest the demand is causing. Mr. Orpet was up to schedule time and covered the subject in a very instructive and natural way which was much appreciated by all present, the account of his experience in raising seedling hybrids being particularly interesting as he had a collection of those flowers present which were admitted by experts to be great improvements over the species. Among them were *Laelio-cattleyas* Latona, Caronis, Balliana, Mercia and Kerchovae, *Cattleya Thayeriana*, *C. intermedia* and others. After Mr. Orpet had finished his address many questions were asked him in connection with orchid culture and all were answered in a way that brought out a great deal of valuable information both old and new. On the exhibition table was a remarkably well grown *Amaryllis* in a seven-inch pot which had twenty-one large open flowers on three stems that came from the one bulb. This was examined by the committee on awards and awarded the society's silver medal for superior culture. The exhibitor was Paul Valquardson, gardener for Mrs. W. G. Weld. John T. Allan, gardener for Mr. John R. Drexel had also on exhibition a collection of seedling *Amaryllis* which were all good and one exceptionally well formed variety which Mr. Allan named Miss Alice Drexel was awarded a silver medal. The color of this is rich scarlet, very attractive under artificial light. The society gratefully accepted an offer of fifty dollars from Mrs. W. S. Wells to be used for some special exhibit at the September show.

AMERICAN POMOLOGICAL SOCIETY.

The American Pomological Society passed its sixty-second milestone at the time of its last meeting in St. Catharines, September, 1909. The formal meeting which brought this historical horticultural organization into existence was held in New York in September, 1848, although that meeting was preceded by a preliminary conference held by those interested in the organization some time previous in the city of Buffalo.

The report of its thirty-first biennial session is now going through press and will be distributed to its members in a few weeks.

In view of the many inquiries regarding the scope and purposes of this Society, the Secretary makes the following statement:

The Society is non-sectional, and is as comprehensive in its aims as the broadest interests of fruit-growing demand. Its purpose is to co-ordinate, unify and further the interests of the various horticultural societies by stimulating the best methods of culture, popularizing scientific advances, and

urging the planting of varieties characterized by high quality.

The Society has no limitations in regard to membership. It is open to the amateur as well as to the commercial grower of fruits, to the nurseryman as well as to the orchardist. The fees are light, being two dollars for the biennial two-year period. The reports are exceedingly valuable as well to the teacher as to the practical fruit grower.

Life membership in the Society is of two kinds: to institutions, it is secured for a thirty-year period on payment of a twenty-dollar fee. Individuals may secure life membership on payment of the same fee. In addition to the forthcoming reports, the Society gives each life member on entering, copies of as many of the back volumes of the *Transaction* as are now available. These are becoming rare and consequently valuable.

The Society is of special interest to the fruit breeder. It promotes development of improved varieties by offering prizes for distinctly worthy new kinds. To this end it maintains a committee whose duty it is to examine and report on new originations and make such recommendations as in their judgment are appropriate. One of the earlier presidents of the Society, the late Marshall P. Wilder, left a small fund which is used to provide silver and bronze medals to be awarded to originators of worthy new fruits.

The officers are: President, L. A. Goodman, Kansas City, Mo.; secretary, John Craig, Ithaca, N. Y.; treasurer, L. R. Taft, East Lansing, Mich.; executive committee, C. L. Watrous, Des Moines, Iowa; W. C. Barry, Rochester, N. Y.; C. W. Garfield, Grand Rapids, Mich.; G. L. Taber, Glen St. Mary, Fla.; W. T. Macoun, Ottawa, Canada.

NEW JERSEY FLORICULTURAL SOCIETY.

The regular monthly meeting of this Society was held at their rooms in Orange on the 8th inst. George Smith addressed the Society on "The Florist vs. the Gardener" in his usual bright and entertaining vein. His praise of the craft was natural, as only six years ago he embarked upon his present successful career as a commercial florist in East Orange after sixteen years' service in a private capacity. He spoke without notes, and therefore from the heart, touching upon the love which every successful craftsman must feel in these productions of what are only "second of God's creations." "Every man who wields a rake, shovel and spade is not a gardener;" "every man alas, is not a florist who makes up a piece." Mr. Smith himself is aesthetic; he is a student of harmony and color as applied to floral art, and his hearers regretted that the business cares of a busy life had not permitted his ideas to be more particularly set forth at length on paper.

The floral display was brilliant and select and covered most of the season's flowers. Lager & Hurrell made an excellent show of orchids, cattleyas, dendrobiums and phalaenopses, a *Dendrobium nobile* of the Ashworth variety with large pure white blooms being exhibited for the first time in this country. Thomas Jones of Summit contributed a vase of wall flowers.

Hitchings & Co., in a letter read, offered a silver cup, which it was decided to offer for Dahlia Night in October.

J. B. DAVIS.

LENOX HORTICULTURAL SOCIETY.

The annual Rose and Carnation Night of the Lenox Horticultural Society was held April 2nd and was a decided success. Seldom, if ever, have roses and carnations been seen in Berkshire County of such high quality. Upwards of fifty vases were staged in the various classes. As a scarlet, Beacon was largely exhibited, while White Perfection, Winsor, Enchantress, Bay State, Rose-Pink Enchantress and Octoroon were strongly exhibited in their various colors. An exhibit on which special praise was bestowed were two magnificent vases of Mrs. C. W. Ward and Alma Ward, exhibited by Cottage Gardens Co., and unanimously awarded a first-class certificate, the Society's highest award. Another exhibit which was greatly admired was an exceedingly fine vase of White House, exhibited by Dailedouze Bros. This variety was shown in the best of condition, which speaks well for its shipping qualities and was unanimously awarded a first-class certificate. The following is the list of the principal awards:

Elm Court Farm, first for 25 Enchantress, Winsor, 12 American Beauties and Richmond roses. A. H. Wingett, first for 25 Beacon, 12 Bay State and 12 President Carnot roses. S. Carlquist, first for 12 White Perfection, Beacon, Enchantress, Octoroon, and Rose-Pink Enchantress. J. J. Donohoe, first for 25 My Maryland, second for 12 American Beauty roses, Winsor, Beacon, M. A. Patten and Rose-Pink Enchantress; also a certificate of cultural commendation for a vase of stock Queen Alexandra.

The judges were Messrs. E. Jenkins, R. Speirs, W. Jack and A. J. Jenkins. George Breed read an interesting paper on "The Orchards of the Berkshires," dealing with the best varieties, soils, pests, general management, etc. Considerable discussion was created, most of the members asking questions, which Mr. Breed answered in a very able manner. He was accorded a hearty vote of thanks.

GEORGE H. INSTONE, Sec'y.

FLORISTS' CLUB OF PHILADELPHIA.

The regular monthly meeting of the above club was held on the 5th inst., Alfred Burton, vice-president, in the chair. There was little of any moment outside of routine business. Most of the members are apparently still unrecovered from the Easter rush. Henry I. Faust read a paper on "Culture of Easter Lilies," in which he has been quite successful for several years. George Anderson, Fred Hahman and Dennis T. Connor took part in the discussion. Antoine Wintzer will be the speaker at the May meeting. Samuel Batchelor exhibited a vase of fine callas showing exceptionally good culture.

CLUB AND SOCIETY NOTES.

The Western Horticultural Society has changed its name to Manitoba Horticultural and Forestry Association.

The regular monthly meeting of the Chicago Florists' Club, Thursday, April 7, was well attended. The club being so fortunate as to possess \$600, it was voted to put it out at interest. A

committee to further the arrangements for the fall flower show was appointed.

The preliminary premium list of the St. Louis Horticultural Society's fourth fall floral exhibition and pomological display has been issued. The show will be held at the Coliseum, on November 8 to 12, 1910. The prizes are liberal, aggregating over \$2,200. Copies of the schedule and other information may be had on application to Otto G. Koenig, 6473 Florissant Ave., St. Louis, Mo.

PERSONAL.

John D. Duly is now the gardener at the Mrs. F. W. Andrews estate, near Newport, R. I.

John L. Wyland, of Allison Park, Pa., has announced his intention of selling out and moving West.

Oliver Hancock is now with Honaker at North Jackson St., Lexington, Ky. Mr. Hancock was formerly of Columbus, Ohio.

A. M. Holter has resigned his position as florist at Liberty Park, Salt Lake City, Utah, and will start in business for himself.

E. Harney is now on the decorative staff of Randolph & McClements, Pittsburg, Pa. He was formerly with Faulk & Furnier.

W. Crighton, formerly at 247 W. 25th street, New York City, is now gardener for J. G. Wilson, Larchmont Manor, New York.

Thomas Redmayne will devote his time to landscape gardening, having severed his connection with the Hotel Rafael at San Rafael, Calif.

Peter Weiland, of the firm of Weiland & Olinger of New Castle, Ind., and Cincinnati, Ohio, who is suffering with rheumatism, left for Hot Springs last Tuesday.

Chas. Brash has resigned his position as gardener at the University Greenhouses, Champaign, Ill., to accept a position at Paxton with Morgan, Adams & Co.

Visitors in Boston:—Al. Osterman, of Osterman & Steele, Springfield, Mass.; Martin Reukauf, Sydney Bayersdorfer and Stephen Green, of H. Bayersdorfer & Co., Phila.

Charles Newton, who was lately gardener for M. I. T. Burden, at Newport, R. I., is now in charge of the greenhouses of the R. T. Wilson estate at Palmetto Bluffs, South Carolina.

Andrew J. Pow has resigned his position as head gardener at the "Breakers" Mrs. Cornelius Vanderbilt's Newport, R. I. residence, his resignation to take effect April 15th.

William Miller, who has been employed in the greenhouses there for many years, succeeds Andrew J. Pow as gardener for Mrs. Cornelius Vanderbilt, at "The Breakers," Newport, R. I.

Providence, R. I.—John F. Wood, florist, was petitioned into involuntary bankruptcy on April 9.

THE GROWING OF LILIES FOR EASTER.

Paper by Henry I. Faust, before the Philadelphia Florists' Club, at its April meeting.

I do not suppose there is anything grown for Easter more uncertain and requiring a greater amount of skill and attention than the lily. To make this paper interesting it has been suggested that I take up the entire subject of forcing lilies from years ago to years to come, to illustrate my subject by samples of well-grown and diseased plants, in fact, to enter upon a long and learned discourse and kick up such a lot of dust and baffle my subject to such an extent that you would have to catch on to my coat tail in order to follow me. But in this I saw no use. The diseased plants you all have seen enough of; you have had a heart's scald of them—the good ones are all sold.

As far as my experience goes there are only two varieties of lilies worth attempting for Easter, the Giganteum and the Formosa. To grow in quantity and to produce good, even results there is at present only one lily, the Giganteum. This is a variety almost perfect—it comes true to its name; for health it is all that could be desired. This year out of 13,000 bulbs I did not have to throw out ten plants from disease; but as far as health goes I can give the Formosa an equally good character.

The first essential is to get good bulbs. I do not think it makes any difference from whom you procure them; any house of repute can supply you. My bulbs this year came in three separate lots. I saw no difference, they were all in perfect condition. Just as soon as you receive your bulbs get them potted. I have a way of potting that may interest you as I never knew anyone else to pot in the same way. It is a very quick and cheap way of doing what would often in the ordinary way of potting be a slow and worrisome job, especially when you grow in quantity. A few days before we receive our bulbs we have a large space cleared on the ground near the soil pile; we then cover this space with 2000 to 2500 empty 6-inch pots, say 20 to 25 pots wide to 100 long, then have a man fill the pots about two-thirds full of soil. When the bulbs arrive another 2000 to 2500 pots are placed on the floor, the bulb cases are opened and sorted, selecting all the best bulbs in the case, the cullings being kept separate. The good bulbs are for growing on in a 6-inch pot; the cullings we place two bulbs in a pot. We take a 16-foot board to place upon top of the pots to stand, or rather kneel upon, then we start to plant, two men planting and two following up filling the pots, and so on until the end.

In filling the pots we throw plenty of soil on top, levelling it with the back of a rake. In this way last fall we did 10,400 pots in three days. I think you will acknowledge this to be much more expeditious than the usual way of potting at a bench; all the work, especially selecting the bulbs and planting, being done at a minimum cost by two laboring men (not interfering at all with our regular work). The bulbs are now ready to wheel inside to be placed under a bench, or, which is just as well, left out and covered up carefully to be brought in at your convenience. We mostly leave

ours out until we are rid of the chrysanthemums, although it does not hurt to bring them in at once. We always like to have our lilies inside on the bench by the 15th of December, and that reminds me of the great difference in forcing a lily for Easter.

Years ago when we first commenced growing lilies, we grew Harrisii, getting our bulbs in August or early September. We would pot at once and have them two or three inches high when brought inside, but we always had trouble getting them into bloom for Easter. In later years, since the Japanese bulbs have been grown, although we do not get them until November, and often late November, we have no trouble, although as in this year needlessly anxious.

We always start the lilies off at a cool temperature and hold them in this temperature according to the date of Easter. The longer they stay at a cool temperature in the early stage the better. After we see they are well-rooted and starting to grow the temperature can be increased up to any reasonable extent until they show evidence of making buds, then you had better go slow. From the time that they first start to make buds to the time the bud is well developed is what might be called the critical period; stunted plants or blasted buds may very easily be your lot. All that can be said of this period is "Beware."

In growing a lily for Easter the credit is due to two people, the fireman and the man at the hose. There is no plant that loves syringing more than a lily, yet no plant resents more quickly an oversupply of water at the roots. I often on a bright day syringe two or three times, and have frequently at night gone into the houses and given them a good syringing, wetting down the paths, and also the steam pipes. I think syringing is very beneficial in growing lilies, especially if you have an apparatus for heating your water. We have an arrangement for tempering the water that enables us to have a constant flow at a temperature of 70 degrees and upwards. This water heater is a very simple apparatus and anyone who uses steam heat could at the expense of a few dollars so equip themselves.

After a lily is in condition to stand it, I believe the quicker it is grown the better, only, of course, remembering to gauge the growth and development according to the date for Easter. I must say that this year was one calculated to try men's souls. We did not get our bulbs until the 18th of November, and on account of the late chrysanthemums could not get them on the benches until the 24th of December. Out of 10,000 pots I do not believe 25 showed growth above the soil. Then came the month of anxiety and worry.

It is usually calculated that it takes six weeks for a lily flower to develop from the time the bud first shows. It can be done in less. I would prefer to have six weeks to do it in than to attempt to do it in four, yet it can be done in four. Just to satisfy myself how quickly a lily could be brought into bloom, I this year marked a few plants. On the 22nd of February I selected a few plants, marking them "No buds in sight." On the 25th buds could be seen on several, and by the 27th all showed bud. We were then running a night temperature of 70 de-

grees, or a little over, letting the day temperature with sun shining run higher. They were all in bloom in time for Easter, just taking, you see, from four weeks to a month from the time of first showing of buds to the blooming period.

I think I am speaking advisedly when I say it does not pay to grow lilies to sell at 10 cents. Now don't misunderstand me on this point; I did not mean that a lily cannot be grown and sold at 10 cents per bud and still yield sufficient margin for the grower to pay his debts; but that is all it will yield. It will give the grower no such profit as will in any way reward him for his risk, trouble and anxiety.

Right at this point I cannot refrain from wondering if we are conducting our business in as wise a manner as we should. Are we not just stumbling along in the dark? Every year as long as I can remember I have heard the report that lilies were going to be scarce, but without and real foundation. No one knows how many lilies it takes to fill the requirements of the city of Philadelphia. Don't you think we should know? If we only had a way of finding out we would commence to be on a business basis; we would then be in a position to regulate prices. I have thought that a "Florists' Board of Trade," with committees to look after the different branches of the trade might be a benefit. The committee on lilies to get reports from all the seed houses and know just how many bulbs were in the growers' hands, or get the report direct from the grower, with monthly reports as to the progress, condition and number expected to be put on the market, in much the same way as the Government gets its agriculture reports. I believe if we all were to cut down the number of lilies grown, 25 per cent., and try to grow better lilies and a better price, it would be a move in the right direction.

There is one thing sure, none of us make enough money. We have the most anxious, worrisome business in the world, everything we buy costs more, and still more, but everytime we get our returns we find them marked less. The only ones I see making any money on flowers are the street fakirs and the commission men, yet I think the commission man deserves all he gets. Without these hustling and enterprising business men who are ever advertising to find an outlet for our goods, I fear often our business would be in a bad way. Two-thirds of the time the flower market is glutted, prices demoralized and the growers building more houses to throw more stuff upon the market, to compete with themselves. Would it not be advisable to call a halt? Let every grower who has more than 10,000 feet of glass pledge himself not to build any more for five years until the market catches up with the supply. Almost every week during the seasons we read in the trade papers of carnations, roses, violets, or lilies being a glut on the market. Let us work for prosperity and better prices, not for the street fakirs.

Lilies, to afford the grower a proper profit should bring 15 cents per flower. We have been too much in the habit of rubbing shoulders with poverty. Let us put ourselves upon an equality with other professions and get more of the sweets of life and less of the bitter.

ROSES

For Decoration Day

Roses always sell well on Decoration Day. Potted NOW, they will be in good time for this important event.

Mr. Florist:—Our stock is in grand condition, the quality the best, true to name and in fine dormant condition. ORDER TODAY AND BE ON TIME.

Hardy Hybrid Roses

We offer extra-strong forcing two-year-old dormant, low-budded stock, in the following varieties, true to name:

Price, 75c. for 5 (of one variety), \$12.00 per 100, \$110.00 per 1000 (immediate delivery).

Abel Carriere. Crimson.
Alfred Colomb. Carmine-crimson.
Anne de Diesbach. Bright carmine.
Ball of Snow (Boule de Neige). Pure white.
Baron de Bonstetten. Blackish crimson.
Baroness Rothschild. Satiny pink.
Capt. Christy. Flesh color.
Cllo. Satin blush.
Duke of Cornaught. Rosy crimson.
Duke of Edinburgh. Bright vermillion.
Eugene Verdier. Crimson-violet.
Fisher Holmes. Dark crimson.
Frau Karl Druschki. The finest white.
Gloire de Margottin. Dazzling red.
Gen. Jacqueminot. Brilliant crimson.
John Hopper. Bright rose.
La France. Pink.
Mme. Charles Wood. Bright carmine.
Margaret Dickson. White, with pale flesh.
Marshall P. Wilder. Cherry rose.
Magna Charta. Dark pink.
Mme. Gabriel Luizet. Satiny pink.
Mrs. John Laing. Satiny pink.
Paul Neyron. Dark Pink.
Perle des Blanchés. White.
Persian Yellow. Yellow.
Prince Camille de Rohan. Dark crimson.
Ulrich Brunner. Cherry-red.

For prices see above.

Also we have on hand a very fine collection of Hybrid Teas, Everblooming Roses, such as Killarney, Cochet pink and white, Kaiserins, etc.

Prices upon application

Ramblers and Other Climbing Roses

CRIMSON RAMBLER. American Grown. The only stock for forcing. Large heavy plants, two years old, mossed and packed in bundles of 10, 3 to 4 feet, \$1.25 for 10, \$12.00 per 100; 4 to 5 feet, \$1.75 for 10, \$15.00 per 100; 5 to 6 feet, extra heavy, \$2.25 for 10, \$20.00 per 100.

PAUL'S CARMINE PILLAR. Flowers large and free; color rosy carmine. Two-year-old, field grown. 85c for 5, \$15.00 per 100.

DOROTHY PERKINS. Lovely shell-pink color. \$1.25 for 10, \$12.00 per 100.

TACSENDSCHEON. The new Rambler Rose. The name translated means a "thousand beauties." Color beautiful rose, shading to pink. \$2.25 for 10, \$20.00 per 100.

LADY GAY. A seedling from the popular Crimson Rambler, which it resembles in habit and general effect. The flowers are of a delicate cherry-pink color, which fades to soft white. Strong plants, field-grown, 4 to 5 feet. \$1.75 for 10, \$15.00 per 100.

Flower of Fairfield The Everblooming Crimson Rambler

This variety is a sport from the beautiful Crimson Rambler, is similar in color, more brilliant and lasting than the old favorite. It also possesses the further advantage over the Crimson Rambler in the fact that it flowers profusely on the young wood the first year. Flower of Fairfield is a vigorous grower and free bloomer. It starts to bloom early in the Spring and continues until late in the Autumn. It is rightly termed "perpetual blooming." 40c each, \$3.50 for 10, \$30.00 per 100.

Veilchenblau (Violet-Blue)

It has long been the desire of rosarians to secure a blue Rose. In Veilchenblau we have practically approached this color. The steel blue flowers of this new Rose appear in large clusters, are semi-double, of medium size and keep in bloom 2 long time. The showy yellow stamens, contrasting with the blue flower, give the whole a striking appearance. 60c each, \$5.75 for 10, \$55.00 per 100.

Baby Rambler Roses

BABY DOROTHY. The same in habit as Baby Rambler, but the color of the flowers is similar to Dorothy Perkins. It makes an excellent pot plant for forcing. Price for strong, field-grown plants, 85c for 5, \$16.00 per 100.

CATHERINE SEIMETH. A White Baby Rambler Rose, larger and better flowers than the type. White with yellowish center. 85c for 5, \$15.00 per 100.

MRS. WM. H. CUTBUSH. Color intense crimson and exceptionally free-flowering. 85c for 5, \$15.00 per 100.

MME. NORBERT LEVAVASSEUR (Baby Rambler). Strong, field-grown plants. 85c for 5, \$15.00 per 100.

THE TREE BABY RAMBLER. (Grown as a Standard). The popularity of the Baby Rambler has suggested the growing of it as a tree or standard. 40c each, \$3.75 for 10, \$35.00 per 100.

BABY DOROTHY. (Grown as a Standard.) For description, see above. 75c each, \$6.25 for 10, \$60.00 per 100.

We also have a fine stock of Hybrids and Hybrid Teas, standard grown.

Something New in Roses for Florists

HALF STANDARD BABY RAMBLERS

These are Baby Ramblers, grown on stems or standards about one and one-half feet high, and will be a novelty for your trade you cannot profitably overlook. They are offered for the first time in this country in the following varieties:

BABY DOROTHY (Half standard). Deep pink. 60c each, \$6.00 per doz., \$45.00 per 100.

BABY RAMBLER (Half standard). Crimson. 45c each, \$4.50 per doz., \$35.00 per 100.

BABY CATHERINE SEIMETH (Half standard). White. 45c each, \$4.50 per doz., \$35.00 per 100.

BABY "STARS AND STRIPES" (Half standard). White and red grafted on the same plant; most attractive. 50c each, \$5.00 per doz., \$40.00 per 100.

ARTHUR T. BODDINGTON

Seedsman

342 West 14th Street, NEW YORK CITY, N. Y.

SEASONABLE NOTES ON CULTURE OF FLORISTS' STOCK.

Antirrhinums.

It is time now to start stock for next winter's crop of flowers. The seeds of the tall and most improved kinds in separate colors—white, pink, red and yellow—are good for indoor bench culture. Where antirrhinums are raised somewhat extensively, it is best to always have seedlings on hand as a source for annual propagation. The blooms of the seedlings are never quite so uniform in color as those raised by cuttings. The second growth coming in the form of sturdy shoots from the base of the plant makes the best cuttings that will produce magnificent long, large flowering spikes. They can be grown on in pots, with frequent shifting during the summer, which is the best way. Either cuttings or seedlings, pinched back as they grow, will make strong bushy plants by fall for benching. They are a very satisfactory flower for the florist to grow, as they are persistent bloomers and have excellent lasting qualities. They are good to follow after chrysanthemums.

Cosmos.

To obtain the best results with these very desirable flowers sow the seed in April in flats or frame; pot into small pots when large enough, and shift into larger pots when required. Give the plants the fullest light, in order to induce a strong growth. They can also be grown in boxes. Boxes about two feet long by eight inches wide and six inches deep will hold about six plants. After planting protect from the scorching sun for a few days; stand them outside where they will be convenient to the hose. The cosmos blooms so late in the fall, that in the north frosts frequently destroy it long before its season of bloom is over. For this reason it is well to grow it in pots or boxes all summer and take it indoors in September. There are many places in your houses that would be unoccupied otherwise.

Cyclamen.

Cyclamens that were transferred from seed flats to other flats some eight or ten weeks ago will by this time be crowding. They should now be ready to go into 3-inch pots. An ideal mixture for them is two parts fresh loam sifted, one of leaf mold and a fourth of well-rotted cow or sheep manure. When potting leave at least one-half of the corm above the soil. They are benefited by a light shading during the hottest hours of the day. They want abundance of ventilation on all warm days, but be cautious as to cold draughts. Never let them suffer for the want of water and syringe on all fine days. They make roots very fast, but in no case ever over-pot. As they have filled the pots with roots they will need a shift from time to time. They can be grown in the house up to June, when they can be plunged up to their rims in coal ashes in some frame outside.

Gladiolus.

One of the most useful and easily handled and lasting of our summer flowers. Plant the small bulbs first and keep the large ones until the last of June for a succession. Get the soil in the best possible condition before planting. Work it deep and make it rich with well-rotted manure. Get the

PITTSBURGH CONSERVATORY DISPLAYS.

The picture which we have used as a cover illustration gives only a faint idea of the magnificent Easter display at the conservatories of H. J. Heinz, where J. Featherstone and his staff had arranged one of the most unique exhibitions ever seen in this city. The exhibit was admired by a large crowd of enthusiastic visitors.

The best effects were seen in one of the new U-Bar show houses, 25 x 50 feet. The two centre tables were converted into one, making a bench 12 x 40 feet, which was an arrangement of choice flowering shrubs, bulbs and spring flowers which would do credit to any of the horticultural fraternity in an exhibition hall. Raised to the roof in the centre was a fine specimen of *Caryota urens*, on each side of which were specimen *Areca lutescens*; then as dot plants were used well-flowered samples of standard *Viburnum opulus*, lilacs, laburnums, *Azalea mollis*, *Prunus pissardii* and roses, with a ground work of hydrangeas, *Azalea indica*, *Rhododendron Pink Pearl*, *Azalea mollis*, of which Van Thol *Altercatens* and seedlings were the best. Some fine specimens of *Malus* were also used as dot plants. Near the margins of the benches were arranged banks of hyacinths, tulips, and narcissi, outlined with *Primula obconica*, lily of the valley, etc.

At the furthest end of the house was

best varieties possible to start with, for you can increase your stock very rapidly after the first year. They should be planted in drills from 2 to 3 feet apart and 2 to 3 inches apart in the rows. If the corms are large they can be planted four inches deep, and when smaller an inch less. Cultivation should be kept up till the plants have attained 6 inches in height, after which they should be disturbed as little as possible. Mulching in summer to keep the soil cool is very beneficial. The spikes can be cut when the first flower opens. Removing the terminal

arranged a little natural garden effect which made quite a hit with the visitors. Pink-flowered hawthorn, *Malus*, standard roses and wistarias formed the centres of moss-covered hills where crocuses, English and Japanese primroses, *Scilla Siberica*, double daisies, lachenalias, grape hyacinths and lily of the valley appeared to be growing naturally, producing a charming effect. The extreme end of this house was completely covered with a bank of genistas, azaleas, *Cineraria stellata*, callas and Easter lilies, the whole blending harmoniously in a charming pandemonium of color. One of the vestibules was filled with hybrid roses and stocks, another with blooming orchids in profusion.

In the plant house were fine specimens of *Clerodendron Balfourii* covered with flowers. A superb plant of *Acacia paradoxa*, some good amaryllis, gloxinias, ferns, yellow callas, ripe oranges and hanging baskets of ferns.

The new grapery contains besides the planting canes, which have already made good growth, some fruiting canes in flower and figs well on towards ripening. In the peach house are peaches, nectarines, plums, apples and cherries in the flowering stage and ripe strawberries. Lettuce, rhubarb, sea kale and radish in the vegetable house just ready for the table were as much admired as the flowers.

JAMES HUTCHINSON.

buds will stop stalk development and give strength to the larger and earlier maturing flowers. The best time of the day for cutting is early in the morning.

Lilies for Decoration Day.

Much of the plant grower's attention now centers in the stock to be had in readiness for the coming Memorial Day. To time lilies with anything like precision for any date calls for a fair amount of good judgment. Lilies that were taken in from the frames the first week of March will come along with but very little forcing. They should

For Decoration Day

We have this year the most complete, elegant and salable stock of florists' goods ever offered for the MEMORIAL DAY trade. Our line of PRESERVED FOLIAGE and other INDESTRUCTIBLE DECORATIVE MATERIAL cannot be excelled and the name of BAYERSDORFER & CO., on the package guarantees that goods and prices are

All Right

Don't wait until the last moment to make inquiry. SEND NOW for list of Standard and New Goods for this important occasion. All you have to do is to show the goods. THEY'LL SELL. Wreaths of Cycas, Magnolia, Fern and other foliage in Green, Autumn Tints and Moss effects are among the novelties.

H. BAYERSDORFER & CO.

The Florists' Supply House of America

1129 Arch Street, Philadelphia, Pa.

show their buds by the last week of April and not later than the first week in May to be right for this date. If any of them are showing buds now they should be placed in the coolest house you have. Making a rapid growth at this time of the year they will need great quantities of water at the roots, fumigation at regular intervals, frequent syringing and the utmost care in ventilation. Just at this time a sharp lookout must be kept for greenfly that get established down in the crown of the buds where smoke fails to reach them. Nicotine applied not too strong is the best remedy.

Lily of the Valley.

Lily of the valley that is unprotected outside seldom gives good satisfaction. Those who have beds of it should have their beds of such size that they can be covered with frames that will prevent the heavy rains from injuring the flowers. You can thus have flowers two weeks ahead of those that comes along naturally. They will take plenty of water up to when the bells begin to show white. Two weeks before the flowers are fully developed a shade on the glass will improve the quality of the blooms.

JOHN J. M. FARRELL.

Mr. Farrell's next notes will be on Aerides, Candytuft, Campanulas, Herbaceous Perennials, Hydrangeas and care of Shrubs after Easter.

Peirce Bros. of Waltham, Mass., are owners of several large automobiles used for transporting flowers and plants to market in Boston. One of them got unmanageable on Beacon street last Friday and ripped a piece out of the fence surrounding Boston Common, but nobody was hurt.

CARNATION WHITE FAIR MAID.

At the time this white sport from Fair Maid was put on the market we did not hesitate to assert its prospective value as a carnation of the "bread and butter" class. In the ambition to produce and the rivalry to possess the splendid show varieties that have appeared in the meantime, White Fair Maid has apparently been forgotten or discarded, although its remarkable freedom of bloom, its grand perfume and fine keeping qualities place it in a class almost by itself for the everyday use of the florist who retails his own product. We were glad to hear so shrewd and capable a grower as John McKenzie of North Cambridge, Mass., a few days ago assert most emphatically that White Fair Maid is the most profitable and altogether desirable carnation he has on his place. He says no other white now on the market can equal it, and he has tried most of them.

PETUNIA BAR HARBOR BEAUTY.

Vernon T. Sherwood writes us a line in regard to the history of this famous petunia. It came originally from Vilmorin and was given the name under which it is now known by A. T. Bodington. Mr. Pulitzer's gardener says it is the only trailing plant for window boxes that will keep good on his storm-whipped piazza, English ivy, Nepeta glechoma, geraniums, vincas, nasturtiums and other things having failed to do it and its keeping qualities are remarkable, the plants being a blaze of color all season—in fact, it is conspicuous from the decks of passing steamers.

INCORPORATED.

Gerrardstown, W. Va.—W. S. Miller Co., nursery and orchard business, capital stock \$35,000. Incorporators, L. P. Miller, Bessie L. Miller and Nannie C. Miller of Gerrardstown, Mary Lou Winn of Sumpters, S. C., and William H. Miller of Enon Valley, Pa.

APHINE

The practicability of spraying, compared to fumigating or vaporizing is being more generally recognized than heretofore among those engaged in floriculture and horticulture.

Spraying, when operated on scientific lines, is proving the most economical method of combating insect pests. Fumigation requires the filling of the house. Spraying requires application to that portion of the house only where the insects make their appearance.

Fumigation is not beneficial to flower or foliage. Spraying with Aphine does not effect them in the least; in fact it invigorates the plants.

Send for descriptive circular

Aphine Manufacturing Company

MADISON, N. J.

HARDY FIELDGROWN ROSES

We offer a fine stock of the following roses, viz.:—

PUBLICATIONS RECEIVED.

Proceedings of the Eleventh Annual Convention of the American Association of Park Superintendents. This volume contains a full account of the proceedings, discussions, etc.; at the meeting in Seattle, Washington, August 9-11, 1909.

Success in Market Gardening, by Herbert Rawson. This latest addition to "The Garden Library," published by Doubleday, Page & Co., New York, is, as explained in the preface, a revised and enlarged edition of the book of the same title written several years ago by the late W. W. Rawson, father of the present author. The name of Rawson is known and recognized throughout the length and breadth of the land as standing at the head in all that appertains to the science and practice of market gardening under glass and in the open. As to the value of the original publication its place was fully recognized long ago and it ran through several editions. As to the revisions and additions which now bring it fully up to date in every respect it is only necessary to allude to the fact that Mr. Herbert Rawson has been brought up in the business of market gardening and from association with his father in the actual business of growing is well qualified to exemplify the practices and ideals of that keen-sighted, energetic man. Market gardening of the intensive kind is making an amazing growth and no one interested in it can afford to be without this useful guide book. The price is net \$1.10. Copies can be supplied by HORTICULTURE.

NEWS NOTES.

Boston, Mass.—A meeting of the assenting creditors of Frank H. Houghton will be held on Thursday, April 21, 1910, at 7.30 p. m., at room 320, Tremont Building, 73 Tremont street, Boston, Mass. A full representation is desired to vote on the question of the assignee's continuing the business for another year.

Waltham, Mass.—W. N. Craig of Langwater Gardens, North Easton, Mass., gave a very entertaining and instructive address on "Floriculture" before the Waltham Woman's Club on the evening of April 5. Mr. Craig gave hearty approval to the home garden movement and gave advice on the planting and care of plants of many desirable varieties for house and outdoor adornment.

BEACON CARNATION CUTTINGS

Dreer's Select Hardy Vines and Climbers

AKEBIA QUINATA.

We offer extra heavy pot-grown plants of this handsome climber.
Strong 4-inch pots, \$1.25 per doz.; \$8.00 per 100.
Heavy 6 " " 2.00 " 15.00 "

AMPELOPSIS VEITCHII.

Strong 2-year-old, \$1.50 per doz.; \$10.00 per 100.
Extra selected plants, \$2.00 per doz.; \$15.00 per 100.

AMPELOPSIS VIRGINICA. (Virginia Creeper.)

Strong 2-year-old plants, \$1.25 per dozen; \$8.00 per 100.

AMPELOPSIS TRICOLOR. (Vitis Heterophylla Variegata.)
Very strong, 3-inch pots, \$1.00 per doz.; \$7.00 per 100.

AMPELOPSIS ENGELMANNI.

Extra strong, 2-year-old plants of this most useful variety.
\$1.75 per doz.; \$12.00 per 100.

AMPELOPSIS LOWII.

A new variety of the same general character as A. Veitchii and clinging to the smoothest surface without support, but with foliage much smaller and deeply cut, giving a light and airy appearance to the plant not possessed by the older sort. In spring and summer the leaves are of a bright apple-green color, changing to a brilliant crimson and scarlet in the autumn. 60 cents each; \$6.50 per doz.

APIOS TUBEROSA.

Strong tubers, \$2.00 per 100.

ARISTOLOCHIA SIPHO.

(Dutchman's Pipe Vine.)

Extra heavy, \$4.00 per doz.; \$30.00 per 100.

BIGNONIA. (Trumpet Creeper.)

Grandiflora. Strong plants, \$3.00 per doz.; \$20.00 per 100.

Radicans. Strong plants, \$1.50 per doz.; \$10.00 per 100.

CELASTRUS SCANDENS.

(Bitter Sweet, or Wax Work.)

Extra heavy plants, \$2.00 per doz.; \$15.00 per 100.

CINNAMON VINE.

Strong roots, 40 cents per doz.; \$3.00 per 100.

CLEMATIS PANICULATA.

(Japanese Virgin's Bower.)

We have an immense stock of exceptionally fine plants of this most popular of all the Clematis, and offer

Strong 2-year-old plants, \$1.50 per doz.; \$10.00 per 100; \$90.00 per 1000.

CLEMATIS MONTANA GRANDIFLORA.

The plant is of stronger growth than any other Clematis, not subject to the attacks of insects, and succeeds under the most adverse conditions. It is perfectly hardy, having withstood without the least damage in a most unfavorable position in our trial grounds. Its flowers, which resemble the Anemone or Windflower, are snow white, 1½ to 2 inches in diameter, and frequently begin to expand as early as the last week in April, continuing well through May, and are produced in such masses as to completely hide the plant. Extra strong, 2-year-old plants, 35 cents each; \$3.50 per dozen.

CLEMATIS MONTANA RUBENS.

Identical in every way with the white flowered variety, excepting in color, which is of a most pleasing shade of soft rosy red.

We offer a limited stock of strong plants, 75 cents each; \$8.00 per dozen.

EUONYMUS RADICANS VARIEGATA.

A nice lot of 3-inch pots, \$1.00 per doz.; \$7.00 per 100.

LARGE-FLOWERING HARDY CLEMATIS.

We have again this season a fine stock of good, strong plants, two years old, own roots.

Boskoop Seedling or Sieboldi. Extra large lavender.

Duchess of Edinburgh. Double pure white.

Henryi. Finest large single white.

Jackmani. The popular dark rich royal purple.

Madam Baron Veillard. Light rose, shaded lilac.

Ville de Lyon. Bright carmine red.

30 cts. each; \$3.00 per doz.; \$20.00 per 100.

VARIOUS CLEMATIS.

Nudiflorum. Yellow, 5-inch, pot-grown.....	\$1 50	\$10 00
Officinale. White, 5-inch, pot-grown.....	1 50	10 00
Primulinum. An introduction from China, its flowers fully double in size to J. 'nudiflorum'; these appear simultaneously with the leaves. Strong plants, 35 cents each; \$3.50 per doz.		

LATHYRUS LATIFOLIUS.

(Everlasting Pea.)

	Per doz.	Per 100
Albus. White.....	\$1 00	\$7 00
Splendens. Rose.....	1 00	7 00
"White Pearl." A magnificent, new, pure white variety, with individual flowers fully double the size of the ordinary Everlasting Pea. These are produced in really gigantic trusses. We offer very strong roots at 20 cents each; \$2.00 per dozen.		

POLYGONUM.

Baldschuanicum. This beautiful, hardy, woody, twining plant is one of the most interesting and showy flowering climbers. Its flowers are white, and are borne in great feathery sprays at the extremities of the branches. Strong plants, 35 cents each; \$3.50 per dozen.

Multiflorum. A very desirable climbing plant, which seems peculiarly adapted to our climatic conditions. It is of strong, rapid, but not coarse, growth, frequently attaining a height of 15 to 20 feet in one season. Its bright green, heart-shaped leaves are never bothered by insects, and during September and October it produces masses of foamy-white flowers in large trusses from the axil of each leaf. \$1.50 per dozen; \$10.00 per 100.

PUERARIA THUNBERGIANA.

(Kudzu Vine.)

We offer a large stock of strong, 1-year-old plants of this rapid growing climber. \$1.00 per doz.; \$7.00 per 100.

SCHIZOPHRAGMA HYDRANGEOIDES.

(Climbing Hydrangea.)

One of the most interesting of our hardy climbers. Its flowers, which are borne in large trusses, are similar to white Hydrangea, and when in flower during July and August, make a handsome display. A limited stock of strong plants, 75 cents each.

WISTARIA SINENSIS.

Extra heavy two-year-old plants, 5 to 6 feet long, well rooted.

	Per doz.	Per 100
Blue	\$3 50	\$25 00
White	4 00	30 00

VITIS HENRYANA.

A new climber from China, foliage similar in outline but not as large as the Virginia creeper, foliage of great substance and prettily variegated, the ground-color being deep velvety-green, while the midrib and veins are of a silvery white. 60 cts. each; \$6.00 per doz.

Henry A. Dreer,

714 Chestnut St.,

PHILADELPHIA, PA.

Ready With the Finest Lot of Palms We've Ever Put Out!

You have probably never seen a more handsome collection of Palms than we are offering this season—grown right here from seed in our houses by men who make that their business. Even with our past experience as Palm growers, we feel that we have made a new record with our present stock.

You will get better satisfaction—better service—from our Palms than from most others you can secure. They are of the

best quality obtainable; our large customers—purchasers who demand and pay for the best—come back to us, year after year, for their extensive stocks.

Our Palms are strictly home-grown; they are clean, thrifty, vigorous, and are worth more, plant for plant, than foreign-grown Palms of equal size; yet ours cost no more than imported plants, as the following prices will prove:

THE BAY STATE NURSERIES,

NORTH ABINGTON, MASS.

NEWS NOTES.

J. A. Peterson has sent out a handsome colored plate of his new seedling begonia, "Glory of Cincinnati." The picture represents a plant in 4-inch pot and well displays the wonderful profusion of bloom on this sterling novelty.

Pansies, like most other plants, are advanced far beyond the average at this season of the year in the vicinity of Boston, being practically in the condition now that they would be in middle May in ordinary years. Leonard Cousins, Jr., at Concord Junction has 250,000 of them and they are a sight rarely seen in April in this latitude. He is shipping them largely to the trade.

Harry S. Miller, at Bella Vista, West Fairview, Penn., sustained a loss of about \$3,000 on Sunday, April 11. A forest fire came to within a few rods of Mr. Miller's greenhouses which, together with his residence, were saved after much hard work by a bucket

brigade, the fire having put out of commission his pipe line from a spring some distance up the mountain. The loss was confined to timber land, wagons and some tools.

Privet GROWN for Hedges

Satisfactory hedges are only obtained by proper nursery treatment. Plants **not** properly treated in the nursery must be cut back close to the ground and practically started all over again. Our California privet is grown specially for hedges and makes a dense growth of dark green, very shiny, ornamental foliage.

Henry F. Michell Company, 518-1018 Market St., PHILADELPHIA, PA.

Seed Trade

A Breathing Spell.

The cool weather of the past week has slowed down the rush of trade to a sufficient extent to allow retail houses to catch up with arrears. These little outbursts of winter are really a blessing to the retail seedsmen, enabling him to catch up with delayed orders and get a breath or two before the next rush. They relieve the high pressure under which most retailers work at this season of the year, and allow them to get through the larger part of the year's work in three or four months.

The Help Problem.

The matter of experienced competent help has become more acute than ever before, and most houses are working under more or less of a handicap in this respect. Reference has been made to it so often in trade journals that it seems needless to mention it again, but the fact is it will not down, and continues to vex the souls of those who are directing affairs wherever there is a large retail and counter trade. We have no solution of this problem to offer at present. Wish we had.

Onion Sets and Seed Corn.

There are reports that onion sets are cleaning up well, and in fact, that high grade sets are really becoming short, particularly whites. Onion sets and potatoes seem to have reversed form. Sugar corn has become very scarce and early varieties in particular. Present prices show a sharp advance over those ruling in January. The Corys, White and Red are quoted

at \$3.50 to \$4.00, and are very scarce even at these figures. Golden Bantam is procurable at around \$4.00 to \$4.25 and Crosley's Early and Early Minnesota at \$3.00 to \$3.50. Late and medium early varieties are easier, but even these are up 50c. per bu. above January quotations. Good sound field corn of strong germination is very scarce, and all varieties of seed corn are very strong. If any considerable replanting should be necessary, where could the seed be found?

The Pea Situation.

Peas are going into the ground rapidly and we are likely to hear many complaints of poor stands, as a considerable percentage of the seed is almost certain to fail of germination and especially the sweet wrinkled varieties. Still early planting is a justifiable risk, but those who take it should not complain of failure. All large podded peas such as Gradus, Thomas Laxton, Sutton's Excelsior, Duke of Albany, Alderman, Telephone, etc., are now out of the market, and are not procurable in quantity at any price. If early plantings of these are lost, it will be irreparable, as there are no reserves for replanting. The same may be said of the leading varieties of green pod beans, and truck farmers should bear this continually in mind.

Notes.

There is likely to be a change soon in the firm of Howard & Morrow of Pittsfield, Mass., one of the partners retiring. This business was started nearly a quarter of a century ago, and under able management has grown to large proportions. Few firms rank higher in their immediate community or wherever known.

O. H. Dickinson, the popular seedsmen of Springfield, Mass., reports a booming trade. The genial "Dick" is supremely happy. More power to him.

The old and reliable house of Cadwell & Jones of Hartford, Conn., were never so busy as now. They are sighing for a few of those midnight suns such as our Alaska friends enjoy to enable them to keep up with their orders.

CATALOGUES RECEIVED.

Horace B. Keizer, Reading, Mass.—Illustrated Pocket List of Hardy Evergreens, Lawn Trees, etc.

E. Gill Nursery Company, West Berkeley, Cal.—Descriptive Catalogue of Roses, Palms, Shade and Ornamental Trees.

Blue Hills Nurseries, W. W. Hunt & Co., Hartford, Conn.—Catalogue of Trees, Roses, Evergreens, etc. A neat well compiled and well-printed catalogue.

W. A. Manda, South Orange, N. J.—Pocket Garden Dictionary and Catalogue of Everything Pertaining to Horticulture, 1910. Well-named. A very complete list of choice material and new introductions.

Lord & Burnham Co., New York.—Leaves from the Handy Hand Book. A glance at these sample pages will convince the reader that he should send post haste for a complete copy of the Handy Hand Book, 1910 Edition.

Wood Bros., Fishkill, N. Y.—Trade List, January to May, 1910, of Plants and Rooted Cuttings. Here is an excellent selection of cannas, carnations, chrysanthemums, grafted roses, verbenas and miscellaneous spring plants.

Julius Roehrs Company, Ruthersford, N. J.—Catalogue of Orchids. Catalogue of Stove and Greenhouse Plants. These two publications are beautifully gotten up, on heavy coated paper, and filled with superb half-tone illustrations. They well represent the leading position in the American trade which this widely-known house has attained to.

PHILADELPHIA NOTES.

Among our visitors this week:—J. B. Deamud, Chicago; Walter F. Fancourt, Doylestown; John G. Gardner, Bryn Mawr; Edward A. Parker, West Grove; Antoine Leuthy, Boston.

We had a pleasant visit this week from Kroeschell Bros. Co.'s able representative, Fred Lautenslager. This gentleman does not belie his picture. Full steam ahead all the time.

Samuel S. Pennock and five other citizens of Lansdowne are a committee to award prizes for the History Club for the best kept lawns in the borough next June. The beautifying of Darby Creek is another project the committee has at heart.

M. Rice at latest reports is scouring Europe for the latest and best in floral requisites, and the results of his quest will no doubt soon begin to materialize. The florists of America can be sure that this astute courier of progress will always find something new and good to tickle the aesthetic tastes of their customers.

Philadelphia is not much of a center for plant auction sales, but one happens once in a while. The latest was on the 11th inst. at Freeman's. A good sprinkling of the trade were present looking for bargains in roses, evergreens and shrubs. But there was nothing to be picked up cheap. Almost everything brought retail prices, and those who were looking for bargains wasted their afternoon. Walter Fancourt suggested that the high prices were an evidence that the public were educated up to appreciating and willing to pay good prices for good stock. Walter is right.

W. Atlee Burpee presided at the annual meeting of the Canadian Society held at the Hotel Walton on the 9th inst. Mr. Burpee was at his best and introduced the speakers in his own inimitable way. The affair was a great success and was given leading space in the dailies next day. Wm. Henry Maule, Howard M. Earl, Walter P. Stokes, A. E. Brown, Burnett Landreth and other seedsmen were among the guests, representing many of the brightest lights in official, business and professional life in this vicinity. Robert Craig and A. B. Scott were there to show that floriculture had a look-in. Cy. Warman, the Canadian poet and philosopher, made one of the most brilliant speeches of the evening—his slogan being "Canada's Glory Is Her Wheat." We congratulate Mr. Burpee on the successful outcome of his year in the presidency. Whatever he does, is always done well.

Of Interest to Retail Florists

FLOWER TRADE OF BARCELONA.

In transmitting a list of the leading flower dealers of Barcelona, Consul-General Frank D. Hill reports that there are no large flower stores in that Spanish city, cut flowers being generally bought on the Ramble de las Flores, a part of the principal thoroughfare, which is lined with open stalls, protected only by large umbrellas, having small stocks which are generally disposed of during the forenoon. On account of the mildness of the climate, flowers are grown out of doors the year round, the result being that during the cold snaps in winter it is almost impossible to get fine flowers of any sort—roses can not be had at any price. In spring and summer flowers are to be had in great profusion, although fine flowers seem to be always somewhat scarce. Pinks, commoner roses, camellias, etc., are the rule.

Obituary.

Mrs. W. J. Vesey.

Stricken by an attack of heart disease while riding on a street car, Mrs. Maggie S. Vesey, wife of Judge William S. Vesey, of Fort Wayne, Ind., one of the most prominent women in that city, died very suddenly on Friday evening, April 8, a moment after she had been taken from the car and assisted into a near drug store. Death was due to arteriosclerosis, combined with fatty degeneration of the heart, from which Mrs. Vesey had been suffering for some time. In all probability the fact that Mrs. Vesey had hastened in order to catch the car may have contributed to the crisis at this time.

Mrs. Vesey's age was 47 years. She was born in Decatur, a daughter of the late Judge David Studebaker, was educated at Decatur and in the Fort Wayne M. E. College, and was united in marriage to Judge Vesey on July

MRS. W. J. VESSEY

25, 1882. Six children were born to this union, all of them, with the husband and father, surviving. Mrs. Vesey's love for flowers had led her to engage with her husband in business as a florist, the firm name being W. J. and M. S. Vesey. Under her management mainly, the business has of late years assumed large proportions and an extensive range of greenhouses are conducted, carnations being a strong specialty. Judge Vesey is a member of the Executive Board of the Society of American Florists and Mrs. Vesey, besides being active in the American Carnation Society, was prominent in the affairs of the Ladies' S. A. F., which she helped to organize and of which she was president two years ago.

Socially, Mrs. Vesey was widely known and her sunny temperament made her very popular. From what we have seen and know of her we think hers was a very happy life. Vivacious and companionable always she not only took the fullest enjoyment for herself, but diffused it irresistibly among all with whom she was brought

into association. She will be sorely missed.

Mrs. Anton Kill.

Mrs. Anton Kill, mother of Leonard Kill formerly of Chicago and now of Los Angeles, Cal., died at her home on Winnemac Ave., Chicago, at the age of 64. Funeral was from St. Mathew's church, Saturday, April 9.

NEWS NOTES.

Chicago, Ill.—The Beaudry Nursery Co. has purchased 100 acres as an addition to their nursery grounds and intend to enter the wholesale field.

Davenport, Ia.—Henry Pauli has purchased the H. B. Campbell place, adjoining his present plant, which consists of 2½ acres of land and three houses 23 x 100 feet each.

Amherst, Mass.—A. Foster Johnson, 5 and 6 Woodside Ave., will conduct a general florist and horticultural establishment under the name of Union Gardens. Products will be sold both at wholesale and retail.

Clayton, Mo.—A. Werner & Bro. are building, as was reported in last issue, two rose houses 32 x 165 feet. In addition to these they have two houses 32 x 162 feet, one 8 x 80 feet and one 18 x 115 feet, giving them a total of 15,000 square feet of glass. Their heating plant is one 120 h. p. steam boiler and one 35 h. p. They intend to put in an electric lighting plant for the new houses.

Flower Market Reports.

BOSTON

Roses of all varieties and grades are coming in profusion, although not as heavily as in the hot spell of last week. They are not selling as well as they should, even the street vendors refusing to have anything to do with the heaps of short-stemmed and culls and insisting on getting the better grades, but at slaughter prices. Carnations have shortened up very materially in supply, but are suffering from the same trouble as the roses. It is a fact that, while the receipts of stock are very much reduced from last week, and general conditions seem favorable to good trade, the demand is not to be compared with that of last week, when the deluge was on. The effect of the heated term is yet noticeable in the keeping quality of the flowers, which is not high. It is worthy of record that while there is still an abundance of good violets to be had, they are actually unsalable, even the street fakirs finding no outlet for them at any price. Sweet peas and mayflowers they can and do sell in any quantity. It seems to follow that it is not worth the effort to try to have violets in the market at this season of the year, in the present popular frame of mind.

BUFFALO

For two weeks past and up to Saturday last the market was in bad condition, though it cannot be said that trade was quiet; but there was too much material and it could not be disposed of to good advantage. The few days of summer weather brought on the stock faster than could be handled, especially carnations and roses. In this line there was no let-up. The finest quality of Kaiserin, Pres. Carnot, Killarney, both pink and white, Maryland and other varieties were had in enormous supply and prices were all chopped to pieces. It was a case of the buyers making the price and large quantities were carried in the coolers from day to day. This includes Beauties, which had little or no demand. Other stock such as peas, daisies, violets and lily of the valley had a good call and cleaned up. Carnations were in over-supply. The end of the past week found a good demand, the cemetery florist helping out considerably. Outdoor daffodils and other stock have made their appearance. Monday of the present week showed a falling off in receipts and an improved demand, and a good portion of the carried-over stock was consumed. Smilax and asparagus are scarce.

DETROIT

Last week was ideal hard-vest weather for the fakirs. Supply of all kinds of flowers was as abundant as the week previous with a strong decline in counter sales and order trade. While there was no change whatsoever in either wholesale or retail prices, this was only accomplished by hard work and strong determination. The busiest man around town just now is the planter of nursery stock. He knows no hour of beginning or stopping except as Old Sol prescribes it. I would not wonder if some of them were not silently praying that the tail of Halley's comet might shed sufficient light to enable them to start earlier.

(Reports continued on page 601)

Special Offer On Chiffon "6887"

This is the best quality of Chiffon on the market. We have just received a big shipment from abroad and offer for immediate orders:

5½ c yard

6 inch width only. The heavy gauze edge on this pattern makes it particularly desirable.

Stock Colors:—
White, pink,
violet, purple.

Chiffon, Gauze Edge, Pattern "6887."

OTHER HIGH QUALITY CHIFFONS

Plain,	Pattern No.
"	5101, 4 inch, 2½ c yard
"	5102, 6 inch, 3½ c yard
"	5103, 10 inch, 7 c yard
Fancy Dotted Lace Edge,	5102A, 6 inch, 7 c yard
Valley,	5102A, 6 inch, 7 c yard

All our chiffons average about 35 yards to the piece. No piece is charged for more yards than it contains. We do not bill out short pieces as equivalent to full measure.

CEDAR BARK

Window Box time. Have you plenty of Cedar Bark? Bundles of about 25 square feet, \$1.00 each. Special price in quantity.

Flower Market Reports

(Continued from page 543)

A good Saturday and CHICAGO Sunday closed a dull week, and Monday, April 11, opened with a fairly good demand for good stock. As one wholesaler expressed it, "We again count our flowers instead of selling them by the jar." American Beauties are going off crop and one or two growers are happy in having their stock an exception to the rule. There is seemingly no end to the quantity of short Beauties now on the counters, but long ones are very scarce. Roses of all kinds are plentiful, but the supply is much less than a week ago. Southern bulbous stock is not coming in in such quantities and the home grown under glass is practically over. Carnations are moving now, fairly well, with fancy red as usual bringing the highest price. Violets are entirely gone.

Lilacs came from South in an overheated condition a week ago, and were in consequence unsalable. At this writing there are few in the market and the cooler weather is in favor of a more successful outcome to the next shipments. Among the slow moving flowers are the forget-me-nots, though the quality is right, and paper white narcissi which have not sold so well as usual all the season. Lilies are accumulating on the counters, and the buyers can get them now at their own price. Ferns are taking up the spare time when business is slack, sorting over and discarding the worthless ones. "Snow" ferns are arriving and many of them are black and dead. So many old ferns are in cold storage, however, that the price is low for the season.

Business the past CINCINNATI week has been very quiet. Complaints from both wholesaler and retailer show this to be the dulllest week they have experienced this season. With another week of bright summer weather stock comes pouring into the market with little or no outlet, and the consequence is that it finds its way to the ice-box, going thence at starvation prices to the street venders or else to the garbage barrel. Roses, with the exception of Beauties, seem the hardest to move—that is, to realize much money out of them. Beauties have been in fairly good demand, selling for \$3.00 a dozen for best, down to \$2.00 per 100 for shorts. With carnations, \$3.00 for extra fancy stock is rarely obtained, the majority of the sales being made for \$1.00 down to 50 cents per 100. Callas and Harrisii lilies are hard to move, even at reduced prices. There being only a limited supply of lily of the valley coming in, it cleans out every day. The market has been short of good sweet peas, for which there was a good demand. Tulips and Dutch hya-

cinths are hard to dispose of at any price. Smilax is scarce, but all other green goods are in abundant supply.

Cooler and more seasonable weather together with the working off of the heavier part of the crops which had been urged along for the Easter period have helped to relieve the market very much the present week and while actual sales do not indicate much in the way of higher prices yet the proportion of goods sold, as compared with receipts is so much better than was the case last week that there is a much better net result to the grower. The relief, such as it is, cannot, however, be more than temporary as lilacs and other outdoor as well as indoor material are ready to break in on the scene in an avalanche in response to the next period of high temperature which is liable to arrive at any moment. In a broad way the spring season has been a disappointment to all concerned and not much reliance is placed on any predictions of improvement.

The market here PHILADELPHIA has not improved any. Last week was lifeless except on Monday, Friday and Saturday. Towards the end of the week there was a slight shortening up

of shipments, consequent on a few cooler days. This helped a little, but on the whole the situation was far from encouraging. Long-stemmed roses cleaned up fairly well as did good carnations, but there was a large surplus in the lower grades. The violet crop is practically over for the season. Lily of the valley is in fair demand and normal as to supply. A good word can be said for orchids. These were not over-plentiful and cleaned up better than most other things. Smilax is the only short item in greens. We need a P. Welch to show us how to get this item on a level basis this time of year. Good snapdragon of the brighter colors is a feature.

H. Bayersdorfer & Co., of Philadelphia are represented this week by a big display of standard florists' supplies at the Quincy House, Boston. Martin Reukauf, S. Green and Sydney Bayersdorfer are in charge, and their time is fully taken up with the numerous trade callers who are taking advantage of this good opportunity to stock up with seasonable goods for the Memorial Day demand.

**AN "EXTRA HAZARDOUS OCCUPA-
TION."**

During the past nine years, no less
than twenty-seven thousand eight
hundred and thirty-one periodicals in
this country have suspended publica-
tion, and there are only about six
thousand left. Those who are of the
opinion that magazine publishers con-
stitute a majority of the millionaire
class may ponder these facts with
good results. If the life of the pub-
lisher was bound up in his magazine,
as his interests are, magazine pub-
lishing would be placed by life in-
surance companies among the extra
hazardous occupations along with
handling dynamite and flying air-
ships. Anybody who would like to try
publishing, however, will find that
there is nothing especially difficult
about it. A magazine is a good deal
like an air-ship. All you have to do
is to make it go and keep it up and
beware of too much wind.—*The Am-
erican Botanist.*

Advertisements in this column one cent a word. Initials count as words. Cash with order. All correspondence addressed "care HORTICULTURE" should be sent to 11 Hamilton Place, Boston.

WANTED—Young man who thoroughly understands Orchids, and with experience with Sweet Peas, Carnations and Garden Stuff. Write giving full particulars as to experience to the Altimo Culture Co., Canfield, Ohio.

WANTED—Working foreman to take charge small commercial place, 12,000 ft. glass. Good grower, reliable, honest. Single violets our specialty. Carnations and no roses. Mrs. Haworth, Farmington, Conn.

WANTED—A good, all-round greenhouse man, strictly sober and reliable; good designer, married man preferred; capable of taking charge of a small place. Apply to Wm. Doel, Pascoag, R. I.

WANTED—An all-round working foreman well up in growing Carnations, Chrysanthemums, etc. For further particulars address or call upon Thomas Pegler, Park St., Boston.

WANTED—Good salesman in wholesale cut flower establishment in eastern city. Address S. P., care HORTICULTURE, Boston.

WANTED—Experienced, well recommended clerk in prominent retail store, eastern city. Good wages. Address S. P., care HORTICULTURE, Boston.

WANTED—An experienced man to work in greenhouses where a large part of the product is carnations. Will pay good wages to the right man. Give references. Address Box 1092, Lowell, Mass.

WANTED—Second man in commercial plant growing establishment in middle West. Wages \$12.00 a week. M. W., care **HORTICULTURE.**

GARDENER—Landscape and floriculturist, has talent and fondness for his profession; competent to take charge of large estate; Swiss, 37 years of age; married; two children; wages \$70 and house. S. A. Leuba, 47 West 129th St., N. Y. City.

HEAD WORKING GARDENER, English, wants situation. Thoroughly experienced in all branches; would take a good single handed place. Married, age 35, no family. Apply, Benjamin Disley, 425 West 13th St., Oklahoma City.

FOR SALE—Greenhouse 150 x 30 ft., glass 16 x 24 "A" quality, 300 ft. 4 in. pipe, 2000 ft. 2 in pipe, 8 section Furman boiler, all in perfect condition, built less than two years. Will sell complete to be taken down for very low figure. Or will sell entire plant including $4\frac{1}{2}$ acres A-1 land, good barn, fine water supply, etc. Howard C. Burr. South Sudbury, Mass.

Height front, 4 ft. 6 in.; centre, 9 ft. 6 in.; rear, 7 ft. 2 in. Allen Improved Steam Boiler. 2300 running ft. of piping. Price, etc., P. O. Box 81, Providence, R. I.

FOR SALE OR RENT—Twenty-six thousand square feet of glass and five acres of land. Will sell on easy terms or rent for term of years. Only eight miles from loop (center) of Chicago. Good condition. Write at once if interested. **AUGUST ERICKSON**, 3437 Foster Ave., Chicago, Ill.

FOR SALE—Special 16 x 18 and 16 x 24 double thick glass in "A" and "B" qualities. Buy now and save money. Write PARSHESKY BROTHERS, INC., 58 Montrose Ave., Brooklyn, N. Y.

Cheap land for a bulb grower; some basket material; ideal place for man wishing to retire. A. G. Cobb, Anna Maria, Fla.

[illegible]

CHICAGO NOTES.

Plants.

The plant situation in Chicago is a little unusual in that there are practically no winter-blooming plants left for April. Stock was hurried on for the early Easter and azaleas, cyclamens, primulas and bulbous stock were all worked off at that time, and other blooming plants are not forward enough to take their place. About the only thing to be had are the marguerites and Baby Rambler roses. A few of the spring importation of rhododendrons are beginning to make their appearance. The fall importation of rhododendrons was very unsatisfactory; the plants seemed to be immature and arrived in poor condition, very few of them producing good flowers. Bedding plant stock is in favorable condition; the early Easter and the warm weather of the past month has enabled the growers to give the plants room and they have developed rapidly.

The Sweet Pea Crop.

The sweet pea growers are just finishing up their winter crops which the three days' damp weather brought to a sudden termination. The result was a quick raise in prices and short-stemmed stock that was unsalable at any price during the warm days now sell readily while long stemmed peas are decidedly hard to get. Norris F. Comley of Lexington, Mass., who was here last week and who is an extensive grower of sweet peas, said he was very much pleased with the quality of the peas he saw in the Chicago markets. The stems of some easily reach 12 inches and earlier in the season were 16 inches. Summer peas are just beginning to come in.

A New Business Venture.

O. Johnson has bought an interest in the Batavia Greenhouse Co., Batavia, Ill., and has taken a stand in the Flower Growers' Market. The present range of greenhouses is devoted principally to the growing of carnations and the firm will build at once a new range of 60,000 ft. which will be used for Beauties and tea roses. Mr. Johnson is well known to the trade and was for many years in business for himself. For the past three years he has been with the Chicago Rose Co.

Street "Florist" 85 Years Old.

One of the most interesting characters among the street venders of flowers is Mrs. Ellen Fitzgerald, 85 years old. Through all kinds of weather she faithfully attends to her business and goes home at night to her one room on the west side. She has a sunny disposition and seems to find real enjoyment in her work. Her basket is kept filled with flowers by one of the kind-hearted wholesalers.

Trade Jottings.

The A. L. Randall Co. is making improvements in their store, moving the wire department to the fourth floor.

Schiller The Florist has a specially pleasing window display in gold this week. A variety of gilt baskets, filled with daffodils, are suspended from the ceiling, and the effect is fine.

Chas. McKellar does not want to unduly influence anyone, but remarks the orange blossoms are coming in finely now and it only takes two dol-

LUXURIES FOR THE TRAMP.

A horticulturist of Berkeley has been experimenting with the rose for several months and by cross grafting succeeded in obtaining from it a delicious fruit with the flavor of the pineapple.—San Francisco Dailies.

"When we hold our next convention I am goin' to offer a vote of thanks to the feller what invented this floral eat."

lars worth to make a good showing at a wedding. This ought to be an inducement.

Personal.

W. E. Ward, of the office force of E. H. Hunt Co., has been ill for a week at his home in Park Ridge.

John Kruchten is back at his place in the wholesale market after a week's wrestling with tonsillitis. He bears evidence of his struggle.

Frank Ayers is serving on jury at the criminal court and says he is proud to state that he does not find any florists among the criminals.

G. T. Pieser, for many years at the head of Kennicott Bros., quietly slipped away from his friends and was married, March 26. The bride is Mrs. Cathleen Bronson Worley.

Harry Philpott, of Winnipeg, B. C., who was here to attend the meeting of the Florists' Club last Thursday, reports a very satisfactory Easter trade in his northern city. Most of the flowers came from Toronto, Chicago, and Minneapolis.

When we went to press last week the fate of our three florists politically inclined, was hanging in the balance. Peter Reinberg was the only one to win out, and he is again alderman of the 26th ward. Mr. Reinberg is spending a week at the Excelsior Springs, Mo.

Visitors:—Norris F. Comley, Lexington, Mass.; G. E. Serviss, Batavia, Ill.; J. W. Davis, Davenport, Ia.; H. Philpott, Winnipeg, B. C.

Roscoe, Ill.—The range of rose houses Arthur Briscoe is building will be devoted to carnations and greens for this season.

NEWS NOTES.

Wellsboro, Pa.—It is stated that the Asaph State Nursery is to be increased to 20 acres.

Kincaid, Kans.—The Kincaid Nursery has been purchased by C. P. Thompkins of Kansas City.

Fremont, Nebr.—G. L. Welch & Co. have purchased 17 acres of land to add to their nursery. This property has a frontage a quarter of a mile long on the Union Pacific Railroad.

Belvidere, Ill.—B. Eldridge is now sole owner of the Belvidere Plant & Floral Co. in Fairview, having purchased the interests of W. H. Moore, J. W. Lyon and W. P. Williams.

Media, Pa.—The greenhouses of L. J. Perrey & Son have been purchased by Eugene Perrey who has moved them to Dorsey, Md., where he will continue the business of growing violets.

Huntsville, Ala.—The greenhouses and garden at the Abbington place have been leased by David Harris. He intends to grow bedding and vegetable plants and will do business under the name of Glenover Gardens.

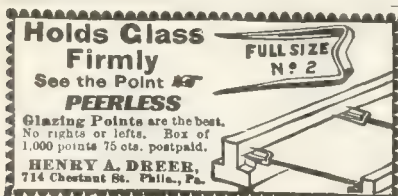

Newport, R. I.—B. A. Bohuslar has leased three acres of land for the propagation of nursery stock. Special attention will be given to growing some things which have not heretofore been produced by home growers.

Chewelah, Wash.—Theo. Albert & Bro. have purchased 20 acres of the J. Story place and will put in a nursery and fruit orchard. Twelve thousand trees will be put in as soon as the conditions permit. They also have a nursery at Colville and one at Addy.

MASTICA
FOR Greenhouse Glazing
USE IT NOW.
F. O. PIERCE CO.
12 W. BROADWAY
NEW YORK

Mastica is elastic and tenacious, admits of expansion and contraction. Putty becomes hard and brittle. Broken glass more easily removed without breaking of other glass as occurs with hard putty. Lasts longer than putty. Easy to apply.

Holds Glass Firmly
See the Point #2
PEERLESS
Glazing Points are the best. No rights or lefts. Box of 1,000 points 75 cts. postpaid.

Sometimes You Forget

that we make every part of a greenhouse but the glass—that we sell any part.

You remember us on the bigger things, but often it never enters

your head to think of sending to us for a tub of putty or a few fittings.

But you ought to—and here's why:

Our sole business is manufacturing every part of a greenhouse. We give it, and it only, our undivided attention.

Everything we make is made with an exact knowledge of just what conditions it must meet, and that is why an ever increasing number from all over the country are continually sending us their orders for just the smaller things.

You know how well we do the big things, and if you only stop to think, it is just because of well done little things that it is possible for us to do so thoroughly and enduringly the big things. So whether white lead, glazing nails, bench fittings, it matters not what, first write to

Plants for Edgings

The formal garden is incomplete without the edging plant. The attractive little evergreen *Buxus sempervirens suffruticosa* is perhaps used more plentiful than others for edging along walks as is exemplified in some of the old-fashioned formal gardens in Brookline and elsewhere. For flower beds there are multitudinous varieties to select from, but the blending and contrasting of colors requires great attention. Such foliage plants as coleus and *achyranthus* with their highly-colored leaves are good edgings for gay colored flower beds. *Opiopogon japonica variegatus* with its beautifully striped leaves and the Golden *Euonymus* are used extensively for edging the sub-tropical beds in the Boston Public Garden. The *Euonymus* cuttings are inserted in March.

Santolina chamaecyparissus incana, *Cineraria maritima* and *Centaurea gymnocarpa* associate themselves well with all strong colors producing striking contrasts. The two latter are easily raised from seed and the flower stems must be pinched out as they appear. *Geranium Mme. Salleri* and *Abutilon striatum variegatum* make very pretty edgings. Cuttings of these may be inserted in early spring. I must not forget our old friend *Pyrethrum Golden Feather*. In this also the flowers must be kept regularly pinched out. There are various others for foliage effect such as *althernantheras* in variety; *mesembryanthemums*, *sedums* and so on. In the flowering subjects we have many to select from, amongst them being *Begonia Vernon* with rich red flowers and *Begonia Erfordii* producing a wealth of rosy carmine bloom. These are also extensively used in edging sub-tropical beds in the Public Garden. Cuttings may be taken from old plants held over from last year, or seed may be sown during February or March. *Lobelia Crystal Palace compacta* is a charming little plant when in bloom, but the flowering period is rather short, and am inclined to favor the one from which most of the dwarf varieties have sprung—*Lobelia erinus*, as it produces flowers nearly the entire summer. The *ageratums*, white and blue, are excellent plants for edging, blossoming continuously through the summer. Among the cockscombs *Celosia cristata* attracts considerable attention and is very effective as an edging plant.

Trans-Atlantic Notes

ROYAL HORTICULTURAL SOCIETY

The meeting of this society on April 5 was a highly successful one, and the hall at Vincent Square was filled with growers of flowers and flowering plants. Very

prominent were cineraries, shown by Messrs Veitch & Sons, especially the varieties *Antique Rose* and *Matador*. The habit of these and others of the same strain is dwarf and compact. Carnations from Mr. H. Burnett made a fine display, among which *Pluto*, a clove variety, *Emperor*, a rose flake, and *Countess of March* were good novelties. Roses, and among them many *R. Wichura* varieties, were displayed by various exhibitors. Messrs. G. Mount & Sons, Canterbury, showed *Lady Hillingdon*, a flower of an apricot tint, and a new variety. Some beautiful auriculas came from Mr. J. Douglas, Great Bookham, and *Phyllis Douglas*, perhaps one of the finest Alpine varieties the exhibitor has raised, got an award of merit. Orchids were unusually abundant, and fine groups and rare plants were shown by Messrs. H. S. Goodson, G. L. Holford, Armstrong & Brown, Charlesworth & Co., Stuart Low & Co., E. V. Low, Sir Trevor Lawrence and Sir Jeremiah Colman.

First class certificates:—*Phalaenopsis casta superbissima*, shown by Sander & Sons, a splendid variety of this natural hybrid. The flowers almost circular, white with a pinkish tinge and spots at the base. *Odontoglossum ardentissima* "Norman Cookson," shown by Mrs. N. Cookson. This is a splendid variety that has improved since we last saw it. The segments are of equal breadth, claret colored, with white margins. *Lycaste Skinneri hellemensis*, an exhibit from Lieut.-Col. G. L. Holford. One of the finest colored of the variety, rose pink with white tip spotted with purple.

Awards of merit:—These were granted to Mrs. H. S. Goodson for *Odontioda Goodsoniæ*, flowers scarlet, with markings of white; *Odontoglossum Ceres*, Goodson's variety, the lip white and broad; the other parts like *O. Rossi*.

BUDDING ROSES BY FORKER'S METHOD

Ordinary budding in summer, with a growing bud, is sometimes a failure in great part, 40 to 50 per cent. being lost. This may arise from a variety of causes—such as a low temperature combined with a constant rainfall, or that the buds were not sufficiently matured. If the budding be carried out in September or October, according to Forker's method, that is, with dormant buds, there is success. These go through the winter with safety, as no growth is made by them, and the wildling stocks are likewise not sappy or growing, for they have lost most of their leaves. Whether a bud is furnished or not with wood behind the shield does not matter. To insert the bud a downward incision is made in the rind and wood, and about an inch is taken off the loose upper strip of rind, the bud attached to the stock, and smeared with grafting wax.

Write to your
 congressman
 about this
 It is encouraging to learn that the bill
 creating the Southern Appalachian
 and White Mountain forest reserve has
 been favorably reported from the Com-
 mittee on Agriculture to the House of
 Representatives. The horticultural intelligence of the

country will be unanimously in sympathy with the report signed by the majority of the committee, declaring that there is no more important bill before Congress than this, which is an initial step in the great and beneficent movement for the conservation of our national resources. The objections as presented by the minority, consisting of Chairman Scott and six other members, are mainly based upon the expenditure involved. We think it would not be a difficult task for the average patriotic and progressive citizen to pick out plenty of items in the appropriation bills which are less urgent and make far less for the country's welfare than the one we are considering. It was a great disappointment to the people of a large section of the country when this project was defeated before. We hope it will have a better fate this time. Just now the congressional ear is closer to the ground than it has been for a long time, for obvious reasons. Write to your representative and tell him you expect him to favor this movement.

We are pleased to note the outcome of
 The revised the protest by the nurserymen and the
 horticultural horticultural importers, in which HOR-
 inspection bill TICULTURE also joined, against the
 Simmons Bill 15656, providing for

Federal inspection of imported nursery stock under conditions not only ruinous to the importing industry but impossible of enforcement. Now in its stead we have H. R. 23252 which was introduced, also by Mr. Simmons, in the House of Representatives on March 21 and was referred to the Committee on Agriculture in whose charge it now is. The new bill appears to be practically on lines endorsed by the Nurserymen's Association, its main difference from the former bill being the provision for examination by official experts at place of destination instead of at dock. It provides also that no nursery stock shall be imported into the United States except under a special permit from the U. S. Department of Agriculture. The nursery and florist interests are in full accord with the Federal authorities in their efforts to guard against the introduction of injurious insects or plant diseases and we think the new bill will generally meet their approval, while at the same time it fully carries out the original intent of the Department of Agriculture in a feasible manner.

As we observed two weeks ago,
 An annually many garden favorites in flowering
 recurring hazard trees and shrubs seem to have passed
 through the winter of 1909-10 in
 excellent condition, better than on the average of recent
 years in the neighborhood of Boston. Our apprehension, then expressed, of danger in this precocious spring to the early blooming material, from later freezes, seems to have been justified, according to the press reports from the interior. We, on the coast have fortunately escaped thus far much of the severity experienced by our friends in the West but we got just enough of the frigidity to spoil the magnolias which were in the full height of their beauty. Rarely, if ever, have these showy trees been so profusely flowered, a fact which makes the disappointment all the keener. Cornus florida, a native,

but, nevertheless, rather uncertain subject here, is in splendid form and will make an unusually fine show. Wistarias, on the contrary, are bare, the blossom buds having been killed at some time during the winter, apparently. Such experiences year after year with exotic garden shrubbery set one to thinking whether it is worth the trouble and frequent disappointments to nurture these uncertain things in our gardens, lovely as they are when they do pull through the winter and spring. Would it not be better, after all, instead of straining to see how far north we can drag a plant of doubtful hardiness, contending against uncontrollable forces and conditions, that we content ourselves with what nature has provided for the latitude and other climatic conditions under which we live. All new things have to be tried out, of course, before they can be pronounced worthy or unworthy in a given locality but the arboretums and nurseries will take care of that. The man with a garden never realizes the sterling qualities of the home things until he has a few experiences of the havoc that may come in a night to his exotic beauties and nothing can more effectually dampen his ardor for a shrub-adorned home than these frequent wrecks. The nurseryman, in advising the purchaser of ornamental shrubbery, will advance his own interests by remembering this. Many a once promising garden has been turned into monotonous lawn or given over to other purposes, much to the loss in business and prestige to the local nurseryman, because of the disheartening results from material unwisely selected.

British Horticulture

PREPARING FOR THE INTERNATIONAL SHOW

The arrangements are satisfactorily proceeding for holding an international flower show in London next year. At a meeting convened by the Royal Horticultural Society this week, the preliminary steps were taken for floating the project. Forty-four years have elapsed since an international assembly of horticulturists took place in London. In the meantime exhibitions have been held at Paris, Berlin, Brussels, Haarlem, Turin, and other continental centres. It is now thought that an opportunity should be afforded Britain for returning the hospitality received at the other great international shows. The Royal Horticultural Society will do its utmost to make the affair a success, whilst many of the leading horticulturists will act on the representative committee now being formed. The difficulty of finding a site sufficiently spacious and at the same time readily accessible has been surmounted. The committee have been offered some private gardens in the Metropolis which will be in every way suitable for a gigantic show. It is estimated that a guarantee fund of about £5,000 will be required, but there is not the least doubt that this sum will be obtained. Most of the leading continental firms, particularly those of Belgium, will be amongst the exhibitors. The time suggested is about the end of May or beginning of June, when a wealth of floral bloom will be available.

A SEEDSMAN'S FAREWELL

James W. Laird, of the firm of Messrs. Laird & Sinclair, seedsmen, of Dundee, is about to leave Scotland for sojourn in Virginia, to the great regret of a large circle of friends north of the Tweed. Mr. Laird is the second son of Mr. R. B. Laird, of the firm of Messrs. Downie & Laird, Edinburgh. Having served his ap-

prenticeship in this firm's nurseries, Mr. Laird subsequently migrated south to the nurseries of Messrs. Fisher, Son & Sibray, Sheffield, where he remained two years. After a stay in Dundee, a short period was spent in Australia, prior to his return to Scotland to take over the management of the Fountainbrae Nurseries. Mr. Laird has distinguished himself by his wide knowledge of forest trees and hardy ornamental trees and shrubs, whilst his genial qualities have gained for him countless friends. This was evidenced at a farewell gathering recently held. Mr. and Mrs. Laird were presented with a gold watch, suitably inscribed, and Mr. Laird also received a bag of sovereigns. Mr. W. S. Melville, the president of the Dundee Horticultural and Chrysanthemum Societies, who presided, said it was but a poor consolation to them to think that what was Britain's loss in Mr. Laird's departure would be America's gain. The subsequent speeches eulogized the splendid service which Mr. Laird has rendered to the horticultural interests in Scotland, and the heartiest good wishes were extended for a prosperous future in the new home.

INTERESTING ITEMS

Details have been published of the trials made with nitro-bacterine by the Royal Horticultural Society. During 1908 trials were made with peas, and last year French beans were experimented with. The results proved that no benefit was derived from inoculation with nitro-bacterine, the crops from inoculated plants being practically the same as those from the plants which had not been so treated.—Mr. E. J. Allard, of the Botanic Garden, Cambridge, has been appointed garden superintendent of the Innes Horticultural Institution.

W. J. H. Adsett.

Mutation vs. Reversion

The experiments of Prof. De Vries, and at the New York Botanical Garden, with the evening primrose *Oenothera lamarckiana*, show (as claimed) a remarkable number of mutants, and especially the repetition of *O. oblonga*. In one culture De Vries found 175 oblonga mutants. When Don Pedro was Emperor of Brazil he visited this country and among the many things of interest shown him was a planing machine. When told that knives were making 2000 revolutions a minute Don Pedro exclaimed, "That beats the South American Republics." The above number of mutants from one culture reminds me of that remark. If dealing with the primrose is the only evidence that De Vries has of the birth of a new species I will feel as the sabbath school boy did when told the story of Jonah and the whale. He accepted it, but thought it rather fishy, but, when told of the wonderful growth of the gourd, he exclaimed, "I don't believe that, and now I don't believe the story of Jonah and the Whale either." Now it seems to me that *O. lamarckiana* must be a hybrid and that the great number of supposed mutants are reversions, and not mutants at all—reversions to an ancient form.

R. B. White

NEWS OF THE CLUBS AND SOCIETIES

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The next meeting of the club will be held at Horticultural Hall, Boston, on Tuesday, April 26, 1910, at 8 o'clock. The halls being rented on the date of the third Tuesday in the month, a postponement was necessary.

In lieu of the regular lecture several timely horticultural topics will be discussed, and a few minutes will be devoted to each of the following subjects, which members have been asked to say a few words on:

1. The best early flowering shrubs for Massachusetts.

2. Useful annuals for cut flowers under glass in winter.

3. What varieties of herbaceous perennials are better planted in the spring than in the fall in New England?

4. What are some of the more desirable early flowering herbaceous perennials, varieties which will bloom in April?

5. What is the best time to propagate Chrysanthemums to be grown as single stems for the Boston market? Do early, mid-season, or late varieties pay the best?

6. What is the best fertilizer for strawberries in the open garden, and when is it best applied?

Any other questions members may wish to have answered should be mailed to the Secretary, or deposited in the question-box on the evening of the meeting.

Resolutions on the death of our late lamented treasurer, Mr. Edward Hatch, will be presented by the committee appointed at the last meeting; a successor will also be elected.

W. N. CRAIG, Sec'y.

NASSAU COUNTY HORTICULTURAL SOCIETY.

A lively meeting was held on April 13. The winners in the monthly competition were G. Wilson for best cineraria and V. Cleres for best vase of antirrhinums. Cultural certificates were awarded to E. Fardel for vase of ranunculus, also for three fine plants of Boddington's Matchless Calceolaria hybrida, Paul Reul for geraniums, also seedling geraniums and climbing rose Hiawatha. Honorable mention to I. Barton for spinach, H. Gaut for petunias, stocks and peas, V. Cleres for carnations and F. Petroccia for mushrooms. I. F. Johnston read a most interesting essay on "Evergreens," and well deserved the thanks accorded by the Society.

A very interesting test of Aphine was made during the afternoon; green fly, black fly, white fly, mealy bug and scale all succumbed in short notice without any injury to the foliage or flower of the plant treated. A pelargonium bloom dipped into the undiluted solution was not injured in the least. It was a most successful test. Harry F. Matz of Glen Cove has secured the agency for this vicinity and will no doubt receive many orders.

OSCAR E. ADDOR.

MORRIS COUNTY (N. J.) GARDENERS' AND FLORISTS' SOCIETY.

April 13th was Rose Night. There were no new roses in sight. "Radiance" was expected but failed to arrive. Joseph F. Ruzicha brought from L. A. Noe's magnificent vases of American Beauty, Brides, Bridesmaids and Killarneys, for which he was awarded cultural certificates; and Wm. Muhl-michel, grower for Chas. A. Work, showed Richmond and My Maryland, being about as fine as they have ever shown here. H. B. Vyse brought single stem specimens of Hydrangea Hortense, the size, color and substances of the trusses being very fine.

The meeting of May 11th is to be given over to the rose men for the arrangement of their section of the final schedule of this year's flower show. All rose growers are invited and welcome to this meeting. We want the classes to be as far as possible, satisfactory all around, and if we get the rose-growers together we will have no trouble in that line. The committee on the fall flower show reports encouraging progress. Other societies and individual growers show an inclination to come in and make this show one of the best ever held in New Jersey. If the outlook continues as bright as it is, this show will be an inter-society show. A great many societies—we may say practically all of them—from Philadelphia to Boston, have promised to assist and the Morris County gardeners' and florists hope there will be no cold feet when the time comes.

E. R.

ST. LOUIS FLORIST CLUB.

The St. Louis Florist Club held its regular monthly meeting on the afternoon of April 14th with a fairly good attendance, considering the busy season for the greenhouse men and how little time they have to attend a meeting in the afternoon. All important matters were laid over until the May 12th meeting. The trustees are expected to look up and arrange for the club's annual outing for the month of July.

There was a review of the Easter business in which all expressed themselves as having had a good trade this year.

The question box brought out a number of questions on which good discussion was made.

BUFFALO FLORISTS' CLUB.

A special meeting of this club was held at Kasting's Hall, April 12th, at which it was decided to hold a flower show in the fall. It is proposed to make this one of the greatest and most up-to-date shows Buffalo has ever had. A most able committee has been appointed to arrange all details, and a report is expected from them at the next regular meeting, May 3rd.

At that meeting Mr. Charles Guenther will read a paper on "Summer Roses," and it is expected that George McClure, Jr., will be prepared with criticisms on the paper recently read by R. A. Slattery on "Color Harmony."

WM. LEGG, Sec'y.

AMERICAN NURSERYMEN'S ASSOCIATION.

The chairman of the Program Committee of the American Association of Nurserymen, J. W. Hill, Des Moines, Iowa, announces the following preliminary arrangements for the program for the annual convention of the Association at Denver in June:

"Publicity campaigns on part of nurserymen," J. M. Irvine of St. Joseph, Mo.

"Varieties," E. S. Osborne, of Rochester, N. Y.

"Orchard pests still unknown to the Colorado fruit grower," Prof. G. P. Gillette of Ft. Collins, Colo.

"Co-operation between nurseryman and fruit grower," W. L. Howard, secretary Missouri State Board of Horticulture.

"Practical experiments with root gall on apple trees," Vice-President E. A. Smith, Lake City, Minn.

"Transplanted raspberries for the retail trade," W. N. Scarff, New Carlisle, Ohio.

"Should a young man choose the nursery business for a vocation?" A. Willis, Ottawa, Kans.

"Observations upon European nursery stock and their plant growing methods" (illustrated by lantern slides), Prof. Craig, Ithaca, N. Y.

"The part nurserymen have taken in the growth and development of the nation," J. B. Morey, Dansville, N. Y.

"Herbaceous plants," C. S. Harrison, York, Nebr.

"Magnifying our craft," E. W. Kirkpatrick, McKinney, Tex.

"A study of the nursery lands of the United States," W. H. Stark, Louisiana, Mo.

"The commercial side of the nursery business," H. W. Marshall, Arlington, Neb.

"Effects of tree planting in the Middle West," Geo. H. Whiting, Yankton, S. Dak.

"Resultant evils of replace policy," J. W. Mayhew, Waxahachie, Texas.

"Crown gall and its effects on orchard trees," Peter Youngers, Geneva, Neb.

"Is the organization known as the American Association of Nurserymen a benefit to the nursery business?" E. M. Sherman, Charles City, Ia.

Paper by E. P. Taylor, Missouri State Experimental Station, subject not yet reported.

YONKERS' HORTICULTURAL SOCIETY.

A very full and interesting meeting of this Society was held on April 15th. The executive committee reported that prizes had been donated for every class in the June show, also three specials. The schedule for the fall show was discussed and adopted, there being sixty-five classes in all.

The prizes offered by Vice-President Cochrane and Louis Milliot were very keenly contested. H. Nichols won first with a vase of antirrhinum, the finest the writer ever saw. J. Goff was second with Pandanus Veitchii; H. Scott third, with a vase of Hydrangea Otaksa. Prizes for the next meeting were offered by Mr. J. Haughton and Mr. Knapper.

Mr. Nichols read a very interesting and instructive paper on the "Vegetable Garden," and a discussion followed. Mr. Frankel, of the Standard Nitrogen Co., was present and spoke on the benefit to be derived from using concentrated nitrogen and inoculated humus. The next meeting will be held on Friday, May 6th.

LEE WHITMAN, Cor. Sec.

ST. LOUIS LADIES' HOME CIRCLE.

The Ladies' Florists' Home Circle of St. Louis met on Monday, April 11th, and Miss Birdie Meinhardt was the en-

tertainer for the afternoon. The attendance was not large. Miss Tillie Meinhardt, the secretary, was absent at Fort Wayne, Ind., attending the funeral of her friend, Mrs. W. J. Vesey. A letter of sympathy was sent by the circle to the family. The afternoon was spent with readings on flowers and a lunch after the meeting, Mrs. John Steidle, the president, presiding over the meeting.

Resolutions were passed as follows:

Whereas, The Supreme Ruler of the universe has called from labor to rest Mrs. Maggie S. Vesey, and thereby caused a cloud of gloom to hover over the immediate family and relatives, as well as the large circle of friends in her beloved profession,

Therefore, be it resolved, That the St. Louis Ladies' Home Circle in regular meeting assembled extend to the bereaved family in this, their sad hour, the sympathetic hand of consolation and affection with the profound hope that the confidence of our loss being her eternal gain shall widen the silver lining around the cloud of sorrow.

Be it further resolved, That a copy of these resolutions be presented to the family and to the trade press, and also become a part of the records of this meeting.

MRS. OTTO G. KOENIG,

MRS. C. A. KUEHN,

MRS. THEO. MILLER,

Committee.

St. Louis, Mo., April 11th, 1910.

LADIES' SOCIETY OF AMERICAN FLORISTS.

In Memoriam.

Whereas, The Ladies' Society of American Florists has been called upon to mourn the loss of our first president, Mrs. William J. Vesey, of Fort Wayne, Ind., and we are desirous of expressing our sympathy. Therefore, be it

Resolved, That in the death of Mrs. Vesey our Society has lost a member whom we have prized for her wisdom and advice: The Board of Directors will miss her executive ability at their session this coming summer. To know her was to love her instantly. She has gone in the prime of life, and our hearts go out in sympathy to the husband and children; we grieve with them. And be it further

Resolved, That a copy of these resolutions be sent to the family and also be spread upon the minutes of this Society, and published in the trades papers. (Signed)

MRS. PETER FISHER,

MRS. J. F. SIBSON,

MRS. J. C. VAUGHAN.

A Wild Flower Show will be held May 24-25 at Arcadia, Mo., by the Second Congress, assisted by the Woman's Missouri Development Association. They say that every wild flower that is indigenous to Southeast Missouri will be shown and prizes will be offered for all collections. The ladies have prevailed upon Mrs. Herbert S. Hadley, wife of Governor Hadley of Missouri, to head the committee on awards, and she has accepted.

Middletown, Conn.—Chas. Keft has purchased the old Morgan greenhouse plant.

SEASONABLE NOTES ON CULTURE OF FLORISTS' STOCK.

Aerides.

These beautiful orchids require considerable care to maintain them in good condition. From now until the fall they should be treated liberally with water. Apply sparingly at first, and when the plants increase into growth, gradually give them a generous supply as may be required. Frequent spraying or syringing is highly beneficial with this genus. The fleshy roots which they throw out from their stems absorb a great quantity of moisture from the atmosphere, and in order to grow them successfully we must give them lots of artificial moisture. Those which have not yet received attention in the way of fresh material for their new roots should be looked after. Where the compost is still in good condition it is best not to disturb them too much and a top dressing of live sphagnum is all that will be required. Remove the old material to the depth of an inch or so and replace with fresh sphagnum. Where the compost has become decayed or sour, it must be shaken out entirely and the roots cleaned by gently spraying and repotted in baskets. They like from 65 to 70 degrees at night. These are good kinds to grow: *Aerides crispum*, *odoratum majus*, and *Fieldingii*.

Candytuft.

Candytuft is one of the most useful plants for the florist to grow. Plants that are in 2½-inch pots will be just right to plant out one foot apart on a bench where violets or other occupants have been thrown out. The seedlings that have been transplanted and are of suitable size can be used also, and with a little care as to shading and watering for a short time they will come out all right, but the pot plants are the best. They are always in demand for Memorial Day trade. They stand quite a warm temperature while making growth, but when coming into flower they like a cool, bracing air with plenty of moisture at the roots. Candytuft can be sown in the open ground any time now. It is better to sow several times for succession. Thin out the plants to four to six inches apart.

Campanulas.

The one largely forced by florists is the Canterbury Bell (*Calycanthema*), often called "cup and saucer." None of the other varieties respond to culture under glass as this one does. It may be had in bloom during the latter part of winter till the end of spring. It gives very satisfactory results during the spring months and can be had in perfection for Memorial Day. The spikes of delicately colored bells are eagerly bought and bring a good price. The crop will last for several weeks, giving a wonderful lot of cutting. They like a cool and airy house with lots of light. They don't like a warm, moist atmosphere. Seed should be sown now in order to obtain flowering plants for the middle or latter part of next winter. When they are about two inches in height they can be planted out in the field about 15 inches

apart in the rows. About October you will have large clumps that can be dug up and planted out the house for flowering.

Herbaceous Perennials.

Where it is desired to make or plant any new borders, this work can be done now. Pot-grown stock which is the most satisfactory, succeeds better than those that are lifted out of the open ground at this time of the year. If you have only field-grown stock it would be advisable to wait until the fall. Where you have established perennials they will all be benefited by some manure scattered between the rows and worked into the soil. The demand for hardy perennials has increased wonderfully in the last few years. Now is a good time to work up salable stock for next fall by taking cuttings before they make too much growth. With a hot bed with three or four inches of soil and about two inches of sand, and careful attention as to shading, watering and airing, you can root any amount of fine stock. Give plenty of air when rooted and pot as required during the summer and they will make fine plants in four or five inch pots. Keep seedlings moving by pricking out into frames where some hot manure has been put—say, about 6 inches—in order to push them along. When large enough they can be planted out in rows. These will make nice plants for next spring.

Hydrangeas.

These plants when well grown are among the most useful for Memorial Day trade. Those brought into heat by the first week in March will have good root action by this time. They will need a liberal supply of water, with liquid manure about once a week. Syringe every day until the flowers show color. See that they have full sun with free ventilation and fumigation with tobacco once a week. It is a good time now to take cuttings. Plants that don't throw much bloom will provide a good batch of cuttings. They can be placed in the propagating bench and kept fairly close and moist. When rooted pot off into 3-inch pots. When these are filled with roots, pot into 6 or 7-inch pots, using good loam, three parts, to one part of cow or sheep manure. These will make fine plants for another year.

The Care of Shrubs After Forcing.

The treatment of flowering shrubs after forcing will require some thought. They must be encouraged to make new growth; the more growth they make the better flowering bushes you will have for another year. After flowering they should be in some house where they can continue the growth they have started, until such time as they can be placed in the open with safety. The best plan is to let these rest by planting out and having another set of shrubs for the coming year. By this system you are always sure of having vigorous flowering plants. These notes refer to such shrubs as flowering almonds, lilacs, snowballs, spiraeas, deutzias and hardy hydrangeas.

JOHN J. M. FARRELL.

Mr. Farrell's next notes will be on Adiantum Farleyense, Aquatics, Grevillea robusta, Bedding Stock, Dahlias and Lemon Verbenas.

NEW AND DESIRABLE HERBACEOUS PLANTS.

Read before the Gardeners' and Florists' Club of Boston by Arthur E. Thatcher.

The subject which I have the privilege of speaking to you about this evening is one that for the last fifteen years I have been able to take a very active interest in. During that period many new species and varieties have been introduced, and it is no doubt a truism to say that we can dispense altogether with some of the older forms which were popular fifty years ago in favor of the much improved and beautiful new kinds. But it must not be supposed that all the old friends can be discarded. There are some which will undoubtedly continue to be grown so long as gardens exist, and this applies more to species than varieties, for it is among the latter that one looks for the majority of new plants. Although a large number of the newer introductions originated in American and European gardens, the most noteworthy are to be found among the new plants discovered by Mr. E. H. Wilson, and I need offer no apology to the Gardeners' and Florists' Club of Boston for mentioning this gentleman's name. The results obtained from his labors during the last eleven years are invaluable.

Horticulture is composed of many different branches, each having its own special claim upon the individual, and while all are of absorbing interest I do not think there is one that has greater claims upon us than the cultivation of herbaceous plants. In this country it is probable that they have not yet attained the same degree of popularity as in Europe, but with the ever-increasing love for outside gardening, which is so noticeable here, I feel sure that the day is not far distant when their merits will be fully appreciated. In no country in the world can they be grown more successfully, and one has only to notice the luxuriance of the native flora, such as solidagos, asters, cypripediums and lobelias to see this. I would like to say a word here about cultivation as one frequently meets people who are under the impression that herbaceous plants when once planted can be left to take care of themselves for an indefinite period, but this is quite erroneous; and though they may not be so exacting in their requirements as the denizens of glass houses, yet to maintain them in good health and produce the best results the necessary amount of attention must be given. In making a herbaceous border, which is to be permanent, it should first of all be seen that the drainage is good, as very few except semi-aquatics will succeed under water logged condition, and the border should be not less than six feet in width, but much finer effects can be produced if from eight to ten feet can be allowed. A good background is always desirable and two excellent subjects for the purpose are climbing roses or a row of sweet peas, but, of course, what to use must be decided by the situation of the border. Trench the soil in the fall to a depth of two and a half to three feet and incorporate plenty of decayed manure or other enriching material and leave the surface in a rough condition till spring so that the climatic effects may sweeten the soil and render it in good condition

for working. The latter part of March or the first two weeks in April is the best time to plant if the frost is out of the ground sufficiently, and it is advisable, if one is not well acquainted with the subjects, to make a plan of the border before hand, showing where each variety is to be planted. Harmony of color is of great importance and can only be obtained by making a plan or having a good knowledge of the plants, and of equal importance is the arrangement. Tall growing plants must, of course, find positions at the back of the border; but the mistake is not infrequently made of carefully graduating the heights so that the tallest are at the back and the lowest at the front, just as one would arrange geraniums on a greenhouse bench. In this way plants lose their individuality, for much of the charm of the border depends on seeing each separately. The most effective arrangement is obtained by planting some varieties in groups and others as single specimens, and by having plants of medium height near the front of the border much greater depth results and the general effect is altogether more pleasing.

Early flowering varieties should not be too near the edge of the border, unless they retain good foliage till the fall, and others which flower at a later season should be in front of them so that no bare places are apparent. By a judicious selection a succession of blossom may be had from spring till late in the fall, but to obtain such a desirable condition it is necessary to be conversant with the very large number at our disposal and then they can be ordered from the catalogues, but failing this I would suggest going to a good nursery where herbaceous plants are made a specialty of and picking out what appear to be the most suitable. It is well to remember that the best plants are always the cheapest in the end and that it pays to procure one's plants and advice from the most reliable and up-to-date nurseries.

In making this selection of new and desirable varieties I have endeavored to include those only which may be relied on to prove satisfactory, and except in one or two instances they are perfectly hardy. I have also separated them into two sections, the first being suitable for what one might call the herbaceous border proper and the other for waterside planting or where the soil is continually moist.

Blue flowered plants, apart from delphiniums, are not numerous, but two very beautiful additions have recently been made. Both are varieties of the old *Anchusa italica*, one being named *superba*, or *Dropmore* variety, with dark blue blossoms, and the other called *Opal*, has flowers sky blue in color. These are two remarkably fine plants, unsurpassed by anything with which I am acquainted. As they seldom seed and sometimes show a tendency to die in winter, it is advisable to propagate a few plants during the fall, so that one may be sure of retaining them. *Aconitums* are on a par with delphiniums for stateliness, and the best should always be included, as they continue to give a succession of bloom over a long period. The most effective is the new *A. Wilsonii*, which grows 6 feet high, with pale blue flowers. *Spark's* variety, dark blue, is also good, and *A. rostratum*,

which grows four feet tall, is a pleasing shade of pale blue, deeper on the hood. *A. hemsleyanum*, a new climbing variety, is also interesting and desirable. *Achillea cerisefolium*, *Cerise Queen* is the most recent and desirable addition to this family, and is devoid of the weediness which usually characterises these plants. The flowers, cerise pink in color, are produced abundantly all through the summer and fall.

It is much to be regretted that *Anemone Japonica* and its many excellent varieties are not sufficiently hardy to withstand the severity of our New England winters in all localities, but if favored positions are selected for them there is no reason why they should not succeed. Two or three years growth are necessary to get them well established, and as they make long roots which penetrate deeply, the soil should be well prepared, which enables them to obtain the maximum amount of moisture and food. Under such conditions the typical variety will grow six feet high, and if they are planted in groups, the luxuriant foliage and great quantities of flowers are unsurpassed in the autumn. There are now numerous varieties, all of much merit, but the old *Anemone Japonica* with its single pink flowers and the white form are very hard to beat, but one should also include *A. J. Autumn Queen*, which is dark rose in color and semi-double. *Mont Rose* is very double and pale pink; *Whirlwind* is a fine double white; *Prince Heinrich* double, dark red, and *Purpurine* is a very large flower, purplish-rose in color.

Among the many low growing plants suitable for clothing the edge of the border there is nothing of greater merit than the double form of *Arabis alpina*, which is a very old plant, but was lost for many years to cultivation. It grows and blooms very freely from spring until fall, and the pure white flowers are produced on spikes similar to a stock.

Bocconias or *Plume Poppies* make extremely effective masses of glaucous coloring in the garden if ample space can be afforded them, but unless this is possible I do not advise planting them where they are likely to interfere with their weaker neighbors. *B. microcarpa* will grow eight feet high and produce ample foliage, which is uninjured by strong sunlight.

We do not usually associate *calceolarias* with hardy plants, but the introduction of a new variety has enabled us to have at least one representative which will thrive in the open ground. This is a hybrid named *Golden Queen*, with large golden-yellow flowers, and is valuable, among other reasons, for its persistent flowering.

Everyone admires the campanulas, whether it be the miniature gems from the Alps, the beautiful harebell of Scotland or the giant pyramidalis, but I think the most desirable for the border are the *persicaefolia* section. These flower early in the summer, but if the stems are removed as soon as the blossoms have faded they continue to produce new growths for some time. *Moerheimi* and *Newry Giant* are two extremely fine double white varieties, and *marginata*, which has a band of pale blue on the edge

of the petals, is very attractive. Alba fl. pl. and grandiflora should also be included. Many new varieties of *Chrysanthemum maximum* have recently been produced, and though mere size is not always a desideratum I think in this case it has improved this useful plant. They are capable of making good masses of white and the long, stiff flower stems render them very serviceable for cut purposes. The Speaker and Mrs. Lothian Bell are the largest, and a variety named Robinsoni, with fimbriated florets, is one of the most pleasing.

For midsummer flowering, the herbaceous clematises are a useful and beautiful family worthy of inclusion in all gardens. *C. erecta* makes a fine bush, four feet high, covered with a multitude of white blossoms, but the variety *mandschurica*, which is larger in all its parts, is ever superior, and *erecta flore pleno*, with very double flowers, is of great merit. *C. integrifolia Durandi* has large blue flowers on robust stems, and *C. coccinea*, which is seen to the best advantage if grown on sticks in the same way as sweet peas, has scarlet and yellow flowers. Everyone is probably familiar with the American Snakeroot, *Cimicifuga racemosa*, and a beautiful plant it is, but those who need a more graceful species should plant *C. simplex*, which is, as yet, rare in gardens. It is smaller generally than its American congener, but the flowers are much whiter and the foliage more elegant. Delphiniums in their multitudinous variety do not need any recommendation from me to commend them to you, but there are some varieties which may not have come under your notice. *D. Belladonna* is one of the very few plants with sky blue flowers, and though it will not withstand a severe winter, it should always be grown, even if one has to pot it up. It has the desirable quality of sending up new flower stems for a long period, and the beautiful coloring is appreciated by all. Several varieties are now obtainable, the best of them being *Belladonna grandiflora*, which is larger generally than the type; *B. semi-plena*, sky-blue flushed lavender, and *Moerheimi*, a very excellent white form. For many years nurserymen have been endeavoring to evolve a pure white, tall-growing delphinium, and they have at last succeeded in producing a variety appropriately named *Nulli Secundus*, which is certainly second to none, being very robust and of the finest white.

Two excellent plants specially for dry positions are *Ephorbia polychroma* and *E. corollata*, the latter a North American species seldom seen in cultivation. *E. polychroma* forms a symmetrical bush, completely covered with conspicuous yellow bracts, and *E. corollata* bears white flowers in the greatest profusion. Few hardy plants are more popular than the charming *Gypsophila paniculata*, with its fleecy cloud of blossoms, but equally beautiful is the new double form, which is one instance where the doubling process has improved a plant's beauty.

Heucheras are among the most useful of small growing herbaceous plants, and many are familiar with the beautiful scarlet, *H. sanguinea*.

Quite a few good hybrids have been raised recently, the finest of which is undoubtedly *H. Shirley*, which grows three feet high and has very large scarlet flowers. Pageant is also fine, a strong grower, rich, bright crimson in color. *Rosamunde*, *Margaret*, *Firefly*, *Coralie*, *Flambeau* and *Lucifer* should all be included.

Heleniums are among the most useful of tall flowering plants too well known to need any reference, and I will only mention one, a new variety raised in this country. This is *Riverton Gem*, which has golden yellow flowers largely suffused with crimson.

Everyone is acquainted with the old Day Lily, *Hemerocallis fulva*, which is a decidedly ornamental plant for many positions, but for the select flower border the newer hybrids are superior. The most noteworthy of them are: *Dr. Regel*, with large flowers, rich orange in color; *Sir Michael*, a beautiful soft yellow; *Queen of May*, a wonderful plant, three and a half feet high, deep orange colored flowers, often carrying eighteen on a single stem, and *Baroni*, with sweetly scented orange-yellow flowers.

Incarvillea Delavayi and *grandiflora* are two remarkable new species from China, the former having deep rose flowers about the size of a gloxinia, and the latter is rich carmine in color with a yellow throat. These succeed best in a position shaded from the hottest sunlight. Two desirable new *Lupines* of the *polyphyllus* section, both with rose colored flowers, are *Lupinus polyphyllus roseus* and *L. Moerheimi*, and an excellent variety of the double *Lychnis chalcidonica* is *Cripps* var. which is not affected by the sun.

No plants, and certainly none of a bulbous character, have more devoted adherents than the Lilies, and though many new ones have been introduced during recent years, I do not suppose there are any so deserving of general cultivation as Mr. Wilson's Chinese introductions. As these have been fully described in the press, I need not deal at length with them, but they cannot be too strongly recommended to those who desire good, hardy, vigorous-growing varieties. *Henryi*, *leucanthemum*, *chloraster*, *Bakerianum* and *myriophyllum* are additions to any flower border and succeed best in a good loamy soil with ample drainage.

Another beautiful class of bulbs, second only to the Lilies in importance, are *Montbretias*, and these, by hybridizing, have been greatly improved of late. They will probably not prove so hardy in New England as the older varieties such as *crocsmiflora* and *Pottsi*, but it is a very simple matter to lift them and store in a cool cellar for the winter. Such varieties as *Hereward*, *Prometheus*, *King Edmund*, *Norvic*, *Westwick*, *Lady Hamilton*, *St. Botolph*, *George Davison* and *Lord Nelson* all have flat, open flowers, measuring from three to four inches in diameter and are produced very freely on strong branching stems. I do not know of any plants, unless it is the florists' pentstemons, which produce such a beautiful display through the summer and autumn months.

Monarda didyma is an old favorite in gardens, but it must give place now to a new variety with bright scarlet flowers named *Cambridge Scarlet*, which is dwarfier in habit but much more floriferous. Oriental Poppies are among the most gorgeous of May flowers, and who does not admire the gigantic blooms of *Papaver Parkmannii*? A host of new sorts are now offered to us embracing a wide range of color, but I think the most desirable are *Lady Roscoe*, *Marie Studholme*, *Mephistopheles*, *Mrs. Perry*, *Jennie Mawson* and *Margaret*. These should not be planted near the front of the border, as their flowers, though gorgeous, are rather fleeting.

A remarkable plant from Central Asia, very closely allied to the campanulas, which one seldom sees grown successfully, is *Ostrowskya magnifica*, but it well repays any care bestowed upon it. This plant should be given a sheltered position under a warm wall in a well drained loamy soil, and on no account disturb the roots after it has once become established. The flowers are of great size and vary in color from blue to rose and pure white, and under favorable conditions the stems will grow six feet high.

Thalictrum dipterocarpum is the most desirable of the family and is one of Mr. Wilson's Chinese children. It has a profusion of rich rose flowers on slender stems five feet high and very elegant foliage.

Tritomas, or *Kniphofias*, are not hardy enough to withstand our New England winters unless amply protected, and I believe the best results are obtained by lifting and potting, unless one has a sheltered position in which to plant them. On the other side they are largely used and make most effective beds in well drained loam. They are so distinct and gorgeous in coloring that any extra trouble is well bestowed on them. A considerable variety of species and hybrids are now obtainable and I can strongly recommend *Nelsoni* and *Macowani*, two very dwarf free flowering plants. *Triumph*, the largest variety yet raised; *multiflora*, *Meteor*, *Chloris*, *Ideal* and *corallina*. The colors vary from the palest yellow to the richest scarlet and they present an imposing and beautiful appearance in the fall garden.

The most useful of all herbaceous plants for producing fine autumnal effects are undoubtedly *Asters* or *Michaelmas Daisies*, and to some who are acquainted with the many wild species which beautify our New England woodlands it may seem unnecessary to draw attention to them, but during the last ten years a great deal has been done by cross fertilization and selection to produce varieties better suited for garden cultivation. The species to which the most notable additions have been added are *Novi Belgi*, *Novae Angliae*, *Amellus*, *cordifolius* and *Vimineus*, but the best results have been obtained by crossing *Novi Belgi* and *Vimineus*. These produce small flowers in great abundance on long pendulous branches right from the ground and for border decoration or using in a cut state there is nothing to surpass. Nearly all the varieties to which I

shall refer have been imported into this country and may be seen growing by anyone interested. Their light and graceful habit makes them exclusively valuable as pot plants, and anyone who has a conservatory to embellish cannot do better than utilize the small flowered varieties for this purpose. The *Novi Belgii* varieties are now very numerous, but I shall only mention two which are in advance of all others, and these are *Climax* and *Duchess of Albany*. Both grow five feet high and the former has bright blue flowers with a conspicuous yellow center and the latter is pale mauve suffused lavender, and one great advantage is that they commence flowering from half way up the stem and not just at the end of the shoots, as is the case with many varieties. The best form of *Novae Angliae* is *Mrs. J. F. Raynor*, which is only four feet high and has bright reddish crimson flowers two inches across.

Aster Amellus is a species with large rich, blue flowers and grows about two feet high. It is very useful for many purposes, especially where masses of color are desired, and it is only within recent years that any new colors have been evolved. Pale lavender, deep rose and almost white forms will be found among such varieties as *Aldenham*, *Herbert*, *J. Cutbush*, *Lilacea*, *Distinction* and *Reversia*. Too much cannot be said in favor of the beautiful varieties which have resulted from crossing *Vimineus* and *Novi Belgii*, the best of which are *Enchantress*, *Hon. Edith Gibbs*, *Golden Spray*, *Delight*, *Star Shower*, *Maidenhood*, *King Edward VII*, *Chastity* and *Ringdove*. The habit of these is so beautiful that they are unsurpassed for growing on single stems and planting on the front of the border where they make perfect pyramids of bloom. Among the cordifolius group there are a number distinguished by their delightful habit and delicacy of coloring, and *Ideal* and *Edwin Beckett* are general favorites with all who have grown them.

A wonderful class of plants which should be represented in all gardens are the *Eremuri*, and if single specimens are planted at various intervals along the border where their stately spikes can rise above the dwarf subjects they present an imposing appearance unequalled by any spring flowering plants. Unlike the other plants I have mentioned, they should be planted early in the fall and the young growths will need slight protection from cold winds and frosts in early April. *E. Elwesianus*, which has pink flowers and its pure white variety *albus will*, when established, grow from eight to nine feet high with fully four feet of blossom. *E. robustus* is equally tall with rosy pink flowers, but *E. Bungei* does not exceed five feet and is very attractive, having golden yellow flowers.

(To be continued)

Madison, Wis.—The greenhouse which is being built by the *Foley Mfg. Co.* at the Experiment Station, University of Wisconsin College of Agriculture, forms a part of the new \$60,000 horticultural building which is soon to be erected. It is said that this building will be one of the most modern and complete of any of the agricultural colleges.

R. VINCENT, JR.

To most of our readers the gentleman whose portrait appears herewith is already so well-known that the name seems almost superfluous. We have just received from the firm of which this gentleman is the head, their annual catalogue of *Geraniums* for 1910. It is a masterpiece in its line and should be in the possession of every geranium enthusiast. *R. Vincent, Jr. & Sons* have recognized no limit to effort and expenditure in bringing together the finest collection of geraniums in this country, adding every

R. VINCENT, JR.

promising new variety as soon as it is possible to obtain it, from any and all sources and whatever advancement the florists' stock of geraniums in America has made in recent years is due more to the persistence and enterprise of Messrs. Vincent than to any other influence. Mr. R. Vincent, Jr., is now abroad and no doubt the collections will be enriched on his return with the best new material that the European hybridizers have brought out, not only in pelargoniums but other useful florists' plants.

THE PEACE OF SPRING.

The quiet of the pasture lands!
There all the grass is green and sweet,
And, whisperless, it understands
The gentle pressure of our feet.
There dandelions thickly spread
In wondrous arabesques of gold
As though the stars from Overhead
Upon earth's bosom had been rolled.
The violets laugh at the sky
An echo of the dreaming blue;
The voiceless breezes wander by
To thread the blossoms' paths anew;
The early bees in search of sweets
Seem all a-tiptoe in the air,
Each wing is noiseless in its beats
As through the soundless day they fare.
The wild rose in its cloister nook
Is shielding yet its summer blush;
The trees beside the lazy brook
Sway softly in the morning's hush;
The scattered clouds of white go by
Like stork-kissed sails far out at sea
The arcoses that journey high
To whatsoever their haven be.
The quiet of the pasture lands!
Where new-born flower, leaf and vine
Seem to be spring's cupbearing hands
That offer us her amber wine;
Where filmy veils of mist uproll
On sights that halt and hold us long
There in a chord that thrills the soul,
The very silence sings a song!

William D. Nesbit, in Los Angeles Times

CHICAGO NOTES.

The Growers.

Decoration Day is now but six weeks ahead but to the grower in this unusual spring it seems rather far in the future. Many vines and plants are now ready to be put out of doors that usually are kept inside for another month at least. Plants and plans for this holiday are well under way, the former almost too much so for the grower with limited space. Geraniums are in their last shift, and are seen in 4 and 5-inch pots. The smaller geraniums in 2½ and 3-inch pots will make nice bedding stock. Other bedding stock is in equally advanced state.

Leesley Bros. finished their first planting of onions for sets last week. They are doubling their acreage devoted to this purpose this year and are getting the 200 acres, lately leased, into shape for planting. The land will be tile drained and a ditching machine is rapidly preparing the place for laying the tiles. The Leesley Bros. are a pair of enterprising young men. Their nurseries are on the north side of the city and are managed by the elder brother Clyde, while the younger brother, Robert, has the 400 acres on the west side under his care.

Nurserymen.

The local nurserymen are finding the season for selling altogether too short. There was no intermediate period, but winter gave way to summer and the stock was ready for planting at once. This shortening of the spring trade means loss of many sales and a great inconvenience in having to hurry through the work.

Seedsmen.

Judging from prices of held-over onion sets, growers realized more for their contract stock than on what they had to sell later.

The change back to winter gave the seedsmen a chance to breathe again, and the sight of snow Sunday was not at all unwelcome to them. The rush at the seed stores for the past two weeks was something to be regretted from both sides. For the customer it meant weary waiting and many mistakes, and to the sellers it meant work almost or quite to the limit.

General Business Notes.

Special programs among the clubs and schools and the planting of trees will take place as usual on *Arbor Day*, which is celebrated on the 23rd.

Now that the spring has fairly opened, the dealers report the sales of the *Evergreen Fertilizers* to be coming in rapidly. The vegetable growers are trying it extensively.

Arbor Day, April 22nd, will be celebrated by many of the clubs, schools, etc. *City Forester Prost* will, as usual, be much in demand, and has promised to speak at various places.

Wm. J. Smyth has had a very pretty display of iris in five colors in his window the past week. He handles quantities of this popular flower and says the demand for it is growing.

Very many growers have their young carnations in the field. Those who got their stock out some time ago have

For Decoration Day

We have this year the most complete, elegant and salable stock of florists' goods ever offered for the MEMORIAL DAY trade. Our line of PRESERVED FOLIAGE and other INDESTRUCTIBLE DECORATIVE MATERIAL cannot be excelled and the name of BAYERSDORFER & CO., on the package guarantees that goods and prices are

All Right

Don't wait until the last moment to make inquiry. SEND NOW for list of Standard and New Goods for this important occasion. All you have to do is to show the goods. THEY'LL SELL. Wreaths of Cycas, Magnolia, Fern and other foliage in Green, Autumn Tints and Moss effects are among the novelties.

METALLIC WREATHS are our specialty; we make them up with Roses, Pansies, Forget-me-nots or anything you please. STANDING ANCHORS, PILLOWS, WREATHS, ETC., all graceful and true to nature. Cape Flowers; Immortelles, all colors; Doves; Sheaves.

H. BAYERSDORFER & CO.

The Florists' Supply House of America

1129 Arch Street, Philadelphia, Pa.

no fears, while those who planted just before the frost are hoping for the best.

Shakespeare comes in for his share of flowers next Saturday when his statue will be draped with festoons of fresh blossoms and appropriate exercises mark the anniversary of his birth.

The crop of Spanish Iris is said to be a comparative failure, so many of the plants coming "blind." The growers attribute this to the bulbs having been grown too dry last summer.

John Algotz, manager of the many small parks about the city, has been appointed to superintend the city nurseries on the Gage farm. He will begin at once the erection of greenhouses and a dwelling house for himself. This work of the city in establishing this enterprise is something of an innovation and the outcome will be watched with interest.

The opening of the new Blackstone hotel Saturday came at a time when the supply of flowers was abundant, and Mangel, who had charge of the decorations, used them to good effect. One hundred large hydrangea plants were artistically grouped and together with daisies and large palms, the effect of the whole was beautiful. The table decorations at the several banquets were much admired. The palms came from Julius Roehrs Co., of Rutherford, N. J.

The Moninger Co. report business as very active this spring. The amount of greenhouse building calls for large quantities of lumber, pipes, etc., and as a result this company has purchased

property adjoining their plant which they will use for storage purposes.

The few stray peonies drifting into the market this week show that the season for this favorite is upon us. The variety generally known as Old Red has made its appearance long before its usual time. Mr. Peiser, of Kennicott's, says he has had thirty years' experience, and never knew peonies to be so early before. He considers it a bad sign for the peony market.

An occasional peony in a sheltered spot in the parks is making a record this week.

Personal.

Ben Zalinger, for five years with Sinner Bros., in the Market, is now working up a business for himself, soliciting orders for flowers from clubs, etc.

Virginia Poehlmann, little daughter of Mr. and Mrs. August, underwent an operation for tumor, at the Augustina hospital, on the 9th, and is recovering nicely. The tumor was caused by a fall.

Visitor: C. A. Brazee, Wilmington, Cal.

"SPLENDID RESULTS."

Editor HORTICULTURE:—

The season is now closed for the sale of our Mary Tolman carnation plants. In looking over results we find we have received splendid results from our advertisements in HORTICULTURE.

Yours truly,

A. E. HUNT & CO.,

April 18, 1910.

HARDY FIELDGROWN ROSES

We offer a fine stock of the following roses, viz.:—

HYBRID PERPETUALS:

Ulrich Brunner, Paul Neyron, Gen. Jacqueminot, Magna Charta, Mrs. John Laing, Baroness de Rothschild, and other assorted varieties in less quantities, like Mme. Gabrielle Luizet, Marshall P. Wilder, Anna de Diesbach, Baron de Bonstetten, Prince Camille de Rohan, Alfred Colomb, Gen. Washington, Princess Bearn, Rugosa Rubra, Rugosa Alba, Blanche Moreau (white moss), Chapeau de Napoleon (pink moss), Persian Yellow, etc.—\$2.00 per dozen, \$16.00 per 100

Fran Karl Druschki, Capt. Hayward, Hugh Dickson, and Mrs. R. G. Sharman Crawford—\$2.25 per dozen, \$16.00 per 100

HYBRID TEAS:

White Killarney—\$3.50 per dozen; \$25.00 per 100.

Killarney (pink), Gruss an Teplitz, La France, Maman Cochet, White Maman Cochet, Lady Mary Fitzwilliam, Hermosa, Etoile de France, Mme. Abel Chatenay, Mme. Jules Grolez, etc.—\$2.50 per dozen, \$18.00 per 100

CLIMBING:

Tausendschon and Lady Gay—\$3.00 per dozen; \$20.00 per 100.

Dorothy Perkins and Crimson Rambler—\$2.25 per dozen; \$15.00 per 100.

F. R. PIERSON CO., Tarrytown-on-Hudson, New York

PRIMULA OBCONICA CARRIED OVER.

P. Peterson of Chicago, whose portrait appears in the accompanying picture, makes a specialty of Primula obconica. The plant shown is one which has been carried over from the previous year, is in a 7-inch pot and bears 63 flower spikes in bloom, besides

many more in an undeveloped state. Growers who have not regarded this plant as a good subject for second-year flowering may be interested to know Mr. Peterson's method. The plants are placed in a solid bench during the summer and re-potted in October. They are kept quite dry during August and watered freely in September. Fine plants for Easter invariably result.

EARLY SPRING IN OHIO.

C. Betscher of Canal Dover, Ohio, writes that peonies and other items are so far advanced that they expect to cut their main crop before May 30th. Liliacs are showing color now and mock oranges are far enough advanced to bloom by May 1st. Plums were in bloom April 1st, apples 10th; last year they were just a month later. Peonies usually bloom about four weeks later than plums. Owing to the very favorable conditions gladioli were planted March 9th and many are now 6 inches high, and will likely be in bloom about June 15th.

Indications are for a phenomenal

Orchids Fresh Stock. Just Arrived.

Cattleya Trianae, per case, \$40.00. Labiata, per case, \$50.00.
In splendid season for strong growth and flowers the first season.

Dreer's Select Hardy Vines and Climbers

AKEBIA QUINATA.

We offer extra heavy pot-grown plants of this handsome climber.
Strong 4-inch pots, \$1.25 per doz.; \$8.00 per 100.
Heavy 6 " " 2.00 " 15.00 "

AMPELOPSIS VEITCHII.

Strong 2-year-old, \$1.50 per doz.; \$10.00 per 100.
Extra selected plants, \$2.00 per doz.; \$15.00 per 100.

AMPELOPSIS VIRGINICA. (Virginia Creeper.)

Strong 2-year-old plants, \$1.25 per dozen; \$8.00 per 100.

AMPELOPSIS TRICOLOR. (Vitis Heterophylla Variegata.)
Very strong, 3-inch pots, \$1.00 per doz.; \$7.00 per 100.

AMPELOPSIS ENGELMANNI.

Extra strong, 2-year-old plants of this most useful variety.
\$1.75 per doz.; \$12.00 per 100.

AMPELOPSIS LOWII.

A new variety of the same general character as A. Veitchii and clinging to the smoothest surface without support, but with foliage much smaller and deeply cut, giving a light and airy appearance to the plant not possessed by the older sort. In spring and summer the leaves are of a bright apple-green color, changing to a brilliant crimson and scarlet in the autumn. 60 cents each; \$6.50 per doz.

APIOS TUBEROSA.

Strong tubers, \$2.00 per 100.

ARISTOLOCHIA SIPHO.

(Dutchman's Pipe Vine.)

Extra heavy, \$4.00 per doz.; \$30.00 per 100.

BIGNONIA. (Trumpet Creeper.)

Grandiflora. Strong plants, \$3.00 per doz.; \$20.00 per 100.

Radicans. Strong plants, \$1.50 per doz.; \$10.00 per 100.

CELASTRUS SCANDENS.

(Bitter Sweet, or Wax Work.)

Extra heavy plants, \$2.00 per doz.; \$15.00 per 100.

CINNAMON VINE.

Strong roots, 40 cents per doz.; \$3.00 per 100.

CLEMATIS PANICULATA.

(Japanese Virgin's Bower.)

We have an immense stock of exceptionally fine plants of this most popular of all the Clematis, and offer

Strong 2-year-old plants, \$1.50 per doz.; \$10.00 per 100; \$90.00 per 1000.

CLEMATIS MONTANA GRANDIFLORA.

The plant is of stronger growth than any other Clematis, not subject to the attacks of insects, and succeeds under the most adverse conditions. It is perfectly hardy, having withstood without the least damage in a most unfavorable position in our trial grounds. Its flowers, which resemble the Anemone or Windflower, are snow white, 1½ to 2 inches in diameter, and frequently begin to expand as early as the last week in April, continuing well through May, and are produced in such masses as to completely hide the plant. Extra strong, 2-year-old plants, 35 cents each; \$3.50 per dozen.

CLEMATIS MONTANA RUBENS.

Identical in every way with the white flowered variety, excepting in color, which is of a most pleasing shade of soft rosy red.

We offer a limited stock of strong plants, 75 cents each; \$8.00 per dozen.

EUONYMUS RADICANS VARIEGATA.

A nice lot of 3-inch pots, \$1.00 per doz.; \$7.00 per 100.

LARGE-FLOWERING HARDY CLEMATIS.

We have again this season a fine stock of good, strong plants, two years old, own roots.

Boskoop Seedling or Sieboldi. Extra large lavender.

Duchess of Edinburgh. Double pure white.

Henryi. Finest large single white.

Jackmani. The popular dark rich royal purple.

Madam Baron Veillard. Light rose, shaded lilac.

Ville de Lyon. Bright carmine red.

30 cts. each; \$3.00 per doz.; \$20.00 per 100.

Nudiflorum. Yellow, 5-inch, pot-grown.....	\$1 50	\$10 00
Officinale. White, 5-inch, pot-grown.....	1 50	10 00
Prinulinum. An introduction from China, its flowers fully double in size to J. 'nudiflorum'; these appear simultaneously with the leaves. Strong plants, 35 cents each; \$3.50 per doz.		

LATHYRUS LATIFOLIUS.

(Everlasting Pea.)

	Per doz.	Per 100
Albus. White.....	\$1 00	\$7 00
Splendens. Rose.....	1 00	7 00
"White Pearl." A magnificent, new, pure white variety, with individual flowers fully double the size of the ordinary Everlasting Pea. These are produced in really gigantic trusses. We offer very strong roots at 20 cents each; \$2.00 per dozen.		

POLYGONUM.

Baldschuanicum. This beautiful, hardy, woody, twining plant is one of the most interesting and showy flowering climbers. Its flowers are white, and are borne in great feathery sprays at the extremities of the branches. Strong plants, 35 cents each; \$3.50 per dozen.

Multiflorum. A very desirable climbing plant, which seems peculiarly adapted to our climatic conditions. It is of strong, rapid, but not coarse, growth, frequently attaining a height of 15 to 20 feet in one season. Its bright green, heart-shaped leaves are never bothered by insects, and during September and October it produces masses of foamy-white flowers in large trusses from the axil of each leaf. \$1.50 per dozen; \$10.00 per 100.

PUERARIA THUNBERGIANA.

(Kudzu Vine.)

We offer a large stock of strong, 1-year-old plants of this rapid growing climber. \$1.00 per doz.; \$7.00 per 100.

SCHIZOPHRAGMA HYDRANGEOIDES.

(Climbing Hydrangea.)

One of the most interesting of our hardy climbers. Its flowers, which are borne in large trusses, are similar to white Hydrangea, and when in flower during July and August, make a handsome display. A limited stock of strong plants, 75 cents each.

WISTARIA SINENSIS.

Extra heavy two-year-old plants, 5 to 6 feet long, well rooted.

	Per doz.	Per 100
Blue	\$3 50	\$25 00
White	4 00	30 00

VITIS HENRYANA.

A new climber from China, foliage similar in outline but not as large as the Virginia creeper, foliage of great substance and prettily variegated, the ground-color being deep velvety-green, while the midrib and veins are of a silvery white. 60 cts. each; \$6.00 per doz.

AMPELOPSIS LOWII.

Henry A. Dreer, 714 Chestnut St., PHILADELPHIA, PA.

The above prices are intended for the Trade only.

Hardy Climbers, Etc.

AMPELOPSIS Strong Dutch-Grown

Ampelopsis Veitchii (Boston Ivy). Extra-strong imported vines, 3-year-old. \$1.25 for 10, \$12 per 100.

Ampelopsis Veitchii robusta. A very compact-growing variety of the well-known Boston Ivy, and very highly recommended to us; will undoubtedly take the place of the ordinary Veitchii in the near future. \$1.75 for 10, \$15 per 100.

Quinquifolia (American Ivy, or Virginia Creeper). Good for covering walls, verandas, or trunks of trees; affords shade quickly. 25 cents each, \$1.75 for 10, \$15 per 100.

CLEMATIS

Henryi. Pure white; extra large. *Jackmanni*. Purple. *Alba*. White. *Sieboldi*. Lavender.

Ville de Lyon. Brilliant Carmine-red; as good as Mme. Edouard Andre, but contrary to this one, is very free-growing.

Extra-strong plants, 30 cts. each, \$2.75 for 10, \$25 per 100. *Clematis paniculata*. Strong, 2-year-old plants, \$2.00 per doz., \$15 per 100.

ACTINIDIA ARGUTA

A desirable Japanese climber of strong, vigorous growth, with dark green, shining foliage and white flowers with purple centers, which are followed by clusters of edible fruit. An excellent plant for covering arbors, trellises, etc., where a rapid and dense growth is desired. Strong plants, 25 cts. each, \$2.50 per doz.

BIGNONIA (Trumpet Vine)

Radicans. Dark red, orange throat; free-blooming and very hardy. 20 cts. each, \$2.00 per doz.

ARISTOLOCHIA SIPHO

Dutchman's Pipe. Strong, field-grown, 3 to 4 feet. 35 cts. each, \$3.25 for 10, \$30 per 100.

WISTARIA SINENSIS Extra Strong. Field Grown

Blue. 6 to 7 feet. 40 cts. each, \$3.75 for 10, \$35 per 100. White. 6 to 7 feet. 40 cts. each, \$3.75 for 10, \$35 per 100.

HONEYSUCKLE

Very extra-strong, Holland field-grown plants. 6 to 8 feet long, many branches. *Halliana*. Yellow. \$3.25 for 10, \$30 per 100.

HYDRANGEA PANICULATA GRANDIFLORA

Two-year-old, 3 to 4 branches. Bushy, \$1.50 per doz. \$10 per 100.

CATALOGUES RECEIVED.

Ralph M. Ward & Co., 12 West Broadway, New York.—Descriptive Illustrated Catalogue of "Horseshoe Brand" Products. Here is a "de luxe" publication, surely. Pages 12x18, on heavy coated paper, illustrated with sixty-eight splendid half-tones showing the characteristics of the various brands of Easter lilies, culture in the field, interesting photographs of other Japan horticultural products, also showing the French, Holland and Bermuda bulb industry, and, also, an interesting map of Japan and adjacent islands, showing the approximate location of various bulb fields, with a complete key. The great and ever growing horticultural importing industry acquires new prestige from the issuance of so elegant and conclusive an evidence of business enterprise and stability. The call for copies is certain to be very extensive. Accompanying the album is a wall sheet, 22x28, illustrated with many interesting views and giving the dates on which Easter Sunday will occur for the next thirty years. Every florist should have one on his office wall.

Yokohama Nursery Co., Ltd., 21-35 Nakamura, Yokohama, Japan.—Descriptive Catalogue of Bulbs, Plants, Seeds, for 1910-11. Here is another beauty among catalogues. The covers are richly adorned in Japanese art manner with peonies, lilies, irises and maples in natural colors. There are, besides,

several full page inserts in colors and the book, which comprises one hundred pages, is otherwise profusely illustrated. The lists of lilies, irises, etc., are quite full. Interesting information is given concerning freight rates, time for shipping various specialties, cable code, etc., all of which will be found very useful by the importing nurseryman or florist.

Charles Black, Hightstown, N. J.—Price List of Nursery Stock, Fruit and Ornamental.

FIRE RECORD.

Logansport, Ind.—A neglected bonfire destroyed the greenhouse of Sam Peterson on March 30.

Privet GROWN for Hedges

Satisfactory hedges are only obtained by proper nursery treatment. Plants not properly treated in the nursery must be cut back close to the ground and practically started all over again. Our California privet is grown specially for hedges and makes a dense growth of dark green, very shiny, ornamental foliage.

Seed Trade

The Outlook in California.

We have received from Charles P. Braslan the following interesting notes on the California outlook:

At this season of the year the various seed dealers throughout the United States and Canada are desirous of receiving information in regard to the various seed crops growing here in California.

The writer returned from his eastern trip about a month ago and has been busily engaged in going over our various ranches, which consist of over four thousand acres, and we are pleased to say to you that never in the seed growing experience have the crops been in such excellent condition. We have had something over $14\frac{1}{2}$ inches of rain this season, which is sufficient to make a crop. The rain has fallen gradually, so that the ground has absorbed all of the water, which has been a great benefit to all of the growing crops.

The hoeing of the crops will be completed on all the seed ranches—not only our own, but also on those of other growers in this section, within the next two weeks and if nothing unforeseen occurs, we will all harvest a good crop.

A field of lettuce of various varieties at Menlo Park, over $2\frac{1}{2}$ miles in length and from $\frac{1}{4}$ to $\frac{1}{2}$ mile wide, shows a magnificent stand. It certainly would be a great sight for any seed dealer to inspect this one field of lettuce. All varieties of onions are looking excellent. The critical time for this crop, however, being when the seed is in the dough, if we would have hot winds at such time, the yield might be injured to some extent; but from present prospects everything is in a most promising condition, the season having been ideal.

The radish crop is better than it has been for many years. Beet crops are looking excellent; also salsify, kale, mustard, celery, carrot and various other crops which are growing on an extensive scale.

We hope that many seedsmen can

arrange to pay us a visit this year and look over the crops, not only on our ranches, but those of other growers, as this is the season above all others for them to make such a trip to California.

A Suggestion Concerning the "Free Seed" Fund.

The Hon. F. D. Coburn, secretary of the Kansas department of agriculture, makes the following very valuable suggestion:

Great good could be accomplished with the money now spent for seeds if it were appropriated and pro-rated equitably between the various agricultural colleges and experiment stations, for experimental work in originating, developing and improving superior strains of wheat, corn, oats, cotton, and other crops especially adapted to or which give promise of worth to each particular state or territory.

In Kansas, the greatest wheat producer in the world, college-bred seed has resulted in increasing yields in some instances even so much as fifteen bushels per acre, and on a large number of trials the general average was five bushels increase per acre. The significance of this is made the more apparent when this increase per acre is applied to the 7,000,000 acres annually devoted to wheat in the Sunflower State.

Let's have our farmers planting pedigreed seeds as commonly as they are now rearing pedigreed live stock; improvement will be marked in the quality and yields from our crops as has been the case with our animals, and prosperity will be given much additional momentum. By diverting the appropriation as suggested impetus will be given a well-directed work already under way, and there will be none to mourn the passing of the day of "free" seeds.

Notes.

San Francisco, Cal.—The California Seed Co. has moved to 157 Market street.

San Francisco, Cal.—Luther Burbank has opened a retail seed store in the Emporium.

Manitowoc, Wis.—The Manitowoc Seed Co. is said to be planning a large addition to its warehouse and plant.

Mr. S. Sibley, representative of the Leonard Seed Company, visited Boston and other New England points last week.

W. W. Harnden, seed dealer of Kansas City, Mo., has been appointed county judge by Governor H. S. Had-

ley in the place of the late George Holmes.

Detroit, Mich.—A banquet of the salesmen of the D. M. Ferry Seed Co. was held the evening of April 6 at the Hotel Cadillac. John N. Doyle was toastmaster, Wm. T. Radcliffe master of ceremonies. An address by Dr. John H. Boyd on "The Art of Persuasion" was the principal address.

Martial Bremond cables that French bulb prices have been set at the conference held on the 15th inst. by the growers in the south of France, and as the prices are 25 per cent advance in Roman hyacinths and 10 to 15 per cent in Paper White Narcissi, it looks as though they regarded the reduction in the United States tariff as being made for their benefit. Short crop is given as the cause of advance and advice predicts a still further advance later on.

Birmingham, Ala.—J. H. White has completed the negotiations by which he becomes the controlling stockholder of the Amzi Godden Seed Co., the largest wholesale seed company in Alabama. Mr. White purchased the stock formerly owned by Maj. Joseph Hardie, Dr. T. F. Cheek and others. At the next regular meeting of the stockholders Mr. White will be elected president of the company and will assume charge of the financial management of the concern. George B. McVay, who has been a leading figure in the management of the company for 20 years, will remain with the company as vice-president and general manager.

Much has been said and written about the low germination of both field and sweet corn in the various corn growing sections of the country, and the outlook for good seed stock for the coming season is not very good. Mr. Tom Fagan of The J. M. McCullough's Sons Co., says that the section in a radius of 80 miles of Cincinnati has plenty of good corn, the weather being ideal for the maturing of corn last fall. The offerings of green corn on the market was so heavy and the price so low that most of the truckers

allowed their crop of sweet corn to stand. Of course, it is not to be had in any great amounts from any one grower, but collectively there was a large amount of good Zig Zag and Stowell's Evergreen produced, and the germination is high. A. O.

Sheboygan, Wis.—The John H. Allen Seed Company are about to build a new warehouse of brick, on the mill construction plan, three stories above a high basement, 50 x 130 ft.; on same lot, another building 50 x 130 ft., one story with cement floor, for storage purposes only, all of which is made necessary by their rapidly increasing business. This company's business is altogether a contract dealing with jobbers and canners, and the demand from their regular trade far exceeds their ability to supply for several years past. While their headquarters at the present time for the transaction of a large part of their business is in Sheboygan, there is a branch at Sturgeon Bay, Wis., and growing stations are largely in Wisconsin and Michigan with occasional seasons in New York and Canada.

Obituary.

Henry G. McPike.

The death of Henry G. McPike, better known as the "Illinois Burbank," removes one of the oldest residents of Alton, Ill. Mr. McPike died on Monday morning, April 18th. He was well known among botanists and horticulturists throughout the country, being the originator of the now well-known "McPike Grape." Mr. McPike was born in 1825 at Lawrenceburg, Ind. The funeral took place Wednesday, April 20th, on the lawn of his home in a grove of fine forest trees which Mr. McPike had planted. This was his wish, so great was his love for his trees and flowers.

Susan Scott Lustgarten.

Miss Susan Scott Lustgarten, 19-year-old daughter and only child of Mr. and Mrs. Charles Lustgarten of Elmhurst, L. I., N. Y., lost her life in a terrible accident on the evening of April 8. With other girl students of Adelphi College, Miss Lustgarten was participating in an entertainment when her dress was set on fire by the blaze from a pan of alcohol which was being used in the scene and she died from her injuries at Brooklyn Hospital.

William Penn Watson.

William Penn Watson, "The Father of Dry Farming," and one of the foremost Pacific Coast horticulturists, died recently at his home, Long Beach, Calif. He is said to have been the first to introduce fruit growing in the Hood River Valley, Ore. He was born in Morgan County, Ill., in 1823.

NEWS NOTES.

Rochester, Minn.—The Rochester Cut Flower Store has purchased the business of R. Grounds.

New Orleans, La.—The greenhouse of F. B. Faessel is being torn down, as he is going out of the retail business. He intends to grow asparagus for the wholesale trade.

Alton, Ill.—Allen and Irvin Keiser have purchased the Weber place in Godfrey Township, a mile and a half beyond the city limits, and intend to operate under the name of the Alton Floral Co. Their three new houses will be equipped with the best of appliances and those interested are very optimistic as to the success of the venture.

Atlanta, Ga.—A. Borg and Ivar Erickson have purchased the Atlanta Floral Co. and will continue the business on a larger scale. A new department of landscape gardening will be added as Mr. Erickson is a professional landscape architect and gardener and will have charge of this department. Mr. Borg will have charge of the floral end of the business at the Peachtree street store.

Flower Market Reports.

We have nothing of importance to report as indicating any change from conditions as described last week. The cut flower market is not lively by any means, but there is a considerable amount of stock distributed every day and any industrious salesman can unload his stock at prices which will compare favorably with the figures realized at a corresponding date in any other market of any comparable extent. Among the specialties which are making a place for themselves in the general market at this season are the Spanish irises, which are bringing from two to four dollars a hundred readily. Yellow daisies are also holding a good outlet. Crops from cold rose houses are beginning to count in the situation. Solid and sleek as might be expected, the Beauties, Kaiserins, Richmonds and Carnots grown from plants that have been resting all winter, hold a place of their own which cannot be disputed. Carnot returns to its former triumphs and there is nothing in sight comparable to it for sleek and fetching qualities. Violets are finished, all except an aftermath of Campbells, which are accepted by the violet hunter as better than nothing, but hold no place of vantage in the general situation and when they are gone there will not be any great grieving.

The best that can be said
CHICAGO is that the market is no worse than last week.

The hot weather came to a sudden termination at the middle of the month and the thermometer fell to eight degrees below freezing point in some sections of the city. The effect on outdoor flowers was to cut off the supply for the time, but a wet snow came in time to save much stock, both of flowers and plants that must otherwise have been lost. The cold, cloudy weather has also reduced the supply of indoor flowers and wholesalers come nearer to selling out clean than they have in some time. This is not due to increased demand, but to less supply. The cooler days have made a marked difference in the quality of carnations and plenty of excellent stock is to be had. The demand for long-stemmed Beauties is a little on the increase. Sweet peas are decidedly scarce and are the one thing wanting in the market. Violets are now quite out of the question. Tulips, daffodils and other bulbous stock from the South are drawing to a close. Lilacs have not been very active and only since the cooler weather has the quality been at all good. Spanish iris is bringing five cents for yellow and brown and six for blue. Fleur de lis is coming in from southern Illinois. The first peonies from Sarcovie, Mo., will be shipped here next week, so writes Mr. Gilbert from that place. Easter lilies are a back number; so much in demand less than a month ago they now sell very slowly while callas are unquotable. Ferns are still arriving in very poor condition from Massachusetts and dealers state that a large proportion are worthless. Shipping trade is holding up better than local. So many of the florists have been buying autom-

(Reports continued on page 67)

Exceptional Offer on Chiffon Pattern "6887"

This is the best quality of Chiffon on the market. We have just received a big shipment from abroad and offer for immediate orders at

5½c yard

6 inch width only. The heavy gauze edge on this pattern makes it particularly desirable.

Stock Colors:—
White, pink, violet, purple.

Chiffon, Gauze Edge, Pattern "6887."

OTHER HIGH QUALITY CHIFFONS

Plain,	Pattern No.
"	5101, 4 inch, 2½c yard
"	5102, 6 inch, 3½c yard
"	5103, 10 inch, 7c yard
Fancy Dotted Lace Edge,	5102A, 6 inch, 7c yard
Valley,	5102A, 6 inch, 7c yard

All our chiffons average about 35 yards to the piece. No piece is charged for more yards than it contains. We do not bill out short pieces as equivalent to full measure.

CEDAR BARK.

Window Box time. Have you plenty of Cedar Bark? Bundles of about 25 square feet, \$1.00 each. Special price in quantity.

Flower Market Reports

(Continued from page 635)

biles and so many are wishing they could, that the coming floral auto parade, May 7th, is of unusual interest. Possibly the elaborate decorations of 500 autos will call for such a quantity of flowers as to bring the realization of their hopes a little nearer.

Market conditions

CINCINNATI the greater part of the past week were

about the same as the week previous, the only difference being a slight decrease in the supply of carnations and roses. With the majority of the growers carnations are going off crop very rapidly. Outdoor tulips are in abundant supply and sales very slow. Sweet peas are still scarce with the demand very good. The supply of lilies and callas has diminished, with prices slightly better. Smilax remains scarce with Plumosus and Sprengeri in over-supply. On Friday and Saturday business assumed a different tone and prices were more firm than they have been for the past two weeks, this no doubt being due to the increased out-of-town demand. The demand for long-stemmed Beauties was good.

Spring comes on

NEW YORK apace and the usual conditions prevailing

in the cut flower market in early part of May are now in full sway here. The supply of everything in greenhouse product is still very plentiful, violets alone accepted, and the profusion is augmented by the influx of outdoor material, especially bulb flowers and lilacs. Violets are finished up and their departure was neither brilliant nor sensational. Should the season maintain its present precocity the Memorial Day question looms up as an occasion for some fine guessing.

Market last week

PHILADELPHIA was quite an improvement over

the previous—especially towards the latter part. Stock cleared up in good shape on Saturday. There was an appreciable falling off in the quantity of stock arriving, and the tone of the market was distinctly better. American Beauty roses continue in good crop, and have moved off in fair shape,

FLOWER CROWER OR BUYER

although at low figures in most instances. The out-of-town demand was quite good, and helped the local situation very much. Richmonds are good quality, unusually fine for this season. Brides, Bridesmaids, the Killarneys and Maryland are also good, but the demand is sluggish on all grades. Carnations have eased up as to crop, and the market has toned up a little. The quality is very good—considering the long spell of warm weather. Lily of the valley is selling very well and at normal prices. There has been very little surplus. Orchids are plentiful—especially Cattleya Schroederiae and Mossiae. A few Lady Campbell violets are coming in of extra good quality for the season. Gardenias are plentiful, with demand rather sluggish. Sweet peas are cleaning up much better; the crop has eased up some and the demand has improved enough to absorb all. Lilies are still in evidence, and go slow at medium prices. Market for callas overstocked. Some very fine snapdragon coming in—all colors good—but particularly the white and yellow. Asparagus plumosus plentiful. Smilax still shy. Good ferns hard to get.

Naperville, Ill.—The N. Saylor greenhouses have been purchased by Chas. Bond of Philadelphia. He will engage in orchid growing for the Chicago market.

NEWS NOTES.

New York, N. Y.—W. A. Blaedel & Son is now the firm name of the concern doing business at 402 West 23rd street.

We learn that burglars have again entered the wholesale florist establishment of George Saltford on West 28th street, New York. All they managed to get after blowing the safes and tearing things up generally was a few pennies and a couple of boxes of cigars. Of the latter the New York Journal says, "They took the good ones." We presume these latter were intended for presentation to likely consignors. The burglars evidently have not had access to the trade papers of late, else a wholesale establishment in the cut flower line would be the last place they would expect to find money just now. But Saltford does have the pose and dignity of mein characteristic of a gentleman of wealth and affluent leisure, and that must have impressed the cracksmen for the second time within eighteen months.

PUBLICATION RECEIVED.

The sixth annual report of the State Forester of Massachusetts is issued. It contains a statement of the results obtained during the year 1909 in the work of suppressing the gypsy and brown-tail moths and the progress made in general forestry, and these topics are covered with a completeness very creditable to State Forester Rane. There are a number of illustrations from photographs of fire-swept woods, new plantings, operations in spraying trees, etc. The summary of recommendations, which is concise and convincing includes one item of \$100,000 for the purpose of handling the elm-leaf beetle under the State Forester's direction. This with \$165,000 for the gypsy and brown-tail warfare and \$15,000 for carrying on the forestry department amounts to \$280,000, which the state is asked to appropriate for this department for the coming year.

INCORPORATED.

Windsor, Ill.—The Quigley Cemetery. Incorporators J. W. Herron, E. D. Tull and L. A. Gaston.

Tyler, Tex.—East Texas Nursery Co.; capital stock, \$50,000; incorporators, Ed. W. Mims, C. C. Crews, Joe M. Mims.

Buhl, Idaho.—Buhl Nursery Co.; capital stock, \$50,000; incorporators, James Munroe, S. A. Dicked and A. V. Mounce.

Cheap land for a bulb grower; some basket material; ideal place for man wishing to retire. A. G. Cobb, Anna Maria, Fla.

FUNGI.

Few persons realize to what extent fungous troubles are robbing the fruit grower and farmer of the profits of his labor. The potato harvest is cut half in two if not protected, and sometimes entirely ruined. The fruit harvested is lacking in size, color and smoothness. Consequently, apples of excellent flavor are sold to the cider mill, while apples that in quality are not fit for the cider mill command fancy prices because of their handsome appearance. Can we get this handsome appearance on eastern-grown fruit? I have no hesitation in answering, "Yes." Experiments made in the East this past summer warrant my saying so.

I had the privilege of attending the National Apple Show at Spokane, Wash., last November, which was undoubtedly the greatest exhibition of beautiful apples that the world has ever seen. It had on exhibition some New York and West Virginia apples, which were as highly colored as the same varieties grown in Washington and Oregon—just as smooth and perfect, and compared favorably in size. Many people suppose that there are certain climatic conditions in the West that are especially favorable to fruit. This is partly true. Climatic conditions were more favorable in the East thirty years ago than today. The increase in insect and fungous diseases has been discouraging to the most enthusiastic fruit growers, and many have fallen by the wayside. All of the newer fruit sections are freer from those drawbacks, but time will more or less equalize these conditions. The ever increasing demand for quality fruit and vegetables is calling for beauty as well as flavor, and fungous diseases do more than anything else to rob fruit of its lustre and bloom so pleasing to the eye, and for which the public are paying a disproportionately high price.

Fungi, in plain English, is one of the lowest groups of plant life, and those we have to deal with mostly on fruit and vegetables are parasites (microscopic in size), some of which attack cuts or wounds such as are made by insects, or bruises from careless handling or packing; yet other forms of fungi will attack healthy plant life, boring their way through the healthy tissues. Heat and moisture are very favorable to their growth and spread, yet some forms are more abundant in cool seasons. It will thus be seen that fungi are of innumerable forms, attacking when and where least expected. This makes it a most dangerous enemy. It is like combatting a contagious disease which we cannot see and know it only by results.

But the grower need not be discouraged, for an immense amount of work has been and is being done along these lines by our National and State Governments, as well as chemists connected with commercial houses, and the experiments made in this past year have been exceedingly gratifying. You will appreciate the difficulty when you understand that fungus is one plant growing on another, and a remedy must be found that will kill one without injury to the other. This has been the difficulty with the old Bordeaux mixture, that in killing the fungi, the little plant cells on both leaf and fruit are often injured.

Scientists have long believed that some form of sulphur other than the copper sulphate would destroy fungi without injury to the fruit and vegetable. This past season experiments were made with self-boiled lime sulphur, commercial lime sulphur, iron sulphate, "sulfocide," etc. The last named, which made an excellent record in the experiments of last year, contains actually between 29 and 30 per cent. of sulphur in solution, admitting of a great dilution; and in every instance where tried as a substitute for Bordeaux mixture, it has far surpassed it in effectiveness with no injury. Whether it can be used on peach and plum will be a matter of future experiment, but the fact that with less trouble and expense it can be used where Bordeaux has been the only remedy is very encouraging and makes it worthy of a trial.

B. G. PRATT.

GATHERING LADYBUGS.

The fable of the mouse which saved the life of the lion has its parallel in the ladybug and the rancher in California. For years untold the children have been singing—

"Ladybird, ladybird, fly away home," and the ladybirds have lifted their little red wing-cases and flown away accordingly. Now the fruit growers and farmers of California are menaced by a thousand insect enemies, and their most able defender appears to be the little ladybird, or ladybug. Early in the history of domestic parasitism in California the ladybug's fight against aphides was conducted almost exclusively in the melon patches. Now, however, it has been found that the little soldiers are capable of protecting many branches of the agricultural and horticultural industries, and so the little redcoats are being enlisted, or drafted, in numbers exceeding the czar's and kaiser's armies combined.

This year the prune men of northern California have made requisition upon the state insectary for bugs, while the applegrowers of the foot-hills have also asked protection. It is the cabbage growers of the Imperial Valley, in the hot southern region of the state, that make the greatest demand for ladybugs. Very soon, too, the grain growers of the Sacramento Valley will be asking protection against aphids that threatens the destruction of their crops, and then will come the gardeners and the fruit men, all asking for ladybugs.

For weeks past agents of the state horticultural commission have been at work in the mountain canyons gathering the ladybugs. While being prepared for shipment, the bugs are handled like so much grain. They are scooped into measures, thrown into a chute, and finally on a bed of excelsior in great boxes that look like arm cases. Here they are kept at a low temperature so that they will remain dormant until called out for active duty. Each crate contains from 50,000 to 60,000 of these militant patrons of husbandry, enough, when they begin breeding, to protect twenty acres of garden or orchard against the attacks of the aphids. No charge is made for the redcoats, but the state insectary uses its judgment to place the insect fighters where they will do the most good. The ladybugs themselves are

beyond price, for it is scarcely too much to say that without them the horticulture and agriculture of California, now valued at millions, would be a failure, and the state would be a desert.—John T. Bramhall, in *The Country Gentleman*.

THE ELM LEAF BEETLE.

The following notes are being distributed by Nursery Inspector A. B. Stene of the Rhode Island State Board of Agriculture, as part of the campaign which the Board hopes to wage against the elm beetle this spring and summer.

Among the insects which these warm spring days are calling into activity is the elm leaf beetle, and since a little effort now may reduce the numbers of this pest quite materially, a few suggestions in regard to the methods of checking it should not be amiss.

The beetle winters over in the imago or so-called "adult" form, and since it is not so hardy as some of our native species and does not know how to burrow in the ground, it seeks protection from the vicissitudes of winter weather in all kinds of protected places, but most frequently, perhaps, in sheds, barns, belfreys and attics, and sometimes even in the living rooms of houses. The warm spring weather brings these beetles into activity and they seek exit through windows and other well-lighted openings. As a result, the housekeeper frequently finds on the inside of the windows, little, dingy-looking, black and yellow striped beetles about a quarter of an inch long, which should by all means be captured and destroyed.

An easy way to destroy these beetles is to sweep them into a tin can or cup in which there is a little water and a tablespoonful of kerosene. A bath in the film of kerosene which will form on the surface of the water will destroy the ambitions of the most hopeful beetle.

When the foliage of the elms appears, beetles which have successfully passed the winter and the housekeepers' vigilance will begin to feed, and little round holes in the leaves will show as evidence of their activity. They feed for some time before beginning to lay eggs, and an early spraying with lead arsenate is, therefore, advisable. If the beetles can be destroyed before eggs are laid, future trouble from the larvae, which are really the more destructive as well as the more difficult to spray for of the two forms, can be avoided.

The beetle is quite resistant to poison and a solution containing one pound of a good quality of lead arsenate to ten gallons of water should be used.

Thoroughness in spraying is essential. Each female beetle which fails to get a sufficient dose of poison will lay from 400 to 600 eggs, and if only a few of the beetles escape, the number of the resulting larvae will be sufficient to cause considerable injury to the trees. Care must therefore be taken to cover the foliage at the tops of the trees as well as in the lower part of the crowns. Since the beetles eat entirely through the leaf and the larvae feed only on the under surface, covering the underside of the leaf with the solution is the more effective spraying, since it will catch both the beetles and any larvae which may subsequently appear.

WHEN TO STOP ADVERTISING.

When buyers forget to forget when competition ceases to compete; when every actual and prospective customer has been convinced that your product is the best of its kind and nothing better can be produced, then, and only then, will it be safe to get along without advertising.—Baker's Helper.

Until that time comes, HORTICULTURE can take care of your interests. If you want to sell to the best buyers in any branch of horticultural industry HORTICULTURE is unquestionably in the front rank as an advertising medium.

Mastica is elastic and tenacious, admits of expansion and contraction. Putty becomes hard and brittle. Broken glass more easily removed without breaking of other glass as occurs with hard putty. Lasts longer than putty. Easy to apply.

The Hump That Humps

It's the hump in the Corrugated that makes the other boilers hump themselves to match it for economy. It may not be a beautiful hump, but it makes a coal bill that's good to look at—and that's what counts.

For many purposes there is not a boiler its equal for greenhouse heating economy, which statement is not "hot air", but coal facts.

We were greenhouse heating engineers years before we began building greenhouses, and we have been building greenhouses over a quarter of a century. It stands to reason we thoroughly know both ends of the business—and we do.

Elizabeth, N. J.

Our Shadeless Ridge Type of House

Its advantage is, none of the benches are shaded by the ridge. This section is the 53 ft Sectional Iron Frame house we furnished for Mr. Fred Burki. His location on a side hill gives him a grade of about 5 feet in fifty.

Robert Simpson built his two 30x465 feet houses on the level, and graded them inside to meet his particular ideas.

Here then are examples of medium and wide Shadeless Ridge houses of our Sectional Iron Frame Construction. Each owner declares that they are the houses of the future, no matter what you want to grow.

If you are going to build, think these things over and get in touch with us.

Pine Bank, Olmsted Park, Boston

O when I am safe in my sylvan home
I tread on the pride of Greece and Rome,
And when I am stretched beneath the pines,
Where the evening star so holy shines,
I laugh at the love and the pride of man,
At the sophist schools and their learned clan,
For what are they in their high conceit
When man in the bush with God may meet.

Ralph Waldo Emerson.

The accompanying picture speaks for itself. Think of the untold years it has taken to produce this stately grove and the wickedness that would countenance its destruction. Yet there are many such beauty spots which are being destroyed every day and which can never be replaced in the life of anyone now living. Our cover illustration shows how industriously the park department of Boston, under the direction of that most eminent and efficient of park superintendents, J. A. Pettigrew, is working to preserve the sylvan beauty of the reservations under their care. Were it not for the foresight which secured these groves for the enjoyment of all the people for all time they would have been laid waste years ago. But now, when the hand of man has been effectually stayed, come the gypsy moths and brown-tails and elm beetles and other pests and but for the determined fight which has been put up it would not be long before their devastation would be accomplished.

Clematis

NEW EVERGREEN SPECIES FROM NORTHERN CHINA

Not for many years has there been such interest manifested in a new plant as was shown last Saturday at

the Massachusetts Horticultural Society's Hall in a hardy evergreen clematis exhibited by R. & J. Farquhar & Co.

The plant was raised from seeds collected in northern China by Mr. E. H. Wilson of the Arnold Arboretum expedition. The seeds were collected for *Clematis Armandii*, and Mr. Wilson who saw the plant in bud, the buds being of a pink color—was greatly surprised at the appearance of such a novelty—believing that a pink form of *C. Armandii* had appeared.

While the plant in general appearance resembles *C. Armandii*, the foliage is larger and more massive and the flowers are double the size of those of that variety and differ from it in being strongly jasmine scented. The flowers occur in sprays of four and in arrangement remind one of a spray of *Phalænopsis*.

Professor C. S. Sargent, director of the Arnold Arboretum, considers the plant one of great promise. The plant exhibited has stood one winter out of doors and is likely to prove perfectly hardy. It was awarded a first-class certificate of merit.

Trans-Atlantic Notes

LIEGNITZ ROSE SHOW

This is now a Rose town, for 30,000 roses have been planted by various exhibitors from many countries. Those who wish to see the fragrant "Gruss an Teplitz" will have to journey to Liegnitz. The climbing roses head the list, so that it promises to be a climbing contest. The usual bare sight of a rosary with its wooden pillars, arches, and laths, of many rose shows in late years will be missing at Liegnitz. The exhibition area measures 45 morgen (a morgen equals 3.122 yards).

ALBERT ROBST

celebrated on the 30th of last month his fiftieth year of service as head gardener to the firm of Ernest Benary, Erfurt. The jubilant was on this occasion awarded the Order of the Crown, 4th class, and his chefs honored him with a prize medal and a valuable gift. Herr Robst still retains the important position in the nursery he has held for so long a period of time.

PRAGUE

In view of the unfavorable financial condition of Bohemia the Landesceusschuss has determined not to decorate the official buildings with flowering plants. At a time when everyone is endeavoring to decorate the houses in the city with plants and flowers, Austria commences to be economical with the use of flowers, etc. It would be interesting to learn the amount of money saved by this policy, if only to compare it with the useless expenditure thrown out of the window, so remarks *Die Gartenwelt* of April 9 last.

country. The destruction of young growing crops and fruit buds by blizzards and freezing which, for the time of year and condition of vegetation, have no parallel in the history of fruit growing and farming in America, is appalling. This is one of those catastrophes against which no human plans or precautions can avail much. When they occur there are lessons to be learned, however, and one of these is that in estimating or computing profits from these industries the annual risk of the recurrence of such losses should never be lost sight of. Fruit growing and market gardening have been given an unprecedented stimulus within the past few years and such a ruinous set back at this stage of their development is greatly to be regretted.

A mischievous proposition

Stockbridge, Mass., is at present the storm center over a movement to so modify the Massachusetts laws against the defacement of the natural scenery of the State by advertisements as to sanction the erection, under certain conditions, of signs on the public highways, containing directions to the traveling public and "designating thereon by whom such signs are erected." One does not need a spy-glass to see what the adoption of such a law would lead to. We hope the attempt will be defeated. Massachusetts has taken and maintained a foremost position in the campaign against the billboard nuisance and the disfigurement of the landscape by advertisements. She can't afford to stand before the country as having now taken any backward step. Far better go the other way, if there is to be any change in the statutes and make the rules more prohibitive than ever. That is the way public sentiment everywhere is heading.

The Nursery Inspection Bill

H. R. 23253, the "Simmons Bill," providing for inspection of all imported nursery stock under the direction of the Secretary of Agriculture is now under consideration by the House Committee on Agriculture at Washington. We commented on this bill last week as one likely to meet with the approval of the parties most largely interested, referring particularly to the clause providing that inspection should be made at the point of destination instead of at port of entry as stipulated in a previous bill. But there are other clauses in this bill to which the Nurserymen's Association and others whose interests are involved take exception and we are inclined to the belief that they are justified in the protest which we understand has been made by representatives of the Association at a hearing before the committee in Washington this week. There is also cause for disquietude as to the application of certain clauses to the seed and florist industries. An awkward complication in the situation lies in the existence already of State inspection laws of more or less rigid character. We shall await with interest details of the hearing and earnestly hope that the bill may be so amended that no injustice or avoidable inconvenience may attend its operation. Unless this can be done no effort should be spared to accomplish its defeat.

We join most sincerely and feelingly in the great wave of sympathy which follows the news of the calamity which has befallen the vast fruit-growing and gardening districts of the central and southern sections of our

SEASONABLE NOTES ON CULTURE
OF FLORISTS' STOCK.*Adiantum Farleyense.*

This beautiful fern, I think, is unsurpassed by any of its allies, and for decorative purposes it has few equals. Its culture differs somewhat from that given other adiantums commonly grown. The only mode of propagation is by division, the fronds being all sterile. Any plants that are resting now, and before the young growth starts, can be broken up into pieces and put in a compost of chopped sphagnum peat and sand. They can be covered very lightly with the same material and placed in a warm propagating bed or house with suitable shading. They should be left in the bed long enough to make roots sufficient to cause little balls of the compost to adhere to them. The soil for the first potting should consist of fibrous loam, leaf mold and sand, in equal proportions. When potting from 4-inch up, the soil should be in a lumpy condition, using only the fibrous portion and discarding the fine soil entirely.

A very good compost to use for this fern is one part of dry cow manure to four of fibrous soil. Pot moderately firm. In hot and dry weather keep the atmosphere moist and give plenty of fresh air, taking care, however, not to expose them to cold draughts. A temperature of 65 to 68 degrees at night is sufficient. From now until November it is best to have the glass shaded, but during the remainder of the year full light can be admitted without injury.

Aquatics.

Florists who have ponds of their own can derive quite some profit from planting them with aquatics. But when such facilities are not at hand they can be successfully grown in tanks, vats, or a hoghead sunk into the ground. To grow any of the nymphæas to perfection there is nothing better than cow manure. In all cases where artificial resources are used a good rich soil and plenty of it is necessary to cultivate aquatics. By planting strong plants of nymphæas in May, you will have fine flowers by July. The hardy nymphæas and nelumbiums when in natural ponds and tanks must have sufficient water above the crowns in winter so that the ice does not reach them. When grown in tanks they can be protected with branches and salt hay. The tender species will do finely in our hot summers, but must be taken up and kept in a house of 55 to 60 degrees. The tubers can be placed in a flower pot with ordinary soil, which should be moist but not wet during the winter. The best hardy nymphæas to grow are *Marliacea* white, *Marliacea rosea* pink, *Candidissima* white, *Laydekeri* lilacea rosy lilac, *Odorata* sulphurea yellow. Here are some fine tender species: *Nymphæa gracilis* white, Mrs. C. W. Ward rosy pink, *Zanzibarensis* dark blue, *Pulcherima* light blue.

Grevillea robusta.

This plant is very useful to the florist for vases and veranda boxes. It is now about time to sow the seeds. Start them in flats and shift as required. They should be kept indoors all summer and will make useful

plants for next year. Plants of moderate size are the most to be desired, therefore it is best to sow some seed every spring. They lose their decorative value when over three feet high. No florist should fail to grow some grevilleas. They will stand a good deal of rough treatment, and are not subject to any insects.

Bedding Stock.

The season for planting all kinds of bedding and flowering plants will soon be here, and, to get the best results, sufficient time and labor should be given the plants so as to have them in good shape. Bedding plants should be allowed to become reasonably well pot-bound by shipping time. Stock thus becoming more firmly root-bound from day to day will need the closest attention as to watering and airing. Much of the bedding material now congesting our houses should find its way into frames. Should these be all in use, temporary inclosures can be brought into play. All these make-shifts will give room needed by other stock yet to be potted up. Stock especially raised and dealt in for outdoor planting should, in the first place, never be grown too rapidly. As the planting season draws near, a gradual hardening-off process should be carried on so as to put them in condition for outdoor changes. It is unwise now to cut down any stock for cuttings, thus spoiling your fine plants for an uncertain market.

Dahlias.

For the production of fine flowers the ground should be deeply dug, and well manured annually. Dahlias succeed best in an open situation, and in a deep, rich loam, but there is scarcely any good garden soil in which they will not thrive. As the plants increase in height they should be furnished with strong stakes to secure them from high winds, and securely tied as the growth proceeds. The cuttings that were taken in February and were struck in March and grown on, should be nice stock in 4-inch pots now. They should have plenty of light and air, so as to harden them off before planting-out time, which should be about the last of May or the first of June. If it is desired to grow them for exhibition as is common with the show varieties, remove all the lateral growth two feet above the ground and disbud, leaving only one bud to a stem, allowing no more to set until the flower is nearly developed. But if a wealth of bloom irrespective of size and form is wanted, allow all the side shoots to grow. During their blooming give them abundance of water and cultivate well during the hot weather.

Lemon Verbena.

Nothing is more appreciated than a few sprays of lemon verbena in a bunch of flowers. They should be nice little plants now in 3-inch pots. They will be greatly benefited by being plunged in a mild hotbed, and should be pinched so as to form good bushy plants. They will stand lots of syringing to keep down red spiders, and will need frequent fumigation to control the green fly.

JOHN J. M. FARRELL.

Mr. Farrell's next notes will be on Annuals, Bay Trees, Cymbidiums, Epacris, Hardy Ferns and Tuberoses.

FERTILIZERS FOR STRAWBER-
RIES.

The following notes on strawberry culture were given by Wilfrid Wheeler in response to an inquiry from the "Question Box" at the meeting of the Gardeners' and Florists' Club of Boston on April 26.

Strawberries need a good deal of quickly available plant food in the form of potash and phosphoric acid added just before the blossoms appear.

In preparing land for a strawberry bed care should be taken to provide a situation where there is abundant moisture in the soil or where water can be added, for while almost any soil will grow a good plant it needs a soil with plenty of moisture to produce good berries. I speak of the moisture conditions as being very essential in dissolving quickly the necessary elements contained in the fertilizers, which are applied just before the bed comes into fruit, as well as supplying the water, of which the strawberry contains nearly 83 per cent. There is nothing better as a fertilizer for strawberries the first season than well-rotted stable manure, well worked into the soil. The plants should be fed during the growing season with such materials as tankage, basic slag, bone meal and wood ashes or sulphate of potash. A good formula to use is as follows: 1000 lbs. of tankage, 500 lbs. basic slag and 500 wood ashes or 200 sulphate of potash to an acre. This should be applied at intervals of about three weeks, care being taken that the fertilizer is not put on the green leaves of the plants.

Fertilizers containing nitrogen in any form should not be used in the spring near the fruiting season, as such fertilizers have a tendency to soften the berries, make them insipid and of poor color.

Wood ashes and basic slag can be applied at this season with excellent results. If wood ashes cannot be obtained, sulphate of potash is a good substitute, used at the rate of one lb. to 125 square feet.

It is very difficult to give advice to anyone when soils and conditions are not known, but I have often noticed in garden culture that strawberries are overfed rather than underfed and the plants go all to foliage rather than fruit. If it is borne in mind that after a good plant has been grown nitrogenous fertilizers should not be applied I feel sure that in most soils the strawberry will be a success.

"COUNTING THE COST.

"To make one little, golden grain
Requires the sunshine and the rain,
The hoarded richness of the sod,
And God.

To form and tint one dainty flower
That blooms to bless one fleeting hour
Doth need the clouds, the skies above,
And love.

"To make one life that's white and good,
Fit for this human brotherhood,
Demands the toil of weary years -
And tears."
T. A. DALY.

"Your paper is a great help to me,
and I hate to lose a number."

N. Y.

NEWS OF THE CLUBS AND SOCIETIES

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

Notwithstanding the heavy rain storm over one hundred members were present at the meeting on the evening of Tuesday, April 26.

Among the communications read by the secretary were several from Congressmen promising support in favor of parcels post and in opposition to free seed distribution. Another came from J. W. Duncan, who is now in Spokane, resigning his office as president and also as a member of the club, and same was accepted.

Peter Fisher was nominated and elected by a unanimous and enthusiastic vote to fill the position of treasurer, left vacant by the death of Edward Hatch.

F. J. Rea spoke on herbaceous plants for spring planting. Wilfrid Wheeler sent a paper on the cultivation of strawberries, and William Swan a communication on annuals for winter blooming, recommending larkspurs and lupins as the best and mentioning *antirrhinums*, *Nemesia strumosa* Suttonii, *Nigella Miss Jekyl*, *Schizanthus Wisetonensis*, *Leptosyne maritima* and stocks as also among the desirable things. Secretary Craig added *Clarkia Salmon Queen* as a pot plant, *Dimorphotheca aurantiaca* for sowing in benches, *calendulas*, and several others.

R. W. Curtis gave an excellent talk on early flowering trees and shrubs, illustrating same with a large collection of branches and flowers, and considerable discussion of this timely topic ensued.

Among the exhibits were the following: Peter Fisher, seedling scarlet carnation No. 409, report of merit. Louis Dupuy, *Erica ventricosa* magnifica and *Hydrangea hortensia* Avalanche, report of merit. Both of these novelties were greatly admired. John Dorgan, *antirrhinums*, report of merit. Mrs. E. M. Gill, herbaceous *calceolarias*, F. E. Palmer stocks.

J. K. M. L. Farquhar spoke of the coming National Flower Show and recommended some special recognition of the event and official action by the club. This will be brought up for consideration at the May meeting.

Resolutions as follows were presented and adopted:

Resolutions on the Death of Edward Hatch.

Whereas, The Supreme Ruler of this Universe has seen fit in his infinite wisdom to call to his eternal rest our well beloved friend and brother, Edward Hatch; and,

Whereas, Edward Hatch was a man worthy of our highest esteem because of his nobility of character, his blameless life, his great heart, his ever-ready sympathy and charity to the poor and needy, therefore,

Be It Resolved, That we, The Gardeners' and Florists' Club of Boston, whilst bowing reverently to God's will, do so with hearts full of sorrow at the loss we have sustained in the death of a friend so dear, one who stood ever ready to help with wise ad-

vice and unselfish aid the members of this organization which he loved so well and served so faithfully as treasurer for many years.

Edward Hatch spoke few criticisms of those with whom he disagreed; he said no evil things of others; he was remarkably free from resentfulness; his noblest virtue was his willingness to forgive and his ability to forget, and no opportunity was ever lost to give a kindly word of praise for anyone he liked.

His genial presence we shall all miss, but his memory will be ever with us and his name will always shine as a bright star in the list of our departed members. Our club will not forget his spontaneous generosity as displayed on very many occasions. No man ever won and retained so thoroughly the affection of our members as did Edward Hatch. He was the idol of those who knew him best.

Resolved, That these resolutions be inscribed in the records of the Gardeners' and Florists' Club of Boston, and that a copy thereof be sent to his bereaved family.

(Signed) WM. J. STEWART,
P. WELCH,
WILLIAM DOWNS,
Committee.

CONNECTICUT HORTICULTURAL SOCIETY.

Rose Night was observed by our Society on the 22nd inst.

It was decided to make the next meeting night, May 13th, Fertilizer Night, for a general discussion concerning the important question of soil fertilization, and especially for an address by Prof. John J. Ruegg, president of the Lava Company of America, of Passaic, N. J., who expects to be with us on that evening. While the idea of utilizing volcanic ashes from many different mountains of the world seems novel and speculative to some, our Society has determined to give a respectful hearing to one of the most ardent advocates of this product.

The absence of any roses on our exhibition table was more than compensated for by the delivery of an able and eloquent address by Howard A. Pinney, one of John Coombs' valuable assistants, on the subject of "The Rose." Paying a high tribute to the skill of American rose growers, Mr. Pinney briefly described the various leading classes of roses, and gave useful hints on their culture. The soil cannot be too good or too rich for roses, he said. The liberal use of water produces marvellous effects. Rose gardens have their place, but it is not in front door yards. They should be planted in groups or masses, for the best effect. Budded plants are the most satisfactory, though own-root plants will be insisted upon by some, whose wishes should be respected. Faulty pruning he believed to be a great evil in rose growing, and the seller often has to take the blame. If pruned back to two or three buds at planting time, and each year thereafter to the same extent, less disappointment would ensue.

Rugosa roses are, in his opinion, the

rose for the millions, and are really shrubs, and of extra hardy constitutions. Climbing roses rank next in value, quickly transforming unattractive views into delightful pictures. Crimson Rambler, Dorothy Perkins, Lady Gay, and Farquhar, were especially praised as possessing the highest merit; and Hiawatha, one of the most remarkable yet introduced, will undoubtedly become the greatest favorite of them all. He denominated it "a grand new rose of the highest quality." Among hybrid perpetuals he mentioned Jacqueminot, Marshall P. Wilder, Mrs. John Laing, Frau Karl Druschki, Paul Neyron, Ulrich Brunner, Earl of Dufferin and American Beauty as among the most desirable. The dwarf polyantha roses have marked a new era in rose culture, being quite hardy and free blooming, and ideal as bedding plants.

In closing his address, Mr. Pinney said that "the rose is the flower of the masses; and its culture in a general way will be for the good of all mankind." President Huss advocated fall planting for roses.

GEORGE W. SMITH, Sec'y.

AMERICAN CARNATION SOCIETY.

Henry Eichholz, Waynesboro, Pa., registers the following named new carnations:

Princess Charming—Helen Boseler × Enchantress. Salmon pink. 3 to 4 inches. Very strong, vigorous grower. Very free producer of first-class flowers. Keeping and shipping qualities excellent.

Christmas Cheer—Alvina × Victory. Fiery scarlet. 2 to 3 inches. Habit dwarf, though stems reach 2½ feet after Christmas. Extremely floriferous. Will produce 100 or more blooms per plant in a season. Especially fine for pot culture. Through an error this name is printed Winter Cheer in the judges' report in the annual report just issued.

A. F. J. BAUR, Sec'y.

CLUB AND SOCIETY NOTES.

A call has been issued for a meeting to be held at Horticultural Hall, Boston, at 3 p. m., on May 27, to consider the organization of a Gladiolus Society. The call is signed by Maurice Field.

Preparations for the second annual flower show of the Albany Florists' Club were discussed at a special meeting on April 21. Fred A. Danker, chairman of the show committee, gave a preliminary report on the finances of the exhibit in the armory last November. A committee of five, with John Sambrook, Watervliet, chairman, was appointed to call upon the florists, growers and others interested, to ask them to furnish exhibits. Displays of seedling carnations were made by President Fred Goldring, F. A. Danker and Heikes Bros. Wm. Hannell had a nice show of carnations and roses.

The Bar Harbor Horticultural Society held its second annual ball at the Casino, Bar Harbor, Me., Friday evening, April 15th. It proved to be one of the most enjoyable affairs ever

held there. The hall was handsomely decorated. Red and green lights with evergreen, shrubs and palms gave the galleries and entrance a very handsome appearance. About 150 couples formed for the grand march which was led by William Miller and Miss Vester Stubbs and Mr. and Mrs. Charles Shand. John H. Stalford was floor director, his aids being Bernard Morris, Clifford Came and William Siever.

The Dayton Florist Club of Dayton, Ohio, held their second annual banquet at the Phillips House the evening of April 15th. H. H. Ritter, president, sat at the head of the table and a very excellent menu was enjoyed. Quite a number of informal talks were delivered after the banquet. The following were among those present: Mr. and Mrs. George Bartholomew, Mr. and Mrs. J. F. Young, Mr. and Mrs. Horace Frank, Mr. and Mrs. F. Mittman, Mr. and Mrs. F. Hasche, Mr. and Mrs. A. E. Schmidt, Miss Bertha Hendricks, Miss Ruby Bartholomew, Miss Catherine Young, A. Bartholomew, Fred Noon, Jos. Furst, C. M. Schaefer and the president, H. H. Ritter.

President Alost of the New Orleans Horticultural Society tendered his friends and colleagues a sumptuous dinner at Rose Villa, Gentilly avenue recently. Mr. Alost was much surprised at the presentation of a handsome traveling bag and tea set, and as he expects to leave for Europe in June he will be able to make use of the traveling outfit. The presentation speech was made by C. R. Panter, secretary of the Society and during the evening the following gentlemen made addresses: P. A. Chopin, Uriah J. Virgin, C. W. Eichling, Solomon Marx, Ed. Baker, E. C. Killere, F. J. Mitenberger, E. J. Thread, Harry Dresel, Harry Papworth and others.

President Alost is one of the oldest and most enthusiastic members of the Society. Many of the foremost men in horticulture in New Orleans are among the members and it has gained much in strength and prominence during the past ten years; it is now twenty-six years old. Officers are: A. Alost, president; Herman Doesche, vice-president; C. R. Panter, secretary; John Eblen, treasurer.

CARNATIONS.

Read before the Florists' Club of Philadelphia, March 1st, 1910, by A. M. Herr.

The trade papers have been full of carnations and carnation society matters for the past month, but they seem to be an inexhaustible subject and I will try and not repeat too much of what has been said.

There seems to be no diminishment in the number of promising novelties year after year; in fact, they seem to be increasing in number and wonderfully increasing in quality. Those of us who were in Pittsburg could not help but remark on this feature of the novelties exhibited there. Just what to expect from these novelties from a commercial point of view is a question for the future. No doubt many of them will prove a disappointment to either the originator or the buyer or both, but what a monotonous world this would be with no disappointments

to make us properly appreciate our success.

In my address at Pittsburg I recommended that a report be secured from a number of growers giving their experience with the introductions of the previous year, these reports to be sent to the secretary of the Carnation society and published in pamphlet form each year. The Society, or rather the committee whom I appointed to take up the recommendations made in this address, did not see fit to even bring this up for discussion. We can hardly ask the trade papers to take it up, but the various florists' clubs might have an experience meeting each January and discuss this matter of the preceding year's novelties pro and con. The opinions of the commission man and the store man are quite as valuable as those of the grower. We cannot expect to get as good results as the National Society could, but with a free interchange of opinion we can buy the second year novelties with some assurance of success, and quite a number of the \$50.00 per 1000 varieties would be hunting buyers at 50 cents per 1000. Publicity of failures is needed, and badly needed. Elbert Hubbard says "let each individual work toward the betterment of as many other individuals as he possibly can, and his financial reward will be money flowing into his pockets as naturally as water flows into a river." How many successes have you had among the novelties bought last season? Don't keep them to yourself. How many failures have you had among the novelties you bought last season? Tell us about them. Some one among us may be able to put you on the track of making this failure a success; if not, then neither you nor I want to plant it another season.

Another point I tried to bring out, and which was ignored by my committee, was to have a tag attached to each bunch of flowers giving the date they were cut and the grower's name on it. This in the course of time would be looked for and demanded by the final consumer as a guarantee of good faith. I would like to see a fresh-flower law enacted on similar lines to the pure-food law, and believe that such a law properly enforced would treble the use of our flowers. Not long ago I was in a store where a good-looking vase of Enchantress was in the window; the clerk told me about half the blooms in this vase were flowers from Chicago, and that they were three days old, the balance of the vase being fresh flowers from a local grower. Enchantress is not the best of keepers and we all know that the final consumer getting flowers from this vase was foreordained to disappointment. Let our carnations be sold under a guarantee by the retail man that they have been cut on a certain date and add a little advice as to the best method of keeping and many an occasional buyer will be turned into a regular customer. It is not so much the price of flowers that interferes with their sale as the fact that in many cases the buyer receives so little value for the money spent.

Let the growers try to grow such varieties as are known good keepers, making this one of his first demands in buying a novelty, then let him grow them properly and tag them, as previously suggested, and in the course

of time the man who does this will find himself on the high road to success, and the man who does not will be traveling an opposite direction.

Enchantress and all of its sports can, if well grown, be turned out moderate keepers but the careless grower wants to leave them alone. Pink Delight, Victory, White Perfection, all of the Lawson type, Winona and O. P. Bassett are all good keepers under ordinary culture and it is this class of varieties that should be planted in quantity and some of the softer but perhaps more beautiful sorts be experimented with until you learn to handle them and turn out flowers that will give good satisfaction.

Another point I tried to bring before the Carnation Society was our lack of business methods and ideas. The retailer in our business is perhaps the nearest to 1910 business methods, but he has much to learn; the commission man follows along about 1900 style and the grower is lagging back somewhere about 1850 style. Not that I know much about 1850 business methods but it will do for a simile and I believe is a correct one. We do not need cultural methods, we have them once a week in four trade papers, but we do sadly need business methods and we need some one to come into our societies who has made a study of modern business and tell us something about this end of our work.

There is some money in carnation growing; in witness thereof just note the modern eight and ten-thousand-dollar houses going up exclusively for carnations. The man who has the cash to pay for these structures is all right; the man who builds on credit will have many a weary year before his houses are paid for. I maintain that the modern carnation establishment can not produce carnations at a profit for less than a two-cent average from Sept. 1st to June 1st. Keep your own records, charging up every item of expense, interest, taxes, wear and tear and every item that goes into the production of your carnation blooms and see if I am wrong.

When you see retailers paying \$16,000 a year rental for their store, and wholesale establishments without number in all of the larger cities and the grower adding house after house you naturally conclude each and every one is making money "a la Rockefeller," analyze the situation carefully and you will find a triumvirate competing hades.

I am not up in business methods well enough to suggest a remedy but I want to give this as an opinion and that is "there are entirely too many commission houses in the larger centers and the competition among them is getting to be a bit hard on the grower. The grower, the retail man, the commission man and the final consumer are all component parts of what is and ought to be an immense business. The healthy increase and life of that business needs the encouragement of each of these sections. Get together.

In our last issue the name of Mr. P. Pearson, grower of fine *Primula obconica*, was incorrectly given as P. Peterson. However, the primulas will grow just as well, notwithstanding.

CHICAGO NOTES.

A Destructive Storm.

Nature has added another startling surprise to the many already ours this season. All is excitement in the downtown district today (Monday) as the various nearby growers are bringing in reports of the havoc wrought by the hard frosts of the past three days. After the warmest March in thirty-nine years all vegetation was in an unusually advanced stage, and the first cool days in the latter half of April came as a welcome relief. Even the appearance of light snow in the air on the 17th caused no apprehension. What started in as a gentle rain on the 22nd turned during the night to a howling blizzard with a cold north wind and temperature as low as 22 degrees in some localities. Icicles eighteen inches long hung from eaves and did not melt for days. Snow fell to a depth of three inches. The tender young leaves of large shade trees hung limp and ice in low places formed to a considerable depth. The greatest concern is felt for the peonies which were in full bud. Not only are the growers of Chicago losers by the hard freeze, but the loss of the crop tributary to Chicago market is also serious for the commission men and further reports are awaited with much anxiety.

Later Reports of the Big Storm.

Nothing encouraging can be said of the situation at this writing, Tuesday, April 28th. The cold rain alternating almost hourly with a wet snow is steadily falling. Those who were so hopeful of a happy outcome as a result of the snow on the frozen vegetation are less hopeful, now that the low temperature and wet weather has reached the fourth day and no indications that a change is near.

Reports from peony growers in the outside towns vary somewhat, but all agree that at least a large part of the crop is gone while there are many who believe that there will be no peonies at all this year.

That the most advanced peonies are gone is now the general verdict in and about Chicago. The older peony plants had their buds, showing color, and they are now black and still hang down in the cold rain. It is now ten days since the fall in temperature began and only late varieties can possibly escape.

Much anxiety is felt for the young carnations in the field. So far as the frost was concerned, the safety of the plants that had been out long enough to be established had caused no anxiety. But the long continued cold rain is likely to develop stem rot and this new source of danger is a serious one.

Whether our shade trees lose their leaves is a question frequently heard, and much speculation as to the effect on the tree, if so. No one can be found who can remember any similar experience and the drooping leaves in many cases are quite black.

Prospects for Memorial Day.

Most florists think the chances of a good business for Memorial Day are very slim. Roses are likely to be off crop and the market so long glutted with stock will be comparatively bare. Outdoor stock in any quantity is an impossibility and even without the

storm lilacs and snowballs would have been over with before another four weeks. It looks as if the artificial wreath will be more in demand than florists like to see and more nearly excusable than usually is the case.

Shakespeare Day.

Unfortunately for those who would do honor to the memory of Shakespeare, the storm prevented the carrying out of the program so carefully prepared for Saturday. Many wreaths of flowers were placed upon his monument in Lincoln Park, sent or carried by his admirers in Chicago and in eastern cities, but the blinding storm made it impossible for the people to remain more than a few moments at the celebration of the poet's 346th anniversary. The statue was hidden in a bank of flowers, which will be allowed to remain several days. Among them were wreaths sent by many noted actors, including Robert Mantel, Edward J. Sothorn and Julia Marlowe.

Another Failure.

This morning the word went around the market that L. Visas, known as the Masonic Temple Florist, was missing and there are many wholesalers who are the losers. The three Visas Bros., Greeks, have one of the best downtown retail stores and did a good business. The move must have been sudden as the eldest brother, who is the manager, had planned to expend \$3,000 on changes in the store which has entrances on both Randolph and State streets and the work had already begun.

Notes in General.

Wm. Homberg has resigned his position with the J. B. Deamud Co.

D. D. Johnson says Evergreen Brand Fertilizer will make vegetation all right if applied after the storm ceases.

Some of the wholesalers have expressed their intention to draw the line more sharply on credits hereafter on account of the recent failures.

Samuelson had a beautiful window last week, done entirely in spring flowers. Possibly he foresaw the impossibility of trimming one in this way this week. Mr. Samuelson is contemplating adding an automobile to his equipment.

Geo. Cook has resigned his position as superintendent of grounds at Sears, Roebuck & Co. and is succeeded by R. C. Lund, formerly at the Garfield Park conservatories. Sears, Roebuck & Co. have probably the most beautiful grounds of any business house in Chicago.

Circular letters have been sent to the trade by the International Forwarding Co., offering for sale six crates of choice boxwoods and conifers from Belgium. They were consigned to R. Jahn, Dearborn street, whose place of business was closed by action of the Municipal Court at the instigation of the landlord.

The A. H. Hews Co. decided last January to give up their Chicago office and have now closed out the stock on hand. The Hews pots are manufactured in Cambridge, Mass., and the cost of freight has been a big item since the establishing of the Chicago business, some three years ago. Last January the new and higher freight rate

went into effect and the firm decided to discontinue their Chicago branch.

Personal.

J. B. Deamud has returned from a two weeks' trip in the East.

Miss Lillian Blom of Bassett & Washburn office is spending a week in Toledo.

Visitors: M. Bloy, Detroit, Mich.; Chas. H. Plumb, Detroit, Mich.; Geo. R. Crabb, Grand Rapids, Mich.; J. W. Lyon, Belvedere, Ill.; E. Amerpohl, Janesville, Wis., and A. N. Kinsman, Austin, Minn.

DURING RECESS.

Chicago Bowlers.

The results of the winter's tournament of 81 games are as follows:

CARNATIONS: Capt. Frank Ayres, Frank Pasternich, Ed. F. Winterson, Ernest Farley, Fred Krauss.

Total pins, 58,673; Average, 724 20-81; prize, \$25.00.

VIOLETS: Capt. Victor Bergman, Erick Johnson, John Kruchten, Fred Lieberman, Thomas C. Yarnall.

Total pins, 57,589; average, 710 78-81; prize, \$15.00.

ORCHIDS: Capt. Huebner, Wm. Graff, Geo. Asmas, Theodore Vogel, John Zech.

Total pins, 57,007; average, 703 64-81; prize, \$10.00.

ROSES: Capt. Wm. Wolf, Otto Goerisch, George Pleser, Wm. Lorman, Frank Johnson.

Total pins, 56,991; average, 703 48-81; prize, \$5.00.

Each member of Carnation team receives champion fob, donated by Peter Rienberg.

Individual Winners. Average. Prizes Won.

T. C. Yarnall..... 158 3-81 \$12.00

John Zech..... 157 30-81 10.00

Wm. Wolf..... 157 17-75 8.00

Erick Johnson..... 154 4-74 7.00

Victor Bergman..... 151 39-75 6.00

Frank Ayres..... 150 60-81 5.00

Wm. Graff..... 147 17-80 4.00

Frank Pasternich... 146 75-78 3.00

Ernest Farley..... 146 61-68 2.00

John Huebner..... 146 60-81 1.00

The first six men each receive an umbrella donated by Foley Mfg. Co.

T. C. Yarnall, Individual Champion, got silver cup donated by Mr. J. B. Deamud.

Victor Bergman, high single game 256, prize \$5.00; high average 3 games 204 flat, prize \$5.00.

Orchid Team, high single game 921, prize \$5.00; high average 3 games 867 1-3, prize \$5.00.

Mr. Bensinger, who has the alley, donated \$55.00 to the Florist Bowling League.

Special Notice.

Starting Friday evening, April 29th, all florists desiring to bowl and make the team to represent Chicago at the coming convention should be at Bensingen Alley, 118 Monroe St., at 7.30 p. m. Everyone has a chance to make the team. FRANK PASTERINICH.

"Enclosed please find \$1.00 for subscription to HORTICULTURE. Rush copy along, we need it."

Obituary.

Joseph Whipple Congdon.

Joseph Whipple Congdon, well known to scientific men throughout the world, died recently in Waterman, Wash. Mr. Congdon won considerable success as a lawyer before taking up the study of plant life. He devoted himself to exhaustive research in the field of botany and added considerably to the world's knowledge of that subject. He was well known in Europe where he made a considerable collection of plants and these combined with a collection from the East, he presented to the Stanford University. European institutions also received highly valued gifts of the same character. When he died Mr. Congdon had an herbarium of about 10,000 specimens. He is survived by a widow, one son and daughter. Interment was in Port Blakeley Cemetery.

Samuel W. Twombly.

Samuel W. Twombly, who was for many years engaged in the florist and truck gardening business at Winchester, Mass., with retail store in Boston, died on April 27th, at the age of 88 years. He was born in Tamworth, N. H., July 31, 1822. For over fifty years he has been active in the social and political life of the beautiful suburban town of Winchester, and much of the attractiveness of this model residential

district is due to Mr. Twombly's influence and foresight in the various departments of the town affairs in which he served. He had three terms as representative of his district in the legislature.

Personally, his character was of the highest and his buoyant disposition made for him many friends.

The greenhouses at Winchester have for a number of years been conducted by his son, John D. Twombly.

Luther James Bradford Olcott.

The funeral of this widely known expert on grass was held at Manchester, Conn., on April 25. Mr. Olcott was a remarkable man and his influence, quietly exerted, will live as long as a grass lawn is known. Rev. Dr. Reynolds, who officiated at the funeral, said:

"Mr. Olcott's greatness appears in that he chose to identify himself with something as small and ordinary as grass and made the grass famous. He took that strip of ground yonder, he planted it with grasses gathered from all over this globe; for twenty years he had been working with those grasses through storm and sunshine and he had made that strip of land the most famous strip of grass land in this country. A man cannot make a strip of land famous because of his labors with grass unless he is great himself. The message of his toil was, let there be grass and nothing but grass upon this strip of land, and there was grass such as we have never before seen. Grass as thick as a sponge,

as soft as velvet; grass as beautiful as a carpet for the palace of a king. A man who could impress you and the generation in which he lived with the grass he produced must of necessity impress you with his own personality, and he did."

APHINE

Is proving a most effective, while at the same time absolutely harmless, insecticide for use on young stock.

It destroys the insects, and invigorates the plants.

Have you tried it?

MADISON, N. J.

NEW AND DESIRABLE HERBACEOUS PLANTS.

Read before the Gardeners' and Florists' Club of Boston by Arthur E. Thatcher.

(Continued from page 624)

To retain the majority of herbaceous plants in a vigorous and healthy condition, it is necessary to occasionally divide and replant them and this applies especially to those which rely upon a mass of fibrous roots for support, such as asters, campanulas and phlox, but such strong rooting plants as *Anemone Japonica* and those with long roots and few fibrous ones will succeed for many years undisturbed if the soil is well prepared.

I would strongly advise giving the border a covering of some material in the fall as soon as the stems have been removed, and for this purpose I prefer soil to anything else as it not only protects the crowns, but affords the roots new food for next season.

Water, whether in the form of ponds or streams, is a most valuable adjunct to all gardens, large or small, and no part of an estate can be made more attractive and beautiful than the aquatic garden if it is well arranged and the most suitable plants are employed. This, however, is a large subject and would need a separate lecture to do it justice; but I fear I have already taken up too much of your time so I will confine the rest of my remarks to some herbaceous plants which thrive best at the edge of the water or in marshy ground. Many of these are recent Chinese introductions, and when seen growing one is greatly impressed with the remarkable beauty of that country's flora, and they are all perfectly hardy.

Astilbe Davidii is perhaps the most beautiful of the family and like all the others would be worth growing for its luxuriant foliage. The flowers are produced on branching stems, five feet in height, and the color is best described as deep rose-pink with a suffusion of violet, a peculiarly beautiful combination not seen in any other plant. *A. grandis* is similar in all respects, except that the flowers are pure white.

A. rivularis and its two varieties, *gigantea* and *major*, are noble plants with immense foliage and arching spikes of creamy white flowers.

A. Chinensis is a plant of great merit with a light pink inflorescence and such varieties as *Washington*, *New Rose*, *Queen Alexandra*, *Silver Sheaf* and *Thunbergii*, which grow from two to three feet high, are indispensable where the best plants are desired.

The *Spiraeas*, though often regarded as being akin to *Astilbes*, are botanically very different; but they are equally beautiful for waterside planting. There is considerable variety of form and coloring among them and a good selection would include *gigantea* and its variety, *rosea*, which are six feet high, *Venusta* with rich pink flowers, *palmata* and its two varieties, *alba* and *elegans*, and the double form

of the English Meadow Sweet, *S. Ulmaria flore pleno*.

Everyone is familiar with *Caltha palustris*, the Marsh Marigold or King Cup, of which there are several good double forms, but the most noteworthy is the new *C. polypetala*, which is the giant of the family. It has very large foliage and the flowers are borne on long stems.

Two handsome North American plants are *Napaea divica* and *Stenanthium robustum*, both deserving of extended cultivation. *Oreocome Candelieri* is also very uncommon, but its elegant foliage and white flowers render it very attractive.

China is responsible for the best of the hardy Primulas; *pulverulenta*, rich purple; *Cockburniana*, orange scarlet, and *vittata* with deep rosy purple flowers are unsurpassed for such positions as where *P. Japonica* succeeds. For many years *Rodgersia podophylla* was the only member of this family cultivated in gardens, and had no new varieties been discovered in China we should have been perfectly satisfied with the large bronzy foliage and numerous white flowers of the well known species, but now there are several others of even greater value. *R. aesculifolia*, with leaves like a horse chestnut and large panicles of rosy white flowers on stems four feet high, is extremely effective. *R. pinnata*, with salmon pink flowers and its white variety are also desirable plants.

Saxifraga peltata, which produces its tall flower stems in spring before the foliage, is one of the best waterside plants and the variety *gigantea* is a larger edition in all respects.

One does not often see that beautiful British plant *Butomus umbellatus* in cultivation, although it is one of the best for growing just at the edge of the water. It has rush-like foliage and fall umbell of rosy pink flowers. For spring flowering the *Globe Flowers* or *Trollius* are unsurpassed and many beautiful varieties are now obtainable in a variety of color, some with yellow and others with rich orange-colored flowers. *Fire Globe*, *Newry Giant* and *Orange Globe* are three of the most desirable plants I am acquainted with.

Rheum Alexandrae is an extremely ornamental rhubarb from China and the most effective of the family. The pale yellow leaf bracts which cover the flower stems present a unique and beautiful appearance in June and contrast well with the dark glossy green foliage. Perhaps the most ornamental of all bog garden plants from the far East are the *senecios*, and Mr. Wilson would have done a good work for horticulture had he only introduced these. *Senecio clivorum* is a singularly beautiful plant, with foliage a foot or more in diameter and rich golden yellow flowers three inches across on branching stems five feet high. *S. Veitchianus* has large foliage and bright yellow blossoms which are produced on the upper portion of the stem for fully two feet, and *S. Wilsonianus*, which is similar in habit, has smaller flowers in much larger numbers. As single specimens or when planted in groups these three plants are unsurpassed.

The pansy crop in France and Germany has been badly winter killed.

ROSES IN OREGON AND WASHINGTON.

Presented at the meeting of the American Rose Society by Wm. S. Sibson.

Mr. President and Gentlemen: You will appreciate the vastness of the subject upon which I have been requested to speak, when I remind you of the extent of territory, and diversity of conditions in regard to climate and soil, that exists within the two states I am to discuss. Combined they aggregate 160,000 square miles, an approximate acreage of 61,500,000 acres of land so diversified in character that in a brief address it is possible only to select a limited area, and to refer generally to the balance of this wonderful empire, which in development is only in its infancy. Having a coast line on the Pacific Ocean of about 500 miles, these states are divided about 150 miles from the coast by the Cascade range of mountains into two great sections, namely, Eastern Oregon and Washington, and Western Oregon and Washington. It is of conditions in the western division that I will endeavor to say a few words that may interest those of you who are strangers to our country.

Climate.

The climate of Western Oregon and Washington is remarkably mild and even. Occasionally, of course, we have "hard winters." The one from which we are now emerging has been, all told, the worst I have seen during a residence here of nearly forty years. As a rule, however, the winters are mild, rainy and pleasant, with a mean temperature in a series of years for the five months between October and May of about 46 degrees. In the summer months from May to October the average temperature, during a like period has been about 63 degrees. These temperatures you will note are averages for a series of years. "Cold snaps," which seldom record lower from 10 to 15 degrees of frost, occasionally occur in winter and the "hot spells" of summer, which range from 85 to 90 degrees and sometimes a few degrees higher, have been of course included in arriving at the averages I have quoted.

Rainfall.

Western Oregon and Washington are frequently credited with an excessive rainfall; in fact, I have heard strangers claim that "in Oregon" it rains thirteen months in the year. As a matter of fact, the precipitation, at Portland, does not exceed 46 inches per annum, and in a series of years it has not reached this average. Perhaps, to people who visit us in winter, it may appear to rain excessively, because the bulk of our rainfall takes place during the six months from October to March. I have noticed that when we have an unusually long rainy winter, generous crops of grain, fruit, and all the products of the ground result, and while I have never seen an analysis of our Oregon winter rain water, I believe it is one of the best natural fertilizers, and laden with plant food by a beneficent nature.

About Roses.

With such a climate as I have briefly outlined, with soil unexcelled, and with a people who are enthusiastic lovers of the rose, it is surprising that our country should have become celebrated for its rose! The motto of the American Rose Society, "A Rose for every Home,

You Ought to Have More of the Palm Business of Your Town or City

—and Heacock's Palms will help you to get it! There's a lively demand in every locality, as you know, for good Palms — both from persons who purchase outright, and from those who rent for weddings, receptions, social functions, etc. In either case, you can supply the demand with profit to your self by furnishing Heacock's Palms — Kentias, Cocos, Arcas, etc.

We grow them by the thousands and our men are real Palm experts. Our stock is vastly superior to any imported stuff you could buy — our Plants are clean, healthy, vigorous, acclimated.

The accompanying illustration shows how perfectly they mature under our care. We would like to fill a sample order from you — for a dozen or a carload — each specimen just as perfectly developed as this one.

Following are our current prices for this choice stock of Palms:—

Joseph Heacock Co., Wyncote, Pa.

a bush for every Garden," is with us a condition and not a theory.

This sentiment is good, but in my opinion far too modest, and I hereby beg to make a motion to amend and substitute, "Roses for every Home, Roses for every Garden." The motto of the Portland Rose Festival Association is, "Roses fragrant, roses rare, Roses, Roses, everywhere," and this is consistent with the feelings, opinions, and practice of our people.

Wild Roses.

Wild roses of many species are indigenous and flourish in luxuriant foliage and wealth of bloom. The fragrant sweetbrier, vigorous and strong, in many places, lines our country roads. In some districts of deep alluvial soil, the swamp brier attains a height of 20 feet or more. High up some mountain slope, we find wild roses rioting amid the huckleberry, sallow, and other native shrubs.

The late Rev. Dean Hole, a great rosarian and one of the originators of the National Rose Society of England, in his invaluable "Book About Roses," says in effect that wherever wild roses grow, rose culture may successfully be done. Without a doubt there are in our soil, climate, and surroundings, qualities peculiarly conducive to rose growing. Eastern people are often surprised at the size, perfection, and beauty of roses in this country. To emphasize this assertion, I will quote the opinion of an expert, well known to many of you, who visited Oregon in 1903.

Sizes of Roses.

I think it was Oregon and perhaps Portland, that first realized all the good characteristics of that fine variety

Orchids Fresh Stock. Just Arrived.

Horseshoe
Brand

before joining your professional ranks, I had the time and inclination to develop the best I could get out of my rose garden. You know the Paul Neyron was up to a few years ago and perhaps is yet, the largest rose in cultivation. I have seen it credited in your eastern catalogues with this characteristic, and further described as "sometimes attaining 5½ to 6 inches in diameter!" In Portland in my own garden, I have cut this rose, not once but often, measuring 11¼ inches in diameter!

Evolution.

Ever since I have known Portland, when her population was only about 9,000, her people have been devoted to roses, and I believe the same applies to every town in Western Oregon and Washington. Nearly twenty years ago excellent rose shows were held in Portland. In those days the ladies of the city took hold and by united effort and good executive, exhibitions were held that would have been a credit to much larger places. The love of roses thus encouraged, rapidly increased and every new home builder became a lover of the rose. In 1901 the Hon. F. V. Holman, a leading attorney and noted amateur rosarian, suggested that Portland be christened and henceforth called "The Rose City." The suggestion quickly "took" and today not only in this country, but throughout the civilized world, Portland, Oregon, is identified with fine roses.

In 1905 the Lewis and Clark Exposition attracted I think some two million people in this city, and the reputation and beauty of her roses were dis-

seminated far and wide. About two years later, the Portland Rose Festival Association was organized and annually in June there is held a "week of roses," including the great Rose Show under the auspices of the Portland Rose Society. At this Rose Show last year it was estimated three million rose blooms were used in the decoration of the building in which the show was held. Perhaps I am saying too much of Portland, but in this connection it is almost unavoidable, because I live there, and have been, and am in close touch with these matters. Other towns, however, in Western Oregon and Washington are developing the same success in their cultivation. It is invidious to mention names where all are interested, but it would surprise many of you gentlemen to see the beauty and quality of flowers that are exhibited at the rose shows throughout this section. At many of them, the latest introductions of Europe are exhibited. Our rosarians are also discriminating and well posted about their favorites, and woe betide the dealer who is not careful to keep everything true to name. Shakespeare says, "What's in a name! That which we call a rose, by any other name would smell as sweet." But here we must have the true rose by its true name, that was given to it by its introducer at its birth. I could say more about this, but it does not come within the province of this paper.

Commercial Aspect.

So far, Mr. President and Gentlemen, what I have written may not have been

of interest to you as professionals wishing to know something about the conditions from a commercial point of view.

I regret to say that for commercial growing in a large way, many insurmountable drawbacks exist. The mildness and beauty of the climate so favorable for the amateur is absolutely impossible for the professional. About five years out of seven, the plants will not ripen until too late for distant shipment. I have often cut good outside roses at Christmas. Then our spring usually opens too early. Frequently when the East is blocked with ice and snow, our roses are budding out and getting ready to bloom. I have more than once seen outside roses in Portland begin to bloom by or about the 8th of April. On the other hand, several times no roses have been in bloom on Decoration Day, May 30th.

In the former cases, the shipping season is ruinously curtailed. At other times there are killing frosts late in January or February, and in my own experience I have seen the young wheat plants frozen out in the middle of March, necessitating reseeded of practically the whole northern part of Western Oregon. In such seasons the plants suffer such serious injury that a year is practically lost before they can again be ready for market.

I am afraid that some of our push clubs might object to these plain facts, but for all general purposes the climate and conditions which exist in Oregon and Washington are so good that the truth will not hurt either us or them.

Dreer's Select Hardy Vines and Climbers

Potted Stock for Present Planting

AKEBIA QUINATA.

We offer extra heavy pot-grown plants of this handsome climber.
Strong 4-inch pots, \$1.25 per doz.; \$8.00 per 100.
Heavy 6 " " 2.00 " 15.00 "

AMPELOPSIS VEITCHII.

Strong 2-year-old, \$1.50 per doz.; \$10.00 per 100.
Extra selected plants, \$2.00 per doz.; \$15.00 per 100.

AMPELOPSIS VIRGINICA. (Virginia Creeper.)

Strong 2-year-old plants, \$1.25 per dozen; \$8.00 per 100.

AMPELOPSIS TRICOLOR. (Vitis Heterophylla Variegata.)
Very strong, 3-inch pots, \$1.00 per doz.; \$7.00 per 100.

AMPELOPSIS ENGELMANNI.

Extra strong, 2-year-old plants of this most useful variety.
\$1.75 per doz.; \$12.00 per 100.

AMPELOPSIS LOWII.

A new variety of the same general character as A. Veitchii and clinging to the smoothest surface without support, but with foliage much smaller and deeply cut, giving a light and airy appearance to the plant not possessed by the older sort. In spring and summer the leaves are of a bright apple-green color, changing to a brilliant crimson and scarlet in the autumn. 60 cents each; \$6.50 per doz.

APIOS TUBEROSA.

Strong tubers, \$2.00 per 100.

ARISTOLOCHIA SIPHO.

(Dutchman's Pipe Vine.)

Extra heavy, \$4.00 per doz.; \$30.00 per 100.

BIGNONIA. (Trumpet Creeper.)

Grandiflora. Strong plants, \$3.00 per doz.; \$20.00 per 100.

Radicans. Strong plants, \$1.50 per doz.; \$10.00 per 100.

CELASTRUS SCANDENS.

(Bitter Sweet, or Wax Work.)

Extra heavy plants, \$2.00 per doz.; \$15.00 per 100.

CINNAMON VINE.

Strong roots, 40 cents per doz.; \$3.00 per 100.

CLEMATIS PANICULATA.

(Japanese Virgins Bower.)

We have an immense stock of exceptionally fine plants of this most popular of all the Clematis, and offer

Strong 2-year-old plants, \$1.50 per doz.; \$10.00 per 100; \$90.00 per 1000.

CLEMATIS MONTANA GRANDIFLORA.

The plant is of stronger growth than any other Clematis, not subject to the attacks of insects, and succeeds under the most adverse conditions. It is perfectly hardy, having withstood without the least damage in a most unfavorable position in our trial grounds. Its flowers, which resemble the Anemone or Windflower, are snow white, 1½ to 2 inches in diameter, and frequently begin to expand as early as the last week in April, continuing well through May, and are produced in such masses as to completely hide the plant. Extra strong, 2-year-old plants, 35 cents each; \$3.50 per dozen.

CLEMATIS MONTANA RUBENS.

Identical in every way with the white flowered variety, excepting in color, which is of a most pleasing shade of soft rosy red.

We offer a limited stock of strong plants, 75 cents each; \$8.00 per dozen.

EUONYMUS RADICANS VARIEGATA.

A nice lot of 3-inch pots, \$1.00 per doz.; \$7.00 per 100.

LARGE-FLOWERING HARDY CLEMATIS.

We have again this season a fine stock of good, strong plants, two years old, own roots.

Boskoop Seedling or **Sieboldi.** Extra large lavender.

Duchess of Edinburgh. Double pure white.

Henryl. Finest large single white.

Jackmani. The popular dark rich royal purple.

Madam Baron Veillard. Light rose, shaded lilac.

Ville de Lyon. Bright carmine red.

30 cts. each; \$3.00 per doz.; \$20.00 per 100.

VARIOUS CLEMATIS.

	Per doz.	Per 100
Coccinea. Two-year-old roots.....	\$1 00	\$7 00
Crispa. Two-year-old roots.....	1 00	7 00
Virginiana. Two-year-old roots.....	1 25	8 00
Integrifolia Durand. Of semi-climbing habit, large indigo-blue flowers. 35 cts. each.		

HONEYSUCKLES.

	In. pots	Per doz.	Per 100
Variegated	2½	\$ 60	\$4 00

"	6	1 75	12 00

IPOMOEA PANDURATA. (Hardy Moon Flower.)

Strong dormant roots, 50 cents per dozen; \$4.00 per 100.

HARDY JASMINE.

	Per doz.	Per 100
Nudiflorum. Yellow, 5-inch, pot-grown.....	\$1 50	\$10 00
Officinale. White, 5-inch, pot-grown.....	1 50	10 00
Primulinum. An introduction from China, its flowers fully double in size to J. nudiflorum; these appear simultaneously with the leaves. Strong plants, 35 cents each; \$3.50 per doz.		

LATHYRUS LATIFOLIUS.

(Everlasting Pea.)

	Per doz.	Per 100
Albus. White.....	\$1 00	\$7 00
Splendens. Rose.....	1 00	7 00
"White Pearl." A magnificent, new, pure white variety, with individual flowers fully double the size of the ordinary Everlasting Pea. These are produced in really gigantic trusses. We offer very strong roots at 20 cents each; \$2.00 per dozen.		

POLYGONUM.

Baldschuanicum. This beautiful, hardy, woody, twining plant is one of the most interesting and showy flowering climbers. Its flowers are white, and are borne in great feathery sprays at the extremities of the branches. Strong plants, 35 cents each; \$3.50 per dozen.

Multiflorum. A very desirable climbing plant, which seems peculiarly adapted to our climatic conditions. It is of strong, rapid, but not coarse, growth, frequently attaining a height of 15 to 20 feet in one season. Its bright green, heart-shaped leaves are never bothered by insects, and during September and October it produces masses of foamy-white flowers in large trusses from the axil of each leaf. \$1.50 per dozen; \$10.00 per 100.

SCHIZOPHRAGMA HYDRANGEOIDES.

(Climbing Hydrangea.)

One of the most interesting of our hardy climbers. Its flowers, which are borne in large trusses, are similar to white Hydrangea, and when in flower during July and August, make a handsome display. A limited stock of strong plants, 75 cents each.

WISTARIA SINENSIS.

Extra heavy two-year-old plants, 5 to 6 feet long, well rooted.

	Per doz.	Per 100
Blue	\$3 50	\$25 00
White	4 00	30 00

VITIS HENRYANA.

A new climber from China, foliage similar in outline but not as large as the Virginia creeper, foliage of great substance and prettily variegated, the ground-color being deep velvety-green, while the midrib and veins are of a silvery white. 60 cts. each; \$6.00 per doz.

AMPELOPSIS LOWII.

Henry A. Dreer, 714 Chestnut St., PHILADELPHIA, PA.

The above prices are intended for the Trade only.

Hardy Climbers, Etc.

Mr. Florist, we suggest these to you to **MAKE SALES.** Do the same to your customers—**IT WILL PAY US BOTH.**

AMPELOPSIS Strong Dutch-Grown

Ampelopsis Veitchii (Boston Ivy). Extra-strong imported vines, 3-year-old. \$1.25 for 10, \$12 per 100.

Ampelopsis Veitchii robusta. A very compact-growing variety of the well-known Boston Ivy, and very highly recommended to us; will undoubtedly take the place of the ordinary Veitchii in the near future. \$1.75 for 10, \$15 per 100.

Quinquifolia (American Ivy, or Virginia Creeper). Good for covering walls, verandas, or trunks of trees; affords shade quickly. 25 cents each, \$1.75 for 10, \$15 per 100.

CLEMATIS

Henryi. Pure white; extra large. *Jackmanni*. Purple. *Alba*. White. *Sieboldi*. Lavender. *Ville de Lyon*. Brilliant Carmine-red; as good as Mme. Edouard Andre, but contrary to this one, is very free-growing.

Extra-strong plants, 30 cts. each, \$2.75 for 10, \$25 per 100. *Clematis paniculata*. Strong, 2-year-old plants, \$2.00 per doz., \$15 per 100.

ACTINIDIA ARGUTA

A desirable Japanese climber of strong, vigorous growth, with dark green, shining foliage and white flowers with purple centers, which are followed by clusters of edible fruit. An excellent plant for covering arbors, trellises, etc., where a rapid and dense growth is desired. Strong plants, 25 cts. each, \$2.50 per doz.

BIGNONIA (Trumpet Vine)

Radicans. Dark red, orange throat; free-blooming and very hardy. 20 cts. each, \$2.00 per doz.

ARISTOLOCHIA SIPHO

Dutchman's Pipe. Strong, field-grown, 3 to 4 feet. 35 cts. each, \$3.25 for 10, \$30 per 100.

WISTARIA SINENSIS Extra Strong. Field Grown

Blue. 6 to 7 feet. 40 cts. each, \$3.75 for 10, \$35 per 100. *White*. 6 to 7 feet. 40 cts. each, \$3.75 for 10, \$35 per 100.

HONEYSUCKLE

Very extra-strong, Holland field-grown plants. 6 to 8 feet long, many branches. *Halliana*. Yellow. \$3.25 for 10, \$30 per 100.

HYDRANGEA PANICULATA GRANDIFLORA

Two-year-old, 3 to 4 branches. Bushy, \$1.50 per doz., \$10 per 100.

PHILADELPHIA NOTES.

Arthur Zirkman and Robert Shoch, of M. Rice & Co., have just returned from a very successful New England trip. The Rice specialties seem to be popular among the critical down-easters.

John Burton entertained a party of friends, including J. B. Deamud, of Chicago, and some local people with an auto trip to Atlantic City and back on the 20th and 21st. Mr. Burton is the ideal host and it is needless to say that all hands enjoyed themselves immensely.

Antoine Wintzer will be the speaker at the next meeting of the Florists' Club—his subject, "Roses Past and Present." This will be worth hearing. Come in, ye lazy, home-loving laggards, and hear a past master! Antoine has been too rushed to write a paper, so the story will be extempore. Remember the date, Tuesday, May 3.

John Westcott has been at Waretown a good deal of late superintending farm operations and renovating and repairing the club house of the Waretown Rod and Gun Club of which he is commodore. The annual opening of the club will take place as usual in June. On the 23rd Mr. Westcott went on a brief visit to his venerable friend, Richard Lynex, at Atlantic City.

Alexander Cumming, late City Forester and Superintendent of Streets of

Pink Climbing Rose— Dorothy Perkins

Without doubt the most valuable of all the new Climbing Roses of comparatively recent introduction. The beauty of the double pink flowers is admirably set off by the rich green foliage, which is free from the attacks of insects.

In addition to this charming kind, we have all the popular varieties in climbing and bush Roses. Our General Catalogue, which will be mailed on request, contains descriptions of all the best Roses—also

Fruit and Ornamental Trees, Shrubs and Hardy Plants.

PEACOCK DAHLIA FARMS, WILLIAMSTOWN, JUNCTION, N. J.

ture. We understand the business will be conducted under the title of "The Red Rose Nurseries."

W. Atlee Burpee entertained a party of visitors at his country home and seed farms at Fordhook on the 24th. M. C. Ebel, of Madison, N. J., W. J. Stewart of Boston, and John Burton and George C. Watson of Philadelphia, were among the guests. Mr. and Mrs. Burpee are genial hosts and every visitor is made to feel as if he were a prince imperial. It is considered a high honor and compliment to break the bread and eat the salt of this "gentleman of the old school," and the present occasion was no exception. The blooded stock—horses, cows, colliers, chickens and pet lambs—which are a great feature of Fordhook farms—came in for a good share of pleasant inspection and admiration under the personal conduct of Mr. Burpee and Mr. Earl. The high state of cultivation and the splendid order and system in the grounds and buildings were duly appreciated, as were the views from the top of the hill giving vistas for twenty miles around. Dr. Washburn, of the National Farm School, adjoining Fordhook, appeared on the scene later, and another treat was in store for the visitors when he took them through the grounds of this remarkable institution. The trip from Wyndmoor to Fordhook was made with John Burton in new Stevens-Duryea auto, this being the fourth and latest in his family of buzz wagons.

Visitors: H. L. Holmes, Harrisburg, Pa.; J. Martins, Hamburg, Germany; Alex. Cumming, Hartford, Conn.; J. B. Deamud, Chicago, Ill.; M. C. Ebel, Madison, N. J.; W. J. Stewart, Boston, Mass.; L. J. Reuter, Westerly, R. I.; M. Henry Lynch, West Grove, Pa.

ALEXANDER CUMMING.

Hartford, Conn., has purchased the Adolf Muller property between Morristown and North Wales, Montgomery Co., Pa., and will establish a nursery business there. He intends to make a specialty of hardy roses and evergreens—the soil at that point being especially fine for these subjects. Mr. Cumming is an expert nurseryman, having learned his business and held responsible positions in Scotland before coming to America. Canadian and New England experience preceded his appointment as Superintendent of the Stoke-Pogis estate in Pennsylvania. We wish all success to the new enterprise and expect to see the upper reaches of the picturesque Wissahickon blossom like the rose in the near fu-

Seed Trade

About Onion Sets: Results of the Cold Wave.

We were misinformed as to the true situation on onion sets, and find that they are much more abundant than what was generally supposed a few weeks ago. On account of the warm March onion sets are in a bad condition and are not selling at prices which they usually bring at this time of the year. It is said that mail order houses find the trade has fallen off greatly within the past two or three weeks, but the recent cold spell should make a renewed demand for a great many items which had unwisely been planted too early. Just how much damage the cold wave has done is not yet apparent, but unquestionably the newspaper reports are greatly exaggerated. Inquiry among the trade in New York does not show any great demand for beans, peas and other seeds, which naturally are sold early in the Southern States. According to the newspaper reports the cold wave extended as far south as Alabama and was down to thirty-two at Nashville, Tenn. If this is correct it must have seriously damaged early-sown vegetables and it may develop that such is the case within the next few days. In Michigan, Wisconsin, Indiana, Illinois and a large part of Ohio, the damage to fruit especially has been very heavy and it is assumed, though we have no positive information on the subject, that early sowings of peas which were out of the ground, have been severely damaged, if not killed outright. We shall be able to give more definite information on this subject in next issue of HORTICULTURE.

Henderson's Improvements.

Peter Henderson & Co. have at last completed the improvements on their store at 35 and 37 Cortlandt St., and now have a thoroughly equipped and up-to-date place of business. The new front is very handsome and impressive and presents favorable comment from all who see it. They are usually in the forefront of improvements and

this is simply a further evidence that they mean to remain "in the lead." Business with them is reported to have been exceptionally good and continues to be very active up to the present time.

European Crop Conditions.

Reports from Europe as to this season's prospective crop of cabbage, turnips, Swedes, beets, mangels and carrots indicate a very heavy shortage and point to another season of exceptionally high prices on these lines. This applies especially to cabbages and turnips. Efforts on the part of some of the trade in this country to increase their contracts along these lines have been largely unsuccessful as European growers feel that they will be unable to anywhere near fill orders already booked. We shall probably have something more definite as to crop conditions within the next two weeks, and same will be given in HORTICULTURE as heretofore.

Effects of the Freeze in the Chicago District.

The Leonard Seed Company reports that at this date, the extent of the damage to early crops in the Chicago garden district cannot be fully determined. In most cases, the gardeners are optimistic and hope for the best.

It is generally conceded, however, that the first planting of radishes is lost and that carrots and beets that have broken through the ground will stand a poor chance of making a crop. Head lettuce, which has been transplanted to the open ground from the hot-beds, will be greatly damaged. Early cabbage and cauliflower, similarly set out, will likely stand the adverse condition, but the serious check to the growth will lessen the uniformity of the crop and cut it down considerably. Onions and onion sets will not be hurt to any extent. Peas may pull through, but any beans that were sprouted will perish. Early sweet corn and other half hardy vegetables, where sufficiently advanced to be above the ground, will not recover. Spinach, which in some places was about ready to be cut for market is wilted and practically unsalable. This

will entail considerable loss, as many of the gardeners have been depending upon this for early money returns.

In the localities where the soil is somewhat sandy and where early planting is the rule, the crops are much further advanced than in the cold clay soil. It is a question whether this advanced condition will be of benefit. Some of the gardeners seem to think that the further advanced the small vegetables are, the greater the damage will be. On the other hand, some of them are of the opinion that where the crops are the farthest advanced the damage will be less. Taken as a whole, the loss will be serious at best, and if re-planting is to be done, there are many of the varieties of seeds that are out of the market and it will be hard for the growers to secure the proper varieties if re-planting is necessary.

The weather, which has continued cold and cloudy since the hard freeze, is doing the right thing, for a sudden return of sunshine and warmth would have been wholly disastrous to the stricken crops.

Concerning Opaque and Transparent Seed Packets.

To the Editor:

In view of the fact that seedsmen enjoy a special mailing privilege in the matter of rates it would come with poor grace for any seedsman to even hint at any objection to any reasonable regulations that the Post Office Department might see fit to impose. It is plainly evident that no one in the Department believes that seedsmen have taken advantage of the lax enforcement of a rule as old as the one to which attention has been recently called, or extension of time to the end of the season would not have been given.

Comparatively few will be affected and no one will be especially burdened except that it will eliminate the dark paper that is forbidden.

It is unfortunate that the matter should have had birth in petty politics and is a case of the many suffering for the indiscretions of a few.

C. E. KENDEL,
Sec. American Seed Trade Association.

A Disclaimer Critic.

H. B. Fullerton, editor of the "Long Island Agronomist," is hot after the seedsmen's disclaimer. On being asked to state why, he sets up a few assumptions, or straw men as they are called, and then proceeds to annihilate them for a few columns—all of the same very good logic if the starting point were but right. Possibly the only way in which Mr. Fullerton could be brought to a proper frame of mind (it seems to us) would be to have him go into the seed business himself for a little while and see how the thing works out. If a man buys a horse he doesn't get a guarantee that it will not run away and break a leg inside of a year. Does Mr. Fullerton want an insurance policy with every pound of seed? It looks that way! G. C. W.

Notes.

"Buds," the new seed, bulb and plant company, have opened business at 76 Barclay street, New York, and when the store fitting is completed it will be a very well arranged outfit with every prospect of good business. The location is a very favorable one for transient trade and Mr. Gloeckner, the president and manager, has had seventeen years' experience in this neighborhood.

Manitowoc, Wis.—As was reported in our last issue the Manitowoc Seed Co. is planning extensive additions to its warehouse and plant. They have purchased the Jirikowic property at 10th & Hancock streets, which purchase will give them more than half a block of property on 10th street.

Grand Junction, Colo.—H. M. Cannon has sold his interest in the Grand Junction Seed Co. to Whit Rozelle who will conduct the business in the future.

PERSONAL.

Among the departing European tourists is Louis Dupuy of White-stone, N. Y.

John D. Duly is now gardener at Mrs. F. N. Anderson's estate near Newport, R. I.

W. N. Reed, of Reed & Keller, New York, sailed on a European visit on the Cincinnati, Thursday, April 28.

Phillip Murray formerly with Clark Bros. is now on the road for C. C. Morse & Co., San Francisco, Calif.

Andrew P. Petersen of South Lincoln, Mass., has taken a position with A. M. Davenport, florist, at Watertown.

George Saltford will move from his present location in West 28th street, New York, some time in the early summer.

John Mayer has taken charge of the Playter grounds at Piedmont, Calif. He was formerly gardener to M. H. De-Young, Ross Valley.

M. Mischon has accepted a position with the MacRorie, McLaren Co., San Francisco, Calif. He was formerly with J. H. Sievers Co.

Philip Breitmeyer has spent two days in Buffalo anent the funeral of his mother's sister, who had gone there only a few days previous.

F. H. Hunter is now with the May Seed Co., San Francisco, Calif. Mr. Hunter was formerly manager for the Germain Seed & Plant Co., Los Angeles, Calif.

Sedalia, Mo.—L. H. Archias, president of Archias Floral Co., accompanied by Mrs. Archias and two daughters, Elise and Edith, sail from New York, May 14th, on S. S. Konig Albert, for a three months' visit in Europe.

Anthony Weigand, Indianapolis, Ind., recently celebrated his 51st anniversary in the florist business with a theatre party at the Grand Opera House, and his 20 employees after the theatre much enjoyed a lunch and smoker at the Elks Club.

Joseph Schmidt, the oldest florist in Central Pennsylvania, celebrated his 83rd birthday at his home in Harrisburg, April 12th. Mr. Schmidt was born in Bavaria in 1827 and came to America in 1860. He came to Harrisburg in 1865. On September 6th Mr. and Mrs. Schmidt will celebrate their golden wedding anniversary.

Boston visitors: George G. A. White, representing R. M. Ward & Co.; H. Frank Darrow, New York.

Princeton, Ill.—The W. E. Trimble Greenhouse Co. is making arrangements for large additions to their plant and the contracts for the erection of two new houses are ready to be let. Last fall this company doubled the capacity of their local plant and the addition of the two proposed houses will make it one of the largest in the state. It is expected that building operations will commence right after Decoration Day as the two buildings must be completed by the first of September. The plant is under the personal supervision of W. E. Trimble the organizer.

Flower Market Reports.

BOSTON This section escaped the cold and inclemency which has had so much influence on the flower market in some other parts of the country, and affairs are running along in ordinary channels without any fluctuations worth mentioning. The supply in all lines is ample and quality is good, especially on roses. Prices are as good if not better than the average at this period in previous years. The slump usually following Easter has not been experienced this year. Lily of the valley has declined in demand as compared with last week and there is an unwieldy surplus of tulips and daffodils of outdoor growth. White carnations are selling better than the colored varieties. Gardenias are fine but the sale drags. American Beauty roses are more plentiful and show a tendency toward lower quotations. There is an abundance of small roses of all kinds. Sweet peas are in brisk demand.

BUFFALO Cloudy weather with a good portion of rain and snow for the past ten days had an effect to shorten the supply and put the market again in good healthy state and for the first time since Easter have the counters and coolers looked bare. Only one-third of the normal supply was had on carnation; the same with roses and other stocks and prices moving upward have cut off the bargain sign. Trade has been good on all lines. Towards the end of the week white carnations have been a little on the scarce side while plenty of colored material was had. Roses have moved better than heretofore. The demand is good for Killarney, Kaiserin, Pres. Carnot and White Killarney and the quality has never been better. Beauties shared in the demand with lily of the valley, peas and daisies. There are plenty of good lilies and callas, which have had only normal demand. Violets are nearing their end although some choice blooms were had the previous week. Out door material is coming in, but in small quantity, the rainy weather ruining a good portion of the yellow and white narcissi, etc. Asparagus in bunches is not plentiful; smilax is also a little scarce and Croomian fern has helped to fill out in most cases.

CHICAGO Out door conditions have worked a marked change in the market. So many weeks of over-filled counters and ice boxes are followed in a day by a scarcity of stock in some lines, and in others a total absence of stock. Not an outside flower remains and the question is now not so much what one shall buy as what one can buy. A few tulips and daffodils left from the greenhouses are to be had, but the out door stock of lilacs, bridal wreath, tulips, daffodils, iris, apple blossom, etc., so crowded upon the market last week is gone. Carnations have taken a sharp rise and prices are from 50 to 75 per cent. higher. Roses remain more nearly the same in price but the demand is better, though the continued stormy weather puts business nearly to a standstill. A most unusual demand for lilies seems to have set in.

(Reports continued on page 673)

MOSS

Extraordinary offer of Sphagnum Moss. Your opportunity to buy cheap.

Having our own men in Jersey who gather and bale the moss we are in a position to make the following extraordinary low price:—

5 bbl. bale, \$2.00 per bale; 10 bales @ \$1.75

Flower Market Reports

(Continued from page 671)

The cool weather has **CINCINNATI** shortened the supply of flowers, with the result of better average prices. American Beauties are on the short side of the market. Tea roses are in better supply, though cleaning up nicely each day, with the call for white predominating. Carnations are off crop, and there are not enough to supply the demand; naturally good shipping stock is bringing a very good price for this season and the poorer grades are sold more closely than usual, the demand for white and light colors being heaviest. Both Easter lilies and callas are selling well, with the supply just about equal to requirements. Sweet peas are also a short item and are not equal to the demand. Bulbous stock is about done for this season and another week will see its finish. Lily of the valley and marguerites are selling well. Asparagus plumosus and A. Sprengeri are in good supply, while smilax still remains a little scarce.

Last week's business **DETROIT** condition brought out some facts most peculiar for this season of the year. The amount of business transacted was below normal, due to inclement weather, which cut counter sales down very heavily. At the same time flowers brought to the wholesale houses were still less in quantity than the existing low demand called for. It must have been that all growers are off crop at one and the same time, and if that is so they are to be congratulated upon the fact that none of their product went to waste during the previous week when they had a full supply. Prospects are good for normal and better business with easy collection. Some of us are already being approached regarding decorations for the Elks' convention and good novelties will be in great demand.

Last week closed and **NEW YORK** the present week began with a very acceptable and encouraging trade activity, but as the days pass the situation assumes a less favorable aspect, due largely to the increasing receipts of material, particularly the outdoor product. Of the latter there is a big showing of bulb stock and lilacs, but more effectual in limiting the sale of greenhouse flowers for the time being are the dogwoods and the various pyruses and double-flowering cherries and almonds which the leading florists and their customers in fashionable circles joyously welcome as a change from the usual variety of material for decorative uses. There is no scarcity of choice exotic material, Cattleya Mossiae being in the lead just now. There are many fine dendrobiums, also stephanotis and anthuriums, and in lily of the valley and gardenias higher quality has never been offered. Among the staples nothing sells so well as sweet peas. The demand far exceeds the incoming supply.

Lilies are too plentiful and must be sold at low rates in quantity in order to prevent their going to waste in the wholesalers' hands. Roses and carnations are in abundance and bringing normal figures for this date.

Business contin-
PHILADELPHIA ued fairly active the past week, and

while prices still rule low there was a good clean-up so that average returns will in the main prove up in satisfactory shape. Lily of the valley was the only item in the list that could be called scarce. Weddings and other social functions called for a great deal of this, and the growers did not seem able to send in more than a normal supply. Special quality went up in many instances from four to five—and some were glad to get it even at the latter figure. All the roses are coming in of good quality, and meet with ready demand, although they have to suffer like everything else from low average prices. Marylands have pulled up very much as to grade, and are now in far better favor than they were earlier in the season. Carnations are of fine quality but a little soft on account of the advancing season, and some complaint is heard about their not keeping any too well. Violets are over. There are more orchids coming in than the market is calling for at present and prices are distinctly in buyers' favor.

Good gardenias—that is the long-stemmed perfect flowers—sell well; but the bulk of the crop is of the lower grades, and the latter are not in brisk demand. Lots of good bargains can be got in these. Snapdragon is a cheerful item, bringing more than roses in some instances.

IN BANKRUPTCY.

New York, N. Y.—Hanges & Papagelis, 258 West 116th street have filed a petition in bankruptcy with liabilities \$4,825 and assets \$30.

APPLE SCAB AND HOW TO CONTROL IT.

By Errett Wallace, Fellow.

The abnormally warm weather of April has started the apple buds much sooner than we had expected. If this continues it means that you must be ready to give the first application of spray very soon. The most important things to know are:

First, the proper time for such application. This must be determined by watching the fruit buds and the weather. Dates cannot be given. The first application should be made before the first rain after the blossom buds have been exposed, but before they have opened; the second after two-thirds of the petals have fallen, being sure to get the mixture on ahead of the rain, and the third about two weeks later. A fourth may sometimes be necessary, nine weeks after blossoms fall. Watch the fruit buds

and the weather: **SPRAY BEFORE RAIN, NOT AFTER.**

Second in importance is thoroughness. Remember that fungous infection can be prevented only where the surface of the young forming fruit and leaves are actually coated with the spray. Spraying from one side with the wind can therefore, at best, only protect one side of each apple.

Third, the spray used has in the past, almost universally been Bordeaux mixture for the fungi, combined with an arsenical for the codling moth and other insects. A 3-4-50 formula with two pounds arsenate of lead to each 50 gallons of the Bordeaux is efficient. Concentrated lime sulfur solution (properly diluted) with arsenate of lead added has been used very successfully during the past season by a number of investigators and the spray injury or russetting of fruit which frequently follows the application of bordeaux was in all cases entirely avoided. A concentrate testing about 32 degrees Baume should be diluted about 1-30 or 1-35 according to our present knowledge and two pounds of lead arsenate should be added to each 50 gallons. Do not use lime sulfur stronger than indicated above on the foliage. Do not use arsenite of lime, paris green or any other poison except arsenate of lead with lime sulfur solution on foliage, since there is much danger of burning with the former while the arsenate of lead has been fully used in this way during the past three seasons.

To the Apple Grower:

These spraying directions have been prepared by Mr. Wallace, the expert in our department who is conducting the investigations on lime sulfur as a summer spray. These directions are, we believe, the most accurate and up-to-date that can be given for the control of Apple Scab. We shall be glad to answer any questions we can on this subject. Address all inquiries to

H. H. WHETZEL, Pathologist,
Department of Plant Pathology,
New York State College of
Agriculture, Ithaca, N. Y.

TREES IN DEMAND.

We learn from the Williamsport Sun that the State Forestry Department is pushing so vigorously its work of tree planting on the barren lands of the State reservations that it has no seedlings to spare for other tree planters. The act of 1909 contemplated the sale of seedlings from the State nurseries at cost to private purchasers. If there be a demand beyond supply it would indicate a satisfactory waking up on the part of owners of unproductive cleared land to the utility of reforestation. It should also spur effort on the part of the State to increase the area of its nurseries. There cannot be too much done in the way of restoring our forests.—*Phila. Record.*

NEWS NOTES.

Lafayette, Ind.—Owing to ill health, H. Roth will postpone building his greenhouse until later.

Poughkeepsie, N. Y.—Mitchell's greenhouse, Winnikee avenue, were damaged by fire to the extent of \$1,000.

Don't Be Misled on Which Curved Eave to Buy

Ours is no experiment—eight years ago we built our first Curved Eave House—It was a success from the start. The present one is much improved and has much to be said in its favor for satisfactory lightness and unquestionable endurance. Send for circular.

Hitchings & Company

New York—1170 Broadway

A Curved Eave Range That Is Compact and Practical

It is located on the Dudley Olcott grounds at Morristown, N. J. A Curvilinear Palm House, with two wings and a connecting passage that are Curved Eave. It is compact because it is planned that way—practical because the construction is the Sectional Iron Frame, which although one of extreme lightness, is one that does not secure lightness at the expense of durability. In considering a Curved Eave House, this point is one to give very serious consideration.

We want you to give us the opportunity to tell you exactly how it is constructed. Will you give us such an opportunity? When? Shall we call or will you write?

DAHLIAS Every Day In the Year

Achimenes

Among the summer flowering greenhouse plants the genus *Achimenes* deserves a prominent place. They are both useful and decorative. It is possible to make fine centre pieces with the cut blooms, using one variety alone or blending various colors together in a harmonious manner. If allowed to hang evenly around the edge of a shallow pan, or a small basket, they also make a nice hanging plant. In fact, no matter how they are used in decorative work either as plants or flowers the quaint shape, fine markings and brilliant coloring always excite admiration. The genus is large, there being over twenty species known to botanists, all natives of tropical America. Horticulturists, however, are more familiar with the hybrid forms, which are said to even surpass the species in beauty, and are getting to be innumerable.

Achimenes are grown from tubercles which should be planted separately in some finely sifted sphagnum moss, and kept moist until the shoots are about two inches high when they may be transferred to the pots, pans or baskets they are to be grown in. A temperature of sixty-five degrees should be maintained all the time they are growing. The compost should be equal parts of fibrous loam, flaky leaves, and dried cow manure, with plenty of finely broken charcoal to keep the whole sweet and open. The receptacles should be well drained with crocks, covering them with some of the roughest of the potting material. Fill the pots or pans to within half an inch of the top with the compost, and do not press too firmly. The started shoots with the tuber attached should be pricked in, say at the rate of ten to a six-inch pot, taking care to have them all of uniform growth, as that is the advantage to be gained by starting them before potting. After potting has been completed, place them as near the glass as possible shading from the sun, as the foliage is easily scorched, water carefully until they are growing vigorously and syringe lightly morning and evening. After they are well rooted in the compost, manure water may be given occasionally, and the shoots should get one pinching. When the plants get so that they are liable to fall over, they should be staked neatly, with thin twigs, and after they begin to flower they should be kept as airy as possible. When they have finished flowering, water should be gradually withheld, until the shoots decay, when they may be placed in some dry, warm corner until the following spring.

Varieties can be increased by cuttings, leaves, or scales from the corms. The cuttings may be rooted in the ordinary way, and the leaves like a begonia leaf. The scales should be sown like fine seed in a rather leafy soil. A selection of desirable varieties may be had from any good nurseryman, who caters to the greenhouse trade. Colors are usually given in their plant lists, and one can select at pleasure. As I said above, varieties are getting to be legion and, as is usual in such a case, the same variety may go by different names.

dignity and rugged beauty. But when it comes to crops and the commercial value of their yield, their usefulness is past, they have done their duty. Much has been said about the decadence of fruit growing in certain New England districts. Is it not a fact that the fruit industry of these older sections has depended too much on the time-honored denizens of orchards planted by a past generation and left to shape themselves at random and to hunt for their food as best they could? The new race of fruit growers in the far West whose products are making a sensation in the markets of the world are not doing things that way and if the eastern grower is to compete he must adopt and practice modern cultural methods. And the man who applies himself to it will find there is a lot to be learned.

Valuable assets

Our weekly news notes from now on will tell of the departure of many members of the craft for foreign shores, some on business bent, others to enjoy the recreation to which a well-spent year has entitled them. All will come home, however, benefited in mind and body, better fitted to take up the worries and responsibilities of the coming year's business, more thoroughly equipped to outstrip their slow-going fellows who never go out to see what others are doing and never realize that in the race for honor and affluence they are falling hopelessly behind. A business man can make no better use of a few days or weeks in the slack season and no more profitable investment of a few dollars than to get out among those who are engaged in the same line of work as himself—if not to Europe, then to places less remote, to S. A. F. conventions, to exhibitions—anywhere that will bring him in contact with the active, intelligent and ambitious element in the business which he follows. Wide acquaintance with people and conditions and extended publicity through the use of the many mediums and methods now at command, constitute a big asset for any business undertaking today.

Some problems of the day

Speaking of the waning demand for greenhouse flowers and floral decorations which sets in earlier and earlier every spring and the later resumption of activity in fall, a prominent florist in a metropolitan centre attributed this disquieting condition to the growing popularity of country surroundings and outdoor pastimes. The tendency of today is certainly back to outdoor life and the florist or anyone else whose strong suit lies in the social stir of indoor gaiety must suffer in consequence. The logical course under these circumstances, and one which would promptly be adopted by most of the active industries, would be to take counsel together as to what the flower grower and flower dealer can do to adapt his business to these conditions as they develop. Here is but one of many vital problems that are pressing for consideration by the florist trade at the present time but which they have thus far shown little disposition to study with a view to solution. Wholesale dealers, retailers and—to a much greater extent—the growers, all have much at stake. As we have before remarked, production has now, for the greater portion of the year, far outstripped the business end of the florist trade in the more advanced centres and, as in the retrogression above noted, each year sees the embarrassment grow greater. Yet it is hardly in line with present day commercial activity to accept these conditions as beyond remedy. The policy of letting things alone is likely to prove a pretty expensive one in the long run.

The apple industry

On another page of this issue will be seen the picture of a patriarchal apple tree, estimated to be between two and three centuries old. We like to see these venerable relics of the past cherished and cared for. They give character to the scenery; we are impressed with their

SEASONABLE NOTES ON CULTURE OF FLORISTS' STOCK.

Annuals.

All annuals that are in the house or frames should be thoroughly hardened off before they are transferred to the open ground. This is as important as anything now to be done. Those that are in the houses should be transferred to frames and gradually inured and those that are in frames will be benefited if the sashes are left off entirely for a while previous to setting them out. When the seeds are sown in the open ground, the soil should be thoroughly and finely worked and enriched by some fine well-rotted manure. These preparations of the soil should be particularly well carried out where fine seeds are to be sown. The grower who wants annuals on a large scale should sow them in drills 15 or 18 inches apart so they can be worked with the hand cultivator. As soon as the seedlings have developed their second leaves they should be thinned.

Bay Trees.

Bay trees want an abundance of water from now until the autumn. In order to keep them in splendid form they should be cut into shape in the spring just before the new growth starts and then the young growths pinched back as they develop. About every three or four years they will need more root room and some good new soil, but they should be kept in as small tubs as possible. During the summer they should be set out in some convenient place where the hose can be used on them freely. They will also be greatly helped by the application of some liquid manure during the summer months, for the health and vigor of bay trees depends greatly on the good care they have during the hot weather. The tubs, where convenient, should be plunged in order to protect the roots from drying out. The bay can endure a few degrees of frost so the trees may be placed outdoors any time now.

Epacris.

Epacris that have been cut back will soon make new growth. When these are about a half inch is a good time to do any potting that may be required. The same soil as recommended for ericas will do for these plants. The soil around the ball should be well firmed. For a week or ten days after potting, a somewhat closer atmosphere should be kept to assist the plants in making a new start. Frequent syringing is essential, but over-watering, especially if practiced right after potting, is sure to work mischief, and great care must be taken not to overdo it at any time. As the plants progress more air should be admitted, till they go to their outdoor quarters. About the middle of June is a good time to plunge outside. When removed too early to the open ground there is danger of their being struck by a spell of belated cold and clammy weather, which is bound to do them harm, in spite of the very best of treatment during the balance of the year. In their flowering season they will stand full sun and do well in about 45 to 50 degrees in the winter time.

Cymbidiums.

There are some very handsome species in this genus. When once well

HAARLEM JUBILEE SHOW.

Group of Hyacinths and Lilac Blooms.

The accompanying picture together with the cover illustration give a partial idea of the features of the great Jubilee Show now in progress at Haarlem.

Mr. R. Vincent, Jr., who is visiting the exhibition, in a letter just received tells us that the display is very fine, inside and out. He says:

"As you enter the main gate, there is a splendid exhibit of holly. Plants from 4¼ to 6 feet high, full of berries of the variety *Ilex laevigatapolycarpa*, one of the best for exportation. Near the entrance is a large plateau laid out in pleasing arrangements of beds of various colors mostly hyacinths with here and there clumps of crown imperials. On the side beds, somewhat raised are clumps of rhododendron the whole surrounded by forest trees of splendid growth in their young spring verdure adding lustre to the bright hue of the many thousand flowers of tulips, hyacinths, etc. These beds are decorated here

and there with box, trimmed in various shapes, adding still further beauty and novelty to the scene. The variety of hyacinths used are Mdme. Van der Hoop, white; Rio des Belges, red; Yellow Hammer, Gertrude, red, and Queen of the Blues.

"The exhibition halls are beautifully arranged with a full variety of spring flowers, comprising a large exhibit of hydrangeas, azaleas, lilacs, amaryllis, cyclamen, and cineraria, the finest in white and blue that I have ever seen. There is also one large collection of narcissii of over 200 varieties, a great many of them new seedlings, especially of the trumpet varieties, very large and fine, when compared with the older varieties, showing great advancement in this easy grown and popular flower.

"We visited in a body yesterday the grounds where 100 years ago the best of the then-known tulips originated and where the great boom was started in their growing. The miniature rose exhibit is very fine."

established, cymbidiums are not difficult to grow. They succeed best when cultivated in pots, in a mixture of chopped peat, sod and sphagnum. In potting an important point for consideration is drainage. This must be thorough. If the drainage is defective the roots are sure to decay and the leaves shrivel. Those requiring new material, repotting, etc., should obtain it as soon as the flowering season is past. They must never be thoroughly dried out, especially the thin-leaved kinds, as then they are liable to lose many of their leaves. It is very annoying to find some plants continually getting into bad condition, but it will often prove that the trouble lies in the quantity of water supplied at the root, or that the atmosphere is either too dry or too wet. Cymbidiums like a moist, intermediate temperature. Although they are fond of plenty of water at the roots when growing, syringing overhead often injures them. When not growing they should be kept somewhat cooler, with plenty of air given on all suitable occasions, but avoiding all cold draughts. A temperature of from 55 to 65 degrees will please them. The eburneum section is very good.

Hardy Ferns.

If you have any spot of ground that is idle on account of being too

shady and moist, it would be well to plant it with hardy ferns. Any strip of loose and friable land that is lying in the shadow of some building or trees will grow any of these ferns. To assist in holding the moisture in the soil, some well decayed leaves should be worked in. With the land so prepared, a position so stated can be made a place of verdant beauty every year. All good varieties of hardy ferns can be obtained from any of the large plant growers. The following sorts will succeed well, *Adiantum pedatum*, *Asplenium ebeneum*, *Aspidium Noveboracensis*, *Pteris aquilina*, *Dicksonia pilosiuscula*, and *Osmunda gracilis*.

Tuberoses.

Much better spikes of bloom are obtained by growing these right along in pots on any sunny bench, than by cultivating in the field. To that end the bulbs are started in 4-inch pots, using a good rich soil, and later on shifted into 6-inch pots, but where they are to be planted out they gain by being started in 4-inch pots and planted out after some growth has been made. About the middle of June is time enough to plant them out.

JOHN J. M. FARRELL.

Mr. Farrell's next notes will be on Baby Ramblers, *Chrysanthemums*, for large specimens, *Ficus elastica*, *Marguerites*, Sweet scented *Geraniums*, The Lily Bed.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Registration of Violet.

Public notice is hereby given that Thomas DeVoy's Son of Poughkeepsie, New York, offers for registration the Violet described below. Any person objecting to the registration or to the use of the proposed name, is requested to communicate with the Secretary at once. Failing to receive objection to the registration, the same will be made three weeks from this date.

Raiser's Description.—Sport of "Marie Louise," 1907. Identical with parent plant, in foliage and habit of growth, flowers double and of a dainty light Wistaria shade.

Name, "Marie Elise."

H. B. DORNER, Secretary.

April 28, 1910.

TUXEDO HORTICULTURAL SOCIETY.

A meeting of the Tuxedo Horticultural Society was held on Tuesday evening, May 3, in the Parish House, president Murray in the chair. The schedule for the Rose Show was presented as ready for the printer, but the date was changed from June 24-25 to June 18 on account of the advanced condition of roses in this section. The executive committee had ready for the meeting a schedule for the chrysanthemum exhibition. There was so much business, however, in connection with the other show that the consideration of a fall show had to be left to next meeting.

D. McINTOSH, Secy.

ELBERON HORTICULTURAL SOCIETY.

The Elberon Horticultural Society held a monthly meeting on the 2nd of May. This society will hold its annual Rose and Strawberry Show in June, the date to be fixed at the next meeting. The date for the Chrysanthemum Show this fall was set for Nov. 9-10.

The following points were awarded: A. Bauer, 95 for antirrhinum; Wm. Seymour, 85 for roses; L. Kelley, 75 for sweet peas. Peter Murray was awarded a certificate of culture for a very fine vase of O. P. Bassett carnations. Chas De Wild received a certificate of culture for asparagus.

ALEX FLEMING, Rec. Sec.

The entertainment committee of the New Bedford (Mass.) Horticultural Society is making plans for the June Rose Show. George H. Reynolds is secretary of this committee. This show, which may be held in a local department store, probably Friday and Saturday afternoon and evening, it is thought will be made free to the public. The date of the exhibition will be announced later. It is hoped that Miss Fay of Woods Hole will have a display from her rose gardens.

ROYAL HORTICULTURAL SOCIETY. Orchid Exhibits, April 19.

Numerous as were the orchids on this occasion, there were but few which have not been observed before, and their prominent features descanted upon. In the collection of plants contributed by Messrs. Sander & Sons, among the many Cattleyas and Laeliocattleyas one of the handsomest was L. C. Rowena. A pretty cream-colored Stanhopea having very minute crimson spots all over it, the name of which could not be determined, attracted much notice. Odontoglossum Rossi var., with bright brown spotting on the sepals and petals was noted, as likewise Miltonia St. Andre—a cross of M. Roezlii and Sander's variety of Blueana. A pure white Sobralia was shown under the name of Sanderae—an acquisition worth possessing—and received an award of merit.

Charlesworth & Co. had a collection abounding in good varieties of Cattleyas and Laeliocattleyas. Of the latter was the variety Doris, bright orange; Cattleya Empress, and C. Mendelli Madame Rejane, white with a beautifully fringed lip, were observed in fine examples. Odontoglossum Armainvillierense xanthotes had a flower of pure white, except for the crest, which is yellow.

From H. S. Goodson's garden came Odontoglossum Amabile var. Lord Carnarvon, a flower densely blotched with brown on white, and O. eximium var. Clarksoni, brown markings on white ground. Mr. de B. Crawshaw showed several Odontoglossums, the variety O. Regale receiving an award of merit. The flowers are large, petals and sepals of yellow, with chocolate brown markings.

M. Henri Graire, St. Fuscien, Amiens, France, received an award of merit for Odontoglossum Rossianum var. Rossianiae, lilac spotted with brown. A similar award was bestowed on O. crispum var. St. Fusciae, white with brown spotting. Walter Cobb was the recipient of an award of merit for Odontoglossum Lawrenceanum (O. Insleayi).

It may not be amiss if mention be made here of a few good plants shown by Messrs. J. Veitch & Sons, viz., a Cineraria 3 to 4 ft. in height and proportionately broad and strong, named Feltham Bouquet (C. multiflora × C. stellata). The flowers are purple, of medium size, and borne in great numbers on strong branching corymbs. The plant was first shown three years ago. The firm showed a plant with one expanded flower of the var. Aristolochia Sturtevantii. It measured 9 inches in width, and was decorated with a tail-like appendage a foot long. Begonia Lucernae with cerise red flowers in massive pendulous corymbs, and bronzy green foliage is a highly ornamental species. F. M.

NEW YORK FLORISTS' CLUB.

At the next meeting of this club, Monday evening, Jan. 9, Prof. John Craig, of the New York State College of Agriculture at Cornell University, will speak on some phases of experimental work in relation to floriculture. JOHN YOUNG, Secy.

DURING RECESS.

Florists' Club of Washington.

The annual banquet given by the club was held at Rauschers on the regular meeting night, May 3rd. This banquet has for years been a special feature, but this one outdistanced anything ever before attempted by the club. The banquet hall had tables on three sides; in each corner were pyramids of palms and American Beauties, while the space between tables was partly taken up by a magnificent pyramid of Beauties, topped by a specimen Kentia. Table decorations were of Killarney roses, ferns and pink carnations. The orchestra which played throughout the evening was hidden in a balcony of palms. The banquet this year was delayed by reason of so early an Easter and the rush incident thereto. But the law of compensation holds good under all circumstances, for every one agreed that it was the most successful ever given by the club.

John Robertson, the newly elected president, presided and officially introduced the toastmaster, Wm. F. Gude. Mr. Gude in his usual happy manner introduced the soloist of the evening, Miss Siebling, who sang "Beautiful Garden of Roses." A thunder of applause greeted this beautiful song and she was twice recalled.

Ex-Commissioner H. B. F. McFarland next spoke on the importance of civic improvements, and paid a glowing tribute to the generosity of Washington florists. He then made the presentation of a silver loving cup to Wm. F. Gude which bore the following inscription: "In token of appreciation of services rendered the Florists' Club of Washington. Presented to Wm. F. Gude."

Commissioner C. H. Rudolph was next introduced and after a pleasant speech he presented the outgoing president, F. H. Kramer, with a silver loving cup. All cups were alike and all bore the same inscriptions. Secretary O. A. C. Oehmler was next introduced and presented with one-half dozen knives and forks.

Robert N. Harper, ex-president of the Chamber of Commerce was next introduced and he presented Geo. Cooke with a loving cup. All of the fortunate receivers of cups replied in a most pleasant and grateful manner, expressing their gratitude and surprise at being so pleasantly remembered, as well as their interest in and love for the club.

Harrison Klingman spoke of the florists as one of the most important factors in all events, both social and commercial and expressed his personal appreciation of them. Frederick B. Owen was then introduced, as a man who has done more than any other man to make Washington's crude and unsightly places beautiful by means of shrubbery, etc. His response was most happy. Then came a turn of the tide, and as has been the history of all time, woman was finally recognized as an important factor in the workings of the universe. "Better late than never" seems to be the key note. Wm. F. Gude here introduced Mrs. Loeffler as one of Washington's foremost business women. She responded in a pleasant, concise manner.

Next in order, men all standing, Wm. F. Gude announced the following toast to the ladies: "God bless

the ladies, may they be with us always." Peter Bisset, one of the ex-presidents of the club, who has just returned from a very extended tour on the Pacific Coast in the interest of Uncle Sam, spoke briefly of his interest in the welfare of the club and of his pleasure at once more being with them.

Adolph Gude was then introduced to the company by F. H. Kramer and he paid tribute to Com. R. M. McFarland and the ladies present, and to John Robertson as a man and a leader. Frank Siebling, official of police court, spoke of his pleasure at being present.

Chas. Woodhead then delighted the audience with several solos. Both he and his wife have done much for the pleasure of the club in the past, as both have fine voices and always requests to sing.

The banquet closed at a late hour. The elaborate decorations were done by Gude Bros., and freely attested to their exceptional taste along those lines.

From the foregoing report one can easily see that the pleasant occasion was a feast of reason and a flow of loving cups.

Chicago Bowlers.

FLORISTS' CLUB OF PHILADELPHIA.

Antoine Wintzer of West Grove, gave a very interesting talk on "Roses, Past and Present," at the regular monthly meeting of the above Club on the 3rd inst. He gave many personal reminiscences of his rose-growing experiences during the past forty years, mentioning many of the old-time varieties of roses that are still good and worthy of extended culture. He also gave warm praise to many of our latter-day raisers of new varieties, among them especially Dr. Van Fleet, W. A. Manda and Jackson Dawson. On exhibition were several fine vases of roses, including Duchess of Wellington from Robert Scott & Son, Sunrise from H. W. Collins, Perle and Niphetos from Charles E. Meehan, American Pillar and other climbing roses from Conard & Jones Co. The speaker for June will be Alphonse Pericat on "Commercial Orchids." John Dale, of Dale & Yost, the newly established growers at Pittville; Hilborn Darlington, son of the late E. D. Darlington, Doylestown, and Lewis Catherez of Michell's, were elected to membership in the Club.

THE COST OF OPERATING A RETAIL FLOWER STORE.

(A paper read before Detroit Florist Club, May 2, by F. Danzer.)

My original intention was to present statistics tabulated and arranged in such form as to show where expenses almost imperceptibly cut up the profits, but the few reports received from local or out-of-town florists show such a difference in methods of bookkeeping that it was not possible to so arrange them. Some of these reports clearly show an unwarranted disinclination to divulge so-called business secrets.

The capital investment of a retail store consists of: I. Storefixtures, from which at least 10 per cent. per year must be deducted; in case of a short term lease this deduction should be in such proportion that the fixture account is wiped out where the lease expires, because a removal makes these fixtures obsolete. II. Livery outfit—horse and vehicle or automobile, on which an annual depreciation of 20 per cent. must be figured. III. Palms for decorative purposes, the upkeep of which is accounted for in the merchandise account because they always are to be kept at least 90 per cent. standard and are as much a salable article on the closing day of business as they were at the beginning. IV. Working cash on hand when business is begun. Next is the merchandise account, which includes all merchandise purchased to do business with or whose exchange into money brings about gain and loss according to our (and I am sorry to say sometimes according to our competitors') manner of management.

To attain a clear understanding of the business year's result accounts should be subdivided into: Supplies, flowering plants, cut flowers, plants such as palms, ferns, etc., for sale. Next is the most important account of all, one which in the course of a year is apt to cut immense holes into our profits—the expense account. This account cannot be divided up too much, and let nobody ever be deterred from a very thorough analysis of it by the word "Red tape." The principal items of this account are as follows: (1) Rent, to which must be added such proportion of lease if the same had to be purchased as will wipe out this item at the expiration of the same. In such cases where a building has been erected for the sole purpose of conducting a retail flower store for a certain term of years only the cost of such building must be charged to rent in its annual proportion. (2) Delivery, daily cost of maintenance, wages of boys, car fares, extra wagons or automobile hire during days of rush. (3) stationery, postage and correspondence. (4) Telegrams and telephone. (5) Heat and light. (6) Flower boxes. (7) Wrapping material, from string to fancy boxes. (8) Cost of renewal of decoration plants. (9) Salaries. (10) Accounts outstanding. (11) Supplies. (12) Green stuff.

Before going further we must consider the subject from three different standpoints: (1) Annual business \$10,000. (2) Annual business \$50,000. (3) Annual business \$100,000. The man who transacts \$10,000 worth of business per year deals with a class of customers who do not demand an extravagantly fitted-up salesroom. They

do not require a fancy box for every purchase. His location is in a cheaper district and his fixtures are of a plain nature. Still on every dozen carnations which he sells we find that rent, heat and light, etc., each have a share. Making up his annual expense account we might possibly put it thus:

Rent, \$1,200; delivery boy, \$520; car fare, \$78; mail, \$52; telegram and 'phone, \$150; heat and light, \$300; boxes, \$100; wrapping mat., \$200; wages one girl, \$312; supplies, \$200; ferns and green, \$300; cut flowers, etc., \$5,000; total, \$8,412.

Assuming the business to be done on a 100 per cent. basis, he must expend \$5,000 for his merchandise. Averaging his expenses by the year they amount to \$3,412.00 or 68 per cent., leaving him a balance of \$1,588.00 or 32 per cent. as his wages.

The next man doing a business amounting to \$50,000 per year belongs to a higher grade but I fear a less profitable one. His store must be in a more desirable location, his patrons demand more in the way of fixtures, their purchases must be done up in better form, a stock of decoration plants must be kept up and many accounts must be carried. To sum up his expenses we can put it thus:

Rent, \$3,000.00; delivery rig and keep up, \$900.00; 2 delivery boys, \$156.00; carfare \$120.00; extra delivery for holidays, \$100.00; mail, \$120.00; advertising, \$700.00; Telegram and 'phone, \$250.00; heat and light, \$500.00; boxes, \$750.00; wrapping material, \$500.00; wages 3 girls, \$6.00 p. w., \$936.00; wages, extra for holidays, \$50.00; 6 per cent. on \$5,000 outstanding account, \$300.00; florist supplies, \$1,000.00; ferns and green, \$1,000.00; 6 per cent. on \$1,500 decoration plants, \$90.00; renewal of same, \$750.00; 6 per cent. on \$2,500 of store fixtures, \$150.00; 10 per cent. depreciation thereon, \$250.00; annual cleaning, etc., \$250.00; cut flowers and plants, \$2,500.00; total, \$36,872.00. With an annual business of \$50,000 we have left \$13,128, of which \$5,000 is outstanding, leaving a clear balance of \$8,128.

These items computed very carefully show a cost of doing business of about 33 per cent., while the net gain, considering the amount of money outstanding, gives a balance of only 16 per cent. clear profits, assuming that every flower and plant bought has been resold at double the purchase price.

The next man doing a business of \$100,000 or more annually, presents again a different picture in his expense account and his bill would be still more complicated, to wit:

Rent, \$4,000; two delivery rigs, \$1,800; upkeep, \$500; two delivery boys, \$156; carfares, \$200; boys extra for holidays, \$400; mail, \$350; advertising, \$1,200; telegram and 'phone, \$500; heat and light, \$1,200; boxes, \$7,000; wrapping material, \$1,000; wages, three clerks, four girls and bookkeeper, \$5,500; wages extra for holidays, \$500; 6 per cent. on \$10,000, account standing, \$600; florist supplies, \$2,000 ferns and green, \$5,000; 6 per cent. on \$2,500 decoration plants, \$150; renewal of same, \$1,200; 6 per cent. on \$30,000—store and fixtures, \$1,800; 8 per cent. depreciation thereon, \$2,400; cut flowers and plants, \$50,000; total, \$79,356.

This on the presumption of doubling up on everything would presume a \$100,000 annual business and deducting therefrom the expenses of \$79,356 leaves a balance of \$20,644—or about 20 per cent. less amount outst. \$10,000, net \$10,644—or about 10 per cent. clear.

As estimated at the beginning, it is practically impossible to procure the actual figures of a detailed expense account, and while the man doing the bon ton business derives considerable from the hiring out of plants and consequently will not pay out \$50,000 for cut flowers and plants to enable him to do a \$100,000 a year business it is a fact that the item of \$1,000 per year for boxes is too conservative by at least \$1,200. This item is very striking as compared with the item of wrapping material in numbers 2 and 3. While No. 2 pays \$500 per year for wrapping material, No. 3 pays \$1,000. No. 2 pays about \$1,000 for boxes, No. 3 pays \$7,000, which shows clearly the extravagant demand made by our bon ton customers.

Another offset for a possible unaccounted-for income from decorative plants is in the low estimate of mailing expense and advertising. A well regulated business sends out the bills contracted daily and monthly. In a business of that size this means at least 800 bills a month or \$178 a year for postage. Add to this regular correspondence, special delivery and so on easily doubles that item. In the matter of advertising I have purposely only taken cognizance of that part which is unavoidable and refers to those apparently unlimited calls of societies for program advertisements. The legitimate advertisement such as annual announcements in the fall of the year in form of little booklets or similar matters will easily reach an annual expenditure of \$1,000, so that the commission from income of plant hire is easily covered.

The item of \$30,000 in store fixtures may appear large, but is conservative because a first-class store must be built right in every detail. The cut flowers must be displayed in cut glass and other expensive material, most of which is not bought and transformed into cash, but is simply a fixture which in a few years becomes fit for the scrap pile only.

I trust that these enumerations have thrown light on points we have been thinking about very much, and while I realize the intricate nature of the subject I hope I have it made clear enough that a retailer has no possible chance for existence and future prosperity unless he at least doubles his price on everything he purchases.

THE BRITISH-JAPANESE EXHIBITION.

There is great progress being made at Shepherd Bush with the Japanese gardens, and the exhibition will be opened to the public about the middle of June. We therefore lose the pretty effects of the May flora, one of the chief attractions of a garden in Japan. Doubtless the powers that rule at the exhibition will have something to show us, making amends for this lacuna. Some ponderous scenes in rock construction are already completed. The "Gardeners' Chronicle" gives an illustration of this in its issue for April 16—much stone, but little water.

CHICAGO NOTES.

Effects of the Freeze.

A. E. Hunt of Evanston thinks the frost has not done so much injury as was at first supposed. With the continued cold rain he is glad with others that his young carnation stock is still indoors.

The peony fields at Batavia are seemingly recovering from the frost but the real outcome will not be known till the flowers are actually open.

Singler Bros. of Morgan Park had 40,000 carnation plants in the field the most of which had been out a week and were unharmed. Those planted just before the frost are injured. This plant, devoted to the growing of carnations, is one of the oldest in the vicinity of Chicago. It was established by Mr. Singler, who died several years ago, and is now ably managed by his two sons.

Geo. Walther, 435 W. 63rd street, had refused to plant bedding stock for his customers who are now only too glad of his positive refusal.

Barnard's ten acres of peonies at Tracy are showing signs of considerable injury, though the loss will be less than at first anticipated.

All over the city and in the suburban towns the shade trees are dropping their young leaves. The soft maple trees, large specimens forty years old are dropping the whole of the young twigs. The first day that the sun shone the air was filled with the odor of decayed vegetation and added to the leaf bestrewn sidewalks, fall and not spring appears to be at hand. While many theories regarding the trees may be heard the majority of the people are at least trying to hope for the best. No one has been found who can recollect ever seeing such a condition before. Those whose shade trees are of the late leafing varieties are congratulating themselves on this fact.

Another Large Retail Store Closed.

Most of the trade were taken by surprise Monday when they learned that Hauswirth The Florist had closed up his business in the Auditorium. This is one of the oldest retail stores in Chicago. For twenty or more years the name of Hauswirth has been connected with this famous hotel. Phil. J. Hauswirth first had a store on the Wabash side and several years ago moved into the Michigan avenue store where upon his death, Dec. 4, 1907, the business was continued by his widow, Marie C. Hauswirth and son Edward. In a little over a year death claimed one of the brightest women in the florists' ranks and since that time "Ed." has conducted the store. It was not altogether a successful venture and Mr. Hauswirth has closed his store and announces his intention of going into the poultry business at Twin Lakes, Wis. Three weeks in succession a closed retail store in the down town district has been the surprise of the early part of the week. Various rumors are afloat as to the successor to the Hauswirth store.

Important Conference.

Arrangements for the semi-annual meeting of the Illinois Outdoor Improvement Association at Springfield, Ill., May 26 and 27, are well under way and a fine program has been

For Decoration Day

We have this year the most complete, elegant and salable stock of florists' goods ever offered for the MEMORIAL DAY trade. Our line of PRE-SERVED FOLIAGE and other INDESTRUCTIBLE DECORATIVE MATERIAL cannot be excelled and the name of BAYERSDORFER & CO., on the package guarantees that goods and prices are

What Every Florist Wants

Don't wait until the last moment to make inquiry. SEND NOW for list of Standard and New Goods for this important occasion. All you have to do is to show the goods. THEY'LL SELL. Wreaths of Cycas, Magnolia, Fern and other foliage in Green, Autumn Tints and Moss effects are among the novelties.

METALLIC WREATHS are our specialty; we make them up with Roses, Pansies, Forget-me-nots or anything you please. STANDING ANCHORS, PILLOWS, WREATHS, ETC., all graceful and true to nature. Cape Flowers; Immortelles, all colors; Doves; Sheaves.

H. BAYERSDORFER & CO.

The Florists' Supply House of America

1129 Arch Street, Philadelphia, Pa.

prepared. The purpose of the conference is to find the needs of the localities which are now attempting outdoor improvement and to stimulate others to begin it. All persons are invited and all clubs, associations, park boards, school boards, etc., are invited to send delegates. Home grounds, school grounds, highways, railway stations, the birds and the parks, all will receive attention. An automobile ride and a lunch in Washington Park and a band concert in the evening will be the recreation features. Among the speakers will be Gov. Deneen, Eugene Davenport, dean of College of Agriculture at Urbana, C. A. Killer, Pres. Chamber of Commerce, Champaign; Geo. Hooker, City Club of Chicago; Jens Jensen and many others. Headquarters will be at St. Nicholas Hotel.

Trees One Cent Each.

Several thousand Catalpa trees were planted in Chicago on Arbor Day. The large department stores sold them for one cent each and they ranged from ten to thirty inches in height. City Forester Prost expressed his approval of the Catalpa for Chicago. In many schools each child went home with a tree to plant.

Chicago Week.

One week in August to be known as Chicago Week, will find all the stores showing goods produced in Chicago. Not the best time in the year for florists to show their products but they will rise to the occasion and do their best which is always something worth while.

April Weather.

The April summary sent out by the

weather bureau shows the month to have had a range of 60 degrees of temperature, 86 deg. on the 29th and 26 deg. on the 23rd, and notwithstanding the cold spell the month averaged 5.3 deg. above normal and had more than nine times the average snow fall.

Around Town.

E. H. Hunt is installing a new billing machine made necessary by the spring rush. The usual demand for tobacco has been greatly increased this year and it is with difficulty that they can keep up with the orders.

The first peonies from Sarcoxie, Mo., were seen here and included Officialis Rubra and Rosea Superba. In the supply department some attractive Japanese brass ware, mostly in the shape of high handled baskets, was being unpacked. They were for hanging or table use and for both cut flowers and ferns.

The Fairbanks Building, the second floor of which has for years been known as The Flower Growers' Market is now in the hands of a force of workmen. Extensive repairs had been all but under way when a fire made havoc with the southwest corner and the entire building will now be overhauled.

The Masonic Temple Floral Co. made petition for bankruptcy on April 25, with assets about 20 per cent of the liabilities. As all of the last month's bills are unpaid including his Easter stock there are many wholesale firms who are heavy losers. Should Mr. Visas again go into business in Chicago, he will not find it easy to get credit.

The automobile floral parade on May 7th will bring some work to the

retail florists but most of them are not looking forward to much on account of the killing of most of the outside flowers. If the owners of the machines could have had a part of their flowers from out of doors they would have been willing to give a generous part of the business to the florists but it is quite an undertaking when stock is scarce to trim a large

APHINE

Is proving a most effective, while at the same time absolutely harmless, insecticide for use on young stock.

It destroys the insects, and invigorates the plants.

Have you tried it?

**Aphine Manufacturing

MADISON, N. J.

car with greenhouse flowers. Fleischman, however, has captured six of the orders.

Personal.

Miss Sadie Heim, daughter of Edw. Heim of Heim Bros., florists, at Blue Island, Ill., has taken a position in the office of E. H. Hunt & Co.

A. F. Longren and Margaret Sharp were married on Saturday, April 30th at the home of the bride's parents 4419 Park avenue, Chicago. A. F. Longren is well known to the trade and for the past two years has been before the public as the introducer of the Lucille carnation. He has for some time been traveling salesman for the E. H. Hunt Co. and has taken his bride with him on a southern trip.

Visitors—Mrs. A. L. Glasser, Dubuque, Ia.; Otto Schwill of the Memphis Floral Co., Memphis, Tenn.

NEWS NOTES.

Toronto, Can.—W. Hill has moved to 716 Yonge street.

Pinehurst, N. C.—H. F. Kelly has started in business here growing flowers and vegetables under glass.

Princeton, Wis.—A partnership has been formed by Fred Schewe & Son under the name of Fox River Nursery Co.

Excelsior, Minn.—S. M. Robinson will grow nursery stock and perennials on the 35 acres of land which he has just turned over at Vine Hill.

Elgin, Ill.—A. F. Hatch who was a heavy loser by the recent snow storm and frost met with an additional loss April 22nd when his greenhouse containing 8,000 tomato plants was destroyed by fire.

Nobscot, Mass.—Adolph E. E. Koch, foreman for Geo. E. Buxton of Nashua, N. H., has purchased the Whittemore Greenhouses at Nobscot, Mass. Mr. Koch will make a specialty of carnations for the Boston market.

Ogden, Utah.—The B. F. Bonnewell Nursery Co. has been charged with fraud and misrepresentation by T. P. Perry. According to the complaint Bonnewell guaranteed trees which he sold to Perry, but Perry avers they were practically worthless.

Medford, Ore.—The Rogue River Valley Nursery Co., the incorporation of which has been previously reported in these pages, has leased 30 acres of land on which over 100,000 seedlings are growing. C. F. Cook, F. H. Cook and B. Franklin are the incorporators and will have their head offices at Medford.

Geneva, N. Y.—On April 21st 3,900 peach trees were disposed of by auction to Timothy Linnehan for the sum of \$1.00. These trees comprised a shipment which had become damaged in shipping and had been seized by Officer Hawkins upon an attachment issued in favor of the Ontario Nursery Co. against the Fraser Nursery Co.

Reading, Pa.—It was reported in our April 30th issue that Stabenow Bros. were to build a greenhouse at 12th and Exeter streets. We now find that the Stabenow Bros. have dissolved

GODFREY ASCHMANN

LOOK! BARGAINS!

I am ready to execute every order in bedding plants promptly; having 10 houses and an equal number of hotbeds, with every hole and crack full of bedding plants alone

Geraniums, double white, pink and red, in 4-in. pots, \$7.00 per 100.

Asters, Queen Victoria and other good varieties, 5 or 6 separate colors, 2½ to 2½-in. pots, \$3.00 per 100.

Canna Eisele, 4-in., \$7.00 per 100. Alphonse Bouvier, Bismark, Patty Gray, 2 to 4-in., \$7.00 per 100.

English Ivy, 4-in., 10c.

Lemon Verbenas, 4-in., \$7.00 per 100.

Begonia Erfordii, our well-known improved strain (5000 now ready), 4-in., \$8.00 per 100.

Begonia Vernon, dark and light red. Our so well-known improved strain from Zurich, Switzerland, introduced by us 4 years ago, which has given so much satisfaction all over America. Always in bloom. Stand the sun and all the dry weather. A bed of this novelty plant, once seen grown and same will speak for itself. When we plant our Begonias we plant 4 to 8 small seedlings in one pot and they are now grown big and bloom in 4-inch pots, at \$8.00 per 100.

Clara Bedman or Bonfire, in bloom (Scarlet Sage), 4-in., \$7.00 per 100.

Ageratum, dwarf blue, best variety, 4-in., \$7.00 per 100.

Fuchsias, assorted colors, 4-in., \$7.00 per 100.

Heliotropes, blue, 4-in., \$7.00 per 100.

Petunias, double, assorted, 4-in., \$7.00 per 100.

Lantanas, assorted, 4-in., \$7.00 per 100.

Vinca Variegata, 4-in., large, for vases or window boxes, 10c to 12c.

Primula Obconica (blue), in bloom, 5-in., \$2.00 per doz.

Dracaena Indivisa, 5 to 5½-in., 25c.

Crimson Rambler Roses, 7 to 8-in. pots, 75c, \$1.00, \$1.25 to \$1.50. Other ramblers, 6 to 7-in. pots, 35c and 50c.

Dorothy Perkins, one of the best new pink Ramblers, pot grown, 2 to 3 years old, 35c to 50c.

Kentia Belmoreana and Forsteriana, 4-in., 20c. Kentia Belmoreana, 3-in., 10c. Kentia Forsteriana, 6 to 7-in., 40 to 50-in. high and over, \$2.00, \$2.50 to \$3.00. Hydrangea Otaksa, in bud, 6-in., 25c, 35c to 50c.

Cobaea Scandens, 4-in., 10c.

All plants 25 at 100 rate. Cash with order, please. All plants must travel at risk of purchaser only. Watch our ad for Araucarias about May 10.

Godfrey Aschmann, 1012 Philadelphia, Pa.

WHOLESALE GROWER, IMPORTER AND SHIPPER OF POT PLANTS

partnership and that it is Herman Stabenow, Jr., who is building the new house. He intends to grow young stock of roses and geraniums for shipping.

Paradise, Cal.—Dr. W. E. Mack of the local technical school has started a movement with a view of enabling growers to secure olive trees without the necessity of importing them from points outside of Butte county. A nursery of 60,000 trees is already in growth. The trees grown in Butte county are free from diseases and pests which often infest imported trees.

Knoxville, Tenn.—A nursery for propagating shade trees will be established here as soon as weather conditions permit. This was the decision of the Park City Civic Improvement Association and is one of the steps to secure a uniform growth of shade trees throughout Park City. The trees will be sold to citizens of Park City at cost and will be accompanied by instructions as to planting, care, etc.

Rosen Zeitung for April, 1910, presents a colored plate of John Cook's new H. T. rose, Radiance.

IN SMALL PLANTS

We have the following in 2½ to 3-in. pots, \$3.00 per 100:

Verbenas, assorted colors.

Phlox Drummondii, dwarf and grandiflora. French Dwarf Tagetes (the queen of the marigolds).

German Asters Queen Victoria, 4 or 5 separate colors, 2½-in.

Zinnia elegans.

German or Parlor Ivy.

Cosmos, assorted, white, red or pink (by name if desired).

Coleus, Golden Bedder, Verschaffeltii and Queen Victoria, fancy varieties, \$4.00 per 100.

Petunias, California, Dwarf Inimitable and Rosy Morn.

Sweet Alyssum. Carpet of Snow or Little Gem.

Tradescantia, two colors.

Thunbergia or Black-eyed Susan. Maranta Bachemiana.

Salpiglossis.

Lobelia Crystal Palace (blue), dwarf and trailing.

Cornflowers, assorted.

Parlor Ivy.

Centaurea Gymnocarpa (Dusty Miller).

Echeveria glauca, also large plants, \$4.00 and \$5.00 per 100.

Don't forget that we are the wholesale growers of the celebrated, world-wide known

IPOMOEA NOCTIFLORA (MOONVINE)

Pure white, rapid grower, very fragrant and earliest moonvine, with flowers as big as a saucer. Grows 50 feet and over in one season, with thousands of flowers on them. We have grown them for the past 25 years and have established a world-wide reputation, over 25,000 having been shipped all over the United States, Canada and Mexico. Price: 2½-in. pots, \$5.00 per 100; 3-in., \$8.00 per 100; 4-in., \$12.00 per 100.

Nephrolepis. We have the following to offer: Whitmani, Boston, Scotti, medium size, 4-in., \$20.00 per 100. Schoelzeli, medium size, 4-in., \$25.00 per 100.

WELL PLEASED.

"We enclose \$1.00 account of subscription to the journal. We are well pleased with your paper."

G. S. & N., South Dakota.

Coleus. Coleus.

2½-in. pot, Verschaffeltii and Golden Bedder, \$2.00 per 100.

Rooted Cuttings, Verschaffeltii and Golden Bedder, \$8.00 per 1000.

Rooted Cuttings in variety, \$5.00 per 1000.

Geraniums, our selection, 3-in. pot \$5.00 per 100.

Geraniums, our selection, 4-in. pot \$8.00 per 100.

MISS A. WASHINGTON, Alvin, Texas

Mention Horticulture when you write

CAPE JESSAMINES FROM THE SOUTH.

In a letter just received from Miss Washington of Alvin, Texas, whose advertisement of Cape Jessamines appears in this issue we learn that the blooming of these flowers has been delayed by the cold wave of latter part of April and will not be ready to ship before May 10. Miss Washington calls attention to the fact that gardenias after being packed properly will keep fresh for two full weeks if the packages are not disturbed. The crate should be kept in a dark, cool place until the flowers are needed, moistening the packing papers but not disturbing the flowers until the night before they are to be used when the stems should be immersed in water nearly up to the flowers. Miss Washington has made a specialty of this business and the flowers she ships arrive invariably in fine condition.

VANDA COERULEA.

It may be of interest to cultivators of this epiphytal orchid to be made acquainted with the conditions under which the species grows in the South Shan states, given by Lieut-Colonel Rippan in the Royal Horticultural Society's Journal for March. At Kalan the plant appears on trees from 10 ft. to 40 ft. above the ground. The roots cling to the bark of the tree, and seem to prefer the shade, whilst the flower spike emerges into the sunlight between the foliage of the host plant. The writer of the note suggests that fleshy-rooted orchids suffer under cultivation from their roots being confined and generally maintained too moist. At Kalan the plant succeeds perfectly when tied to the bole of a tree or to a thick branch (dead or alive). F. M.

A NEW ORCHID ESTABLISHMENT.

Charles J. Bond has made a start in his recently acquired houses at Naperville, Ill., with 7,000 cattleyas, the first 20 cases of which have already been received and housed and are very fine stock. Naperville is 29 miles out of Chicago, and with no factories to speak of the air is quite smoke free and the conditions seem ideal for the culture and the marketing of orchid flowers, which are Mr. Bond's specialty.

INCORPORATED.

Alexandria, Va.—New York Orchids Co., capital stock \$5,000. C. A. Hamilton, president; W. A. Hussey, vice-president; H. P. Morse, secretary and treasurer, all of Washington.

BLIZZARD DAMAGE.

A wholesale fruit dealer of Elgin, Ill. estimates the loss of fruit in Elgin and vicinity as a result of the recent blizzard to be from \$15,000 to \$20,000. The total loss of the County he states will probably reach \$75,000. The cold damp weather after the freeze is all that saved gardens and field truck and prevented a wholesale killing of trees. Garden truck while damaged was not a total loss, so that the cash loss will not amount to a high total. The crop can be planted again. Much of the fruit of this section of the country is ruined without question. However there are still hopes for strawberries, grapes, raspberries, currants and gooseberries, which are now recovering. The greatest damage to garden truck was to the tender tomato plants and beans.

Mr. Prescott of Marengo was perhaps the greatest loser in this section as he had prospects of a record crop from his 7,000 to 10,000 cherry trees. A. F. Hatch of South Elgin lost 8,000 tomato plants and his rhubarb and asparagus were badly nipped. His whole crop of lettuce was destroyed.

A PATRIARCHAL TREE.

This old apple tree on the farm of L. H. Buzzell, Barrington, New Hampshire, is 12 ft. 4 in. in circumference; the three main limbs being 6 ft. 3 in.; 5 ft. 9 in.; 6 ft. 10 in. respectively. According to an authentic record it was a large tree bearing fruit in 1781—129 years ago. It bore about 25

bushels of apples in 1909. It is estimated to be over 250 years old.

Grand Rapids, Mich.—The Superior Court jury has awarded a verdict of \$250 to Charles Leising in the case brought by the lad against Henry Smith, the florist. Leising fell from a tree while picking cherries on the Smith farm last summer and was painfully hurt.

"SPLENDID RESULTS."

Editor HORTICULTURE:—

The season is now closed for the sale of our Mary Tolman carnation plants. In looking over results we find we have received splendid results from our advertisements in HORTICULTURE.

Yours truly,

Dreer's Select Hardy Vines and Climbers

Potted Stock for Present Planting

AKEBIA QUINATA.
We offer extra heavy pot-grown plants of this handsome climber.
Strong 4-inch pots, \$1.25 per doz.; \$8.00 per 100.
Heavy 6 " " 2.00 " 15.00 "

AMPELOPSIS VEITCHII.
Strong 2-year-old, \$1.50 per doz.; \$10.00 per 100.
Extra selected plants, \$2.00 per doz.; \$15.00 per 100.

AMPELOPSIS VIRGINICA. (Virginia Creeper.)
Strong 2-year-old plants, \$1.25 per dozen; \$8.00 per 100.

AMPELOPSIS TRICOLOR. (Vitis Heterophylla Variegata.)
Very strong, 3-inch pots, \$1.00 per doz.; \$7.00 per 100.

AMPELOPSIS ENGELMANNI.
Extra strong, 2-year-old plants of this most useful variety.
\$1.75 per doz.; \$12.00 per 100.

AMPELOPSIS LOWII.
A new variety of the same general character as A. Veitchii and clinging to the smoothest surface without support, but with foliage much smaller and deeply cut, giving a light and airy appearance to the plant not possessed by the older sort. In spring and summer the leaves are of a bright apple-green color, changing to a brilliant crimson and scarlet in the autumn. 60 cents each; \$6.50 per doz.

APIOS TUBEROSA.
Strong tubers, \$2.00 per 100.

ARISTOLOCHIA SIPHO.
(Dutchman's Pipe Vine.)
Extra heavy, \$4.00 per doz.; \$30.00 per 100.

BIGNONIA. (Trumpet Creeper.)
Grandiflora. Strong plants, \$3.00 per doz.; \$20.00 per 100.
Radicans. Strong plants, \$1.50 per doz.; \$10.00 per 100.

CELASTRUS SCANDENS.
(Bitter Sweet, or Wax Work.)
Extra heavy plants, \$2.00 per doz.; \$15.00 per 100.

CINNAMON VINE.
Strong roots, 40 cents per doz.; \$3.00 per 100.

CLEMATIS PANICULATA.
(Japanese Virgins Bower.)
We have an immense stock of exceptionally fine plants of this most popular of all the Clematis, and offer
Strong 2-year-old plants, \$1.50 per doz.; \$10.00 per 100; \$90.00 per 1000.

CLEMATIS MONTANA GRANDIFLORA.
The plant is of stronger growth than any other Clematis, not subject to the attacks of insects, and succeeds under the most adverse conditions. It is perfectly hardy, having withstood without the least damage in a most unfavorable position in our trial grounds. Its flowers, which resemble the Anemone or Windflower, are snow white, 1½ to 2 inches in diameter, and frequently begin to expand as early as the last week in April, continuing well through May, and are produced in such masses as to completely hide the plant. Extra strong, 2-year-old plants, 35 cents each; \$3.50 per dozen.

CLEMATIS MONTANA RUBENS.
Identical in every way with the white flowered variety, excepting in color, which is of a most pleasing shade of soft rosy red.
We offer a limited stock of strong plants, 75 cents each; \$8.00 per dozen.

EUONYMUS RADICANS VARIEGATA.
A nice lot of 3-inch pots, \$1.00 per doz.; \$7.00 per 100.

LARGE-FLOWERING HARDY CLEMATIS.
We have again this season a fine stock of good, strong plants, two years old, own roots.
Boskoop Seedling or Sieboldi. Extra large lavender.
Duchess of Edinburgh. Double pure white.
Henryi. Finest large single white.
Jackmani. The popular dark rich royal purple.
Madam Baron Veillard. Light rose, shaded lilac.
Ville de Lyon. Bright carmine red.
30 cts. each; \$3.00 per doz.; \$20.00 per 100.

Primulinum. An introduction from China, its flowers fully double in size to J. nudiflorum; these appear simultaneously with the leaves. Strong plants, 35 cents each; \$3.50 per doz.		

LATHYRUS LATIFOLIUS.
(Everlasting Pea.)

	Per doz.	Per 100
Albus. White.....	\$1 00	\$7 00
Splendens. Rose.....	1 00	7 00
"White Pearl." A magnificent, new, pure white variety, with individual flowers fully double the size of the ordinary Everlasting Pea. These are produced in really gigantic trusses. We offer very strong roots at 20 cents each; \$2.00 per dozen.		

POLYGONUM.
Baldschuanicum. This beautiful, hardy, woody, twining plant is one of the most interesting and showy flowering climbers. Its flowers are white, and are borne in great feathery sprays at the extremities of the branches. Strong plants, 35 cents each; \$3.50 per dozen.
Multiflorum. A very desirable climbing plant, which seems peculiarly adapted to our climatic conditions. It is of strong, rapid, but not coarse, growth, frequently attaining a height of 15 to 20 feet in one season. Its bright green, heart-shaped leaves are never bothered by insects, and during September and October it produces masses of foamy-white flowers in large trusses from the axil of each leaf. \$1.50 per dozen; \$10.00 per 100.

SCHIZOPHRAGMA HYDRANGEOIDES.
(Climbing Hydrangea.)
One of the most interesting of our hardy climbers. Its flowers, which are borne in large trusses, are similar to white Hydrangea, and when in flower during July and August, make a handsome display. A limited stock of strong plants, 75 cents each.

WISTARIA SINENSIS.

	Per doz.	Per 100
Blue	\$3 50	\$25 00
White	4 00	30 00

VITIS HENRYANA.
A new climber from China, foliage similar in outline but not as large as the Virginia creeper, foliage of great substance and prettily variegated, the ground-color being deep velvety-green, while the midrib and veins are of a silvery white. 60 cts. each; \$6.00 per doz.

AMPELOPSIS LOWII.

Henry A. Dreer,

714 Chestnut St.,
PHILADELPHIA, PA.

The above prices are intended for the Trade only.

Hardy Climbers, Etc.

Mr. Florist, we suggest these to you to **MAKE SALES.** Do the same to your customers—**IT WILL PAY US BOTH.**

AMPELOPSIS Strong Dutch-Grown

Ampelopsis Veitchii (Boston Ivy). Extra-strong imported vines, 3-year-old. \$1.25 for 10, \$12 per 100.

Ampelopsis Veitchii robusta. A very compact-growing variety of the well-known Boston Ivy, and very highly recommended to us; will undoubtedly take the place of the ordinary Veitchii in the near future. \$1.75 for 10, \$15 per 100.

Quinquifolia (American Ivy, or Virginia Creeper). Good for covering walls, verandas, or trunks of trees; affords shade quickly. 25 cents each, \$1.75 for 10, \$15 per 100.

CLEMATIS

Henryi. Pure white; extra large. **Jackmanni.** Purple. **Alba.** White. **Sieboldi.** Lavender. **Ville de Lyon.** Brilliant Carmine-red; as good as Mme. Edouard Andre, but contrary to this one, is very free-growing.

Extra-strong plants, 30 cts. each, \$2.75 for 10, \$25 per 100. **Clematis paniculata.** Strong, 2-year-old plants, \$2.00 per doz., \$15 per 100.

ACTINIDIA ARGUTA

A desirable Japanese climber of strong, vigorous growth, with dark green, shining foliage and white flowers with purple centers, which are followed by clusters of edible fruit. An excellent plant for covering arbors, trellises, etc., where a rapid and dense growth is desired. Strong plants, 25 cts. each, \$2.50 per doz.

BIGNONIA (Trumpet Vine)

Radicans. Dark red, orange throat; free-blooming and very hardy. 20 cts. each, \$2.00 per doz.

ARISTOLOCHIA SIPHO

Dutchman's Pipe. Strong, field-grown, 3 to 4 feet. 35 cts. each, \$3.25 for 10, \$30 per 100.

WISTARIA SINENSIS Extra Strong. Field Grown

Blue. 6 to 7 feet. 40 cts. each, \$3.75 for 10, \$35 per 100. **White.** 6 to 7 feet. 40 cts. each, \$3.75 for 10, \$35 per 100.

HONEYSUCKLE

Very extra-strong, Holland field-grown plants. 6 to 8 feet long, many branches. **Halliana.** Yellow. \$3.25 for 10, \$30 per 100.

HYDRANGEA PANICULATA GRANDIFLORA

Two-year-old, 3 to 4 branches. Bushy, \$1.50 per doz., \$10 per 100.

CULTIVATION OF THE POINSETTIA.

Abstract of a paper read by Harold B. Vyse, before the Morris Co. Gardeners' and Florists' Society.

Poinsettia pulcherrima is almost indispensable for Christmas decoration, and in my opinion every gardener should grow a few for that purpose. I will take this subject up from the resting period, and will endeavor to give you a brief outline of my method of cultivation, although it may differ, perhaps, from the usual pursued by some growers. I may say I have never resorted to the planting out system in benches, although I believe a good many are grown that way for cut purposes.

The resting period begins about the first week in January, lasting until the early part of May. The plants are cut back to within about 2 ft. from the pots, and then are turned over on their sides, water being withheld all the time. I place them under the carnation benches and there they remain until I start them in May. Then I usually place them under the rose benches, as near the walk as possible, so that they can get light, giving them a good soaking with water, and syringing them two or three times a day.

In two or three weeks the first batch of cuttings can be procured. I prefer cuttings about 2½ inches long, taken with a little old wood, or a "heel," as the term is often used by gardeners. There are other methods that can be resorted to if the stock of old plants is limited; that is by cutting up the old stems in the manner in which you would make vine eyes; and yet another method is to cut up the stems so that one eye is above the sand.

It is advisable, when taking cuttings, to have close at hand a little powdered charcoal and dry sand to insert the cuttings into as soon as they are taken off, to stop the sap from flowing. Get the cuttings into the sand as soon as possible so as to avoid flagging. Give a good watering and shade with papers. I find the Poinsettias very easy to root, and by making a succession of strikings, one can have plants ranging from 1 ft. to 6 ft. in height.

Under favorable circumstances, cuttings will be rooted in about three weeks. Do not leave the cuttings in the sand so long that the roots get over an inch long, otherwise they will in all probability get damaged while being potted. For the first potting, prepare a fairly light compost, using sand, leaf-soil, and loam well-mixed. Place the young plants in a shaded part of the house. As soon as they are rooted sufficiently to stand the sun, place them in the full sunlight, and when ready give them a shift into larger pots, making the compost heavier with loam, using a little sand to keep the soil open. Pot firmly. By the early part of August the plants will take their final shift into 5 or 6-inch pots. I use all loam, with a small quantity of bone meal and Scotch soot well incorporated in the soil.

When potting use the rammer freely and pot firm, for in my opinion that has a tendency towards helping the plants to hold their foliage longer than when loosely potted.

Always be very careful to insure

A BLUE ROSE

The Greatest
Rose Novelty
of the Century

It flowered with us this season and was greatly admired.

The New Rambler (Violet Blue), hailed by the German rose growers as the forerunner of a genuinely cornflower blue rose, is a seedling of Crimson Rambler, very vigorous and hardy, and free blooming.

PEACOCK DAHLIA FARMS, WILLIAMSTOWN, JUNCTION, N. J.

that they have a plentiful supply of water, for if left to get dry and flag in the hot sun, the result will be a crop of scorched foliage. Spray the plants overhead several times a day in bright weather. Some have the idea that the Poinsettia needs high feeding; that, I find, is a mistake. Two applications of Clay's fertilizer at intervals of two weeks is ample to finish off good bracts, say from 14 to 19 inches across, in 5 or 6-inch pots.

The Poinsettia is not very susceptible to the ravages of insects, mealy bug being its worst enemy. Even this can be ward off if a careful watch is kept, never allowing the pests to gain headway. An occasional spraying of X L All or some other good insecticide will keep them clean.

**Little Ads Bring

Seed Trade

Results of Cold Snap.

It seems to be the consensus of opinion that the recent cold wave did much less damage than was feared. Undoubtedly considerable damage was done to fruit in many sections, but, so far as can be ascertained, the injury to planted crops has been comparatively slight, all of which proves the tendency to exaggerate every calamity and the necessity of waiting for reasonable proof before getting excited.

As expected, there have been a few complaints of unsatisfactory germination of peas, but in the majority of instances this trouble can be traced directly to unfavorable conditions of soil and weather. In many sections there have been severe frosts and snows from a few inches to a foot in depth since peas were planted, and it is not surprising, under such conditions, that the germination is not of the highest. It should not require a very high degree of intelligence to figure this out; but the disposition to blame someone for our failures is predominant in most of us.

Pea Prospects.

Speaking of peas, we learn that they are in full bloom in Maryland and Delaware, and it is expected that picking and canning operations will begin by the middle of May. This will be a very early start, almost—if not quite—establishing a new record. Prospects for a good crop are said to be excellent and it may be added here that crop conditions generally, as affecting peas, are good up to this time.

While not exactly a part of the seed

business, it is interesting to note that Maryland strawberries will undoubtedly be in the market by the 15th, which is also unusually early. There is promise of a fine crop and indications are that the fruit will be of excellent quality.

Maule Expands.

For several years William Henry Maule, the well-known Philadelphia mail order seedsman, has worked under a handicap of a lack of room. A considerable part of his seed business has been carried on in a building owned by him on Market street, and in which are the offices of his paper, The Practical Farmer. Recently Mr. Maule has leased the building immediately adjoining his main office at 1711 Filbert street and, as this will give him five additional floors, it will help to solve the problem he has been wrestling with for several years. He proposes to cut doors through from his building into the next on each floor, and when his plans are perfected he will be enabled to employ a larger force during the annual spring rush and will probably be prepared to take care of all business within twenty-four hours after his orders are received.

Mr. Maule is one of the most progressive, and it may be added, aggressive, men in the seed business, and there are few improvements of a practical character that he does not avail himself of.

The Burpee Premiums.

In our issue of March 12, commenting upon the numerous large premiums offered by W. Atlee Burpee annually for competition in vegetables and flowers at state and county fairs, George C. Watson wrote as follows:

"As there is no mention of horticultural societies (or other similar organizations) it is presumed that only state and county fair secretaries come under the provisions of the offer. There may be good reasons

for this limiting, yet it seems to us it might be broadened; not only for the advancement of horticulture under the auspices of horticultural and floricultural associations—as distinct from county fairs; but for the benefit of the business of the generous donors.

"We will be glad to hear from Mr. Burpee as to his reasons for excluding these associations—that is, if we are correct in assuming that he does so limit his offer."

In reference to the above Mr. Earl has written in explanation, as follows:

"Some time ago there appeared in the columns of that bright paper, HORTICULTURE, a paragraph or two asking why we did not allow different horticultural societies to offer at their several exhibitions the special Burpee cash premiums as they are offered annually by us at state and county fairs. Without giving you the names of the different societies, we have for several years past done all we possibly could to encourage the holding of flower shows especially when they made a specialty of sweet peas but as to our offering these premiums broadcast we do not think it would be wise, as there is no way by which we can tell just where to draw the line. As a rule when any of the officials interested in flower shows write us they generally obtain some sort of a premium to offer in our name whether the premium consists of cash or some of our books on horticultural topics or, as is sometimes the case, a piece of silver."

Mr. Earl further asks for suggestions as to how his house could best proceed to extend even greater encouragement than heretofore, to the holding of horticultural shows and fairs without waste of time and money.

We might say that it should not be forgotten that the Burpee premiums, while liberal, are all for the products of Burpee's seeds—so that the donor would be the gainer whoever won them. Why is a county fair in a little community so much preferable from a business standpoint to a horticultural show in a big town? That is the main question asked by Mr. Watson and Mr. Earl's letter does not quite answer it.

Through wise advertising, splendid organizing ability and enterprise that knew no limitations, the Burpee estab-

lishment has grown to be far more than a mere mail order house. It is today a national institution with a field and scope reaching beyond and above the county fair. The same hearty response would be forthcoming from the big metropolitan and national shows as from the county fairs, at the mere mention of "Burpee premiums." We think Mr. Watson's suggestion is worth considering, even for a house already so widely and favorably known as W. Atlee Burpee & Co.

Notes.

A. F. Hills, formerly with A. T. Bodington, has accepted a position with W. W. Rawson & Co. of Boston.

Baker City, Ore.—H. G. Hyde has purchased the retail business of the Bergman Commission & Seed Co.

Newark, N. J.—We learn that a young man employed by I. N. Simon & Son, Philadelphia, and who was in charge of their Newark, N. J., store, recently committed suicide via the gas route. We have not learned this young man's name in full, but he was familiarly known as Max. No reasons have been given why he should have committed the rash act while still young, with every inducement to live, but we may certainly extend sympathy to his friends and relatives.

ST. LOUIS NOTES.

Ed. Gerlach, manager for C. A. Kuehn, has resigned his position and will enter the paper firm of Hagen & Co.

Miss Rose O'Connor has opened a floral store at Broadway and Rutger streets, where she has been doing a nice business of late.

The Oakland Floral Co. at East Kirkwood, Mo., are erecting four new houses which will be 28 x 200. Robert Thompson is doing the building. They will have when the new ones are completed 23,000 feet of glass.

Mr. Pierre Schneider reports that he has resigned his position with A. C. Canfield at Springfield, Ill. and accepted a position as foreman for the Oakland Floral Co., at Kirkwood, Mo. Mr. Schneider is glad to get back to St. Louis where he has many good friends in the trade.

Theo Miller is putting in a new front in his store at Delmar and Euclid avenue. It will be on the mission order and when completed will be very attractive.

Newburgh, N. Y.—A newly organized firm, under the name of Caldwell & Jespersion, have leased the Newburgh Floral Company's Greenhouses and will carry on a wholesale and retail trade.

LOVE AND FLOWERS.

Shrewd Sayings of Mrs. Solomon.

My daughter, wouldst thou know a man's secret? Go to the florist, then, oh simple one, for in him every man repositeth his confidence.

Yea, by the flowers which he sendeth a woman shall ye judge the quality of a man's love, likewise the quantity and the exact stage.

As violets pass unto roses and roses unto cheap carnations, and carnations unto nought, so passeth his grand passion, from the first throes into matrimony.

Lo, at the beginning of a love affair, mark with what care a man selecteth his flowers in person, that not a wilted violet shall offend thine eyes!

Yet, as time passeth, he telephoneth his orders and leaveth it all to the clerk. And there cometh a day when he mureth wearily, "I say, old chap, just make that a standing order, will you?"

Then the florist heaveth a sigh, for he knoweth that the end is at hand. Yea, this is the mark of an engaged man who doeth his duty. So after the wedding bouquet all orders shall cease together; and until he seeketh flowers for his wife's grave, that man shall not again enter a florist's shop.

For stale carnations, bought upon the street-corner and carried home in a paper bag, are a fit offering for any wife. Yet a funeral rejoiceth the florist's heart and maketh him to smile, for he knoweth that a widower's next order shall be worthy of a new cause, and the game shall begin all over again.

Verily, verily, my daughter, I charge thee, account no man in love until he hath gone forth into the gardens and the fields and plucked thee a few dinky pansies or stray weeds with his own hands.

For when a man sendeth thee violets it may mean only sentiment, and when he sendeth thee orchids it may be only a bluff, but when he doeth real work for any woman it meaneth business. Selah!—*London Tidbits.*

NEWS NOTES.

Syracuse, N. Y.—Phillips & Koecher now conduct the business at 213 Helen street, formerly owned by G. M. Phillips.

Providence, R. I.—Olney H. Williams, who has greenhouses at Pocasset, has closed his store on Matthews street.

Newton, Kans.—Ellwood and Norval Klein, who sold their business to Wm. Hasselmann, are now with Jos. Stamm at Hutchinson.

San Francisco, Cal.—The store opened by Frank Claverie, California and Devisadero streets, discontinued after one week.

Montreal, P. Q.—A city ordinance having been passed ordering the closing of all retail places of business in Montreal, with certain specified exceptions, at 7 o'clock on every Wednesday and Thursday evening, has been disregarded by the Canadian Floral Co., and the case has gone into the courts for a test. Mr. Hay, of the Canadian Floral Co., claims that the peculiar exigencies of the florist business place it in the same class as the drug, fruit, cigar and other industries which have been exempted from the provisions of this law.

PERSONAL.

Walter Paul is now with W. D. Faulk, Homestead, Pa.

Bertram O. Moody has accepted a position as florist in Agawam, Mass.

Ed. Roehrs, of Rutherford, N. J., returned from England on the Mauretania, May 5.

E. Rober will start in business on his own account, taking H. F. Port's place at Maywood, Ill.

George Eickhorn is now with F. Ueberle. He formerly ran a stand in the market, at Pittsburgh, Pa.

William Moran, late with Galvin, of Boston, has taken a position with The Rockville Floral Co., Rockville, Conn.

Robert Ergot, formerly with the Cincinnati Floral Co., is now manager for George E. Tromey, Cincinnati, Ohio.

P. J. Brackenburg is now with Charles Mueller of Wichita, Kans. He was formerly with the George M. Kellogg Flower & Plant Co.

Fred Fromhold of Kansas City, Mo., and Miss Rose of St. Joseph, Mo., were married April 17. Mr. Fromhold is manager of the W. L. Rock Flower Co.

A letter informs us that R. Vincent, Jr. and party arrived safely and well at London and at once proceeded on their journey to Holland. After doing the Haarlem Jubilee Show they will go to Brussels where the exhibition at that place will also be inspected.

Boston visitors—W. H. Hay, of Canadian Floral Co., Montreal, P. Q.; J. Muller, representing Julius Roehrs Co., Rutherford, N. J.; E. J. Fancourt, representing Pennock-Meehan Co., Philadelphia; George G. A. White, representing R. M. Ward & Co., New York.

Flower Market Reports.

BOSTON Business was pretty quiet all through the first half of this week, but it has picked up nicely, beginning with Wednesday, and the prospects are excellent for a satisfactory wind up. The dark weather of the past few days has shortened up the supply very materially and has retarded the outdoor stock which, had the warm weather continued, would have encumbered the market at a time when there is little demand for it. Quality is good, as a rule, and the cold-house roses, such as Kaiserin and Carnot, are superb in every way. The call for white carnations is quite strong at present and prices are on the up-grade for any good stock.

The market showed a slight improvement over the previous week. Stock is not as plentiful as could be desired and there is no reason to look for any immediate increase. The one hot day following the continued rain caused the plants to suffer from thrips. There is not at this time any outdoor stock coming into the market which is really salable. In fact lilacs are the only flowers offered and they are frost-bitten and poor. It is predicted that white carnations will be in great demand and supply short during the latter half of the week. Last year the quantity used for Mothers' Day was large and this year the orders are coming earlier. Prices have advanced to five and six cents at present writing. Lilies continue scarce. The first peonies are arriving in fine shape and as usual are queen of the windows. Snap dragons are selling fairly well. The stems are long but not so stiff as a few weeks ago. Gladioli, in light shades as well as the bright red, are a welcome addition and a boon to the florist needing a stately flower. Asparagus plumosa is getting a little scarce and there is no excess of green of any kind. There has been an unusual scarcity of sphagnum moss the past month. Some of the large retail houses have resorted to excelsior to fill their designs.

A few warm days following the recent cool snap has brought in an abundant supply of Beauties and Tea roses which are moving nicely, although at reduced prices. The cut of carnations has also increased with white bringing the highest price, the quality for this season of the year being very good. Both outdoor and indoor lily of the valley are moving nicely as are also callas and Harrisii lilies. The demand for sweet peas is still in excess of the supply. Antirrhinum and daisies find a ready market. Local grown peonies made their first appearance of the season on Monday, while bulbous stock is a thing of the past. All green goods are in good supply. A. O.

Detroit reports continued cold, rainy weather has kept the supply down for the past week and, with a very good demand in general, prices have ranged higher and firmer than in previous years at corresponding date.

(Reports continued on page 709)

WINDOW BOX TIME

We offer below a few seasonable items for Window Boxes, Baskets, Porch Boxes, Etc.

CEDAR BARK.

Have you plenty of Cedar Bark? Bundles of about 25 square feet, \$1.00 each. Special price in quantity.

Flower Market Reports

(Continued from page 709)

Tendency this week is in the direction of surpluses and lower figures on all but the few select high-grade flowers which are sold in so small quantities as to make very little impression on the final average. Warmer weather is now surely due and its advent is certain to embarrass the market as there is a big reserve crop of outdoor and indoor material which has been held back by the prevailing dark and generally chilly weather. Quality is good, as a rule, in all lines. Roses are excellent, the weather conditions suiting them exactly. Cattleyas are very fine with a tendency to reduced supply. Sweet peas are increasing in quantity and there are now more than enough to go around. Lilies very plentiful. Bulbous material from out of doors on the wane.

As the season advances there is now very little hope left for any general advance in prices. There may be a slight spurt in spots from time to time until the summer arrives in real earnest but the bolt is shot for this season and all concerned may as well make up their minds to digest their medicine and be as philosophical under the circumstances as they can. While stock was plentiful last week there was no great over-supply. A few cool days had a tendency to prevent a glut, and the demand has kept up all right. American Beauty roses continue of fine quality and in good supply. Richmonds are also good and there are a few Libertys of the new crop commencing to arrive. Not enough to be a factor in the market as yet but enough to show fine quality and good promise. Kaiserin tops the list in white roses with White Killarney and Bride good seconds. Jardine leads among the pink varieties and Maryland is also very good. Harry Kirk and Duchess of Wellington are two new yellows that have appeared on the market recently and meet with good favor. Both are Dickson introductions. Carnations are in good supply and there appears excellent prospects for some extra business in these (whites especially) towards end of week. The "Mothers Day" fad, May 8th, is the stimulating influence in

that connection. Orchids are scarce. Outside sources have been called on—the past few days—to augment local supplies. Peonies have made their advent. The red and pink officinalis and the red tenuifolia are the only varieties so far; but Festiva is well advanced and may be looked for about the 15th if the weather keeps good. Lilac, outdoor crop from near by sources is over; but there are already plenty of fine snowballs to be had.

PHILADELPHIA NOTES.

New crop American Beauty roses from outside sources have been arriving at McKissick's the past week—grand flowers and perfect foliage.

H. F. Michell Co. are exceedingly busy at present but not so forgetful as to omit asking us to remind our florists friends that May is the time to sow cineraria seeds. Verb: sap.

M. Rice, of M. Rice & Co., writes from Berlin that he has landed some special good things for florists' use for the coming season. He expects to sail for home May 22nd on S. S. President Grant.

C. P. Poryzees of the Poryzees Floral Co., sailed for Greece on the 3rd inst. on the S. S. Patris. He will return in September. The business in the meantime will be in charge of his brother Stephen.

J. Monroe Palmer of Kennett, will build two houses 128 ft. x 140 ft. for carnations. The materials will be

supplied by Lord & Burnham Co., the contract having been secured last week through their local agent D. T. Connor.

Robert Scott & Son will tear down four or five old houses this summer, having given up the growing of plants for the mail order trade. They will devote themselves more largely to commercial cut flowers and will be able to give increased attention to the Dickson roses. We understand new building is deferred for the present as Alex. B. Scott the head of the firm has to start shortly on a trip to Europe.

The wicked types have been at it twice again. First they have put an M for an N in Norristown in our news note about Alexander Cumming last week. Mr. Cumming's correct address is—Red Rose Nurseries, Center Square P. O., Montg. Co., Pa. The property he has secured is a part of the estate of the late Wm. F. Singler, proprietor of the "Phila. Record." The second instance was in crediting the verses "Counting the Cost," printed in our last issue, to T. A. Daly instead of S. W. Gillillan. Both gentlemen are talented poets. Our sincere apologies to the bard of Wingohocking and the bard of Baltimore.

SOUTHERN WILD SMILAX

Fully Guaranteed.

Why HORTICULTURE has stood the test as a profitable Advertising medium for the trade.

Because It is read by the men of standing and influence in the Horticultural field, every one of whom is a prospective buyer.

Why HORTICULTURE is so widely read.

Because Its contents are distinctly representative of American Horticulture and are thus indispensable to the Florist, Nurseryman, Seedsman and Gardener.

An Admirer of HORTICULTURE in the Central West writes; "It has won on its merits. It is our most prized weekly visitor."

And Now You See How HORTICULTURE has managed to elbow its way in between its older rivals and why the best trade advertisers find it an indispensable auxiliary.

It's No Secret That the men who read HORTICULTURE are the sort of men that advertisers like to talk to and if you have anything to advertise you can't afford to get along without them.

CHAPEL OF THE NATIONAL FARM SCHOOL, BUCKS CO., PA.

(See Phila. notes, issue of April 30.)

The illustration here presented is a good example of the many quaint and

picturesque features of this remarkable institution, so ably presided over by that remarkable man, Dr. Washburn. Walter F. Fancourt is the horticulturist in charge. He has put new life into that department.

"Enclosed please find \$1.00 for subscription to HORTICULTURE. Rush copy along, we need it."

S. F. CO.

North Dakota.

MONEY MAKERS

FOR

ADVERTISERS

A good illustration is often the means of making a sale, especially if it shows something new or novel.

We have in stock many of the cuts used in our reading articles, all of which show the best type of the subject illustrated and in an effective manner.

They should all prove effective for catalogue or advertising purposes and can be secured at about half price.

Tell us your requirements and we will send you proofs of cuts nearest suited to your needs.

Obituary.

John Lang.

John Lang, a well-known gardener at Pittsburgh, Pa., died at his home, 213 Deniston avenue, East End, April 19. He was 82 years of age. He was born in Germany and came to Pittsburgh when a child. Two daughters survive him.

Mrs. Caroline Schisler.

Mrs. Caroline Schisler, wife of Henry M. Schisler, of the Schisler-Corneli-Seed Co., St. Louis, died Friday, April 29th, after a short illness. The funeral took place Sunday, May 1, and Mr. Schisler's many friends in the local trade attended.

Friedrich Harms.

This old master of rose growing and first authority on roses in Germany, died in his 80th year, on April 19, in Hamburg. But a few days separated his death from that of his contemporary and friend, L. Moller. The loss of these two eminent men will be felt not only in Germany but throughout the entire horticultural world.

Reinhard Schuetze.

Reinhard Schuetze, landscape gardener and superintendent of public parks and boulevards of Denver, Colo., is dead. Mr. Schuetze's first work was on Fairmount Cemetery, where he now rests. Other parks constructed under his direction and plans are Washington and Congress parks and a number of lesser reservations.

Ludwig Moller.

Ludwig Moller, editor of Moller's Deutsche Gartner Zeitung, died on April 12. Mr. Moller was born in 1847 and his eminence in horticulture was the result of unremitting study and application, for he had very little education as a start and worked for fifteen years practically as second gardener and afterwards attained to the position of head gardener on various estates of note in Germany.

Catherine Powers Lynch.

Catherine Powers Lynch, widow of the late M. J. Lynch, died after a very brief illness on April 19 at her home on South street, Poughkeepsie, N. Y. About forty years ago she married Mr. Lynch and they located at their late residence. After her husband's death the business was carried on by Mrs. Lynch and her sons, and it will be continued by his sons.

Alfred Herbert Howard.

Alfred Herbert Howard died at his home on Main street, Otter River, Mass., Friday evening, April 15, at the age of 58 years and two months. Mr. Howard was born in Holden and has made his home in Otter River for about 35 years. At the time of his death he was conducting a business of raising cucumbers under glass. He is survived by a wife. The funeral was held from his late home April 19.

Alexander O'Driscoll Taylor.

Alexander O'Driscoll Taylor died at his residence in Newport, R. I., Sunday, April 10. He was president of

the Natural History Society and was particularly active in any cause to save or beautify the city's trees. As state commissioner of birds he did also most excellent work. Mr. Taylor was born in Cork, Ireland, of Scotch parentage, and was in his 79th year. The funeral was Thursday, April 14, from Memorial church.

Anthony Murray McLaren.

Anthony Murray McLaren, proprietor of the Westwood Nurseries, High street, Westwood, Mass., died suddenly of a shock of paralysis at Hyde Park avenue, Roslindale, Mass., April 27. Mr. McLaren was born in Crieff, Perth County, Scotland, October, 1830. His early education was received at Drummond Castle, after which he attended Octertyre, the great training school for landscape gardening. For forty years he conducted a florist business at Forest Hills square, and when the railroad tracks were elevated the site of his greenhouses was taken for the new depot. He then removed to Westwood, where he has since conducted the Westwood Nur-

ANTHONY MURRAY McLAREN

series. He was a member of the Massachusetts Horticultural Society and was the winner of many prizes at its exhibitions some years ago.

Baron Schroeder.

Baron Schroeder passed away on April 22, at The Dell, Egham, Surrey, England, at the age of 84. His end was not unexpected as he has been an invalid and failing in health for some time. His death is a great loss to horticulture but to orchidculture in particular. One of the most ardent admirers of orchids, he had for many years been gathering rare varieties until his collection occupied a unique position. It was perhaps the most valuable in existence. Always enthusiastic on the subject, he did much towards making orchids so popular as they are in Europe today. He also gave liberally to anything that was for the advancement of horticulture. One of his largest donations was towards building the present Horticultural Hall in London. His name will live forever in horticultural annals.

George S. Saunders.

A well known and esteemed contributor to the British Horticultural Press has lately passed away in the person of Mr. George S. Saunders, who was formerly editor of the Royal Horticultural Society's voluminous "Journal." His initials "G. S. S." had become familiar to the readers of the gardening papers; his bright and informative articles were always eagerly welcomed, for his writings were popular amongst a wide circle. He made an important contribution to the "Century Book of Gardening." Of a quiet, and retiring nature, Mr. Saunder's genuine and genial qualities secured for him many friends, particularly at St. Thomas's Hospital, Westminster, where for many years he acted as librarian. W. H. A.

NEWPORT LABOR PROBLEMS.

Newport gardeners who are in charge of estates are having some extra anxiety at present on account of their laborers having recently formed a union and voted to ask for an increased scale of pay from the 1st of June. The new scale is to be \$2.25 per day or \$55 a month, wet and dry, which is an advance of 25 cents per day or five dollars a month. Most of the gardeners seem to be in favor of the men having the rise and some have written to their employers explaining the situation and asking for the advance which is expected will be given in most cases, but it is also expected that some will refuse the request and cause a good deal of changing around among the laborers which will not be desirable to the gardeners. There is a great deal of extra work in progress around Newport at present, which is causing gardeners' help to be very scarce, so a very opportune time has been chosen for this class to get in touch with the upward movement of the wages of other classes, and the prices of necessities.

DAHLIAS Every Day in the Year

The Most Ornamental Crabs

At no season of the year is the Arnold Arboretum so attractive, from a floral point of view, as the present and many and beautiful are the attractions presented to the observant visitor on every side. Each special group has its own claim upon the individual, and whether it be the celebrated lilacs, the deciduous rhododendrons, the wonderful cornuses or the flowering pears all are surpassingly beautiful and combine to make this famous garden a delight to the eye and a pleasure to all who love nature at her best. It is, however, the flowering crab-apples which I would draw special attention to in this note and no more beautiful shrubs or small trees exist for the embellishment of American gardens. The only regrets one has is that they are not more extensively planted. The best flowering crabs belong to what is botanically known as the *Malus* section of *Pyrus* and this in turn is a member of the great order *Rosaceae* which includes many of our most ornamental shrubs. These *Maluses* certainly have many claims upon the garden lover as they produce enormous quantities of blossom in spring, their foliage remains in good condition till the fall and many of them carry a profusion of ornamental fruits. They are extremely easy to cultivate and never fail to produce a galaxy of flower and, what is of supreme importance, they are not seriously affected by any of the injurious insects if the ordinary precautions of spraying are taken. From the florist's point of view it would seem that they are particularly valuable as no flowers are more eagerly sought after when obtainable and the small amount of attention necessary to have them in good condition should strongly recommend them to those engaged in commercial pursuits.

To produce good flowering sprays or shoots for florists' work it is advisable to prune the flowering wood hard back as soon as the flowers are over so that good shoots are procured for next season and it should be remembered that the blossoms are produced on the previous season's growth. By this system of pruning the plants can be kept within moderate dimensions. Propagation is easily effected by grafting and the most desirable stock to use is *Pyrus Malus* though *P. baccata* can be used but it appears that the former is the longer lived. Varieties are now extremely numerous and for some of the most desirable of them we have to thank Jackson Dawson who has for many years labored to improve the *Malus* section. That wonderful variety *Malus Arnoldiana* will ever remain a monument to him.

The following varieties though by no means exhaustive will be found to include the most ornamental.

Malus floribunda, a native of Japan, is one of the most desirable and makes an excellent specimen where it has sufficient room to develop. The flowers are white suffused with rose, of good size and produced in great numbers along the full length of the branches. The variety of this, named *atrosanguinea* is one of our handsomest flowering shrubs being a decided dark red color, and the habit is frequently pendulous.

M. Niedwetzkyana is particularly ornamental and very distinct from any other species. The flowers are large, extremely showy and a peculiar rosy-red color. This *Malus* fruits quite freely and these are permeated, as also are the leaves and bark, with a reddish tinge.

M. Halleana or *Parkmanii* is one of the most beautiful with rosy-red flowers which are semi-double and last for a considerable time in good condition. This variety and *M. Scheideckeri* which has large flowers deeply flushed with pink, are two excellent subjects for forcing

PYRUS MALUS ARNOLDIANA.
Growing in the Garden of Wm. J. Stewart.

in pots, for which purpose they might be much more largely and profitably employed.

Among the single-flowered varieties *M. Arnoldiana* has no superior if an equal. Even young plants flower abundantly and a well-established specimen in good condition is unsurpassed by any spring flowering shrub. The flowers are very large, white on the inner side and heavily suffused with dark red on the outer which makes an excellent contrast. The slightly pendulous habit of the long branches adds to the beauty of this exquisite shrub which should find a place in all gardens.

M. Sargentii is also extremely effective, the flowers being very pure white and somewhat later than the majority. This is a very valuable shrub, of medium size and worthy of the name it bears.

Malus spectabilis and its varieties furnish some of the most ornamental small trees, the most noteworthy of which is *M. spectabilis Riversii*, which has very large, double, deep rose flowers and is the best of the double forms. *M. spectabilis* with single flowers two inches across and its variety *Kaido* with richer colored blossoms are very ornamental and the foliage often colors richly in the fall. *M. baccata*, the crab-apple of Siberia, is a beautiful small tree and very conspicuous when loaded with bright red fruits. The varieties *cerasefera* with scarlet and *lutea* with yellow fruits are worthy of inclusion.

Undoubtedly the finest of all the double-flowering crabs is *M. Ioensis flore-pleno*, which does not flower till the end of May. The individual blossoms are very large, sweetly scented and a warm rose in color. This makes a remarkably handsome tree or large bush.

Other good crabs are *Ringo*, a Japanese species; *Dawsoniana* which is very effective as a specimen on grass; *Malus flore-albo-pleno*; *baccata floribunda*, and *Toringo*, a pleasing dwarf variety.

The gypsy and brown-tail pests

A statement appears in the "National Horticulturist," a paper devoted mainly to fruit-growing in the West, that, notwithstanding the strenuous efforts of inspectors, the brown-tail and gypsy moths have invaded the mountain fruit districts of Utah. We, here in eastern New England, who have been engaged for years in a costly warfare with this terrible scourge can sympathize most sincerely with any other section upon whom the plague may descend. We trust that our contemporary is mistaken but despite all possible precautions, cannot see how the rest of the country can escape, although it is possible that the parasites and other natural enemies of these insects now being dissem-

inated in New England may hereafter accompany them wherever they may spread to and thus modify their power for mischief.

Florists' problems of the day

How to best dispose of the surplus of cut flowers which is now almost continuously with us, and, on the other hand, how to meet the demand occasioned by holidays and popular affairs to which certain prescribed flowers are dedicated, are two problems that play hide and seek with the florist trade. The surplus—well, we think it will take not one but several Moseses to lead the flower grower out of the wilderness in which he seems to be getting more and more tangled up. The combined brains and magnanimity of the best men in the profession will be found none too much to successfully cope with this vital question. In the matter of the extreme demand for certain flowers for special occasions we commend to the attention of our readers the sentiments and advice expressed in the communication by George C. Watson to a Philadelphia daily paper, which we copy on another page of this issue. It looks as if the less special campaigning the florist does on behalf of the white carnation for "Mothers' Day" the better it will be for the peace of mind, general standing and prosperity of the florist. Flowers, flowers, for mothers and fathers and grandmothers and children, and "sisters, cousins and aunts," as well as everybody else—not for one day alone but for every day in the whole year, for all occasions and all conditions—this is the slogan that can be everlastingly put into profitable use by the man who raises flowers and the man who sells them, here, there and everywhere. Is it not too bad that an industry so honorable should have to run the chance of unpopularity, all on account of a few cents' advance on white carnations caused by an inordinate demand for immediate delivery? The interests of all—carnation growers as well as the rest—will often be better conserved by discountenancing rather than encouraging fads of this sort.

King Edward VII. gret, which we know are shared by all our fellow countrymen that

It is with feelings of profound regret, which we know are shared by all our fellow countrymen that we offer our sympathy to our brothers over the sea who have been plunged into the deepest sorrow by the passing away of their beloved King. In the death of King Edward horticulture has lost a warm friend and a keen supporter as indeed every institution has which was worthy of his confidence and thought. In anything which made for the advancement of horticulture the late King was never backward either with money or his presence in assisting so worthy and object. It will be remembered that the magnificent building of the Royal Horticultural Society in Westminster, built but a few years since, was opened by His Majesty and much of the unparalleled success which this institution has achieved was very largely due to the Royal support it so frequently received. The magnificent shows held annually in the Temple Gardens on the Thames embankment and at Holland Park, Kensington, have become social events in London and were frequently opened by the late King who was ever ready to give a word of praise whenever it was deserved. Since his accession to the throne the gardens on his own estates at Windsor and Sandringham have become among the most celebrated in the United Kingdom and contain many features which are unsurpassed, especially the glass corridor and pergola at Sandringham. British-born gardeners on this side tell us that the comfort of his employees was always carefully considered by King Edward and the new bothies

erected on both estates were constructed under his personal supervision. Mr. MacKellar who has charge of the gardens at Windsor and Mr. Thomas Cook at Sandringham are well known to many of our readers, and to them and all engaged in the profession on the other side as well as those hailing from there who have so enriched American horticulture by casting their lot with us, we extend our heartfelt sympathy for the irreparable loss they have sustained. The Gardening Charities which do such excellent work among those who are no longer able to carry on their profession were always warmly supported by His Majesty.

"He was a man; take him for all in all, we shall not look upon his like again."

Trans-Atlantic Notes

WARMED RAILWAY CARS FOR VEGETABLES AND FRUIT

We learn from the German journals that the managers of the state railways in Germany have provided experimentally a large number of closed wagons fitted with steam heating apparatus for the safe conveyance of fruit, vegetables, potatoes, etc. The wagons will be heated when the temperature out of doors reaches 17.6 degrees Fahr. or 14.4 degrees below freezing point, the warmth in the wagons not to exceed 50 degrees Fahr. In order to render possible the forwarding of goods in these wagons when dispatched by fast goods trains special invoices must accompany them, for which no charge is made. The warmed cars will commence to run about the end of March next between Berlin and Hanover, Cologne, Halle-Erfurt-Frankfurt-on the Main and Schneidemühle, Eydtkuhen.

A WHITE CAROLINE TESTOUT ROSE

By crossing the variety Caroline Testout with Kaiserin Auguste Viktoria, a white rose which in habit of growth and its flowers is the exact counterpart of C. Testout, has been raised by the firm of S. A. Vosters & Sons, Kiel, Holland. In the leafless state no difference is discoverable between the parent on one side and the new variety. The white C. Testout will be of great value to rosarians and growers of roses for cutting purposes. Flowers sent to England and the U. S. A. arrived in capital condition.

A CUCUMBER DISEASE IN SAXONY AND ELSEWHERE

The advisory institute for plant protection at the Botanical Garden of Dresden (Prof. Dr. Naumann) makes in the interest of cultivators and the public in general, the fact known that the so-called False Mildew, *Pseudoperonospora cubensis*, has made its appearance on Weigelt's beste von allen—a fine, much valued forcing cucumber.

The fungus is said to have been introduced from America to Europe, and attacks melons, cucumbers and gourds.

WOMEN'S WORK IN THE GARDEN AND ON THE FARM

We learn that arrangements are being made for what is called a Women's Congress at the British-Japanese Exhibition, and that several meetings will be devoted to subjects relating to gardening and farming for ladies. On July 5 Viscountess Falmouth will preside, and papers will be read on such subjects as lady gardeners for the colonies, landscape gardening for ladies, French gardening, jobbing gardening, market gardening, etc. On July 6 there will be addresses by lady experts on farming, bee-keeping, dairying, etc. The arrangements are in the hands of the Hon. Frances Walseley, principal of the Glynde School for lady gardeners in Sussex.

Fredrick Moore

Abies concolor

The subject of the accompanying illustration is a handsome specimen of *Abies concolor*, a tree which stands on the lawn of the Mrs. R. Goellet estate at Newport, R. I., and is one of the most admired evergreens in that section of Newport. It will be seen that it is quite symmetrical in shape and it is well furnished on all sides from the ground up. The height of this specimen is about 20 feet and its diameter at the bottom is a few feet more and being branched out with many leaders it presents a very uncommon and attractive appearance.

James Robertson

Here's Your Chance

Don't miss the SPECIAL ORCHID number of *Horticulture*, to be issued on MAY 21, 1910.

It will be a beautiful edition with cover of special design and its contents will comprise articles from the pens of some of the most noted orchid specialists. Extra copies will be published and distributed among the professional visitors to the great ORCHID SHOW which opens at Boston on May 29,

This Special Number will be timed to meet the call for

MEMORIAL DAY FLOWERS Plants and Supplies

Everybody will want to have a copy and the advertiser whose offers appear in its pages will get the business.

NEWS OF THE CLUBS AND SOCIETIES

NEW YORK FLORISTS' CLUB.

The regular meeting of the Club was held on Monday evening, May 9. An interesting report was made by Chairman Siebrecht of the Flower Market Committee, which was accepted as a report of promising progress. The Outing Committee was merrily represented by Chairman Bunyard who gave the date set for the festival as Tuesday, June 28, and the location Wetzel's Point View Grove.

The Exhibition Committee reported the offer of a silver cup by Hitchings & Co. A discussion followed regarding the competition for same and a set of rules covering the exhibitions from June till December, and specifying the manner of awarding points was approved, the winner of the largest number of points during that period to get the cup. Copies of these specifications may be had on application to Secretary Young.

Resolutions on the death of Mrs. W. J. Vesey of Fort Wayne, Ind., were presented by W. F. Sheridan and duly adopted. Mr. Sheridan also announced that the attraction at the next meeting would be a stereopticon address by George V. Nash of the N. Y. Botanical Garden on the topic of "On Horseback Through Hayti."

Prof. John Craig of Ithaca, then took the platform and delivered a most enjoyable lecture, telling of the work being done at Cornell. The problems in floriculture which are being worked out at that institution were described by Prof. Craig and comparisons made between the conditions prevailing in Europe where the work is done mostly for amateur help and those prevailing here where the most important needs are those of the professional. He eulogized New York's high position of leadership in agricultural and horticultural industries and the fine art of floriculture and outlined the interest and influence the institution at Ithaca had exercised in bringing the Empire State to the premier position now occupied. He chided the florists for their modesty in not asking for more consideration and assistance from the Agricultural College and told of the work that had been so well begun in co-operation with the Peony Society and the Sweet Pea Society, there being now after four years 1600 varieties of peonies in the trial grounds, and no less than 600 varieties of sweet peas now under comparative cultivation. The effect of artificial light (electric and acetelene), of etherization of plants, methods of application and results noted were fully covered in that part of the lecture devoted to culture under glass. The Experiment Stations, Prof. Craig claimed, are practically a clearing house for the novelties of each season and their work in the breeding and improving of plants is a monument to their value to the profession.

Much discussion followed Prof. Craig's excellent talk, many members participating, and it was recommended by Patrick O'Mara that an organized movement be started at the S. A. F. Convention at Rochester, next year,

with a view to making an appeal to the legislature at Albany for the better recognition by the State of the rights of floriculture to governmental support. On motion of A. H. Langjahr, the president was authorized to appoint a committee for the purpose indicated and same will be named at the June meeting. A handsome bouquet of roses was presented to Prof. Craig and he was accorded a rising vote of thanks for his stirring address.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

At the next meeting of the club to be held in Horticultural Hall on Tuesday evening, May 17, which precedes by a few days the big orchid exhibition to be held in the same building. The speaker of the evening will be E. O. Orpet, of South Lancaster, the title of his topic being "A Talk On Orchids." Other well known orchid growers will attend and assist in the discussion following the essay, and the subject should prove a timely and interesting one.

Some excellent exhibits are promised. The question of the annual picnic and a report of the executive committee on the S. A. F. National Show will also be discussed. It is hoped that there will be a rousing gathering on May 17. It has been decided to hold a "Ladies' Night" in June.

W. N. CRAIG, Sec.

FLORISTS' CLUB OF WASHINGTON.

The monthly meeting of the Florists' Club was held on May 10th, at Gude's Store, President Robertson in the chair. Four new names were proposed for membership, and a committee of three was appointed to report at next meeting concerning their eligibility. The President appointed a committee for the next Fall Flower Show, consisting of Wm. F. Gude, chairman; Geo. H. Cooke, Elmer C. Mayberry, Jas. L. Carbery and W. W. Kimmell, the said committee given full power to act on date, selection of hall and all arrangements. A committee of three will be appointed to correct and revise the present constitution and by-laws of the Club. Those selected are to be notified by letter and will report their findings at next meeting night.

Light refreshments were then served by Wm. S. Gude, and the meeting adjourned at a late hour.

AMERICAN PEONY SOCIETY.

The 1910 meeting of the American Peony Society will be held at Horticultural Hall, 300 Massachusetts Ave., Boston, Mass., in connection with the regular peony show of the Massachusetts Horticultural Society, Thursday and Friday, June 9-10, 1910. This date subject to change if weather condition requires.

A. H. FEWKES, Sec.
Newton Highlands, Mass.

NEWPORT HORTICULTURAL SOCIETY.

The regular meeting of this society was held Tuesday evening, May 10, when business connected with the June and September shows occupied most of the time in session. Six judges were appointed for the June show who are all members of the society and are as follows: John T. Allan, John Mahan, William Mackay, Alexander MacLellan, Bruce Butterton and John A. Forbes. The society had previously voiced its sentiments in favor of having two sets of judges at the June exhibition, and three sets for the one in September, the idea being to have the judging done in shorter time than was possible with only three men, as has been the custom in the past. The new arrangement will also provide a better opportunity to have more lines of exhibits judged by experts.

This Society is fortunate this year again in having liberal prizes offered by several members of the summer colony, and in recognition of those favors it was voted at the above stated meeting to place on the list of honorary members the names of all who had recently given substantial aid to the society. Included in those are Mrs. Robert Goelet, Mrs. W. S. Wells, Mrs. E. J. Berwind, Mrs. Lorillard Spencer, Mrs. H. D. Auchincloss, Miss Fanny Foster, Mr. L. Lorillard, Mrs. T. J. Emery, Mr. R. L. Beeckman and others. The special prizes from the above mentioned are mostly offered for the September exhibition, but the June show schedule which is now ready is also good, although having few specials. Copies of those schedules can be had on application to the secretary.

ST. LOUIS FLORISTS' LADIES' HOME CIRCLE.

The Ladies Home Circle met last Monday afternoon at the usual meeting place. Miss F. H. Meinhardt was the chief entertainer. It falls to each lady by vote for each meeting. Mrs. John Steidle, who is President of the Circle, presided over the meeting and all present had a jolly time—so it is reported by the secretary.

The annual meeting of the Society for the Protection of Native Plants was held in Boston on May 7, in the lecture hall of the Society of Natural History, the president, Robert T. Jackson of Cambridge, presiding. The following officers were elected: Robert T. Jackson, Cambridge, president; Benjamin L. Robinson, George L. Goodale, Merritt H. Fernald and Dr. David Snedden, vice-president; Miss Amy Folsom, treasurer; Miss Maria E. Carter, secretary; Miss Margaret E. Allen, corresponding secretary; Miss F. R. Morse and Miss M. C. Jackson, members of council.

An address entitled "Spare Our Wild Flowers and Our Roadside Scenery" was given by Walter Deane, president of the New England Botanical Club.

SEASONABLE NOTES ON CULTURE OF FLORISTS' STOCK.

Baby Rambler.

Nothing more attractive could be suggested for massing in borders during the summer than the Baby Rambler-rose. It also makes a fine pot plant for the Easter trade and will sell fast in all sizes and at all stages of growth. To have fine good-sized bushy and vigorous plants for next season's trade it is time now to make a start. I have found that those grown in pots all summer are much easier to manage and give greater satisfaction when forced than those that are grown in the field. Young stock from 3 or 4-inch pots can be put into pots of a size larger and shifted from pot to pot as becomes necessary to keep them in good growing condition. They do well in a rich well-composted soil, say about three parts of sod to two parts of manure and a little bone at the last shift. When growing fast they will need plenty of water and syringing once or twice a day. When they show unmistakable signs of having reached a point when no more growth worth while takes place it is then time to gradually let up in watering. When planted in the field let them have the best kind of soil in a freely exposed situation, cultivate well and pot up in October.

Chrysanthemums for Large Specimens.

Plants intended for exhibition should now be growing rapidly, and must have every attention in the way of watering, ventilation, pinching and tying up. In order to have large plants in the fall they should now occupy at least a six-inch pot. It is very important that the plants should not suffer from being pot-bound, but at the same time it is well to allow the pots to fill up well with roots before repotting. A good turfy loam with an addition of one-third well-rotted cow manure, and a sprinkling of bone, is a good compost to use. Keep your exhibition plants under glass by all means, at all times. Never allow your plants to have to beg for water and wilt, yet too much is just as injurious as too little. Syringe every sunny morning and again in the afternoon on very warm days. Look out carefully for aphids and fumigate regularly. When growing show plants it is a good plan to start enough of them so that if a few kinds turn out faulty you can afford to discard them. After the plants have reached the height of about four inches they should be pinched, and three shoots allowed to grow; after they have made about six inches more growth pinch again, and allow three to each again and so on according to the size of the plant required. Don't pinch after the middle of July.

Ficus Elastica.

Although the propagation of the rubber plant on extensive places is carried on during a time when a continuous supply of bottom heat can be furnished, yet, for the small grower there is no better time to increase his stock than the present. Lanky, unsalable specimens, if you have such, can be operated upon by the mossing system. This is a favorable month for

the operation. Select the leafy tops, cutting the wood almost half through on one side leaving about 8 or 10 in. from the top, and inserting a piece of gravel to keep the cut open; after the bleeding has been stopped wash away the gum and tie some sphagnum moss around so as to entirely envelop the stem where the cut has been made. If the moss is made as large as a duck's egg it will be sufficient. The moss must be kept moist by frequent syringing daily. In about 5 or 6 weeks the white roots will show through the ball of moss. The plants should be allowed full time for the formation of abundance of roots before cutting away the tops. They can then be potted and kept away from the sun and draughts till they have rooted into the soil.

Marguerites.

This is a good time to propagate the popular winter flowering daisies of the shrubby species. If this is done now they will be in good shape to be planted out in the open field and will grow and make fine stock for next winter's flowering. Afford them good rich soil, and pinch them so as to form nice bushy plants. They should be well cultivated during the summer, and potted up early in the fall. When resorting to pot culture repot during the summer as they may require it until an 8-inch pot is reached. Assign them a sunny spot in the open ground during the summer, sinking the pots into the ground or some cool material. See that they are sprinkled and watered in a plentiful measure.

The Lily Bed.

Lilium longiflorum and *candidum* should find a place with every florist, and many other species are beautiful to grow where there is room. The lily beds should now be looked after carefully, removing the soil from over the bulbs, and taking off the sets that have formed at the base of the stem the previous year. These can be planted in some convenient place and will make flowering bulbs the coming season. The beds require as much protection as far as mulching is concerned in the summer as in the winter to get the best results. The ground should always be kept moist and cool, and to that end a mulching of freshly cut grass or any other convenient material that is not unsightly will accomplish the purpose. If the beds are protected in this manner both summer and winter, the bulbs will produce nearly three times as many flowers as when grown in the usual way. The principal thing to observe with lilies is to have the beds well drained. When making new beds they should be sheltered from the scorching and drying influences of the sun's rays and it is better to plant early in the autumn, so that the roots may be at work all the fall, and to select a cool, shady border, not exhausted by the roots of trees or shrubs. Some good types to grow are *Lilium Canadense*, *croceum*, *excelsum*, *pomponium*, *tenuiflorum*, and *Thunbergianum*.

Sweet Scented Geraniums.

The scented geraniums are valuable plants for the florist. For making up bouquets, and as a background for buttonhole flowers they are indispensable. Cuttings should be put in now, and grown on either in the field or in

pots with an occasional shift through the summer. Planted out on some spare bench they will give a fine lot of cuttings.

JOHN J. M. FARRELL.

Mr. Farrell's next notes will be on Acacias, Growing Carnations Indoors, Begonia Gloire de Lorraine, Memorial Day, Odontoglossums, Primulas.

CONDITIONS IN THE WEST.

March and April changed places and all Nature turned crazy. March was one of the most delightful months in 40 years. It was warm and mild with no wind and no storms. Everything was very forward. The first of April was also mild. Then she seemed to think she had forgotten something and went back after it, bringing in fearful blizzards and awful dust storms. For 10 days in succession old Boreas came down in maniacal glee, wielding his stinging lash. Fruit trees were in full bloom and he reveled in his power for harm. Many mornings the ground was frozen. The second of May ground and water froze. The swirling, biting, cruel north wind raged at 40 miles an hour. We had put out thousands of evergreens. The drying winds caught them and though thoroughly watered many were dried up. One day we had a genuine American sirocco—mercury, 100 in the shade, and two days after a most cruel frost.

We have 50,000 peonies, many of them in exposed places. How they were buffeted, twisted and lashed by the furious winds, and yet there is a promise of thousands for Decoration Day. Some early sorts have bloomed already. A *tenuifolia* was out on the 23d of April.
